the 22th inst. left Yokohama on the 28th for Shanghai to be repaired, as there is no vacant dock in Japan III present.

The Commander of the Japanese Standing Squadron hoisted his flag on the battle-ship  $Fuj\ell$  a few days ago.

SEVERAL fires have occurred during the past week in Yokohama, but none fortunately attained any very serious dimensions.

TYPHOTO fever and diptheria are rife in Yokohams. Some foreign residents have been attacked by the former disease.

FRANCE is sending out a cruiser to reinforce its Asiatic Squadron, but will remain Impassive unless there be some foreign aggression in South

In the gale which visited Yokohama on the actt inst. a large junk named the Taiyei Maru sank between Yokohama and Tokyo, and three lives were lost.

Tax week has been remarkable for the number of shipping disasters on the coast of Japan One wreck off the Pescadores involved the loss of many lives.

An earthquake occurred on Sunday the 26th inst. which was felt over a wide area. grams referring to it were received from Niigata, Fukushims, and Yonezawa.

THE Government has received information from Mr. Kurino, Minister to France, that the new treaty between France and Japan was passed by the Senate on the 23rd instant.

THE funeral of the late Prince Shimazu will take place on the 5th or 6th of next month at Kago-shima. The Government will grant twenty thousand yen towards the expenses.

Ar Shimo-takai and Shimomizuchi, in Shinano province, snow has fallen to a depth of 10 or 12 feet. Many farm houses have been crushed by the weight of the snow.

On the 18th inst., 915 families of soldiers who died during the China War were rewarded by the Board of Decorations with special grants of money ranging from yen 200 III yen 300.

THOUGH Count Matsukata and other Ministers of State have tendered their resignation, they are to maintain their posts until His Majesty the Emperor gives his sauction to their retirement.

The ex members of the House belonging to the Liberal party held a meeting on the 27th and decided to circulate throughout the country a detailed statement of the cause of the dissolution.

Tes Nippon Yusen Kaisha's steamer Tamba Maru, now on her way from Loudon to Japan, is reported to have taken on board at London rome\_gans and ammunition for war-vessels in

Marquis Ito was summoned to the palace on the 28th instant and had a long audience of the Emperor. The Marquis is reported to have received his Majesty's commands to form a new

THE amount of paid-up capital of 172 Japanese industrial companies, according to investiga-tions made during the first balf of the year, was ven 34,424 364 and the total profits earned by them yen 2,272,647.

MR. UCHIDA YCSHIRO, representative of over

senting petitions. They ask for the independence of the judiciary, the protection and encouragement of industry, and the establishment of a proper banking system.

THE Diet after being formally opened on the 24th by the Emperor in person, was dissolved next day, just me a motion declaring want of confidence in the Cabinet was being introduced in the Lower House.

RUSSIA, according to Reuter, demand the dis-missal of the English engineers at present employed on Chinese railways. She also demands that German military instructors in China be replaced by Russian officers.

The Times' Peking despatch reports that the Chinese Government will reconstruct the forts

Port Arthur under Russian supervision and with Russian money; which points to the permanent occupation of the port by Russia.

THE ex-members of the Diet belonging to the Progressionist party beld a meeting on the 26th inst, and decided to support the proposers of the motion of "want of confidence" and to issue a manifesto regarding the dissolution.

It is understood that the Washington Government has been sounded as it its views in regard to Chinese affairs, and has replied that it is not interested in the territorial question, the protec-tion of established American interests being its sole concern.

THE steamer Hokuyo Maru, which left Yokohama on the 22nd instant for Niigata pid Hakodate with a cargo of 2,700 bags of foreign rice, went ashore and was wrecked off the mouth of Niigata river on the 27th inst, and there is no hope of saving the ship or her cargo.

THE amount of coal conveyed to the port of Wakamatsu (Kyushu) during November last from various mines in Kyushu reached 366,270,000 kin. The figure shows an increase of 1,500,000 kin as compared with the previous mouth and an increase of over 30 per cent, on the output during last summer,

THE Nippon Tetaudo Kaisha (Japanese Railway) lately presented a petition to the Com-munications Department for an amendment in its fares. According to the petition, the fare of t sen 2 rin per mile on journies extending from 1 mile to 100 miles remains as heretofore, but the fare of 8 rin per mile on journies exceeding 100 miles is to be raised to 1 sen.

No business has been done during the last week in piece goods of any kind, or in yarns. For m-tals there have been a few enquiries, not, however, resulting in any transactions, in spite of a weakening in prices. The kerosene market is exceptionally dull for this time of the year, business being limited to small sales for imme-diate requirements. There has been a fair demand for augur, both brown and white refined, III slightly advanced prices. A considerable amount of Saigon and Bangkok sice has been imported recently and the market for the home production has given way slightly as some holders are obliged to sell to raise money for the New Year settlements. In exports there has been a fair business done in silk, both raw and waste, II prices about 10 yes per picul above last month's quotations. Stocks are low, only about half the quantity at same time last year, and holders are very firm. 100 discontented persons serving in the Gover Very lew transactions have taken place in tea, nor-General's Office, Formosa, came up to the the balance of stock in hand being small and shin Maru it the entrance of Tokyo Bay on capital a few days ago for the purpose of pro- of poor quality. Exchange closes firm.

> UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

#### SPIRIT OF THE VERNACULAR PRESS.

Of course the condition of domestic politics occupies a large share of journalistic attention in Japan at present, especially when viewed by the nomewhat vivid light of events occurring on the adjacent continent. The fift's opinion, briefly atsted, is that in order to secure the national union so desirable under existing circumatances, a reconstruction of the Ministry is essential. By "existing circumstances" our contemporary refers to the occupation of Kiaochon and Port Arthur by Germany and Russia chon and rost assume by respectively; to the atrong probability that col-lusion exists between those two Powers; is the inevitable inference that France will not be found in a different camp; to the assembling of a British squadron at Chefoo, and finally to the deduction that we are on the eve of a partition of the Chinese empire. At such a crisis, what should be Japan's action? In the first place, she must claim the voice which she is undoubtsue must caim the voice which she is undoubtedly entitled to possess in any extensive re-distribution of Far-Eastern territory; in the second, she must hold resolutely by Wei-hai-wei until China has discharged in full the obligation on account of which that place was given in pledge, and she must recognise in certain contingencies,—such, for example, as the permanent occupation of Risochon by Germany and Port Arthur by Russia it may be necesary for her to retain possession of Wei-hai-wei even after China has paid the whole of the indemnity. Such is the course plainly mapped out for her. In order to pursue it, her strength must be united. There must be no dissensions between the Cabinet and the That result can easily be achieved, but the first steps have to be taken by the Government. If the country's best statesmen combined to form a cabinet, they would assuredly command the support of the Diet, for the nation would recognise its own interests sufficiently throw its whole strongth into the scales with the Cabinet. It will be seen that the Jifi is constant in its often expressed policy, the policy of ke-

The Nichi Nichi Shimbun lays on the Cabinet's shoulders the whole blame of the conflict between the Ministry and the Diet.
Writing immediately after the official opening but prior to the dissolution of the House of Representatives which took place on the 25th instant, the Nicht Nichi alleges that the Cabinet intends to have recourse to dissolution, should the House prove recalcitrant, and in the interval pending the general elections, the idea is to form a new Ministry. Such a programme is denounced by our contemporary in strong terms. It wants to know upon what grounds the Government intends to appeal to the country. If the Cabinet considers that it needs re-construction, then it admits inferentially that the Diet lian cause to be discentented, and it should place its own organization upon a sound basis before resorting in such extreme measure as the dissolution of the Lower House. The Nichi Nichi recounts the grievances urged by the Opposition against the Government; alleges that never since parlia-mentary institutions were inaugurated in Japan has there been such a sweeping majority hostile to the Cabinet, and affirms that the nation is with the Diet in this instance. The "harmony" alluded to by the Emperor in the Speech from the Throne can not be attained with the present Cabinet in nower.

The Kohumin Shimban takes the Emperor's speech for text, and writes an intensifying homily, concluding in terms so general that they sound is sure and unpractical. The gist of the article may be summed up by saying that our contemporary urges the House of Representatives not to inflict an injury on the empire nor to impair the national interests by allowing petty squabbles of a personal or party nature to inter-

post-bellum measures. The Kokumin writes eloquently, but thetoric and political platitudes are not the kind of food for which the nation Craves at present.

The proceedings of the Great Powers towards China are discussed by the Nippon, which arrives III the conclusion that the scene of international friction, hitherto confined to the eastern part of the Mediterrean Sea, has been deliberately transferred to the Far East. It is abourd to suppose that the murder of the missionaries constitutes anything like a sufficient cause for the movements that the Great Powers are now making in Asia. There must be another explanation of their action. In Germany's case the explanation probably is nothing more than a desire to divert national attention to a distant part of the globe. It is in the consequent movements of England and Russia that a real danger to the peace of the Orient lies. Russia has long had her eyes fixed upon Manchuria and its contiguous regions as a field of expansion. England, on the other hand, will not stand idly watching the Russian advance: she will step into the lists to resuscitate her decaying prestige. Possibly she may be found supporting Germany sgainst Russis, though so long as the Triple Alliance exists there is little chance of Russia ranging herself against Germany. At all events, Germany's occupation of Kiao-cheu, not in itself an act calculated to produce wide disturbance, has speedily led to demonstrations by England and Russia against Samsha and Port Arthur, respectively, and a collision between England and Russia would set the Orient on fire at once. What should he Japan's attitude under the cir-cumstances? If she joins England, Russia will be provoked to more vigorous action. If she throws in her lot with Russia, a resolute exhibition of strength on England's part will follow Her best plan seems to be to watch events quiet-ly. Even her defensive preparations are not complete. Offensive action, therefore, is not fessible. The Powers concerned are so formidable that the utmost circumspection must be her rôle for the present.

Referring to the dissolution of the House of Representatives, which event took place subsequently to the publication of the article from the Jiji Shimps epitomized above, that journal notes that although the House has been dissolved several times already, this is the first instance of dissolution on the opening day of the session. The fact is interesting and striking in itself, but when the conditions that confront the Empire abroad are considered, these aquabbles for mastery between a Cabinet and a coalition of political parties assume so extremely petty aspect. It is quite consistent with the spirit of constitutional institutions that a Cabinet should appeal from the Diet to the nation, and that a Diet should refuse to endorse a Cabinet's procedure. But the country can not afford just now to fritter away its strength in such blokerings. The crisis in foreign affairs demands that the administration should be conducted by a combination of all the available talents, in order that not only the people II home, but also the Powers abroad, may know that the Government of Japan really represents Japan, and that when it speaks, it speaks with the voice of the nation.

The Nichi Nichi Shimban discussed the sentence of dissolution from quite a different point of view. It takes no note of the consi-deration that such disputes are prejudicial to the nation's vital interests at the present time, but confines itself to the fact that by dissolving the House before the members had an opportunity of enunciating their views and before the Government had offered any explanation of its own policy, the purpose of the Emperor's Speech, which exhorted to harmonious deliberation, is effectually defeated. The dissolution of the Diet is the most extreme step that the Constitu-

should be invited on one day to open the Diet and address the members from the Throne, and on the next to issue a mandate for the dissolution of the House of Representatives. The Cabinet can not be absolved from the responsibility of bringing about such an anomalous situation. A Ministry that can not claim even the credit of being united, that has blundered in every step of its policy, and has finally precipitated a result like the present, will not occupy a very high place in the historical record of the era. There is more in the same strain, of the era. There is more in the same etrain, but the Nichi Nichis extreme partizansish is this epoch unfortunately detracts agmestiate from the general value of its criticisms.

The Maintchi Shimbun declares that the Cabinet has employed dissolution as a weapon of revenge. The true purpose of dissoluting the House is to appeal from its verdict to the tribunal of the nation. There is no other constitutional reason for such a step. understood to be the intention of the present Cabinet to go out of office before the new Diet The Ministers have, therefore, overthrown their enemies preparatory to committing suicide themselves. If they pursue that programme, they will stand convicted of the most unconstitutional procedure that ever diagraced any Government in any country. Their duty now is in stand their ground, face the new Diet, and ascertain what opinion the nation entertains of their administration.

The Kokumin Shimbun stoutly maintains the propriety of the Ministry's action in dissolving the House of Representatives. A House that resorts to such procedure can not be considered to have the nation's mandate. On the day previous, the Emperor had instructed the Diet to bring to its deliberations a spirit of harmony and had indicated certain important measures calling imperatively for parliamentary approval. Notable among them was the Bitl embedying the remaining portion of the Codes, which have to be put into operation in order to consummate the great work of Treaty Revision. There were other measures which his Majesty described as essential to the success of the administration, the promotion of national progress and the regulation of the finances; for example, measures of increased taxation; measures for amending the local government system, and measures for developing means of communication. The Government. recognising the vital importance of these various projects of law, placed some of them in the bands of the Diet on the very day of its opening—an unprecedented procedure. But the House of Representatives took not the slightest note of all these things. Having received the Emperor's commands, it made answer that it would endeavour in satisfy his Majesty's purpose and to discharge the trust reposed in it by the nation. Yet, on the very day after receiving such commands and formulating such assurances, it allowed itself to be carried away by petty motives of party politics, and without even completing its own organization or reading so completing its own organization or reading so much as a page of the Bills submitted to it by the Government, it proceeded to bring forward a vote of want of confidence in the Cabinet. Such a house can not be credited with any exmest desire to disclusing its legislative functions or fulfit the duties it owes to the nation. It did not even wait to put itself in order. Possibly some may wast to put itself in order. Possibly some may adduce the case of Mr. Hoshi Tore as a precedent. But there is no analogy. Mr. Hoshi was President of the House, and the members might not unreasonably allege that even the business of organization could not be properly carried out under a President who had forfeited the House's confidence. The feelings of the members towards the Cabinet, however, have no connexion whatever with the election of Standing Committees and of a Chairman of Committee of the Whole, which steps had to be taken, according to the Constitution, in order fore with the discharge of the duty plainly indicated by his Majesty, the duty of acting in
harmony with the Cabinet to achieve the great
purposes now in hand, Treaty Revision, and the respect towards the Sovereign that his Majesty

Taken, according to the Constitution, in order
that the organization of the House might be
complete. By neglecting those regular obligations and proceeding so pracipitately to attack

Digitized by Google

the Cabinet, the House betraved not merely a conspicuous lack of dignity, but also an unbecoming levily in the discharge of its most important functions. The Government's only recourse was dissolution.

The Nippen, as might have been expected, fiercely attacks the Cabinet. It calls the dissolution of the Lower House a coup ditat, and declares that the Government has had most unwarranted recourse to force. To dissolve the House and appeal to the country is an ex-treme measure under any circumstances, but it is held to be constitutionally justified when uncertainty exists as to whether the party, or parties, commanding a majority in the House really represent the will of the constituencies In the present instance, however, no such unthe Progressionists, the Liberals and the National Unionists, are all unanimous in their opposition to the Cabinet. There can not, therefore, be the least doubt that the nation reposes no confidence in the present Government. To dissolve the House and appeal to the country under such circumstances must be regarded as a wanton abuse of administrative power. The Cabinet is responsible first to the Sovereign, secondly to the nation. In this instance it has discharged neither the one responsibility nor the other. Its failure with respect to the nation has been demonstrated above. Its failure with respect to the Sovereign is clearly shown when we observe that immediately after the Emperor had called upon the Diet to deliberate harmoniously, the Cabinet, upon which devolved the of the Imperial purpose, destroyed all hope of auccess by resorting to unreasonable force. (The Nippon elaborates this point, but its arguments are too attained to be worth reproducing). The Cabinet has been found con-picuously wanting in its duty towards the Throne and the nation, and its continued tenure of office has become a national calemity.

#### THE FINANCIAL SITUATION.

We translate the following hostile article from the Chue :- Immediately before the dissolution of the Imperial Diet, a financial statement alleged to have been compiled by the Premier from estimates drawn-up by the various Government Departments, was presented as follows:--Gross estimates of revenue and expenditure for the 31st year compared with those of the previous

Revenue. Ordinary Extraordinary	3zst yest. Yen, 129,403,366 Br,510,753	geth year, Yen, 1921,406,618 198,217,852	Decrease. Yen. * 8,196,547 †45,607,498
Total	222214,110	349,524,670	137,420,592
Expenditure, Ordina y Extraordinary	286,979,297 202,416,590	110,384,753 135 <b>/007:4</b> 85	426.392,444 130.542.053
Total,	120,438,327	241,588,137	114,147,550
4	Increase. 1	Decrease.	

The Revenue for the 31st year shows a deficiency of 17,324,468 yen in addition in a sum of 4,285,321 yen, which was set down in a supplementary budget as a special grant to Formore. These figures amount to 21,609,589 yen. To make good this deficit, Count Matsukata intended to have recourse to a revision in the system of land and sake taxation. The supplementary budget compiled for the purpose

#EVERUE. TEN. Increased land taxes	John Diack
Total	O. Keil Organist, W. H. McGowan I.G. J. B. Coulson Steward.
Revaluation of land expenses	H. lvison
Balance, excess of revenue	presiding. A very pleasant evening was passed

In the above estimates of revenue the item, increased taxes on sale, was omitted owing to the amount not being realisable during the 3 set the amount not being realisable during the 3 set we understand that the big prize in the Manila year. The new sake taxes will increase the lottery—\$200,000—has come to Yokohama, and rate to ten yes per keku, and brewing for is shared by two parties.

domestic use is prohibited. As to the revaluation of land, the rates are to be altered for rice and vegetable fields and also for house lots in cities and towns. The surplus obtained from these sources was to be appropriated to supplying the deficiency of 21,600,589 yes above mentioned, and also to cover the loss of 329,803 yes which would result from the prohibition of domestic brewing. The item set down as "loans" refers to money over and above the budgetary items, which devolves upon the Treasury by contract. It is to be obtained at less than five per cent, interest to the amount of 13,512,566 yen, redeamable in four years to suit the convenience of the Treasury. Con-sidering that the Mataukata Cabinet declared would not raise a domestic loan, seems probable that this scheme really refers to a foreign loan bearing five per cent. interest. In investigating the causes of the deficit in revenue, it may be mentioned that the total expenditure for new undertakings for the 31st year amounted to 1,670,481 year, which is partly appropriated for making extensions in elegraph wires and partly for establishing fifteen offices for the better control of communications These are really indispensable undertakings, but there are also other unimportant, in fact, we might say absurd, items relating to the granting of a special subsidy of 3,100,000 yes to the Yusen Kaisha, etc. From the 32nd year a subsidy was to be granted annually to this company for ten years to the amount of 4,500,000 yes. With regard to general expenditure, it may be remarked that the total increase for the 31st year amounted to 16,390,000 year. Subtracting from this amount the expenses for new enterprises, the increase from next year for ordinary expenditures comes to over 8,000,000 yen. The deficit therefore has simply arisen from the expansion of Departmental expenditures and from the special outlay of 4,000,000 ven in Formosa. It is, indeed, a matter for congratulation that this programme of loans and increased taxation on account of unnecessary outlays can not be carried into execution owing to the dissolution of the Diet. The various Departments, however, having recently revised their official organizations, this failure will no doubt occasion them serious difficulties. It is said that the Naval Department, in particular, is greatly embarrassed, as it requires an increase of 930,000 yen alone as allowances to promoted officials.

#### "STAR IN THE EAST" LODGE.

The annual installation meeting of the "Star in the East" Lodge, No. 640, S.C., took place on Tuesday evening at the Masonic Temple, Yokohama, when Rt. Wor. Bro. J. G. Cleveland was duly placed in the chair. A goodly number of Brethren were present. Wor. Bro. Andrew Patterson very impressively performed the cere-mony of installation, after which the Rt. Wor. Bro. J. G. Cleveland's officers were invested as follows:---

A. R. G. Clark	I.P.M.
H. W. Lea	
T. E. Beatty	S.M.
E. C. Fox	S.W.
Henry Smith	J.W.
C. A. Peterson	Treasurer.
J. T. Griffin	Secretary.
W. S. Worden	Chaplain.
John Diack	Architect.
J. Delbourgo	\$.D.
L. J. Grimmesey	J.D.
T. M. Laffin	D. of C.
O. Keil	Organist.
W. H. McGowan	I.G.
J. B. Coulson	Steward.
H. Ivison	
After the ceremony, the usu	
held, the Rt. Wor, Master, Bro.	

with toast and song.

#### THE DINGLEY DEFICIT.

The Dingley high tariff law, says a prominent American newspaper, is proving a failure as a revenue producer. Out of the mouths of its authors and champions is the operation of the act condemned. Said Representative Dingley in the House on March 24 :-

" Our problem is to provide adequate revenue from duties on imports to carry on the government.

In discussing the measure in the Senate on May 26, Senator Aldrich, of Rhode Island, who had charge of the bill in the upper body said :-

" The adoption of a revenue bill which should fall in this purpose [of producing revenue], which should create an additional descreecy in the immediate future, which would require a further issue of bonds to meet current exhopes of future success of any political party responsible for such legislation.

The excuse for the calling of a special ecs-sion of Congress for the sevision of the sariff was the necessity for increased revenue. real purpose of such legislation was the furnishing of protection to special interests. As usual in such a case the latter object was accomplished at the expense of the former, as the figures clearly show. The statement of Government receipts and expenditures for November shows a deficit for the month of \$18,572,109. deficit for the fiscal year up to the present time stands at \$46,581,120. The deficit by months since the beginning of the present fiscal year is es follows :-

July	\$11.073,545
August	14,564,432
September	3.435,718
October	9.310,097
November	8.572,100

The Dingley bill became law on July 24. The deficits for the last four fiscal years, ended June 30, have been as follows :--

1894		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	************	\$69,803,201
1895	*1+1+1+		**************	42,805,223
1896	4,,,,,			25.203,246
1897				18,052,254

For the current fiscal year the deficit, which for the five months already expired amounts to over \$46,000,000, promises to be larger than for any of the years given in the foregoing table, unless there shall be radical, and, judging in from the present outlook, unexpected changes in the relation of receipts to expenditures.

For the fiscal years from June 30 up to the close of the third week in November the revenues, expenditures, and deficits for the years given were as follows :---

Revantes, Expenditures, Deficit, 1895.....\$131,108,437 \$152,078,155 \$20,969,728 1896....... 122,575.547 161,906,957 39.331,410 1897...... 123,275,777 168,145,280 44,869,503

For the periods from July 24, the date of passage of the Dingley law, to the close ill the third week in November, the comparative deficits are m follows :---

1895	
1896	26,254,441
1897	34,170,739

However it may be figured, the comparisons are unfavourable to the Dingley law m a revenue producer. Possibly the future may bring improvement, but the natural fear must be that the rates of the Dingley law are so nearly prohibitive as to prove destructive of revenue pro-ducing qualities sufficient to meet the needs of

#### DEATH OF PRINCE SHIMAZU.

His Highness Prince Shimaga Tadayoshi of Satsuma, whose illness assumed a serious character some time ago, expired in Kagoshima on the morning of the 26th ultimo. The Emperor has conferred on him the Grand Cordon of the Rising Sun and has ordered that he shall receive a State funeral.

#### THE CABINET.

Monday, Dec. 27.

It can scarcely be doubted that the Cabinet has been subjected of late to some internal perturbations. Indeed, its period of unrest does not appear to have terminated yet. There is a strong disposition to recast the Ministry by placing Marquis Saigo at the head of affairs and relegating Count Matsukata to the Department of Finance alone. The chief advocates of such reconstruction are said to be Viscount Takashima and Count Kabayama, and the motive animating them is that, with Marquis Saigo in the President's seat, the Progressionists and National Unionists might be persuaded to join hands again with the Cabinet. If we may credit the Jiji Shimpo and the Nichi Nichi Shimbun, journals whose general title to be believed is strengthened in this particular case by the virtual identity of their information, a project of reconstruction in the above sense was actually mooted by Viscount Takashima at a recent meeting of the Cabinet, but being strenuously opposed by Mr. Yamada, Baron Nishi, Viscount Mr. Yamada, Baron Nishi, Viscount Nomura, and Mr. Kioura, had to be aban-doned. The reasons said to have been advanced by these four Ministers were that a reconstruction of the Cabinet on the eve of the Diet's session was in itself undesirable, and that certainly nothing of the kind ought to be attempted unless the resultant advantages were of a greatly preponderating and plainly discernible nature. The proposal of replacing Count Matsu-kata by Marquis Saigo did not appear likely, however, to be productive of any striking beneficial results, and the four Ministers consequently set their faces against it. They might well do so, if the aspect that political affairs present to outsiders be at all correct. For it is not against Count Matsukata that the various sections of the Opposition have ranged themselves in such a powerful phalaux, but against Viscount Takashima, and, in malesser degree—perhaps we should say a greatly lesser degree—against Count Kabayama. The Jiji Shimpo probably diagnoses the situation with complete accuracy when it says that the tide of opposition directs itself against Count Matsukata only as the head of a Cabinet in which Viscount Takashima is the ruling spirit. It is like the case of a player at *écarté* who has a bad hand though it includes the king. He may shift the king to whatever position he pleases in the hand, but unless he throws out two or three cards and replaces them by others, he can not hope to win the trick. It is an interesting and curious but unquestionable fact that in all this agitation one hears no voice raised against Count Matsukata himself. In the case of other Cabinets against which public opinion declared itself emphatically, the Premier generally came in for a greater or less share of direct abuse, but somehow the general feeling now seems to be that Count Matsukata has struggled manfully and honestly against a flood of difficulties and that he might have swam safely to shore had he not been dragged down by his associates. Were a new Cabinet organized under the leadership of Marquis Ito no one would be surprised to see Count Matsukata holding a portfolio in it, supposing that he himself could be pursuaded to accept the position. His personal reputation has plainly to Marquis Ito. suffered wonderfully little in proportion to the unpopularity that has overtaken

sents itself as most probable is a radical change of Ministry before, not after, the general elections. That order of events which seem interesting and are given with present. House of Representations. present House of Representatives has been sent down for paying no attention to the Imperial instructions, and the present Cabinet would surrender office by way of atonement for its failure to secure the support of the House. As for the new Cabinet, that Marquis Ito will be the Premier and that Count Okuma will be a principal member, we entertain little doubt. There is nothing to prevent these two statesmen's serving together if only Count Okuma can divest himself of a modicum of his independence. He resembles Lord Palmerston in his disposition to act first and consult his colleagues alterwards, an excellent trait in some cases but not always conducive to harmony. For the rest, there is no denying that he is politically one of the strongest men in Japan to-day. We are not speaking of his ability: that has been amply proved. What we mean is that he possesses the confidence of the political parties in a very marked degree, and that their support would be given to any Cabinet in which he was included. Marquis Ito, on the other hand, has the full confidence of the Imperial Court. The union of these two men seems to be what Japan wants at the present juncture.

Tuesday, Dec. 28. It is very confidently affirmed that the Ministry have resigned. Marquis Saigo seems to have set the example, and to have been followed in quick succession by Viscount Nomura and Mr. Kioura. Count Matsukata, it is said, has not actually submitted his resignation, but has stated to the Emperor that he wishes to be relieved. Rumour says that he will retain office until his successor is appointed, as the nation can not be left without a Cabinet even for a day at the present crisis. There appears to be some uncertainty about the course pursued by Viscount Taka-shima and Count Kabayama, but the impression is that they too will insist on retiring. Baron Nishi, Mr. Yamada and Mr. Hamao have also tendered their resignations, but as they joined the Cabinet quite recently and can not be associated with its policy in the past, it is asserted that they have been urged to remain at their posts for the present, at allevents.
According to the Chuo Shimbun, the
Emperor instructed the Minister of the Household to summon the elder statesmen —the Genro as they are called—to the Palace as soon as possible, in order that a consultation may be held. Marquis Yamagata was about to start for Kyoto when the summons reached him, and Marquis Ito and Count Kuroda were also communicated with at once. The Chuo thinks that the task of forming a new Cabinet will devolve upon Marquis Ito, for though his Excellency is understood to be unwilling to serve, Count Kuroda will plead age, and Marquis Yamagata is credited with having recently stated that, at an epoch like the present, the office of President must be filled by a statesman not only of the ripest experience but also possessing an accurate knowledge of the conditions existing in the various countries of the Occident. Such a statement points

sponsibility is laid on the aboulders of Viscount Takashima, the Minister of State for War, who, if these accounts are correct, must have a remarkable penchant for intrigue. At the outset, indeed, Count Kabayama is represented as having worked with the Viscount, but in the final stages of the trouble, the former stood aloof from his intriguing colleague. When the Cabinet was formed, and when an alliance with the Progressionists had been effected, Count Matsukata and Count Okuma cooperated carnestly, and the clan element, represented by Count Kabayama and Viscount Takashima, found themselves virtually powerless. Resenting such a state of affairs, the clan leaders set themselves to dissociate the Premier and Count Okuma, and finally succeeded in bringing about the latter's resignation in connexion with the demand preferred by the representatives of the Progressionists. After that event, Count Matsukata, taking council with the elder statesmen, determined to revert to the old policy of independent Cabinets, the Government pursuing its own views and taking no thought for political parties. Count Kabayama and Viscount Takashima however, did not share that idea. They considered that the support of a political party was essential, and they accordingly set themselves to effect a coalition with the Liberals, the conditions being that Mr. Hoshi Toru should be made Minister of Justice, and that two or three other portfolios also should be given to prominent Liberals. These arrangements were made entirely without the cognisance of the Premier. But when the project was submitted to the committee of the Liberals at a general meeting, it was negatived by a large majority, and Count Kabayama and Vis-countTakashima found themselves in a very awkward position. Count Matsukata, intensely chagrined not only that his distinctly declared policy had been set at naught, but also that portfolios and governorships had been offered to party politicians without his knowledge, invited the members of the Cabinet to a private meeting at his house, and condemned the action of the two Ministers in the strongest terms, declaring his own resolve to stand entirely aloof from political parties, and announcing that if his programme did not please his colleagues, they might adopt any course that suited them. Count Kabayama seems to have taken this failure to heart, and to have refrained from all similar enterprises thenceforth. But Viscount Takashima's propensities underwent no change. Acting in conjunction with certain intriguers outside the Government, he resolved to direct his efforts towards putting Marquis Saigo at the head of the Cabinet, believing that the alliance of the Liberals and the National Unionists might thus be secured. He accordingly addressed himself to Marquis Saigo, asked him whether he would be willing to sacrifice himself for the sake of securing such majority in the House of Representatives as would suffice to pass the measures of vital national importance, and added that Count Matsukata as well as the other members of the Cabinet desired to see such a change effected. Marquis Saigo replied that if the conduct of State affairs would be facilitated thereby and if the

aspect of his plan, broached the subject will have to be abandoned sooner or later, reputation of any political party and openly at the Cabinet meeting on the 14th but Japanese 'statesmen act wisely in materially increase its chances at the polls. instant, but found, to his surprise, that even Count Kabayama seemed uncertain whether to condemn or endorse, and that all the other members were opposed to the change. At the same time, Count Matsukata was indignant that his consent had not been obtained before the proposal was put forward, and Marquis Saigo was angry to find that he had been played upon. Naturally a coolness sprang up between the Marquis and Count Matsukata, and I crisis would have been immediately precipitated had not the imminence of the Diet's meeting suggested the desirability of avoiding any Ministerial complications until the close of the session. It was for these reasons that Marquis Saigo tendered his resignation on the very day of the Lower House's dissolution, and his example was followed by all the other Ministers

As for the new Cabinet, the general impression appears to be that Marquis Ito will be Premier and that Count Okuma will be a prominent member. Marquis Saionji, Viscount Yoshikawa and Viscount Katsura are also expected to hold port-folios. There is no attempt as yet, however, to forecast the whole Cabinet, nor do we find any mention of the names of Baron Ito and Baron Suyematau, to whom important positions would certainly be given if Marquis Ito returned to power.

#### THE POLITICAL SITUATION.

It is now definitely asserted by the Fifi Shimpo that the Cabinet's reason for dissolving the House of Representatives was to save the principle of Imperial Cabinets from apparent violation. Before the Diet met, the Ministry found that they could not work together any longer, and that their resignation was inevitable. The discovery was made at such a late date, however, that it could not be acted upon previously to the opening ceremony. Had the Opposition in the House of Representatives postponed their action with regard to the vote of want of confidence until after the New Year's recess, they would have found a new Cabinet in office when the Diet re-assembled on the itth of January. But by forcing the measure to the front on the 25th of December, they placed the Cabinet of either remaining in the dilemma in power despite the House's verdict, or going out of power in apparent obedience to that verdict. The former course was impossible, hopeless friction having arisen between the Ministers; the latter would have been equivalent to acknowledging the Diet. Under the circumstances, nothing remained except to dissolve the House of Representatives by way of prethe dissolution of the Diet is not to be his Excellency whether he would under-interpreted, so far as we can see, in the sense of an appeal to the country, for, if so, he might reckon on their but rather in the sense of an asser-support. The Marquis said that it would tion of the principle that Ministers hold be time to talk of these thing when office by the will of the Emperor alone, the future had unfolded itself a little and that any House of Representatives more, but he did not discourage his visitors

clinging to it as long as possible so as to In that respect the Liberals have a decided afford time for the due organization of advantage over their opponents, the Propolitical parties.

The Emperor is said to have returned the resignations of Marquis Saigo and Count Matsukata when they were pre-sented to him on the 25th instant. Two days later, however, Viscount Nomura, Mr. Kioura, Viscount Takashima and Count Kabayama sent in their resigna-tions to the Premier, and Baron Yamada, Baron Nishi and Mr. Hamao followed their example on the 28th. Accordingly, the resignations of the nine Ministers were submitted to the Sovereign en masse on the afternoon of the 28th.

His Majesty is said to have summoned Count Kuroda, President of the Privy Council, to the Palace on the 27th instant, and held a long conversation with him about the affairs of the Cabinet. Count Kuroda recommended that either Marquis Ito or Marquis Yamagata should be sent for, and on the same evening the Emperor instructed the Minister of the Household to despatch a telegram to Marquis Ito desiring his immediate attendance. The Marquis replied that he had been suffering for some time from his eyes and that he begged to be excused from attending at the Palace for the present, but the Emperor ordered Count Kuroda to proceed to Oiso on the 28th, bearing the Imperial command.

The only forecast of the new Cabinet published as yet is that of the Nippon, namely:-

Minister President ..... Marquis Ito.

М	linister of—	•	
	Foreign Affairs M	arquis Sajonji.	
	Home Affairs	r, Yoshikawa.	
	WatVI	scouist Katsura.	
	The NavyVI	ce-Admiral Yam	amote
	Justice	r. Kimra Keige.	
	Education	unt Okuma or ?	
	Communications M	c. Sone Arasuke.	
	FloanceV	iscount Watanab	e.
	Agriculture & Com-		

We should think that if Count Okuma consented to serve in an Ito Cabinet, his portfolio would be either that of Finance or that of Foreign Affairs. It will be observed, also, that no place is assigned to Count Itagaki.

According to the Fifi Shimpo, the failure of the Progressionists to preserve their relations with the Cabinet has impaired their reputation and caused a reaction in favour of the Liberals, so that if the latter play their cards well at the general elections, they may reasonably hope to secure that the Cabinet held its mandate from from a hundred and ten to a hundred and twenty seats. Immediately dissolution of the House of Representatives, some of the leading Liberals repairliminary to the resignation of the Cabinet. ed to Oiso and had an interview with The principle of Imperial Cabinets could Marquis Ito. They told the Marquis that, thus be preserved, since the last act of the in their opinion, the Matsukata Cabinet Ministry had been to dismiss a House could not possibly hope to obtain a which refused to legislate with them. We majority in the coming elections, and that have already stated in these columns that its downfall was assured, and they asked the dissolution of the Diet is not to be his Excellency whether he would under-

general wish pointed in that direction, he which refuses to work with his Majesty's by any means. There can be no doubt was willing to do anything. Viscount nominees, is acting in contravention of Takashima, much pleased at the promising the Constitution. It is a principle which with Marquis Ito would add greatly to the gressionists, if, indeed, the two are to be really in opposition.

#### PICTURESQUE ADVERTISING.

Mr. Wellesley Parker writes :- " As you have been so unjust as to criticise my work and endeavour to injure me in my absence" (the italics are his) "you will perhaps be fair enough to publish an independent criticism as below. You all seem to have an idea that the money taken and profit, if any, pass out of your town. You are wrong. I receive the ordinary commission that an advertising agent is entitled to only. If a paper does not expend the money in hand on a good production, surely I am not to blame. \* \* \* I wish to add that I hold from the representative of the Japanese Government in writing clearly and distinctly all I said re their patronage, &c. The Times of India hold this original, and your statements, to use your words, "as a matter of fact" are false. Shanghai will be finished, but naturally after Yokohama's ungenerous assault on me as a pressman of nineteen years in Australia, Mr. (name illegible) "decided to wait and show Calcutta and Bombay" (word illegible) "as they are the exact replicas of what we are doing there." The "independent criticism" to which our correspondent alludes is a eulogistic notice in the Overland Mail of "Picturesque Calcutta," which has been issued by the Statesman of that city. The Overland Mail describes the production as "highly artistic," "distinctly creditable" and so on. We do not reproduce the criticism, being in no way concerned with the original. Mr. Parker accuses us of "injustice" and of an ' endeavour to injure him in his absence.' We fail to appreciate the grounds of his charge. Certain illustrated sheets of Singapore were sent us "for the favour of review" and we reviewed them, stating, as we now state again, that they seemed abominably vulgar and that to call them "picturesque" was a libel. We naturally expressed a hope that the pictorial advertisements for which some people in Yokohama had contracted would not be of such a character. By and by, a Shanghai journal stated that Mr. Parker enjoyed the patronage of the Japanese Government. We denied that, and we again deny it. Mr. Parker alleges that he "holds from the representative of the Japanese Government in writing, clearly and distinctly, all that he has said about patronage." What he means by the representative of the Japanese Government we do not know, but we have inquired at the Foreign Office in Tokyo, and are assured that nothing whatever is known about him there, and that he never received any authority to announce himself as under the patronage of the Japanese Government. Possibly he thinks that the support he obtained from the Governor of Kanagawa justifies his statement. but there is a very wide difference between the head of a prefecture and the Government of the empire.

#### THE IWO BATTLE-SHIPS AND THEIR COST.

A curious dispute is going on between the Japan Times and the Kobe Chronicle, in which, we venture to think, both sides are in error. The case is this:-Kobe Chronicle having asserted that the battle-ships Fuji and Yaskima were "built with money granted by the Diet," the Japan Times pointed out that such was not the fact, as the funds had been "contributed by the Court and the officials." To that the Kobe Chronicle replied that "the deductions from the salaries of officials and the uses to which such deductions were put, was (sic) decided by the Government and could have been opposed and rejected by the Diet exactly as in the case of any other financial measure." The Kobe journal further said that "the comment of the Japan Times would be justifiable enough if the funds had been contributed voluntarily," and having then explained that the contributions by officials " pressed very heavily upon many," it concluded with the statement :-- "When the history of the fund is considered, it is all the more remarkable to find it being regarded in the light of a voluntary contribution."

Now this is a very typical example of the Robe Chronicle's method of argument. The question whether the funds were a voluntary contribution or a compulsory disbursement has no more to do with the point in dispute than it has to do with the be devoted to ship-building. Therealter theory of telepathy. The point in dispute the amount appeared every year in the is simply and solely whether the Diet granted the money or whether it was pro-vided without the Diet's intervention and independently of the Diet's purview. Considering that this incident is one of the most remarkable in the story of the conflict between the Government and the Diet, it is astonishing to find the Kobe Chronicle so ignorant of the facts. The deductions from the salaries of officials by way of contribution to the ship-building fund were decided by the Emperor in the exercise of his Constitutional prerogative. The Diet had nothing whatever to do with the matter. To say that the Diet "granted the money" is absolutely wrong, and when the Kobe Chranicle attempts 10 elude the real issue by introducing the question of voluntary or compulsory, it is merely dragging a herring across the trail. On the other hand, if the Japan Times intends to assert-and we do not see what other construction its words bear-that the Fuji and the Yashima were built solely with "funds contributed by the Court and officials," there is an evident mistake. The ships were certainly built in part with such funds, but only in part. The cost of the two vessels, according to the Budget, was 21,895,941 yen, and the sums contributed by the Imperial Court and by officials from the fiscal year 1892-4 to the fiscal year 1897-8 totalled 9,074,879 yen only. Thus the Imperial and official contributions fell short of the sum required for the building of the ships by more than 123 million yen. The fact is that the Fuji and the Yashima formed part of a programme of naval increment submitted to the Diet in the session of 1892-3, and that, in addition to the two line-of-battle ships, there were included the cruiser Akashi and the gun-boat Miyako, the cost of the two latter being 2,654,780 yen, so that the outlay on account of the four ships aggregated tions may be introduced when the new 24,550,721 yen. In deference to the Emperor's message the Diet passed this probe submitted.

Had the official contributions gramme. been levied for six full years, as indicated by His Majesty, the expenditures involved by the programme would have been met by a sum of III millious, approximately, from the Court and official salaries, and 13 millions from the Treasury. But the Diet having presented an Address to the Emperor in the session of 1896-7, praying that the deductions from salaries be remitted as no longer necessary, His Majesty entertained the suggestion in part. The Diet had no more power to abolish the deductions than it had to impose them in the first instance. Perhaps it may be well to add, in order to make the matter quite clear, that the deadlock between the Government and the Diet which led to the issue of the Imperial Message relating to official contributions, was caused chiefly by the Government's refusal to accept the Lower House's amendment of the Budget in the sense of reducing offi-cial salaries. The House has no power to deal with official salaries. They are fixed by the Sovereign, and in attempting to meddle with them the Representatives behaved unconstitutionally. We are merely stating facts, not discussing their propriety or impropriety. Failing to get what it wanted in the way of administrative economy, the House refused to pass the naval estimates, and the Emperor finally resolved the deadlock by docking official salaries to the extent of 10 per cent. for six years, and directing that the money be devoted to ship-building. Thereafter extraordinary Revenue under the title of seikan-hi (ship-building expenses).

We wonder whether the Japanese political agitators of 1892 reflect, now-a-days, how things would have fared with their country had not the situation been saved by the Emperor's wise comp described above. The possession of the Fufi and the Yashima makes all the difference in the world to Japan at present. Without these two vessels her Navy would be comparatively weak; with them, it can hold its own against any foreign squadron on the Pacific station. What that means at this critical juncture we need scarcely pause to point out.

#### THE BUDGET.

The main figures of the Budget for the fiscal year 1898-9 appear to be as follow:-REVENUE. YEN.

82,510,753 mates ....... 23,019,800 Total

EXPENDITURE.

Ordinary Expenditure
Extraordinary Expenditure
Expenditure under first Supplement-235,133,919 126,972,197 102,466,390 4,285,121 memary Budget ..... 1,080,408 It must be confessed that this is a very fine balancing of accounts. However, interest attaches for the moment to the main figures only, and even they are not of much consequence, for, the House of Representatives having been dissolved, the Government will have to work next year on the lines of the Budget of 1897-8. Of course some Bills for special appropria-

#### PATENTS AND TRADE MARKS IN JAPAN.

It is worthy of note-though no note appears to have been taken of the fact by any of the vernacular newspapers-that the phraseology of the Protocol recently concluded between Great Britain and Japan with respect to the protection of patents and trade marks, shows an important variation from the form hitherto used in Orders in Council. The language used in this Protocol is simply ;—" Whereas by Treaty Her Britannic Majesty has jurisdiction in relation to Her subjects within the dominions of His Majesty the Emperor of Japan." We no longer find the old form "by Treaty and otherwise." The jurisdiction is explicitly based on the Treaty alone. Anyone that has followed the innumerable disputes and discussions which have arisen during the past thirty years with reference to the scope and origin of the Queen's jurisdiction in Japan, will recognise that had the phraseology of this latest international document been adopted from the beginning, an immense quantity of controversy would have been averted. Our own contention has invariably been for the principle now finally established by the wording of the Protocol, and we commend it with all respect to the many disputants who have called us ugly names, from time to time, because we advocated such views. As for the Protocal itself, it represents a practically valueless but none the less significant instance of the liberal attitude maintained for several years past by Great Britain towards Japan. Her Majesty consents to surrender all the jurisdiction exercisable by her Consular Courts in Japan with reference to matters, civil or criminal, arising out of the operation of the Japanese Law of Patents and Trade Marks. Other Powers-we need not particularise—have not been by any means so liberal as Great Britain in this respect. On the other hand, since the concession is not to become operative until all the other Treaty States follow Great Britain's example, and since they are not likely to do so without the usual series of delays and obstructions, we may assume that Consular Jurisdiction will have been finally abolished before this Protocol cau acquire practical valué.

#### THE BRITISH SQUADRON.

The British squadron has successfully managed to become invisible at this crisis. The greater part of it left Hongkong on the 16th instant, and was to have been followed as quickly as possible by the Powerful, the Grafton, and the Edgar, but the destination was secret. Rumour spoke of a demonstration in the neighbourhood of Chemulpo by way of a hint to Russia, but if the ships had gone to Korea, we should have heard something about them before this time. The recent report that they were at Talien-which, as most of our readers know, is on the east coast of the Liaotung Peninsula, some 25 miles north of Port Arthur-is evidently incredible. It is an interesting little mystery. Admiral Buller, however, may be trusted to turn up at the right moment and the right place.

Dr. von Seldeneck, who was formely Consul-General at Havana, arrived at Bangkok on the 25th November to take up his duties I German Minister Resident.

#### VERBAL ACCURACY AND EDI-TORIAL ACUMEN.

"The extremely loose and careless fashion in which the editor of the Japan Mail uses words is one of the great difficulties in the way of instructive discussion with him." That is the verdict of the Kobe Chronicle. Its proof is this: -"In a recent article the Mail said that 'one and all of the Treaty-Port journals had assumed such and such a thing, and then, a few lines further on, dealing with the same charge, the Mail spoke of the humiliating attitude of the local foreign press with very rare exceptions." We suggest that the editor of the Kobe Chronicle would get on better as a controversialist if he devoted a little more care to reading the matter which he undertakes to controvert. Is there no difference in his eyes between "Treaty-Port journals" and "the local foreign press"? We recommend him to reflect; to wait until he has a moment of uninterrupted leisure and then to propound to himself the question "are all the newspapers that constitute the local foreign press of the Far East included in the category of treaty-port journals." When he has thought the matter out he will perceive that the trouble in this instance is, not our loose and careless phraseology, but the fact that our accuracy has been a little beyond his own apprecia-

Our contemporary also brings up the words "right" and "privilege," and accuses us of failing to distinguish between them. The accusation and its context make one of the most comical specimens of "squirming" we have ever observed. The Kobe journal denied that the new Treaties conferred any "privileges" what-ever in the matter of leases. We retorted that they conferred "the privilege of leasing land according to the provisions of Japanese law." "Not at all," is the Kobe Chronicle's reply; "they confer simply a right to make leases,—nothing further." Now what imaginable difference does it make for the purposes of such a discussion whether the power obtained under the Treaties to lease land be a "right" or a "privilege"? The whole question originally at issue was whether the Treaties contained, or did not contain, a provision enabling foreigners to acquire land in Japan by lease. The Kobe Chromicle's attempt to shuffle out of its blunder by telling us that "privilege was among the Romans something conferred upon an individual by private law," and that "right signifies in this sense what it is right for one to possess "—this whole attempt is really too silly to be taken seriously. If the "right" be there, British subjects ask for nothing more. They will not concern themselves about lexicographical distinctions provided that they get the land. For the rest, ours is the correct language, the Kobe journal's the incorrect. "Right," according to the usage of the best authors, signifies "that to which one has a claim"; "privilege" signifies "a peculiar benefit or advantage." It consequently seems inaccurate to speak of a treaty conferring a "right." We may properly speak of rights possessed under a treaty because the provisions of the treaty constitute a claim to the rights. A treaty may recognise a right, or create a right, but it confers a privilege.

nicle wanted us to understand that when it complained of "the Treaties not conferring any privileges whatever in the "something which among the Romans was advanced by Germany. Degraded he cerconferred upon an individual by a private tainly has been, but why? The news of law," it ought to have labelled it comments the fact, when received in Tokyo, suggestacademical irrelevance.

We have one word more to say to our contemporary, though truly we are reluctant to add to the distress which has already driven it to seek refuge among the ancient Romans. Why does it not apply to some competent authority for an explanation of the word "superficiary" Any Japanese law student could furnish the necessary information and make it intelligible to the Kode Chronicle by an object lesson in a back garden. Ordinary language is plainly powerless to dispel the thick mists of perplexity that hide the significance of this novel word from our contemporary's perception. Like the Tennessee owl it would probably have a belated laugh at its own denseness when the truth dawned upon it, but the result would be wholesome and the humiliation of further floundering in public might be avoided.

#### KIAO-CHOU.

We recently reproduced, from the columns of the North-China Daily News, a detailed statement of the settlement of the Kiao-chou affair and of the terms said to have been accepted by Germany. The account proved entirely misleading, and our contemporary now accounts for the error thus:-" The Germans had agreed to evacuate Kiao-chou forthwith, without insisting on being given a permanent coaling-station, if, as was at one time understood they did, the Chinese agreed to the reparation that Germany demanded. Complications, however, have now arisen which, it is feared, threaten to postpone indefinitely the German evacuation. The Chinese seem not to have realised the advisability of agreeing with their adversary quickly while they had the opportunity."

Meanwhile it would seem that the Germans are making themselves quite at home in Shantung, and gradually extending their sway. "Native despatches received from Chefoo," writes a Shanghai contemporary, "report that the Germans have also occupied the city of Chimô, some distance from the city of Kiao-chou, on the mainland, which they entered on the pretext of calling upon the district magistrate, and that their outposts on the 3rd instant were as far as the hamlet of Nükuk'on, on the Kiao river. The territory occupied by the Germans is estimated at something approaching three or four hundred square miles so far. At Nükuk'on there is a likin station which has also been taken possession of by the Germans, who have also begun collecting taxes on the imported and exported goods. The brigade of General Chang Kao-yuan has been ordered by an edict of the 2nd instant to make a retrograde movement to Chefoo is order to prevent any conflict with the Germans.

No explanation is yet forthcoming of the We do not say that this distinction is in- fact that Li Ping-heng, formerly Governor varially observed, but we ourselves always of Shantung and subsequently made Vice-endeavour to observe it as carefully as roy of Szechuan, was commanded by an

possible. At all events, if the Kobe Chro- Edict of Dec. 11th, to resign the latter post. Li had just been appointed Viceroy but had not yet handed over the governorship of Shantung when the murder of matter of leases," it was thinking, not the two German missionaries occurred, whether foreigners would be entitled to He was consequently responsible, and his He was consequently responsible, and his lease land, but whether they were to get degradation figured among the demands ed that the Kiao-chou affair had been settled, for the Chinese Government would scarcely have taken the initiative in punishing Li. The incident remains a mystery.

#### DISASTERS AT SEA.

Telegrams received in Tokyo on the 28th instant, announce the loss of the Nara Maru, a steamer belonging to the Osaka Shosen Kaisha. She was on a voyage from Formosa to the Pescadores, and ran on a sunken rock in the neighbourhood of the latter. Two men-of-war, the Tenriu and the Katsuragi, left the Pescadores with all expedition to render assistance. It is said that eighty lives were lost, but the statement requires confirmation. Mr. Montague Kirkwood was a passenger in the Nara Mars, but happily he escaped without injury.

On the 24th instant, a steamer called the Amatsu Maru ran on a rock off Nagasaki Cape in the Matsura district of Nagasaki Prefecture, at 11 p.m. No lives were lost. Another steamer sustained serious injury on the forenoon of the same day in Wakamatsu Bay, Nagoya, but in this case also there were no casualties. Yet another disaster is reported from Mitosaki, Niigata Prefecture. The steamer was the Hokuyo Maru, belonging to the Hokyo Kaisha of Niigata. She sank with all her cargo, on the forencon of the 26th instant, but her crew and passengers were saved.

#### A CURIOUS AFFAIR.

We learn that on Wednesday afternoon Mr. F. Schroeder, editor of the Eastern World, was the recipient of some rather unwelcome attentions on the part of a compatriot. German subject named Polzien, against whom Mr. Schroeder recently conducted a successful libel suit, called at the office, in company with a man named Allmacher, at about 2.30 p.m. and after a dispute with Mr. Schroeder about the purchase of certain books, Polzien drew a revolver from his pocket and threatened to shoot Mr. Schroeder, his companion at the same time stopping Mr. Schroeder's exit by the door. Mr. Schroeder called for help to the Japanese in a godown opposite and eventually his clerk, who had gone to the police station, returned with a constable. whereupon Allmacher ran away, and Polzien was secured, but the revolver was not then on his person, having probably been taken away by Allmacher. Polsien was taken to the German Consulate by the policeman, where a charge was lodged against him by Mr. Schroeder.

#### BII.LS.

Among the projects of Law that would have been submitted to the Diet had not its session been interrupted by the dissolution of the Lower House, there was one for limiting the period for the exchange of silver yen to June 30th of next year, and another for abolishing the system of special bounties on ailk for direct export.

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

### DISSOLUTION OF THE LOWER HOUSE.

RITICS of the Government's action in dissolving the House of Representatives seem to forget that the principle of party Cabinets is not yet introduced in Japan. The situation, as it presents itself to us, was that the House of Representatives refused to legislate so long as the present Cabinet remained in power-Under such circumstances one of two courses only was possible: either the Government must dissolve the House and appeal to the country, or the Cabinet must resign. The latter plan would have plainly declared by implication that the Cabinet holds office by the mandate of the Lower House, a principle not acknowledged to be recognised in this country. The dissolution of the House was therefore the only feasible alternative.

Some of our readers may be perplexed to understand our assertion that the House of Representatives declared its resolve not to legislate so long as the present Cabinet remained in office. The House, they may say, was not suffered to hold any debate or to record any opinion. How, then, can it be said to have declared any such resolve? That point is easily explained. It turns upon a question of of procedure. The projectors of Resolutions in either House are accustomed, especially when the subject is of grave importance, to hand to the President, simultaneously with a copy of a Resolution, a list of the proposers (teishusha) and of the supporters (sanseisha). In the case of an Address to the Throne, a Question or a Representation to the Government, or a Bill, the Law of the Houses provides that a fixed number of proposers-sometimes thirty, sometimes twenty-must be associated with the measure in order that it may come before the House. No such rule applies to mere Resolutions, but the custom is extended to them also. The Resolution of want of confidence, brought forward on the 25th instant, was accompanied by a list of names representing 38 proposers and 195 supporters. It was, the affairs of a nation that it undoubtedly therefore, a foregone conclusion that if possesses in those of an individual, Japan the Resolution were carried to a division, ought certainly to be up and doing at preverdict most emphatically. later, in dissolution. Probably the best Germany. The invasion of a luge empire of such a step are not to be mistaken. It

course in the interests of the nation was to appeal at once to the constituencies.

The curious feature of the situation, however, is that this dissolution of the House can not be called an appeal to the country. There is not, we should say, the smallest chance of the present Cabinet's remaining in office to meet the new Diet. Indeed, we regard the formation of another Ministry as a question of days only. Why, then, dissolve the House, it will be asked. Why not reorganise the Cabinet at once, and leave the Diet undisturbed? One reason has been indicated above-namely, that the time for direct acknowledgment of the Diet's mandate is not supposed to have yet arrived. Of course, the resignation of the Cabinet immediately after the dissolution of the House is virtually an acknowledgment of that principle. But there is a palpable difference between surrender to a victorious opponent and suicide after striking down one's opponent. We have here, in short, one of those compromises which the history of Japanese politics has led us to anticipate at every crisis. The people of Japan unfailingly carry to its logical issue the old saying that "it takes two to make a quarrel? The degree of guilt may vary, but there must be some guilt on each side, and both sides are therefore expected to suffer. In this instance, too, importance was doubtless attached to the fact that on the very day after hearing a Speech from the Throne, in which legislation in harmony with the Ministry and the careful discussion of certain important measures, were indicated by His MAJESTY, the House declared its determination not to work with the Cabinet to which the execution of the SOVEREIGN'S commands had been entrusted. That consideration would not carry much weight in England, but the Japanese preserve a great deal of their old attitude of "reverence and awe" towards the Throne.

#### THE SITUATION.

IF the operation of taking time by the forelock possessed the same virtue in it would receive at least 233 votes in a sent. It is impossible to doubt that events House of 398 members. The House may, are rapidly leading up to a radical re-distherefore, be said to have pronounced its tribution of power in the Far East. China's Moreover, helplessness to defend herself against aghad not the Government intervened, it gression invites enterprises for which her was well understood that the House, administrative laches furnish constant prehaving passed the Resolution of want of texts. The most sanguine on-looker can confidence, would have risen until the scarcely retain any hope in the chances of 11th proximo, and that if the Cabinet her awakening from her lethargy and had not resigned by that time, an Address striking a stout blow in defence of her

by six hundred marines from three ships of war, is an incident for which history furnishes no parallel. Japan, at all events, paid China the compliment of sending armies against her, but Germany undertook to coerce her with half a battalion. It must be plain to every one that if China is to be divided, now is the time to divide her, and it must also be plain that the fact is receiving practical recognition. Japan is not directly concerned, perhaps, by changes in the ownership of Chinese territory. Some of her people may harbour a secret ambition for possessions on the neighbouring continent. Such an ambition showed itself pretty strongly in the closing days of the recent war, but it seems to have been not so much a permanent feeling as a transient sentiment born of successes in the field. Even though the Chinese empire were completely absorbed by European Powers, the resulting position for Japan need not be more dangerous than is the position of the British Isles at present, provided always that she were competent to turn "the silver streak" to defensive purposes as successfully as England does. That proviso means a great deal, however. It means, above all, a strong navy, and there is no concealing the fact that the consummation of Japan's programe of naval expansion depends on China's keeping her engagements with regard to the payment of the Indemnity. This statement is not absolute, of course. When we speak of dependence upon the Indemnity, we refer to Japan's programme as it now stands. Her arrangement is to defray the cost of her new vessels out of the Indemnity, and the amount of the Indemnity still remaining unpaid is 59 million taels, or about 90 million yes in round numbers. If that sum failed to come into the Treasury, Japan would be much inconvenienced, though of course she could ultimately find other sources of income. The question to be considered, then, is whether she is wise in remaining any longer under the semblance of dependence on China. The Peking Government is confronted by troubles so serious that failure to discharge its obligations to Japan may soon dwindle to the dimensions of an altogether trivial humiliation. With Russia at Port Arthur and Germany at Kiao-chou Japan's continued tenure of Wei-hai-wei could not be a matter of great regret to China, and, moreover, her ability to find money may soon be sensibly impaired. It appears to us that the Japanese Government would be acting prudently did it at once place itself in an independent financial position by bold recourse to the European moneymarket. Two hundred million yen could be borrowed with the greatest case in to the Throne impeaching the Ministers integrity. That her helplessness was first London at present, whereas if the compliwould have been presented. Thus the demonstrated conclusively by Japan, can cations now in view develop a more Government's action averted an unseemly not, of course, be gainsaid, but its most acute phase, there might be much difficulty conflict which must have ended, sooner or signal illustration has been furnished by in placing a loan. The political aspects

would be an announcement to the world that Japan is determined to push forward her programme of naval expansion under all circumstances, and that her resolve to arm herself efficiently and vigorously was prompted from the first, not by fortuitously coming into possession of a sum of money, but by a thorough conviction of the necessity of such a measure. From a purely financial point of view, little doubt proval of the Sovereign. But when he says, exists that drafts on foreign capital must be made sooner or later. Even though Finance to fix upon a scheme of increased the Chinese Indemnity be paid punctually taxation," the public can not fail to recognise and in full, the post-bellum measures can not be carried out without floating a loan of 135 million yen-the Public Undertakings Loan, as it is called in the programme. This loan, as originally planned, is a domestic loan, but there does not appear to be any probability of its being taken up by the people. In fact, the Government makes no attempt to float it, being evidently persuaded that subscriptions could not be obtained at present. Yet the money will have to be found eventually. To foreign observers it has long seemed that Japan was over-taxing her financial strength. During the past fifteen years she has been fixing large Maje fifteen years she has been fixing large Majesty's servant, Hatoyama Kazuo, Presidentol sums of floating capital, and the situation has been immensaly aggregated by the inhas been immensely aggravated by the industrial mania that followed the war. She is now virtually at the end of her resources, and the only visible method of easing the situation is to redeem a portion of the War Bonds. These Bonds, or, at any rate, large quantities of them, were purchased by Japanese capitalists, not for speculative purposes, nor yet as an investment, but from purely patriotic motives. Their holders could find other and far more profitable uses for the money were it now available. All that part of the problem, however, has already been pretty fully discussed. The considerations which have not been publicly urged as yet, and which nevertheless seem to possess great importance, are the political points set down here. They appear to us very weighty.

#### OPENING OF THE DIET.

SPRECH PROM THE THRONE.

His Majesty's Speech at the opening of the Diet on the 24th instant was an follows :-

We hereby perform the ceremony of opening the Imperial Diet.

the Imperial Dict.
Lords and Gentlemen of the House of Peers and the House of Representatives—We have pleasure in informing you that our relations with all the Treaty Powers are on a footing of the closest and most friendly character and that the Revision of the Treaties is on the point of con-

In order to establish the finances on a firm basis, We have instructed the Minister of Pinance to fix upon a scheme of increased taxation in connexion with the Budget for the thirty-first year of Mel/i, and to submit the measure III you, in conjunction with a Bill embodying the Revised Code and various other projects of law, essential to the promotion of national prosperity and to ad-

ministrative progress.

We trust that you will discharge your functions of deliberation and consent with harmony and

The Emparor's allusion to Treaty Revision

and the Codes was more or less anticipated, but | Constitution, We hereby order the diasolution of the public will probably be surprised to find that the House of Representatives. His Majesty very explicitly endorses the measures for increased taxes also. Of course an Imperial Speech at the opening of the Diet does not, as a rule, possess any strong political significance. But the phraseology of a speech may be constructed so as to signify a great deal. If His Majesty had said simply that measures relating to increased taxes would be submitted to the Diet, no inference could be drawn in the sense that such measures had the distinct apin order to establish the finances on a firm basis. We have instructed the Minister of that his Majesty seems to adopt, so far, at any rate, as language is concerned, the precise policy that Count Matsukata himself has enunciated on more than one occasion. Speeches from the Throne have not acquired in Japan the comparatively perfunctory character attaching to them in European countries. On one occasion the words wachie kyede (harmonious conperation), appearing in an Imperial Message, were quoted and referred to time and again during the subsequent course of the session, and certainly exercised no small effect in moderating, or even quelling, the fiery ardour of political antagonisms. In the present speech the celebratde group of ideographs is reduced to two: his Majesty exhorts in "harmony" (machin) but says nothing of "cooperation" (hodo).

The reply of the Representatives to his Ma-

jesty's Speech was as follows :-

May it please Your Imperial Majesty,-Your are moved with profound granting for Your Majesty's condescension in personally attending to open the eleventh session of the Imperial Diet and in favouring them with Your Majesty's gracious Speech. Your Majesty's servants will endeavour by carnestness and careful deliberation, to respond 
Your Majesty's will and to discharge the trust reposed in them by the nation,

#### DECEMBER 25TH.

THE HOUSE OF REPRESENTATIVES.

The House of Representatives met at 1.10 p.m.

The President reported that he had repaired to the Palace in the forenoon and presented the Reply to the Imperial Speech voted by the House on the preceding day, which his Majesty had acknowledged in the following words:

We approve the loval sentiments expressed by the members of the House of Representatives. The President announced that the Government had submitted the Budget and correlated measures for the fiscal year 1898-9.

VOTE OF WANT OF CONFIDENCE.

The House was about in proceed to the Order of the Day when Mr. Suzuki Shigeto asked permission to have the Order changed for the purpose of introducing an urgency mo-tion.—(Cheers, and cries of "No," "no.")

The President inquired the nature of the motion.

Mr. Suzuki-It is a Resolution declaring want of confidence in the Cabinet .- (Cheora and groans.)

Mr. Haseba Junko said that he wished to oppose the motion, and several other members

also signified their dissent.

The President—It has always been the cus-tom to dispense with any discussion in connexion with a motion for changing the Order of the Day. I shall follow that precedent on the present occasion. Those who are in favour of changing the Order will sland up,—(A majority rose.)
Mr. Suzuki Shigeto—The Resolution that I

have in propose is as follows :---

Resolved that this House does not place confidence in the present Cabinet.-(Cheers.) DISSOLUTION.

The President called upon the members to rise, as an Imperial Message had been received, which he proceeded to read :-

In accordance with Article VII. of the Imperial no time in replying to the Question.

This announcement was received with cheera and clapping of hands, and the House rose at 1.19 p.m.

THE HOUSE OF PEERS.

The House of Peers met at 9.40 a.m., and the President having announced his intention of proceeding to the Palace in present the House's Reply in the Speech from the Throne, the chair was taken by the Vice-President.

The Reply was as follows:---

May it please Your Blustrious and Enlightened
Majesty—Your Majesty's servants, the members
of the House of Peers, have the bonour to state
with awe and reverence, that
On this occasion of opening the eleventh session

of the Imperial Diet in accordance with the usual ceremonial, Your Majesty's sevents, receiving Your Majesty's gracious Speech and humbly perusing it, learn that Revision of the Treaties with the various Powers is on the eve of achievement; that the national prosperity is increasing, and that Your Imperial Majesty entertains certain prolound and important projects with reference to the essentials of domestic administration,

Your Majesty's servants reverentially bow to the Imperial will, and keeping in view the welfare of the State and the prosperity of the people, will have the honour to submit their views, with sawe and reverence, for the gracious consideration of Your Imperial Majesty in respectful accordance with Your Majesty's Constitution.

The House then proceeded in elect a chairman of Committee of the Whole. The result of the voting was :--

Marquis Tokugawa Iyesato ...... roz 

The Standing Committees were then elected.

#### THE TAKAND APPAIR

Mr. Matsuoka Koki presented a Question relating to the Formosan Judiciary, as tollows: Since the 8th month of the present year, the Govenment has taken the following steps with regard to Judicial Officers in Formosa:—Takano Takenori, Chief Judge of the High Court, Ono Yoshitoshi, Chief Judge of the Lucal Caurt of Tainan, Shimazu Nobuyoshi, Chief Judge of the Local Court of Misoli Ito Tanemoto, Chief Judge of the Local Court of Taichyon, and Hands Motonao, Judge of the Preliminary Court, have been placed on the Retired List.

Takano Takenori, Judge of the Governor-General's Court, Hamazaki Yoshio and Induye Ataushi

have been dismissed with disgrace.

Does the Government consider that Formosa being beyond the scope of the Constitution, the Constitutional rights of the judiciary are not operative? Or does it consider that the Judges officialing there do not come within the purview of the laws in their administration of civil and criminal justice? On what principle, finally, does the Government retire and dismiss Judicials in Formosa?

The speaker explained that his object in presenting this Question was to afford the Govern-ment an opportunity of explaining its procedure. He described the sensation that had been caused by the retirement or dismissal of the Formosan Judges, and pointed out that in all the towns through which the Judges had passed on their return from Formosa public receptions had been organized to do them bonour by persons who were neither their friends nor their acquaintances and who had There had nothing to gain by féting them. There had been, in short, a spontaneous and wide-spread demonstration against the Government's action. Almost every newspaper and periodical had taken up the subject, and it might almost be said that the Government had found no defenders, so few and far between were those that altempted to vindicate its action. On the other hand, there could be no doubt, he presumed, that the Ministry possessed both courage and ability, and that they had some good reasons for the step taken by them. Unfortunately, however, they were without any recognised means of submitting their views to the public, and to furnish such a means had seemed to him desirable, since the dignity of the Constitution and the tranquillity of the people's minds were concerned. talk of the Diet's being suspended or dissolved, so he trusted that the Government would lose

Original fron UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

ANOTHER HECKLER.

Viscount Tani begged to present the following Ouestion :-

On the 25th day of the 5th month of the 30th year of Meiji (May 25th 1897), the Government ordered the retirement of Yasukawa Shigenari, Ichijuro, Machida Naozami and Seki Muneyoshi, Ichijuro, Machida Naozami and Seat intueyosii, members of the Board of Andit, in accordance with Law No. 91 of the year 1896. The provisions of that Law are applicable to officials who through physical or moral debility, have caused to be competent in discharge their duties. Now the above four officials were in sound bodity heafth, and were daily attending to their duties. For what reason was the Emperor asked in dismiss them.

Viscount Tani was proceeding to explain the important character of the functions discharged by the members of the Board of Audit as overseers of the national income and expenditure, and the consequent necessity of guaranteeing their tenure of office against the caprice of a Ministry whose financial transactions they had to accratinize, when the President announced the receipt of an Imperial Rescript ordering the Prorogation of the House.

#### SITUATION IN THE EAST.

It is natural that at a time like the present many sensational rumours should be circulated. To that category, we have no doubt, belongs Reuter's telegram announcing that Russia has demanded the dismissal of the English engineers employed on Chinese railways and the German military instructors in China's service. The thing is quite incredible. There may be an intrigue of the kind, but surely there is no oficial demand. Great Britain, also, is represented as having declared to the Chinese Government that if it acquiesces in Germany's demand, she-Great Britain-will prefet a similar de-mand. That story, too, is not to be accepted without great modification. It may be taken for granted that Great Britain has made some intimation to China, if indeed Germany be really responsible for the course attributed to her with regard to the working of mines and building of railways in Shantung. The spirit of the most-favoured-nation clause would be plainly violated were China free to make national discriminations of such a nature, and we shall be safe in assuming that Great Britain has warned the Peking Government against committing itself to anything of the kind. But that is very different from the declaration attributed to her by the Fiji Shimpo's telegram.

#### AFFAIRS IN MANILA.

The following telegram has been received by his Excellency the Spanish Minister in Tokyo and kindly handed to us for publication :-

I take great pleasure in informing your Excel-lency that the principal chiefs of the insurrection have laid down their arms with acclamations in favour of Spain, the King and Peace.

It is a matter for congratulation that the weary struggle in Manila is at length brought to a close. The persevering courage shown by Spain in grappling with the terrible difficulties that have confronted her of late years, is worthy of all admiration. She has certainly deserved to emerge successfully from her troubles, and the public can not fail to be glad that the light is breaking in upon her long night of trial. We gather from the above telegram that some concessions have been made to the insurgents and that they have accepted them with acclaims, but as to what the terms may have been we are without information. At all events, that method of terminating the struggle is not only happier from a humane point of view than reliance on the award alone, but is also calculated to secure more permanent results.

Sir William Van Horne, President of the C.P.R. Co., recently received, says a Kobe paper, some magnificent porcelain vases and placques from the Emperor of Japan, in token of appreciation of courtesies extended to Marquis Ito during his progress through Canada last summer.

### CURRENT LITERATURE.

To the pages of the Kokumin-no-tomo Mr. Onishi Shuku furnishes an interesting article entitled Keimo (容蒙) Jidal no Seishin, in which he discusses the spirit of the age which witnesses a change from darkness to light. The gist of Mr. Onishi's essay is that though the causes which brought about the enlighten-ment of Japan resemble those which worked such wonders in Europe in the last century, the manner in which the civilising and enlightening movement has been followed up in Japan differs widely from what took place in Europe. In Europe revolutionary principles affected in a powerful manner every stratum of political and social life. The eyes of the people were opened by the spread of learning and by the efforts of a few powerful writers of the type of the Japanese Mr. Fukuzawa. Once having realised what enlightenment meant, the French people needed no Governmental pressure to induce them to move quickly along the road of progrees. If the Government did anything, it acted as a brake to lessen the speed at which the masses were going ahead. In Japan it cannot be said that the people as a whole are as yet actuated by the spirit of enlightenment. To effect reform the Government apar is constantly needed. As regards the reactions which from time to time occur in this country, and one of which in certain quarters is witnessed to-day, they find a parallet in the wave of conservatism and, from one point of view, retrograde movement which succeeded the European struggle for liberty that characterized the end of the eighteenth and the beginning of the nineteenth century all over Europe. As to how far enlightened thought will retreat owing to the pressure of conservatism, this depends largely on the extent to which such thought holds sway over the minds of men of influence and position in the country. From one point of view the fact that a great and fundamental revolution was effected here without any of the horrors which attended a similar movement in France is a subject for congratulation. But at the same time it is a cause for regret that in this country the Government should be always leading an unwilling people, instead of a progressive nation urging reforms on its government. Mr. Fukuzawa's view is that a nation cannot be said to be enlightened because its government has adopted the laws and institutions of enlightened countries; that there is no real progress till the people as a whole, of their own free will, and prompted by intelligent conviction of the necessity of this course, determine to enter the new path. spirit of enlightenment needs to be explained and to be insisted on more and more man antidote to the efforts of the numerous advocates of retrograde movement whose voices are loud in these days.

The Teikoku-bungaku, commenting in laudatory terms on the sentiments given above, adds that the Japanese as a nation have much to fear from that fickleness of disposition which clings to them from year to year and leads to their abandoning enterprise after enterprise solely from lack of the perseverance necessary to

The Ryôikujiron gives at some length the views of Viscount Yoshikawa on education in general and the morality of students in particular, of which the following is an epitome: -In 1871 the Mombusho was established. The following year the system of education to be followed was promulgated. In 1879 there were 28,025 Elementary Schools in the empire and 2,210,607 pupils. At that time the Normal and Middle Schools in existence numbered 196 and the students in attendance 14.512. At firat the establishment of additional Elementary Schools was left to the provincial government authorities, but this plan did not work well, and in 1880 the Department assumed the control of all elementary education. In 1885 the number of Electronvinced of the need of such a book, I was in mentary Schools had increased to 28,283 and no way qualified to write it, being quite ignorant the pupils to 3,097,235. The number of Normal of such matters. I hunted through bookstore

MON1HLY SUMMARY OF JAPANESE and Middle Schools was 162, with an attendance of 23,511

The moral effect of the changes incidental to the operation of the new system of education mas bad. Ability to acquire knowledge rapidly was more thought of than uprightness of life. The tendency to despise the old in favour of the new made its influence felt in morals. That high code of honour which was observed by the warriors of the Tokugawa era was regarded as no longer binding. The old parochial system of education enabled teachers to keep a sharp watch on the conduct of their pupils. but under the new régime, the students were free to do pretty much as they pleased, out of school. The new knowledge they had imbibed tendered pupils conceited, and they began to regard their parents' notions on morelity as antiquated and unworthy of attention. In the mean time the law of the land had been gradually undergoing a transformation whereby the individualism of the West was installed in the place hitherto held by parental authority. In addition to this many of the old houses, whose existence would have always fornished a safeguard to morality, grew poor and lost their influence in the world, and their position was taken by upstarts whose one idea was the acquirement of wealth. Thus have the undermining influences made a complete wreck of our ancient code of morals, says Vis-count Yoshikawa, and it is most essential that those who are entrusted with the education of youth should find some adequate substitute for what has been lost.

From the preface to the new edition of Mr. Fukugawa's writings, reference to which was made in our last Summary, we extract the fol-lowing additional information bearing on literary subjects:-In 1859 I settled in Edo, says Mi Fukuzawa. My first work there was a small dictionary which gave in Japanese kena the English pronunciation of Chinese names. My next work was entitled Seiyō Jijō (Foreign Affairs). This book was largely in demand, and more than 250,000 copies have been sold. The reason of its success was that it contained an account of all that had impressed me during the 12 months that I spent in foreign lands. I was fortunate enough to be able to go to Europe in 1861 in connection with the mission despatched at that time. Hitherto I had only read about foreign countries. Imagine my astonishment when I was able to examine everything with my own eyes. There are those whose foreign tours end in wonder. It was not so with the. As I witnessed the various signs so with use. As I witnessed the various signs of progress, I said to myself, this progress shall be seen in Japan before many years are past. I returned to my country full of what I had seen and made it my aim to enlighten the poorly educated samuras as to the real mate of things in the West, and with that intent published my Salyō-jijō. As is well known, our Japanese revolution was not the work of scholars. The learned few were powerless to effect changes of such magnitude III were required. Beforer I went to Europe, so strong was the anti-foeign spirit that, much as I desired to do so, I found it impossible to obtain instruction in English in Yokohama. But this antipathy to foreigners was only the result of ignorance. That ignorance my book did something to dissipate.

My early study of English was attended with great difficulties. I had to acquire it by means of Dutch. Learning it in that though acquainted with hundreds of technical terms, I often found myself ignorant of words in common use among children of four and five years of age in England, and, since help in Japan at that time was not available, I had to be content with what I knew when I set out for England in 1861.

My next work was called Raijū-Söhö (Use of the Rifle). My reason for publishing this work was that in the war between Choshu and the Bakufu, the former was victorious owing to the superiority of its rifle shooting. Though convinced of the need of such a book, I was in

Digitized by Google

after bookstore in search of an English or Dutch work on the subject and at last came across just what I wanted. The little volume cost me sixty-eight sen. I had a brother-in-law who was studying rifle-shooting and from him I hoped to receive assistance, but the book seemed beyond his knowledge. So I set to work and translated it we well as I could. Its success fairly astounded me. I am afraid m say how many copies were sold. In connection with this I may mention that Murata Shosho, the famous inventor of what is now called the Murata rifle. told me that his attention was first drawn to the subject of rifles by my little book. little amusing to know that a great inventor was given to the world by means of a book translated

by the veriest tyro on the subject of fitearms.

The next work I published was the Seiyo-tabi-Annei (Guide m Travellers in the West.) In 1866 I was sent in America on Bakufu business. Before leaving I went to Yokohama to make arrangements for drawing money in the U. States. On applying to Messrs Walsh, Hall & Co., for an order on America, I was furnished with Bank of England notes. To these I objected on the ground that they were payable in England; to which country I had no intention of going. It took the clerk who was serving me two hours to convince me that these notes would be received in America. On apologising for my stupidity, I was told by the clerk that the day previous half a day had been occupied in convincing one of my fellowcountrymen of the credit accorded to the Bank of England in every part of the world. Knowing how great was the ignorance of the samurai class m which I belonged on all financial matters, and to save such of them as should go abroad from humiliating situations, I jotted down for their guidance a number of practical suggestions, which subsequently took the form of the "Tourist's Guide" mentioned above.

In publishing my work on Physics entitled Kyūri-sukai (Physics, explained by Charts) I had a special object in view. I wished to show how elementary and how erroneous were the notions entertained in Japan on the laws that govern the material universe and to convince iny readers of the immense superiority of foreign teaching in this branch of knowledge, and thus prepare them to accept western guidance on a variety of other matters. It seemed to me important in begin with a subject that was capable of clear demonstration. My book was not a translation of any particular foreign work, but a treatise founded on general study. I wrote in a free and easy style, so as to make it intelligible to people of limited capacity and education.

The 洋兵明艦 Yohel Meikan, a work on foreign military tactics, drill, &c., was a translation undertaken as an order from a Kumamoto military man, for which I received the aum of 600 yen, which was utilized in adding a new

building to the Keiögijuku. The Yöhei Meihan had a smaller circulation than most of my works, being of a purely technical character.

The Fig. 666-indan is a work that gives an account of English Parliamentary debate. At the time of its publication the desire for representative assemblies in Japan was growing stronger every day and the book was waited for with such interest that I was requested by those who suggested its publication to work at it day and night. Though the work consisted of a volumes, the blocks were prepared and the book printed in 37 days, a feat which in those times was most rare.

My 後 界 圖 畫 Sekai-kunisukushi wan designed to enlighten the ignorant as to the size, location, history, customs and general character of the principal countries in the world. At the time of it in publication the world known to most Japanese did not include the whole of Asia, to say nothing of Europe, Africa and America.

The 準調クストタ Gahumon no Susume (Promotion of Learning) was published in 17 small volumes and treated of a variety of subjects under discussion at that time. Its circulation

more stir in the country than anything I ever wrote. It was furiously attacked on all sides. Among other things the remark that the death of a samurai who threw away his life foolishly out of mistaken loyalty to his master was no better than that of a dog, gave great offence. The newspapers were mostly against me, Numerous were the threatening letters that I received, and my friends showed no small amount of alarm for my personal safety. In order to quiet public excitement and appeare the anger of my opponents. I was recommended to state my case afresh in the columns of one of the news-papers under a nom de plume. This I did in he Chöva Shimbun, signing myself Keiögijukuno-Gokurō Semban, with the desired result.

The 重豪教草 Domo oshie gusa was, ■ its name implies, solely intended for the young and the ignorant, and was published early in the Maiji era when few books on morality Meiri as taught in the West existed in the language, this subject having been much neglected by early translators and writers. The Dōmō-oshie-gusa consists of five volumes. The book has been largely used in schools and has, I am told, helped to mould the minds of young people into the right shape.

My Katawa-Musume is a very insignificant book, a kind of novel, but a novel with a purpose, that purpose being the bringing about of the discontinuance of silly customs. The practice of blackening the teeth, not only followed by married women, but by Court nobles at that time, seemed to me most objectionable, in that
the description hearty given by nature. The it destroyed beauty given by nature. The Katawa-Musume (the Deformed Daughter) aimed at showing the silliness of trying to improve on nature in the ways attempted by certain women. The war against foolish customs was one which I felt it my duty to wage.

A little pamphlet called 改勝辨 Kalreki-ben (An explanation of the Change of Calendar) written when I was in bed with a cold in six hours. But, though the price of a copy was only a few sen, within 3 months it brought me in 700 ran. At that time the feelings of the ancient samurai were still strong with me, and I remember asking myself whether I was justified in taking from the public 700 yen for six hours' work. The change in the calcudar took place on Novamber 11th, 1872. The majority of the people had no notion why the change was made or what it meant. Hence the large demand for my little book. At the end of the book I explained the figures to be seen on foreign watches and taught fellowsamurai how to read the time, This triffing addition augmented considerably the circulation of my little book, which went on increasing month after month.

None of my works cost me more labour than the 報合之法 Chōaino-hō, a treatise on book-keeping. In the first place the whole subject was new to me, and I found it impossible to render to my actisfaction the many technical terms found in foreign books. What I aimed m and what I eventually effected was the ap-plication of foreign methods of book-keeping to Japanese accounts.

The Kwaigi-ben is a book on debating and public speaking generally, for which there was a great demand at the time of its publication. It may be hard for those who see the prominence and importance of public speaking to-day to realise how many were the obstacles to the practice of Western oratory in Japan in former times. Many of the terms now in common use were coined at the Keiôgijuku. This was the case with 複說 ensetzn, the Japanese equivalent of speech, which was first written 演舌 but subsequently was changed to its present fuller and more dignified form. Bi foron as an equivalent for debate; 可决 kaketsu for the passing and 否决 hiketsu for the rejection of a motion or resolution, and 養成 sansei for supporting a motion, all ori-

Keiögijuku. I commenced by writing out my speeches in full, but afterwards abandoned this practice and simply prepared my thoughts and left myself free to choose what language suggested itself II the time. After some months I felt sufficient confidence in myself to recommend my system to others. At that time there existed a society called the III Kall Meirokusha, whose meetings were attended by a number of scholars, among whom were Mitsukuri Shuhei, Nishi Shu, Kato Hiroyuki, Mori Arinori, and others of equal reputation. To these scholars I expounded my method, but received no encouragement whatever. Mr. Mori said that public speaking was essentially a western performance, whose success depended on genius of the language used; that the Japanese tongue was unauitable for such a pose, and so on. To this I replied that in the sermons of priests, the lectures of Koshakushi (lecturers), and the speeches of Hanashika (story-tellers) we already had abundant proof that oratory of a very effective kind was quite possible. But since the above named scholars still remained obdurate, I determined to show them what was possible by delivering a speech in their presence. This I did; and at its close asked whether they had understood what I had said. To which all replied in the affirmative. From that time public speaking became all the fashion. Soon after wards, we erected a lecture hall at the Keiögijuku,having sent to America for plans of numerous public buildings, in order to understand how to give to the new structure the acoustic properties desirable in such structures.

In the year 1874, it seemed to me that the nation was sufficiently persuaded of the superiority of Western civilisation to be able to appreciate a fuller account of Occidental progress than that furnished by the fragmen-tary treatises hitherto published. I therefore set to and prepared a work consisting of six volumes called 文明論之能略, Bummei-ron-no-gairyaku. My labouts were appreciated by the public. The book had a large sale. It was a favourite of Saigo Takamori's, who was in the habit of recommending all young men

My Minkan-keisairoku (Account of Economy as practised by the People) was intended to help the merchant class by explaining to them Western business principles and methods. It was brought to my notice that some traders who had adopted the system of keeping accounts recommended in my Chōai-no-hō, had failed in business, and, without inquiry as to special cases, I concluded that their failure was due to ignorance of business methods. This book, too, had a large sale, despite the hostile action of the Department of Education, took the form of a Reader and was largely used in Government schools until about 1882, when a strong movement in favour of Confucianism and conservative thought made itself felt in the policy of the Department of Education, and orders were given to discontinue the use of Fukuzawa's books in all schools, on the ground that they contained injurious matter. Ten years later, a rich man called Horikoshi, at his own expense, and with my permission, printed 2,500 copies of the Minkan Keisairoku for free circulation among the shop-keepers of Tokyo. The interdict of the Mombusho did me mere good than harm.

My Bunkenron (Divided Authority or Power) Minkenron (Popular Rights) Kokukenron (National Rights) and Jiji-zhogen (Words for the Time) all had one object, namely the improvement of the relations of the Govern-ment and the people. In the early days of the Melji era, there was a tendency among prominent statesmen to advance without the prople, to disregard popular feelings, and instead of taking steps to enlighten the masses as to the advisability of proposed reforms, to despot-cally force their policy upon unwilling subjects. I perceived that this was the wrong way to set to work. At this time, the two watchwords were ginated at that time. In this context Kwanken (Official Rights) and Minken (Po-it may be of interest to relate the early pular Rights), and bitter indeed was the strife history of public speaking in Tokyo. In between the two great parties. I always aimed was large, certainly not less than 200,000 copies, history of public speaking in Tokyo. In between the two great parties. I always aimed which represents 3,400,000 volumes. It caused 1874 we made a commencement at the at playing the rôle of a mediator, of throwing

Digitized by Google

oil on the troubled waters, of enabling one side to approach the other. Very early in the Meiji era, I warned the leading statesmen of the evil consequences that must follow the policy of supercilious indifference to public sentiment and feeling which they had adopted. I tried to make them see that they were little better than the peasant-despising, despotic officials of the Tokugawa era, and that they seemed entirely to forget that there are limits to the forbearance of subjects, especially when those subjects are beginning to perceive that the ruled have rights as well as the rulers. To Okubo Toshimitsu and Itō Hirobumi I explained my position in full. On one occasion, when at the house of Mr. Samejima, I was spoken of by Okubo an the "champion of popular rights," and was reminded that if the people had their sights so had the Government, and that in the struggle for precedence it was the duty of the Government not to give way. To this I replied that in figuring as a representative of the people I intended in offer no opposition whatever to the exercise of that lawful authority which belongs to all strong Governments, but only to show my disapproval of the official pride and red-tapeism, of the airs of superiority assumed by the Jack-in-office men who filled Government posts. I was only contending for the right of the people to receive the treatment of men and not that of cattle. At the same time I reminded my bearers that the time was not distant when the people would claim another right, namely that of sharing the government of the country, that they would dispute with the holders of the highest posts in the land their right to remain in power against the will of the people. When that time came the Meiji statesmen would find that they had unwittingly pulled a horners' nest about their ears. When that day comes, I added, it will be seen that Fukuzawa's ideas are to the best method of governing a progressive people were eminently practical and based on the knowledge of incontrovertible facts."

The preface to Mr. Fukuzawa's collected works from which the above extracts are taken covers 130 pages and is for sale at the Jiji Shimpo office an a separate book, at 20 zen per copy. In this work Mr. Fukuzawa states that the fortune which he now possesses is wholly the result of his writing. The money obtained by his pen has not only sufficed to insure for him an affluent old age, but has enabled him to make a thorough success of the great private school with which his name will ever be associated and for the maintenance of which he has subscribed large sums from time to time.

A handbook consisting of English and Japanese sentences of a practical kind by Mr. F. W. Eastlake has been announced as for sale at 40 sen per copy at the Watenabe Shoten, Urajimbochô, Kanda, Tôkyō. The title of the work is Esiwa fitsuyö Kwaiwa-dokushû (A Practical Colloquial Phrase Book-to be used without a teacher). It is said to cover 346 pages, to furnish a number of sentences arranged according to subjects, specimens of letter writing, and other useful matter, and is asserted to be free from mistakes.

Mr. Nalto Chiso, the well known Shinto scholar, has recently published a work entitled 碧海學說 Hekikai-gakusetsu, in which it is contended that Shinto is essentially a system of ethics and that its theology is an invention of priests and is made use of to awe the ignorant and superstitious:

The Topotetsugaku speaks in laudatory terms of Mr. Anezaki's "History of Indian Religions," observing that the difficulties connected with the compilation of such a work were very formidable, but that, undaunted by them, Mr. Anezaki has succeeded in giving to the religious world a really valuable work.

\* \* \* A Collection of Essays on Female Education has recently been published under the title of Joshikysiku-ronsan. Among the writers are Prince Konoye, Mr. Nishimura Shigeki, Dr. Kato, Dr. Toyama, and Mr. Kiyoura: The work

is for sale at the Fukyŭsha, 1, Gofuku-chō, Ni-honbashi, Tōkyō. In Dr. Katō's essay the view that it is desirable to push high class technical education with females is traversed. Dr. Kato approves of giving young women a good general education, but thinks they should not be encouraged to compete with men in the study of the higher branches of knowledge. There has been a great talk of establishing a Female University in Osaka. Dr. Kato is opposed to the notion. He would like to see the number of Female Schools increased thoughout the country. What is most wanted, says Dr. Kato, is female education corresponding to that received by the boys who attend Ordinary Middle Schools. The danger to health and proper physical development which is involved by the severe mental training advocated in some quarters, is, in Dr. Kaiō's opinion, not sufficiently thought of in Japan. Even in Western lands girls are apt to injure themselves by close application to study. This is still more likely to be the case here where the stock of strength belonging to the upper and middle classes of women is so much less than that of their European sisters.

In the pages of the Yaiyo Mr. Yoshimurs Torataro, the former Director of the Second Higher School, states his views on education and the proper policy for the Mombusho to adopt. There is a sad want of continuity in everything undertaken by the Department of Education, says Mr. Yoshimura. The policy of the Department changes with every change of Minister. The late Viscount Mori was only Minister who has anything like an intelligible and far-reaching policy. He it was who devised a scheme for connecting the lower class schools with the University. But he was cut off in the midst of his days, and the Elisha on whom his mantle is to fall has not yet made his appearance. The course, or rather courses, adopted by the Department are nothing more than a series of make-shifts, which effect nothing permanent or meritorious.

The Kyōiku jiron has an article written in a similar tone, in which Mr. Kurabara Ikaku similar tone, in which his accument changes its made to say that no Department changes its notice as frequently as the Mombusho. We policy as frequently as the Mombusho. We have had Cosmopolitanism, Individualism, Nationalism, Conservatism, and we have also had periods when the Department has been policy-less. Mr. Kurabara further asserts that there is no real and effective connection between the three classes of education carried on by the Mombusho, that of the Elementary School, the Middle School and the University. The attempt to make the subordinate school preparatory to the higher establishment and at the same time to enable it to supply the wants of students whose education terminates in the lower school, in the elementary or in the middle, has proved a failure. The attainment of two incompatible objects, has proved an impossibility, as was bound to be the case. Would it not be better, asks Mr. Kurabara, if the University were rendered independent of the Mombusho? Ought not inquiry to be free there? Should University students be urged to adopt nationalism or any other " ism " on which the Department may for the time being wish to lay stress?

The Teikoku-Bungaku prints another of the poetical productions of Mr. Noguchi, the Californian poet, entitled "Noguchi's Song unto Brother Americans," which we give below. The poem, we are told, was suggested by the following extract from a letter. "What a sensation about gold! What a joke it would be to send down rains of gold upon mortals and laugh at them from the heavens." The effusion needs no comment.

mortal, divorced husband from Lady,

Thou, ant, battling for gold dew, art a demon-child unlike the father-God!

Gather, mortal, the boundless gold that bids not abundance adieu-

The world-illuming gold that kindles mortal's delight!-O gold! not the Klondyke gold-The gold at the proud gate of San Francisco Bay, aye, the divine gold of the majestic sun!

At a meeting of the Kodo-kai on the 20th instant in the isekan restaurant, the following

I hall the goddess-Night whose sacred melody unheard flowery tales of a thousand years-

Her's the blessed task to bring peace to the heart that has parted from the land of Content—

O. Night,-a broading love-mantle warming the mortal to full-hodied ease !

Behold, the gracious throne of the empress-Moonwhose heaven beams messages unto me

n humble singer among mortals, respond to a fulling strain of the velvety night!

O, idle Spirit of the night, open the doors of the star-shrines to unite the earth with the beavens Lo, doves mature in the moon's bliss where the guardian-Silence watches the sleeping Voice!

 a constant lover, kiss the bare breast of the damsel-Muse, whilst brother mortals sleep. Hark! An awakening shout-Klondyke geld! Nay, mortal, the gold of day!---

Aye, the emperor-Sun glorifles the snow-obed Alaska land with a crown of golden light!

### JAPANESE FACTS AND COMMENTS.

The Osaka Asahi places the amount of saké brewed in Nishinomiya for this year 🛍 98,141 koku, an increase of 7,700 koku over last year.

The number of Parliamentary members whose annual allowances bas been distrained for debt is reported by the Tokyo Shimbun to have reached 53.

The Hochi states that the Yokohama Specie Bank has resolved to issue loans to the amount of three million yes to manufacturers engaged in the cotton spinning industry.

According to the Nichi Nichi, the Kobe Rice Company has recently entered into a contract with a foreign firm in Yokohama for 1,000 tons of uncleaned rice at \$5.72 per picul, and with another firm for 500 tons at the same price.

With regard to the death, through contact with an electric light wire, of a young girl employed in a Tokyo beef shop, an action has been in-stituted against the Electric Light Company, in which compensation amounting to 4,690 yen in claimed by the bereaved father

The Government subsidy towards repairing the damages caused by recent floods is esti-mated at yen 1,000,000. Niigata Prefecture requires the largest share of the subsidy, and is followed by Toyama, Fukui, Gumma, Saitama, Tokyo, and others.

The Tokyo Shimbun states that the number of destitute people who have come to the capital from the provinces devastated by natural calamities, for the purpose of committing robberies or acts of incendiarism, has increased considerably of late, and the police patrols have been accordingly augmented in the capital.

According to the Tokyo Asaki, the amount of coins and notes in circulation in Japan at the and of last month was 96,480,715 year, showing an increase of 1,682,161 yen over the previous month, and of 14,654.564 yes as compared with the corresponding period of last year. The amount was made up as follows :-- Gold coins, 21,104,370 yen (including 9,920,504 yen in new gold coins); one yen trade dollars, 32,015,806 yen; ailver below 50 sendenomination, 27,297,576 yen nickel pieces 6,712,178 yen; copper, 9,350,783 yen.

The 34th and 121st banks, in Osaka, which lately amalgamated, are now carried on as a joint stock corporation with a capital of 2,100,000 yes. It is now proposed that the Bank shall be incorporated with the Japan Neutral Bank (capital, 3 million yes), the Japan Union Bank (capital, 600,000 yes), and the Nada Commercial Bank (capital, 300,000 yes). Mr. Tataoka Chokuun, of Osaka, has been commissioned to make the necessary arrangements and he contemplates, the Jiii notes, increasing the capital to five million yen.

At a meeting of the Kodo-kai on the 20th

Digitized by Google

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

resolutions, according to the Shegye, were passed:-(1) The Kodo-kai shall, after the reconstruction of the Cabinet, endeavour to pursue a policy compatible with the progress of the nation at large, so that the post bellum programme may be consummated. (2) The increased taxation schemes contemplated by the Government shall be opposed until the reform of the administration and the adjustment of finances have been carried out.

Statistics, published in the Kokumin, show that at the end of last mouth the number of companies throughout the empire totalled 2,146, their capital aggregating 302,408,012 pm. Compared with October the figures are :--

At the end of Dec Capital.—yen. At the end of Nov. Capital.--yen. Companies. Commercial 1,043 142.019.155 1,027 140 688 125 Industrial...1,013 167,962.287 997 168.232,996 Agricultural. 90 2,426,570 90 2,342 070

Total ... 2.146 342.401.012 2.114 311.263.101

The reclamation of Hokkaide has been proceeding steadily year by year, says the Tokyo Shimbun, but the munia of immigration has about reached its climax, and the area of leased lands now amounts to several bundreds of thousands of cho. In the year before last, such lands did not exceed 237,017 che, but at the end of last year the area increased to 254,774 cho. Divided in proportion to the population, each inhabitant secures for cultivation an area of a little over six lan. But this calculation is unsatisfactory, as it includes merchants, artisans, and other elements in addition to the farmers.

The Yomiuri has a curious note, which we translate:-At the end of October, a man convicted of a certain offence was sentenced to one year and three months' imprisonment. He was transferred to Kameda Prison, Nemuro, where he is undergoing hard labour. It now appears that he is a fisherman who lived not far from Hakodate, and for a consideration took the place of the real culprit, a certain rich man in the same village. He receives thirty yen a month during his imprisonment for being another man's substitute. The prisoner, it is said, made a false confession and on this confession was convicted. Meanwhile the real offender is providing for the wants of his deputy's family.

It is no cause for wonder that serious pressure is felt in monetary circles at the close of the year, says the *Hochi*. The unprecedented increase of convertible notes proves how extensive has been the demand for capital during the past few days. On the 18th inst. the bills presented for discount at the Bank of Japan amounted to 1,840,000 pen, loans issued having increased by 630,000 pen over the pre-vious week. The Bank of Japan was therefore obliged in resort ill another over-issue of notes The actual amount on the 18th reached 203 million yen, a sum never before known at the end of the year. On the soth it had risen to about 204 millions.

The trade report of the Finance Department published in the Mainicht shows the exports and imports for November aggregated 15,556,397 yen and 22,261,966 yen respectively, the excess of imports over exports being 6,705.569 yen. Such large imports as this 22 millions in a single month have never been known before. Comparing the volume of foreign trade from January to November this year with that of last year, the following figures are obtained :-

	<b>3897.</b> Yen.		2896. Yen.
Exports			
Imports	200,130,004	*******	157,553.052
Total	346,989,170	*******	260,624,606

The rate of increase compared with the previous year is therefore 42.5 per cent. for exports

and 27 per cent for imports.

Teunoda, Nippon, Osaka, Chuo, and Azuma. Business is chiefly carried on with a definite number of customers who act as middlemen between the manufacturers and the small retail dealers. The retail price of a cask (380 pounds) during aummer was seven yen, but it fell to five or six yen before October, and large orders have been filled at less than five yen. largest demand was made in the spring by the Railway Bureau, the quantity ordered being roo,000 casks. Next came orders from the Hokuyetsu Railway Company, which were scarcely less considerable in volume. The industry, on the whole, develops year by year. But the import of foreign cement during this year changed the general aspect of the home market, as the quality of the imported article was very good. The total imports for this year are said to have reached 100,000 casks.

The Hochi states that in spite of the general depression in trade applications are constantly being received by the Government with regard to the organisation of new joint stock companies. Investigations show that the month in which the number of such applications was the smallest was September. In many respects however, these applications present very dif-ferent features. Formerly the capital applied for generally exceeded 100,000 yen, but at pre-sent it ranges in most cases from 10,000 yen to 100,000 yes, the latter limit being seldom passed. The principal aim of such companies in former times was to engage in new enterprises, the foundations of which had to be built. But the present craze seems to reach towards converting into companies businesses hitherto carried on by individuals or smaller concerns. Another new feature is that while most of the applications for the organisation of joint stock companies used formerly to come from the Kwausai districts, they now arise in localities north east of Shizuoka.

According to the Nippon, a meeting of the Match Manufacturers' Guild was held a few days ago in the foreign settlement, Osaka. A report was read stating that since Chinamen have begun to print Japanese trade marks and labels in Canton, which they affix to matches manufactured in China, the reputation of Japanese matches has been seriously impaired. A representation was made to the Agricultural and Commercial Department urging that steps should be taken to prevent the Chinese from indulging in these frauds, and a reply was received to the effect that nothing could be done. A committee was appointed to investigate the matter, and communications were opened with the idea of establishing sole agencies in Shanghai, Hongkong, Amoy, Singapore and Bombay, to take charge of all interests connected with the export trade. Commissioners were also chosen in Osaka and Kobe to be despatched to foreign countries for the purpose of studying the actual condition in the match trade. These persons will start early next spring.

The Fomiuri states that Kuroda Riuliei, an engineer employed by Tokyo Gas Company in the capacity of foreman of the 2nd workship, shot himself the other day. The rash act was committed on account of his baving made some miscalculation in regard to a plan for the extension of the Company's works. It seems that alterations having have made in the plane, additional expenses of 14,000 yes were necessitated, and the engineer feeling this to be a dishonour, resolved to clear himself of his professional responsibility by death. "In this generation of corruption and immorality," the satisfactory. He Yomiuri adds, "a man possessing such a noble his rearing house. spirit is seldom to be found. His deed may draw upon him the censure of shallow, siderate thinkers, but to us his suicide renders Excessolimports. 53,271,459 ....... 54,483,298 him worthy to be called a man.

> On the 25th instant, loans issued by the Bank of Japan amounted to over three million ven,

augmenting the volume of the Bank's paper, Subsequently the demand for loans increased considerably. Discounted foreign bills for the Specie Bank exceeded seven million ven, so that the issue of notes above legal limit is now expected to reach 40 millions. Permission was obtained from the authorities on the 27th inst., however, to issue notes to the amount of 45 millions. The total issue of loans by the Nippon Ginko for this period of the year will not fall short of 100 millions, showing an increase of 15 million yen over the previous year.

The Agricultural and Commercial Department recently issued a notice to the effect that silver, copper, antimony, sulphide of autimony, and coal, upon which taxes are to be levied, will be assessed as follows :- Gold, 4.89 ven per momme; ailver, 0.14 yen; copper, 25.30 yen per picul; autimony, 15.41 pen; aulphide of antimony, 926 pen.—The assessment of coal per 10,000 catties is fixed as follows:—

	Lump.	Smalls.	Dust.
Place of production.	Yen.	Yen.	Yen.
Tokagori, Fukuok- Prefecture	11.34	15.89	16.58
Kurate, Ficknoks Prefecture	23-3*	82.04	19.63

The assessment of anthracite ranges from 15.34 yen, in 23.17 yen, Wakayama being the highest. Other mineral products not scheduled above, will be taxed in accordance with their market value.

According to the Jiii, banks incorporated for the exchange of notes have hitherto been 18. Twelve other banks have now been added to the list, with the proviso that 10,000 yen in public bonds must be deposited by each according to the regulations of the corporation.

The Jiji states that kerosene oil imported into Kobe from January to December this year was as follows:—"Pine" brand, 1.657,39s cases; "Anchor," 123,789 cases; Sumatra, 161,642 cases; Chester, 147,904 cases; Tank, 323,768 CABOS.

Statistics compiled by the Saké Brewers' Corporation in Osaka and published in the Oraka Asahi show that the amount of sale in Osaka on the 1st December was 13,747 koku, in Kyoto 21,516 koku, in Nishihomiya 16,500 koku, in Nada Higashigo 9,762 toku, in Nakago 17,688 koku, in Nishigo 14.905 koku, and in Yeikajima 12,600 koku.

Mr. Yokota Katauzo, of Tokushima prefecture, remarks the Nippon, early distinguished him-selfas a zealous sericulturist. He deplored the shiftless nature of persons who took part in the silk industry, which was then generally carried on as an additional occupation by farmers. Accordingly be devoted several years to perfecting better processes for producing silk and eventually found himself reduced to extreme poverty. His efforts, however, were finally crowned with success, for he discovered a fundamental secret of the industry. He saw that the successful development of silk worms depended upon a regular supply of moisture and the retention of heat at a certain temperature. He accordingly planned a special rearing house for moths, and his system was put to the test seven times in Kami, Saitama prefecture, within three months-May to July-and each time proved satisfactory. He has obtained a patent for

In Okumai, Kochi prefecture, lives a fishmonger named Fukuda Kazutaro, whose wife has been ill since last year. Her sufferings rendered her so laan and ghastly that she pre-sented the appearance of a denizen of another world than this. A few days ago, asserts the There are now sine cement factories in the empire, according to the Hochi. They are called the Hokkaido, Asano, Mikawa, Aichi, of stock seems to have been the chief factor in son with a sword, and stabbing two daughters

The Finance Department has resolved to issue, twice a year, a trade report for Formosa. The returns for the first hall of this year were lately published as follows :- Exports 5,272,066 yen ; imports, 6,446,982 yen; excess of imports 1,174,915 yen; export of builtion, 174,654 yen; imports, 2,495,233 yen; excess of imports, 2,320,579 yen. Bullion exported was entirely silver but imports included 3,533 yen of gold. The ports where imports and exports are undertaken are eleven in number, but those which realized over one million yes in trade were Tameni and Anping only.

#### CHRISTMAS DAY.

A brilliant sun, flooding an almost cloudless aky, characterised Christmas Day in Yokohama: but this notwithstanding the air was rather shrewd and nipping. Skating was possible on the Y. S. C. pond under the Bluff in the early morning, and several enthusians ensured the corated, having a cosy, Christmassy appearance, though, owing to the big fires and gas, the atmosphere was distressing to a degree.

At one o'clock on Christmas Day 15 poor men sat down m the Seaman's Mission to a bountifully supplied table, with grateful feelings towards those who, out of their abundance, had remembered their need. At six o'clock over sixty seamen partook of the annual Christmas dinner provided chiefly by ladies of the community. After dinners varied programme of vocal and instrumental music was carried out to the satisfaction of all present. Before separating the usual three cheers were given for those who provided the capital enter-

A game between scratch teams of eight a side, captained by Messrs, W. Goddard and H. S. Goddard respectively, was played on the after-noon of Christmas Day. During the first half, H. S. Goddard's team got the best of the play by two goals to nil, one of the goals being ac-cidentally kicked through by W. Goddard's goal, Morse. On changing ends, the latter eight also scored two goals, but just before time was called H. S. Goddard's forwards got the ball through again and the game ended with three goals to H. S. Goddard and two to W. Goddard's side. Another game is to be played this afternoon, kick off at 3 o'clock.

#### FIRES IN YOKOHAMA.

On the 23rd ult, at 6 p.m. fire broke out in a house occupied by Ikari Konnejo, porcelain dealer, at No. 1, Ichome, Bandai-cho, Yokohama, and four houses were destroyed. The origin of the fire was accidental. Another fire occurred on Friday morning at 5 o'clock in a house occupied by a farmer named Koiwai Ihei, No. 1,837. Ota, the flames being limited to the one house, which, was destroyed.

Fire broke out on Tuesday morning at about 2.30, in a house occupied by one Otani Sannosuke, in 11, Chojamachi Ichome, Yokohama, Five or six small houses were burned to the ground and several others more or less damaged, before the flames were got under control by the police brigade at about 3.30. The origin of the fire has not yet been discovered.

About a quarter past six on Tuesday evening fire broke out in a coach-house in Morton's stable yard, on No. 118, Settlement. As soon as possible after the alarm was rung. Superintendent Morgin, with a party of men, one of the steam engines and a stand

when the eldest sou sprang upon his mother at No. 107 already on the spot with stand pipe and wrested the weapon away from her. and hose, as well as some men of the Police Brigade. The blaze was very soon extinguished without the assistance of the en-gine. The fire started in a corner of the coach house, apparently from the outside, where it was evident that the woodwork had been saturated with kerosene, and there can be little doubt that the fire was the result of a deliberate attempt in burn down the premises by some person outside. Fortunately the firemen were so promptly on the apot that the fire was ex-tinguished before it had a chance of obtaining a hold, and very little damage was done, but it shows that incendiaries are at work in the town and that extra precautions are necessary. With the present system of police patrol-or rather absence of patrol—little protection can be ex-pected from that source.

#### OLD SHRINES AND TREASURES.

On the 15th instant the following by-laws for the enforcement of Regulations concerning the preservation of old shrines and temples were issued under Imperial Ordinance No. 446 :---

Art, I .- When national treasures are exhibited museum in accordance with Article the Regulations drawn up for the preservation of

old shrines and temples, an overseer shall be appointed to take charge of such treasures.

The overseer shall, subject to the Minister for Home Affairs, be responsible for all matters relating to the preservation of the treasures.

Art. II .- The overseer of national treasures in a Government museum shall be appointed from among officials of sonin rank connected with the institution.

In the case of public museums the superintendent shall perform the duty of an overseer.

Art. III .- The overseer is required to deposit a certain sum of money as personal security, in accordance with Imperial Notification No. 60 of the 22nd year of Meiji and notification No. 4 of the 23rd year.

Act. IV .- When treasures are lost or damaged either purposely or through perfunctoriness, the overseer shall be held responsible.

Art. V.—Annual subsidies will be granted in accordance with Article VIII, of the Old Shrines accordance with Article VIII, of the Old Shrines and Temples Preservation Law. They will range from two yan to fifty yan for each object, and the amount shall be determined by the Minister, of Home Affairs. If any object is found to be of special value or importance, the Minister for Home Affairs may, upon making enquiries of the society organised for the preservation of old shrines and temples, creat a subsidie of aver to wee here. and temples, grant a subsidy of over 50 year but

helow 100 yen.

Art. VI.—The expenses incurred in packing or transporting treasures for exhibition shall be defrayed by the museum in which they are ex-

defrayed by the museum in which they are exhibited. This provision will hald equally good in case of returning the same to the owner.

Art. VII.—When compensation is claimed in accordance with Article XV. of the Old Shrines and Temples Preservation Law, the Minister for Home Affairs shall estimate the amount of compensation, and submit the question for discussion by the Council organised for the preservation of temples.

If the amount determined by the Council differs from the estimate presented by the Home Mini-ster, the latter shalf cause the two amounts to be

ster, the latter shall cause the two amounts to be added together and then take the half of the total. Art. VIII.—Rules other than these which may be necessary for the enforcement of the Old Shrines and Temples Preservation Law shall be determined by the Home Minister.

#### THE LATE MRS. SQUIRE.

We are asked by Commander Squire to express his heartfelt thanks to all who attended the funeral of the late Mrs. Squire, and in other ways showed their kind sympathy on the occasion of her death and in connexion with her illness.

London papers alleged on December 1st, that China had agreed to cede to England a strip of territory near Hongkong, and all the surroundpipe and hose reel, proceeded to the scene, ing islands—Mirs Bay, we presume—in order to where they found a detachment from the enable England to fortify them securely, and to branch station of the Yokohama Fire Brigade increase the garrison at Hongkong.

#### KOREAN NOTES.

The citizens of Soul pay no taxes. Whatever be the area of a man's property or the extent of his frontage, he is not required to contribute a cent towards the repair of the streets, the sanitation of the city, or any public purpose. The provin-cials find all the money required for such objects. It is a system conceived in the interests of the officials of the central government, who find it work very satisfactorily.

The provincial Korean is said by recent travellers to be much better off than he is generally supposed to be. He has a considerable quantity of hard cash which he takes infinite pains to conceal from official eyes. His speciality in the way of a strong room during the winter is a hole in the ground in which he places his store of coins. Water is then poured in and the coins become embedded in a solid mass of ice. The process is completed as each addition is made to the store, and finally an ice safe results which defies thieves.

The Peddlars Guild and the Righteous Army are acquiring something of their old popularity and influence in Korea. They are both among the very worst abuses of ante-reform days. In some directions, at all events, Korea is losing whatever progress she made after the war between Japan and China.

The Söul-Chemulpo Railway is making rapid progress. About two thousand navvies are said to be working on the line, and it is expected that the grading will be finished in a couple of months.

The Emperor of Japan sent an autograph letter of condolence to the King of Korea on the occasion of the State funeral of the late Queen, which was celebrated with so much pomp recently.

All the Departments in Soul are now in telephonic connexion with the Palace.

#### CHINESE NOTES.

The separation of the offices of Chief Justice and Consul-General has now taken place in Shanghai, Mr. G. Jamieson, C.M.G. being the new Consul-General.

Chang Ju-mei is the new Governor of Shan-tung. He took over the seals of office on the asticustant. The question is, will be be the last Chinese Governor of that province.

The commissioners appointed to negotiate with the German Representative in Paking are Prince Ching and their Excellencies Li Hung-chang and Chang Ying-huan.

Talk is again heard of the dismissal of the German officers at Woosung.

Shanghai's scarcity of silver lately received some relief by the importation of £135,000 worth in the Satsuma Maru and £100,000 worth in the Coptic.

We extract the following paragraphs from the Report of the Zien-tsu-kui, or anti-foot-binding association :-

The keynote of this report must be thankfulness. We have not done so much but what we have done has been greatly prospered and we have so far succeeded beyond our most ardent hopes, when with some fear and trembling we formed ourselves into a Society on the 2nd of April, 1895. People doubted then whether it were worth while to form a Society to attempt such a Herculean task—when ther it were not a case of the agg beating against the rock. And many were the attempts made to turn us into ridicule. Now not only Englishmen, like the gentleman who at both of our public mee-t

ings has so kindly taken the chair for us, appland, but Chinese Itterati are writing anti-foot binding tracts, a Chinese Viceroy is circulating one with a preface of his own; a descendant of Confucius is collating and distributing our publications, the leading Chinese periodical is a dvocating our cause, an influential Chinese Anti-footbinding Society is established in Shanghai, Pu Chen Tsu Hui, Bubbling Well Road, and best of all, Chinese fadies of distinction are coming forward to found a school for girls of the upper classes, the first rule of which is that all girls who enter it must be notoned. We must not flatter ourselves that all of this has been that all girls who enter it must be indomed. We must not flatter ourselves that all of this has been brought about by our exertions, yet again and again we find Chinese men coming forward, because they have read our publications. Mr. Chao, the Suilu Hsioyuan, whose appeal has been the most largely circulated of all our tracts, only wrote it when, just after reading some of our literature, his heart was wring by the wailings of his little daughter whose feet were then beginning to be bound. (They are long ago unbound.) Again King Hui-chung, a descendant of Confucers, wrote tast Julys—"I have always had my unquiet thoughts about footbinding, and felt pity for the many sufferers. Yet I could not venture to say it publicly. Now there are happily certain benevolent gentler men and virtuous daughters of ability, wise daught-Now there are happily certain benevolent gentlemen and virtuous daughters of ability, wise daughters from loreign lands, who have initiated a truly noble enterprise. They have addressed our women in animated exhortations and founded a Society for the prohibition of foot-binding. They sim at extinguishing a permiciate custom." He was compiling a book from the best of our statements in order to circulate it, and adds:—"All who are interested in social questions, important in our time, will, I am sure, be glad to see this enterprise advancing." In the West of China Mr. Chao has stated an Anti-Root-binding Society at Snifu, Mr. Mei another in Chungking, and his brother again another at Chanchow, all led and his brother again another at Chanchow, all led in part at least by our efforts. There may be many others in this vast empire of which we have not yet beard.

At Kinking the American Methodists can show about fifty Chinese girls stepping firmly on their retty feet, not to speak of women whom they have pretty feet, not to speak of women whom they have induced to upbind, whilst from Chinkiang our entursiastic local Secretary writes:—"The growth of the anti-foot-binding sentiment within the last six years has been manyellous, and I have never felt more convinced about anything than that the hand of the Lord was in this movement. It is but a short time since it was a taboued subject even amongst Christians and efforts to create a sentiment against the custom in the native Clauch were regarded with indifference, while as for taking any action on the subject that was out of all reason! Unbinding the feet of elderly women was considered worse then preposterous—an absolute crucity.

"All this is changed. Action has been taken and a rule enacted that no preacher shall marry a bound-footed woman nor shall be hind his daughters' feet nor betroth his sons to bound-fontramen. A sentiment sufficient to bring forth the afmesaid rule has not only been created but provision has been made to keep it alive and in-creasingly faithful by an annual mass meeting held in connection with the yearly conferences. The initiative in all this was largely due to the natives themselves."

A memorial to the Emperor of China was drawn up by Dr. Fryer, and signed by a thousand foreign ladies residing in the East and on behalf of 15,000 women of the International Union of Europe and America. Dr. Fryer wote: —"It is copied out on gold paper, and mounted in the most testeful and becoming way that money and native talent could becoming way that money and native talent could command. It is plain but good work, and in in command. It is plain but good work, and in initiself a master-piece of Chinese composition, caligraphy, and mounting. The writing is on eight pages, and it folds up in a space of 5\frac{1}{2} \times 10\frac{1}{2} + \frac{1}{2} Emperor, and that they would therefore prefer to Emperor, and that they would therefore prefer to keep it on their shelves. On Colonel Denlay bringing further pressure to hear he seems to have been successful in getting the memorial duly presented, for although no official notice of this has yet reached our Society a Chinese gentlemen says he himself has seen the foreign ladies, memorial in the Imperial Palace, which shows that the Emperor has seen it. He also adds that the Emperor has seen it. He also adds that he knows that the Emperor disapproves of

foot-binding.

Are any Chinese women's feet unbound in consequence of the exertions of foreigners? Yes!

But no more than European ladies are they going

bound in missionary schools at Amny, Hangchow, and all up and down the river. And at parties ladies, who as far as we know are untouched by Christian infliences, yet show with pride their soft-forted little girls, saying, "My old people bound my feet, but I will never bind hers." It is the apper circles of China who are giving up binding; the man un the street yet binds, and loves bound feet, just as in Singapore all the Straits-born Chinese have cast off binding, if it be not the very poorest of the poor. Whilst Hongkong has never punished footbinding under the Act for the prevention of cruelty to children the practice the prevention of criefly to children the practice is already greatly diminishing there. There are, however, doubters, if you wish to know, whether it is worth while, quite worth while, to give a small contribution, yet millions of little gibs suffering such tortine as we hope you never felt, from this hideous, cruel custom, for the Chinese proverb still holds true;—"\* For each pair of small feet there have the and the store of the force of the contribution of the chinese of the contribution of the chinese proverbers have been stored on the force full of term."

there has been shed a whole hong full of tears."
There is much yet to do, millions of suffering little ones yet to relieve, but we are thankful for the feeling aheady aroused. It is feeling that

"A despatch from Peking," says the N.-C. Daily News, " states that two Djiggits, or Cossack couriers, in charge of Russian mail matter for the Legation at the capital, were attacked by a gang of bandits on the way from T'ungchou to Peking in broad daylight. The Cossacks open-ed fire upon their assailants and wounded two, whereupon the rest decamped. It appeared that the bandits had been on the track of a Tientsin trader who had with him several boxes of sycee. The man learning at Tungchou that he was tracked, escaped by a ruse, and the robbers seeing the Cossacks' cart mistook it for their intended victim's vehicle, with the above result. The #pao of the ward where the attempted robbery took place failed to report the affair to his superior, the sub-prefect of T'ungchon, who was naturally ignorant of the whole thing until the Taungli Yamen, which had been informed by the members of the Russian Legation, wrote to the Taotai and ordered the punishment of the local officials. The result was that the tipas received 1,000 blows and the sub-prefect had a black mark recorded against him."

#### NEWS OF THE WEEK.

Three German coasting vessels, the Swatew, Quarta, and Loyal, have been chartered by the German Government for one year for the parpose of conveying coals and stores to the navy and troops at Kiso chen.

It is reported that the Russian Marine Department has placed orders with firms on the Tyne for two 38-knot torpedo-bosts. Each boat will be propelled by 12 screws-three screws to a

The Reverend Mother of the Convent, Yokohama, presents the Compliments of the Season with her best thanks to all the kind anbacribers who sent her the sum of \$228 towards the Christman treat for her many poor orphans.

The Pacific Cable company of New York announces that its proposed cable will connect San Francisco with the Hawaiian islands near Honolulu, Japan and Australasia. The surveys for the cable between the coast of California and the Hawaiian islands are highly satisfactory, and arrangements are being made for the establishment of that section within eighteen months.

The Macao Independente claims that in the partition of China Portugal should have as her share at least the whole of the island of which Macao forms part. Our contemporary urges the importance of Portugal's being permanently represented at Peking, and, in view of the present situation, recommends that the Governor of Macao, who is also Minister to China, should at once be ordered to Peking or that another Minister should be appointed.

It is said that Dr. Alexander Edington, bacteriologist to the Cape of Good Hope Governto walk basefoot through the streets to convince doubters. And what is far more important, numbers of little girls remain une ed by rinderpest, when treated with citric acid little to impose a tax on motor cars, the tax ap-

and for such a time as to insure the death of the contagium, will, when injected, immunize all animals exposed to infection. Dr. Edington has practiced his protective injection on several large herds, and always with satisfactory results, the largest mortality having been a little over 3 per cent, or eight animals in a herd of 234.

Typhoid fever, we regret to say, is very prevalent in Yokohama. There are several cases in Japanese town and two foreign residents who entered the General Hospital on the Bluff this week are thought to be sickening for it. Diphtheria is also very rife among the Japanese in Yokobama,

Of the representatives of the payers of the highest amount of national taxes who sit in the present Parliament, Mr. Nozaki Bukichi, of Okayama Prefecture, is reported by the Yomiuri to occupy the most conspicuous position, his annual payments amounting to 8,707 yes. Next comes Mr. Sumitomo Kichizayemon, of Osaka, with 6,787 yen. He is followed by Mr. Igarashi Jinzo, of Niigata, who pays 4,102 yen. Mr. Kayeda, of Kagoshima, is represented as ranking lowest, paying but 520 yen annually.

The French Chamber of Deputies is considering a project for making Paris a scaport by a caust from Rouen to Paris along the valley of the Seine. It will be about 20 feet deep, and serve for all vessels which arrive at Rouen. It will end in a large dock at Clichy, Paris, and the engineer, M. Bouquet de la Grye, estimates the cost at 150 million francs, or six millions sterling. He proposes to carry out the scheme by a public company with a concession of 99 years, and to finish the work for the great Exhibition of 1000 if he is allowed to begin at once.

The great "meteorite" which Lieutenant Peary brought home from Greenland, but which Namen regards as of terrestrial, not celestial, Namen regards as of terrestriat, not celestiat, origin, is a block of a dull blue colour, weighing from 50 to 90 tons according to various estimates. It is about 10 feet long by 8 feet wide and 6 feet thick. Analysis shows it to consist of 92 per cent. of iron, and 8 per cent. of nickel. Even if the block proves a bogus meteorite, it is still interesting as a geological specimen, and, moreover, Lientenant Peary did not go so far north merely to bring it home, but also to prepare for his coming attempt to reach the Pole.

Speaking at Dublin recently, Lord Charles Beresford said Irishmen were not understood properly by Englishmen. But of one thing there was no doubt—the military capability of Irishmen. Wellington, Wolseley, Roberts, Kit-chener, and Sir George White were names well known in England on account of the military prowess they had displayed. Again, in the famous charge of the Gordon Highlanders at Dargai heights, it was curious to find that among the killed were many Irish names, while the piper who continued playing after he was shot through the legs rejoiced in the Irish name of Findlater. That man was recommended for the Victoria Cross, and it was hoped that he would get it.

Matk Twain's new book is graced with more maxims from Pudd'uhead Wilson's notebook; Here are three :--

"Grief can take care of itself; but to get full value of a joy you must have somebody to divide

"Man is the only animal that blushes. Or needs to,"

"Everything human is pathetic. The secret source of humour itself is not joy, but sorrow. There is no humour in beaven."

The last gives us a glimpse of the Mark Twain whom so few persons know-the Mark Twain who once gave it - his chief ambition to write a new life of Christ.

The French have a decidedly practical way of looking at new methods of locomotion. No sooner was the bicycle established than a large revenue-producing tax was imposed on it, and parently varying in different parts, according to the density of the population. In the large centres of population the tax will be somewhat a serious item, and in Paris it amounts III \$12 on vehicles for two passengers and \$20 on larger vehicles. It is curious that at the same time that this tax is being imposed it is also being proposed that aubsidies should be granted to public services of motor cars.

The troubles of Lieutenant M. J. O'Brien of the Romeyn scandal and other notoriety, the San Francisco Chronicle, have finally led to his resignation from the Army. O'Brien was one of the brightest men in his class at West Point, and on that account, and because of professional services, he was sent to Japan to represent the Government during the late war. Peremptorily recalled from that sphere of duty and interrupted in the writing of his report at Washington by orders to rejoin his company, nothing farther was heard of him until the Romeyn affair occurred. Lately he was absent from his command a week without leave and this made a court-martial so imminent that he chose to go back to private life. He now in-tends to go in the Far East as a war-correspondent, should the troubles there lead to the outbreak of hostilities.

"The completion of the trans-Siberian Railways," says an exchange, "seems likely to be deferred to a much later date than was at one time supposed. From Vladivostock to Khabarovks, a distance of something under 500 miles. the line is open; but the rolling-stock is very poor, and the traffic is worked very slowly. The section from Khabarovka to Stretensk, a distance of 1,340 miles, has not yet been touched. From Stretensk to Lake Baikal the line is open and the trains are transported across Lake Baikal in the summer on two large ferry steamers built by Armstrongs. In Western Siberia there are still two large gaps in the line. There is some doubt now whether the line will be carried through Manchuria after all. The original surveyors reported that as the country at the western end was mostly mplain, the construction there would be very easy; but it is found now that this plain is full of swamps, and is intersect ed by rivers whose beds are very capricious, and a great part of the line will have to be carried on bridges, whose construction will be excessively costly; while at the eastern end there is some very heavy tunnelling. It is considered doubtful now whether the line can be completed in ten years from the present time.

#### CORRESPONDENCE.

#### "JAPANESE PROVERBS AND IDIOMS."

TO THE EDITOR OF THE "TAPAN MAIL."

SIR,—I have to thank the author of the review in your issue of yesterday for his valuable additions to my "Sprichwörter," and also for the apprecia-tive remarks he has bestowed on the collection. In some cases; it is true, the instances cited in the review were no novelties to me, but had already found their place in the collection, although in a slightly different form, as in the case of hyakuryō no kata ni amigasa ikkai (in my collection as senryō no kata ui kasa ikkai) ; or of inyōshi no mi no ne shi rasu (in my callection as onyōshi mi no ne shirazu; onyōshi being the more usual pronunciation of 陰陽節) ; homuru hito wa kau tameshi nashi (in my collection in the completer form, shinamono mo kometaru hito ni kau tameshi nashi); hito no takanonetaria nito ni nau tamishi nashi; into no takara no kazoeri (in uny collection as foneri no takara no kazoeri (in uny collection as foneri no takara no kazoeri ye-which form is perhaps more in use than the other). In Japanese proverby synonyms likm hito and tonari, or iro and koi are sometimes interchangeable, and it has been my special care to point out the cases where such interchange can take place; that a few such cases should have escaped my attention is perhaps, after all, not so much to be wondered at. As to hilo wa mikake mi yaram mono, which also is cited as missing, it will be found in the collection under 694. But for all that I most willingly acknowledge the fact that the majority of instances was unknown to me, and that by offering them the reviewer has laid

how could this first attempt to bring out a collection of Japanese proverbs and figurative expressions, be reasonably expected in be anything like exhaustive? For it ought to be well borne in mind that the Japanese themselves have nothing of the kind, and that the collection in question represents indeed the very first attempt to give, if not an exhaustive, at least a more or less compre-hensive collection of Japanese proverbs and idious, To have delayed publishing till the collection was quite complete and perfect, would have been very much the same as never to publish it at all. The only merit the collection claims is to have materially facilitated the work of future collectors by clearing the ground. I thought indeed that in the preface of the "Sprichwörter," especially on the preface of the "Sprichworter," especially on p. VII., I had already said all that was necessary to remove any doubt as to the question whether the collection was intended to be exhaustive or not.

Yours sincerely, P. EHMANN. Tokyo, 17th December, 1897.

It is to its observed that the first four proverbs referred to by Professor Ehmann as being in bis collection, have not yet been published by him, the second volume of his book taking as only to "K." We, of course, criticized what has been actually published only. With regard to His to we mixels mi green means, we have to myologine; it escaped our attention. For the rest, we have only to repeat our admiration for Mr. Ehmann's excellent work,—Eb., f.M.]

#### VANDALISM.

TO THE EDITOR OF THE " JAPAN MAIL!

IO THE EDITOR OF THE JAPAN MALE.

SIR,—I write to you concerning an abuse which, it seems to me, cries for redress. This is not anything of a political, or the like kind, but has reference to the ruthless, harbarons, truly inexcusable and even criminal defacement of the scenery of this district of Japan—a string of lakes on the this district of Japan—a string of lakes on the side of Fuji-san just opposits to Hakone, the finest scenery that I have seen in the country after having travelled thousands of miles in the interior; and travened into sators of miles in the intertar; and destined, I believe, in time, to be the great summer resort of the main island of Japan—defacement due to the reckless felling of trees now going on. Defacement which will become destruction, so far as beauty of landscape is concerned, unless a stop be put the denudation of the plains and supplies a destroy in the later. mountain sides before it is too late.
Until the Restoration and nome time after that,

when the inhabitants learned that the old check had been relaxed, the trees were most carefully re-spected, but since then cutting has become more

and more reckless, till now it goes on in a way that would scarcely be believed.

The finest trees—those forming features of the landscape—are cut down without besitation for a few feet of the timber, and the rest is left to rot on the ground. It may scarcely seem credible, but it is a fact that I have known a man in this district to cut down a fine cliestinit tree to save himself the trouble of climbing for the nata, or obtaining them in any other way. When asked what he would in any other way. When saked what he would do for chesnuts next year if all behaved like him, he replied that "he did not know where he would be next year, or if he would be dead or alive." In na case are young trees planted to replace a mature tree cut down, whilst, on the other hand, young trees, growing naturally, are untilessly sacrificed if it is thought convenient. Thus a young himski is cut down for every few bearing poles made, and the manufacture of such poles is one of the industries of the district.

What makes the thing worse than it would otherwise be is that most of this wood is sloten, all but a small part of the forest belonging to the Imperial Household Department.

About two years ago an attempt, in which I took some part, was made to have this state of affairs altered. Some half-a dozen or so of men of the Motosu District were arrested and punished. This put a partial check to the thieving for some little time, but now it is carried on more impudently than ever. Even as I write, looking over Shojitake, I see men cutting down trees in the forest of the Imperial Household Department close by the water's edge, whilst boat load after load load of the wood is carried across the lake to the village having aheady been blocked out for the making o bearing poles, clogs (geta), chopsticks (hashi), &c There is no attempt at concealment, thing is carried on as if it were a legitimate industry.

Now the forest would undoubtedly be none the worse for thinning if the selection of trees were judiciously carried out, and if—as is, I believe, in accordance with the law—four saplings were planted for every mature tree felled, the process might go on indefinitely.

The people absolutely need wood for at least some purposes, and I do not think that the poor should be made to suffer even for the preservation of fine

cut discriminately than in cut recklessly, and that the cost of the saptings would be a mere trifle; another is that people are at present killing the goose that lays the golden eggs, inasmuch as that, if things go on as at present, there will be no tree for the next generation to fell, either at a fearable distance for the hext generation to fell, either at a

feasable distance from the villages or from sites where new villages would be built.

I made a series of photographs of these parts about 4 years ago, generally taking advantage of some of the fine old trees to form loregrounds or

some of the fine old trees to form foregrounds or framing for the magnificent views of Fuji-san that are in be had from so many points in these districts. In the case of many of these it would now his impossible to tell where they were taken from. What I have said applies to all the lake districts, but the greatest sinners are the people of Motoso, where the landscape has been entirely changed during the past four years. The people of Shoji were quite as bad till a few years back, when they greatly reduced the amount of felling by the water's edge, and carried their depredations into the interior of the forest, where the defacement of the scenery is not so patent.

facement of the scenery is not so patent.

What are the proper steps to be taken to put a stop to this most shameful state of affairs I do not know, but surely if the case comes to the knowledge of the public something will be done to preserve to the country one of the most beautiful districts of lake and virgin forest to be found in any part of the world.

I remain, Sir, yours &c., W. K. BURTON. Shoji, Yamanashi-ken, Dec. 16th, 1897.

#### FOOTPATHS AT MIVANOSHITA.

TO THE EDITOR OF THE " JAPAN MALL."

SiR,-Will you kindly allow me's small space in order to suggest the desirability of taking some steps for opening up some of the less fre-quented footpaths in the neighbourhood of Miya-noshits? The same thing was done at Kanuzawa during the last two mammers with excellent results.

and at very small expense.

Perhaps the finest walk in the neighbourhood of Pethaps the mices was in the neighbourhood of Miyanoshita is from the top of the Otome-toge along the extreme ridge of the hills to the Fukaratoge at the end of the Hakone lake, crossing the Nagao-toge about midway. The traces of a path are still visible here and there, but in many places it is always in lang mans and is almost impassable, owing to long grass and thomy scrub. All that is required in to cut this down to a width of 4 or 5 feet.

Another path which requires very little more

than grass-cutting in from the Otome toge towards the summit of Kintoki zan. In one place a short the summer of the management of the finest vices in the color of the finest vices in the color of the finest vices in Kamiryana affords one of the finest views in

the neighbourhood, but the first half of the ascent from Yu-no-hana-zawa is through the longest and closest grass, and the remainder through the thorniest jungle to be found anywhere in the district.

Other routes might be suggested, such as from the teachouse mi Sengen-yama along the ridge towards Yumoto in the other direction.

Even where there is no "scrub " (expressive word!) long grass can be extremely unpleasant, especially after rain or heavy dew. I have frequently been drenched to the shoulders, where a past moon 3 or a feet wide would have let me pass through dry; and if that sort of thing is disagresable for knickerbockers, how much the worse for petricans! for petticeats!

If Mr. Yamsguchi would kindly indertake to obtain the necessary permission from the land-owners, and to set a few coolies to work, the exowners, and to set a rew cooles to work, the expense would some be defrayed by a subscription which need not exceed tyen per head, and which would, I think, be cheerfully contributed by some of the more active of his pedestrian guests. Perhaps some of his Christmas visitors will start the movement, and I, for one, shall be glad to contribute my share.

Yours tenly,

W. SILVER HALL.

A St. Petersburg correspondent telegraphs:—I understand that the Minister of Marine has ordered eleven vessels belonging to the Black Sea Squadron to be held ready, in a full-equipped state. These ships are the first-class battleships Catherbae II., Ichesmé, Georgi Pobiadonosets (Georgi the Victorious), and Tria Sviattlelia (Three Saints); the torpedo gunboats Captain Sakens, Griden, Karsarky; the training-ships Pruts, Dueste, and Beresan; and the transport Gonete. and that by the tortest was the following the series of th

#### U.S. CONSULAR COURT.

(Before P. J. Goway, Esq., Consul-General and Judge, sitting with Associates.) THURSDAY, Dac. 23RD.

HAY DAYSHS THE AMERICAN TRADING COMPANY In the U.S. Consular Court on Thursday morning, below Mr. J. F. Gowey, Consul-General and Judge, proceedings were resumed in the suit of A. Stanley Hay versus the American Trading Company. for libel, claiming damages to the amount of yen 10,000, which was adjourned from the previous day. Messes, Vacanta and H. J. Davison were the Associates. In the U.S. Consular Court on Thursday morn-

Mr. Litchfield appeared for the plaintiff and

Mr. Lowder for the defendant company.

On the re-opening of the Court, Mr. Lowder and he had one or two more questions to put to

the plaintiff.
Plaintiff—I saw a pactial statement of accounts made by the American Trading Co. in June last.

Mr. Lowder-A complete account could not be made up by the company until your statement was in, could it?—We should have fixed it up together. Interest was a small amount.

Mr. Lowder-Have not the American Trading Co. entered an action suing you for the amount

such a suit has been started.

Mr. Lowder—Are you ready and willing to pay
the amount to the Trading Co.!—Yes, when they

are ready to pay me.

Mr. Lowder—Did not you see by the statement of account of the defendant company that there

of account of the defendant company that there was nothing due to you?—No; and that's why I wanted it investigated by the Court.

Mr. Litchfield asked that the petition and answer in the suit referred to, by the American Trading Company against plaintiff, be put in.

His Honour said that certified copies of the same might be put in an exhibits.

Kobayashi Beika, called and examined by Mr. Litchfield—I am a Japanese subject. At the fall of this year I made a translation of a Japanese advantagement for Mr. Hay. It is marked 9 and the date of the journal is 22nd August 1807. (With the date of the journal is 22nd August 1897. (Wilthe date of the journal is 22nd August 1897. (Witness then read out the advertisement in Japanese.) The English version is:—"There is a person of the name of A. S. Hay; although he was formerly connected with this company, owing to dishonest conduct, this connection was severed. Although this person advertises himself on the preceding page as an agent of a pump manufacturer, he has no authority or right to do so, and if the said person again or persistently continues this dishonest conduct he will be dealt with in a suitable manner." The heading is, as near as can be translated, "Fraudulent misconcerntation with regard to an agency." At as near as can be translated, "gradulent mare representation with regard to an agency." At the buttom is "Asserican Trading Company, 28 Yokohama, 17 Kobe." The is a literal transcript of the advantisement in the Engineering Fournal

of the advantagement in the Engineering Journal of 22nd August, 1897.

Cross-examined by Mr. Lowder—On page to of the Kogyo Zasshi of 22nd August there is an advertisement purporting to be issued by R. or A. S. Hay. It is an advertisement with reference the Worthington duplex pumps. In the advertisement Mr. Hay is described as being the sole agent in Japan for these pumps, On page 8 of the same exhibit there is an advertisement in which the American Trading Co. are described as the sole agents in Japan of the Worthington Pump

Mr. Lowder then cross-examined witness several of the ideographs contained in the advertisement which contained the libel complained of Desirs means againcy, sho misrepresentation, and so fraudulent or deceitist. In this particular place it is a matter of argument whether the character so does not mean both deceitful and fraudulent. Captain Brinkley is considered to be one of the most able scholars in the Japanese language particularly in colloquial Japanese. I have Capt particularly in colloquial Japauese. I have Capt-Brinkley's new dictionary. It is considered to be an authority, through in a great number of his definitions I disagree with him. Nevertheless he is certainly an authority that I should how to; but from certain notes I have made from his dictionary I should say that it was not entirely written or cevised by himself. (Captain Brinkley's dictionary put in and referred to) The sa in the word sa-bo is the same as the word sa that I have translated as frandulent. The sa here means deceit or deception. Brinkley translates sa-bo as the word sarge is no means deceit or deception. Brinkley translates sarbo as deceptive device, strategy, etc. Turning to the word sarbyo, same page, the sarber is the same as the same as the same as Brinkley gives the meaning of sa as feigued, and the word sarbyo is feigued sickness. I understand fraud to be some deception practised on a third rand to be some deception practised on a third can teacher at the of age 9. I am now 28 years old. the head office in New York, to Mr. Hay, verbally. I did not give him a copy of the letter. The matters contained in the letter were of great importance both to the company and to Mr. Hay. I did not write to him on the subject, but interviewed him. My head office did not tell me whether the Worthington Company were negotiating with Mr. Hay for a renewal of his agency. Shortly previous to March '95 there was a change in the discounts and prices of the Worthington Company. Hearned that from the head office. I communicated the change to Mr. Hay. At the interview of May 6th, Mr. Morse, Mr. Hay and myself were present. We asked Mr. Hay certain questions about the business and whether he had written personal letters asking for, or receiving, commissions. He said so, he had not asked for or received the head office in New York, to Mr. Hay, verbally. sions. He said no, he had not asked for or received commissions and had had no personal correspondence on the subject of the conversation. subject of the conversation with limited to his re-engagement. In the conversation on May 11th the question of discounts was raised. He denied having received any remuneration. I cannot renaving received any remonstration. I cannot re-member when it was Mr. Hay showed me his sav-ings bank book. The \$3,200 commission of the Ingersol Co. was paid over to me by Mr. Hay on May 18th. I asked him for it between the 13th May 18th. I asked him for it between the 13th and the day he paid it. I told him I wanted the money. I think he first said he would get it from the bank at once; he did not object to pay it hefore the end of his agreement. The machinery on which the Ingersol commission was paid went forward through our import department. The usual practice was show on the invoice the dis-counts allowed. No trade discount had been deducted in this invoice.

deducted in this invoice.

Re-examined by Mr. Lowder—I remember receiving a letter dated Feb. 16th from the head office regarding the Ingersol order.

Clarence T. Marshal Martin, examined by Mr. Lowder—I am a British subject and have spens most of my life in Japan. I was eight years in the Local Japanese Court, and eight in the Supreme Court, Tokyo, and have made a study of Japanese. The heading dairs sasho means "false representation of agency." I think "frandulent" would be too strong. The would sasho appears in the Penal Code of Japan. I have myself revised a translation of the Penal Code. Article 214 of the Code contains the word sasho and is there translated false, in connection with name or title. In article 82 sasho appears or title. In article 82 sasho appears against five times in a line and is interpreted in all instances "false". In article 202 it also appears and is translated as "unduly." The word peans and is translated as "titudity." It is word sash is made up of two characters so and sho—to make words, or make up. Witness then quoted from Japanese writers of a hundred years ago and ancient classics on the meaning of the characters sasho, where it is used to describe "pretend" or "feign." It is not possible to translate sasho as fraudutent, it is widening the meaning too much. Sagi is the term for fraud in the Penal Code. Final cannot be expressed without sa and gi in conjunction, in the accepted form in the Courts, conjunction, in the accepted form in the Courts, schools, etc. I should translate the word fusei as improper, incorrect. It would be exaggeration to translate it dishonesty, in this context. The term fusei occurs in the official translation of the Commercial Code of Japan. It is there translated "incorrectly" in Art. 257. In Art. 278 in the Penal Code fuset is translated "illegally" and in Art. 309 "through his own fault;" in Art. 314, "by his own fault;" if I wanted to say dishonest I should say fushinjitss. In expressing strong terms in Inpanese two charwanted to say distinues I should say fusingities. In expressing strong terms in Japanese two characters are generally used. Scichobu would also represent "dishonest," I should never use fusci mexpress "dishonesty," but should was a stronger term. The translation of the advertisement shows me is correct.

Cross-examined by Mr. Lowder-In the trans Cross-examined by Mr. Lowder—In the trans-lation of the terms given I relied on the usual significations given in the dictionaries and also on the ordinary meanings. I consider Hep-burn's dictionary a good book. It is certainly old but is recognised as an anthority. It is founded mostly on Chinese. He translates fushojiki as dishunest. Those are the characters I should use oisnmest. I nose are the characters I should use if I wanted to express dishonest. I do not recall any instance of Japanese adverthing the dismissal afany employé. I never saw Gubbin's dictionary. I recognise him as an authority on the Japanese language. In combination, the character sa generally implies deceit.

At this stage the hearing was adjourned till

Middle School and afterward studied English under Dr. Ebr., Mr. Eastlake and Mr. Summers. In 1888 I passed the examination for entry into the English Law College under the Educational De-1888 I passed the examination for entry into the English Law College under the Educational Department and graduated there three or four years afterwards. I was then appointed, in 1891, a clerk in the Yokohama Court and was promoted to English interpreter and translator in 1802. I have also taught English in schools, and have made a special study of philology. I translate Dajei Sasho as "false representation of agency." If I meant to say fraudulent misrepresentation I should say dairi sagitahe kesho. I was in Court this morning when Mr. Martin gave his avidence and paid particular attention to the meanings he gave for sasho. I think the translation he gave of sasho, as false, in the Articles in the Penal Code, quige proper. I agree with him in his definition of the component parts of sasho. I don't think I could express "fraudulent" conduct without using sagi. I agree with what Mr. Martin said with reference to the classic works he quoted. He gives the ideograph sa as a wasteful lie. In sagi the ideograph sa means deceptive and gi falsehood. The distinction in Japanese between fraud and falsehood is that fraud is falsehood profitable to oneself or furtful to auother, while falsehood need not necessacily be either. I am not prepared to give a quotation from any other classics on the definition, but Di. Legge in the Confucian Ananot necessarily be either. I am not prepared to give a quotation from any other classics on the definition, but Dr. Legge in the Confucian Analects, first volume, translates "owing to the conduct of you being deceitful," the word deceitful is rendered by ss. The word fuses which occurs twice, is very indefinite and it is only from the context that one can gather what is only from the context that one can gather what is the meaning meant. In the context of the advertisement it could not be used as dishonest, except at the writer's own risk. I should translate fraudulent representation as sagi lake dairi kosho.

fraudulent representation as sagi sake dairi kosho. The Japanese equivalent of improper conduct would be fukisoks or fusei. Fusei no okonai as given by Hepburn for improper conduct is right, only we add the kona.

Cross-examined by Mr. Litchfield—The first meaning given in Hepburn's dictionary for fusei is "unjust." The word fusei appears in the Commercial Code, under bankruptcy, in Articles 257 and 1054, but I do not know whether the translation is correct.

Reexamined—After comparing the defendant's English translation of the alleged libel with the original in the Kogyo Sasho witness said—I think it is a correct translation.

it is a correct translation.

C. R. Morse, examined—I am President of the American Trading Co., the defendants in this action. About the end of last year I was in New York, and in consequence of information I obtained instructed Mr. Shaw to write a letter, dated 20th January, to Mr. Stone. I returned to Yokohama in March 1897. I instructed Mr. Stone to ask Mr. Hay whether he intended to continue with us after the expitation of his contract. I had heard in New York that he intended to leave us at the expiration of his contract. I also told Mr. Stone that I had heard Mr. Hay had asked for and received commissions from firms filling our orders. ceived commissions from firms filling our orders. I wanted to know at once if Mr. Hay meant it leave as as in that case we should have to obtain another engineer. Mr. Stone told me that Mr. Hay had stated emphatically that he had neither applied for nor received commissions from firms for which he was agent. I remember the interview which took place on 21th May with Mr. Hay. I asked him whether he had received any commissions, rebate, or salary from any of the firms which had executed our orders, and he replied "not one cent." I told him that I had heard in New York that he had written to the Worthington Co. claiming 5 per cent, commission on all orders from He said he had not made such a demand. I then rie said to had not made such a demand. Then told him I wanted a definite answer as to whether he was wilting to re-engage. He said he wanted time to communicate with his friends. I asked him if he had not already done so and he said he ad, and expected an answer by the next steamer. I sold him there were two or three steamers due and I would give him till the 1st June for his reply, on condition that he would at once write me a letter promising to give me his reply on or before the 1st June. I did not receive any replythe next day, the 1st May, and learned that Mr. Hay had gone to Tokyo. That day I learned that Mr. Hay had Tokyo, That day I learned that DIC cray new received a very large commission on our account, and I instructed Mr. Stone to withdraw the offer and I make the other ways. The Mr. Hay. I told him he had promised to write and had failed to do so. He said he had been very busy and had not thought it very important. I then referred him to our conversation on the 11th regarding commissions and rebates and asked him if what he said then was true. He said, ves. sir. I told him he was a liar, that I knew he had taken over \$3,200 commission on one transaction, and that if he did not make restitution at once we should take 33,200 commission on the transaction, and that it is did not make restitution at once we should take criminal proceedings against him. He asked me what proofs I had of what I said and refused to make any statement miles I produced proofs. At this stage the hearing was adjourned till Thesday, the 28th instant.

#### TURSDAY, DEC. 28TH.

The examination of Mr. Morse by Mr. Lowder was resumed.—In the conversation with Mr. Hay on the 13th May I said to him, "Of course you can have no further connection with us." I was then aware that he had received the \$3,200 commission from the Ingersol Co. I learnt that on the 12th May. I had already suspected that he was taking commissions, and knowing that the agent of the Ingersol Drill Co. was in Yokohama I sent for him and asked him if he could give me any for him and asked him if he could give me any information with regard to the transaction. He fold me if I could show him the invoice he could say if any commission had been paid. After looking at the invoice he said that some one had received 20 per cent, on the invoice, if we had not then Mr. Hay had. The same evening Mr. Hay came to my house, and said he must apologise for calling so fate, but as I was going away on the morrow he wanted to make an explanation. He said he thought Mr. Stone had not treated him right and therefore he had refused to make a statement before him, which he not treated him right and therefore its mad re-fused to make a statement before him, which he was now prepared to make. He said he had been mistaken in the terms of his contract, with regard to the logersol commission. I told him it was too late to discuss the terms that eight but that if he would come to the office the next mouning we would discuss the matter. I asked him if there were any other commissions paid him and he mentioned several instances of commissions paid or due. I told him I was glad he had made the statement to me or otherwise I should have left instatement to me or otherwise I should have left in-structions to prosecute bin criminally. On the next morning I told Mr. Stone that after Mr. Hay had repaid the money due I wished him to be treated as leniently as possible. Helt instructions for Mr. Wolseley to be appointed manager of the engineering department in place of Mr. Hay. I have no recollection of Mr. Hay ever stating that he considered he had a right to retain monies rehe considered he had a right to retain monies re-ceived by him for the company till the end of his agreement. He only said he did not understand his contract. An account had been made out which showed a debit balance at the end of May against Mr. Hay. But there were a number of accounts still insettled. We may recover half; but even if all were, there would be little left to the credit of Mr. Hay. The plaintiff's ad-ceptionment was first houself to my attention by vertisement was first brought to my attention by our Kobe agent, Mr. Sargeant; in consiquence I had the notice complained of as the libel inserted in the same paper. After the plaintiff's advertisement was withdrawn I gave instructions for ours to be withdrawn also.

ment was withdrawn I gave instructions for ours to be withdrawn also.

Cross-examined by Mr., Litchfield—I know we have been fairly good customers of the Worthington Pump Co. We have sold a number of their pumps. The husiness was one of the largest done under Mr. Hay's introduction. I may have asked plaintiff some questions regarding the business of the engineering department between March, when I arrived from America, and the 19th May. I don't remember Mr. Hay saying anything to me about having been ill-treated by Mr. Stone with regard to the Worthington Co., unless it was

with regard to the Worthington Co., unless it was in the conversation of the 13th May.

This closed the evidence for the defence and Mr. Lowder then addressed the Court. The defence, he said, was two fold, first, not guilty, and second, if a libel had been committed, it had been justified. The alleged libel was in the Japanese language and he submitted was an inference only, and capable of different constructions. Course then commented on the personality and evidence of the expect called by the plaintiff on the transla-tion of the alleged libel, whom he characterised as an imposter, and submitted that the aver-ment in the advertisement did not bear out the evidence claimed by the plaintiff. With regard to the heading of the advertisement, which it was admitted had been added at the which it was admitted had been added at the his objection, citing the case of Fisher v. Clement, office of the periodical, but to which it was alleged in England, 1882.

Mr. Morse's attention had been drawn after it had appeared, it was only necessary for him to point out that it was not till after the alleged held that the alleged libel was confined to the libel had appeared—on the 22nd August—that it Japanese ideographs in the Kogyo Zasshi, and the was seen by the defendants. That was after the objection was sustained.

Digitized by GOOSIC

are injured and decrived. Turning to the word sargi, on page 1152, the sa is the same character as has been referred to. Brinkley gives the equivalent of sagi as a finald, a cheat, deception. It may mean a deceptive falsehood if divided into may mean a deceptive falsehood if divided into its component ideographs. Sagi is the only word to describe fraud, used in the Japanese Courts and law books. I think that my translation of rasho as "fraudulent misrepresentation." Sagi as far as I know is the only ideograph which can be used for the English word fraud, in the Courts and Codes. To translate the words fraudulent conduct into Japanese the only word pequisable would be sagi. I have translated the word fissed of fusion. fusho, which occurs twice in the advertisement as distancest. In Brinkley's dictionary the meaning distincest. In Binkley's dictionary the meaning of fusei is given as impust, improper, bad, wicked. Hephyrn's dictionary is also considered an authority but it is somewhat out of date. Passe or fusion is given in Hephyrn's dictionary, third edition, as impust, incorrect, improper. He does not give the equivalent as dishonest. Simplistive the colloquial form of the ideographistichoku. Sicho, or in colloquial form Sho-juki, in Binkley's dictionary is given as huncet, upryth, intoltenus just. In the allegead libel the desegraph rightenus, just. In the alleged libel the idengraph choku does not appear in connection with set. With regard to the translation of the word set in the alleged libel I do not think the word is improperly translated as dishonest, notwithstanding the absence of the ideograph choku, in view of the fact that the ideographs fu sei, fu, dis, or not, and sei, honest, are generally used to describe distincest. In translating the petition if I made use of the word "improper," it ought to have been "dishouest," because the same characters fuses are used in each instance in the Japanese. If I used the term "improper" it was to avoid tautology. The only way I can translate fuser in this connection is "dis

Mr. Lowder here submitted an alternative translation of the alleged libel to witness, who after reading it continued ;—

The translation of the advertisement produced is practically a correct translation of the advertisement, with the exception that the character 3s in saska in the heading I believe should be "fraudilent" instead of "false," and where the words "improper conduct" appear, I think the words "dishouest conduct" more correct; otherwise I think the translation a correct one.

To the Court.—The heading of the advertisement made no difference in my translation of the body

of the notice.

Re-examined by Mr. Litchfield- The meaning which would be attached by Japanese to the advertisement would be that the plaintiff had done something dishouest in the service of the defendant company. The same idea could I suppose have company. The same idea could I suppose has been conveyed by another style of composition. The Court here adjourned till 2 p.m.

On the Court re-assembling after tiffin, Mr. Litchfield called Mr. Assima of the American Trading Co., with reference to the translation of the advertisement in which the alleged libel was

Mr. Asains not being present in Court a mes-senger was sent for him, and after the Court had been kept waiting for about fifteen minutes the

Asaina Asabide, examined, doposed-I am em ployed by the American Trading Co, as translator, to August this year I translated an adventisement to August the year I translated an advectisement for the company and sent it to the Kogyo Zasshi. I saw it published in the journal, I received my instructions to send it to the journal from the President of the American Trading Co. in writing in English. I gave back the writing to the company after it had been in my possession for some

Mr. Litchfield asked Mr. Lowder to produce

the copy.

Alt. Lowder declined to produce the English copy of the advertisement on the ground that the libel complained of was what appeared in the Japanese ideographs, and not what their intention was, It was on the form that the advertisement assumed after publication that the case was based,

Mr. Litchfield contended that the manuscript called for was material evidence and would show the intention of the defendants in issuing the paragraph in question, and as showing whether the instructions given by defendants were carried out in the notice as it appraised.

Mr. Lowder quoted authorities in support of

his objection, citing the case of Fisher v. Clement,

Witness, continuing-I think I made a correct ranslation of the notice given me for insertion.

translation of the notice given me for insection. Gross-examined by Mr. Lowder-Comparing the advectisment as it appeared in the Koyro Zastki with the dualt of advectisement sent by me I find no change except as to the heading, and at the end there was in the original so to mi instead of so to no as appears in the advectisement. The later is a misprint. The heading in the dualt as it left our office was "notice," or attention,—kinkokus, literally, "Respectfully inform the public."

Researchised—I saw the advectisement on page 9 soon after it was set up. The editor always sent a copy; sometimes a few days or a week after publication. In this case I don't semember how long after the publication I received a copy of the

long after the publication I received a copy of the paper. When I did receive the paper I recognised the difference in the heading. I think I called Mr. Morse's attention to the difference in the heading of the advertisement.

Re-cross-examined-I have not made a mistake. I called Mr. Morse's attention to it through Mr. Woolsey. They were both present together Woolsey, I ney were boin present together. Art. Woolsey, to whom I first spoke, took the paper to Mr. Morse's coom, and I followed.

This closed the case for the prosecution.

This closed the case for the prosecution.

Alt. Lowder said—At this stage I have an application to make. I am prepared if necessary to go on with the case and bring better evidence than is now before you to show that my clients were justified in the publication which is alleged to be a libel. It is almost impossible, however, that any evidence I can bring before you will emphasize what has already been given to you by the plaintiff himself. He complains that he has been libelied by that which is set out in the next inch. en libelied by that which is set out in the petition in Japanese ideograph and to which he attaches a particular signification. For the purposes of the application which I am now making to you, of course, the Court will accept the construction in English placed upon the ideographic libet. Ex-cepting that, the question in whether the defend-ants have gone beyond what they were entitled to do under the evidence which has been brought to do under the evidence which has been brought before the Court. I submit that the libel as it stands is fully justified in both forms. The evidence shows either if you adopt the inference of the heading of the libel as being "it audulent representation of agency," that the planning did make a fraudulent representation agency. The evidence shows that if you adopt the translation of "dishonest," as being the equivalent of fassi, that the plaintiff was dishonest, and if that is so I think that it would be a waste of time to occupy the Court with saw est, and if that is so I think that it would be a waste of time to occupy the Court with any further evidence considering that the plaintiff is not entitled to the claim that he perhaps once possessed, but has thrown away, viz., his good name. Mr. Lowder quoted from Folkard's Law of Libel and Slander, what he escribed as the law as to justification, to the effect that the defendant was prima facis justified to law and exempt from all responsibility if that which he outlisted were true, and that it would be which he published were true, and that it would be inconsistent with every sound legal principle to allow the plaintiff to recover damages for any injury to that which he either did not or could not possess. Mr. Lowder said the law was very clearly and concisely stated there and submitted to the Conet that so far as the evidence had gone the plaintiff was convicted out of his own mouth and he ask the Court to dismiss the suit without farther evidence being called.

Detrog called.

The Coart decided to continue the case and Mr. Lowder then called, W. S. Stone, who deposed—I was formerly in the employment of the American Trading Co. and was so up to the time the agreement with the plaintiff was severed. I had the making of the agreements between the American Trading Co. and the plaintiff in July, 1894, and 1895. On May 9th, 1897, I addressed a letter to the plaintiff with regard to a renewal of his agreement (rxhibit I produced and shown to witness.) I recognise this letter as the one I sent to plaintiff on May 9th, 1897. I asked in the letter for a definite reply. No reply came. On May 10th I don't think plaintiff was in Yokohama. I did not see him. On the 11th or about that date is aw him, in company with Mr. Morse. Assuming that to be the date of the conversation between plaintiff, Mr. Morse and myself, the conversation was in connection with his relations with the people ha represented in America. The Court decided to continue the case and we satisf was to connection with his relations with the people he tepresented in America. The questions put to him were as to whether he had demanded commissions or rebates from these firms and his answer was that he had not demanded not received any such commissions or rebates. Prior to that I had myself put a similar question to him. I think it was about the middle of March. Some time after that conservation I came down to the Convention of the conservation. versation I came down to the Consulate-general and made an affidavit with reference to it. The affidavit was that produced. The conversation I Original from

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

believe took place on the day of the arrival of Mr. Morse from the United States. Prior to that I had received the letter produced dated 29th June, 1897, from the American Trading Co., New York. The conversation on the 11th March was based upon the contents of that letter and what I heard upon the contents of that letter and what I heard from Mr. Morse. I asked Mr. Hay if he was carrying on any correspondence direct with the American suppliers, or if any commissions had been asked for or given to him. He replied that he had neither asked for nor received any commissions, and that nothing but correspondence with his personal friends was carried on. I made the affidavit on the 13th May because Mr. Morse was going to Korea and I might be going home, and I wanted to record the gist of my conversation with Mr. Hay on the 12th March. On or about the 11th May, Mr. Morse, Mr. Hay and myself met in the office. Mr. Morse asked Mr. Hay self met in the office. Mr. Morse asked Mr. Hay if he had asked for or received commissions from the suppliers of goods ordered by our company. He also asked plaintiff if he had carried on any direct correspondence in the matter; and to these questions Mr. Hay answered no. The next these questions Mr. Hay answered no. The next conversation was on the afternoon of the 13th when Mr. Hay returned from Tokyo. Mr. Morse, Mr. Hay and myself were present. I asked Mr. Hay III wait and see Mr. Morse. The conversation was taken up first by Mr. Morse. He taxed Mr. Hay with having received commissions. Mr. Hay said "I decline to answer any such questions unless you bring penof." I remember Mr. Morse asking Mr. Hay if he had told him the truth on the 11th Mr. Hay replied that he had told him the

Adjourned till 10 a.m. on Friday.

#### FRIDAY, DEC. 24TH.

Upon the hearing being resumed the examina-tion of the winess, Mr. W. S. Stone, by Mr. Lowder, was continued—

Lowder, was continued—
On the 13th of May I sent the letter produced to the plaintiff, cancelling the renewal of the agreement previously proposed. The letter was written before the conversation between the plaintiff, Mr. Morse and myself. On the morning of May 14th there was another conversation between Mr. Hay and myself in which the plaintiff admitted having received commissions. Plaintiff said if this matter received commissions. Faintiff said it this matter was pushed it would not only injure him but make his people at home heart-broken. He did not say then that he had a right to retain the commissions and would account for them at the end of his agreement. On that morning, the 14th May, plaintiff ment. On that morning, the 14th May, plaintiff was removed from his position of manager of the engineering department, and Mr. Wolsey was appointed to the same. Plaintiff was allowed to remain estensibly in the employ of the company from that date till the 30th June, in the interest of human charity. He was not paid his 200 yes for the morth of June, I think, and so far as I know, never asked for II. A copy of the letter dated 15th October, 1895, from the New York office of the American Trading Co. was given to plaintiff. On Dec. 6, 1895, I dictated a letter to the New York Office of the American Trading Co. with reference to the transfer of the agency of the Worthington Pump Co. (copy produced). It was not communicated to Mr. Hay, This letter of the 6th Dec. was to the effect that I had mislaid their contract and regretted it. Another letter, received from the New York ted it. Another letter, received from the New York Office, dated Dec. 14th, was communicated to Mr Hay, asw as also another dated January 3, 1896, from the New York Office. On February 12th, 1896, I wrote to the New York office of the Amerirago, I work in the New York office of the American Trading Co., accepting the agency of the Worthington Co.; this was communicated to Mr. Hay, with whom it was also discussed.

Cross-examined by Mr. Litchfield—When Mr. Hay joined the firm in 1894, he told me that he held agencies from various manufacturers in America.

rica. It was the only inducement offered to us. There was a fairly profitable business done. At the end of the 1894 agreement there was an account residered to Mr. Hay and the halance due to him was paid;—741 yen. The engineering business of the company was almost entirely conducted by the plaintiff. We worked in harmany, Mr. Hay and myself, till the change of agency of the Worthington Co., but I don't think our relations could be called cordial. As a rule I communicated the contents of the letters from the head office con-

commission of the alleged libel, and defendants were not charged with continuing the publication of the libel after the first day of its appearance. After quoting at considerable langth numerous authorities on the interpretation of the words frandulent, fraud, and ingendo, counsel submitted that he had proved that defendants were not guilt-ty of libel, the innendoes in the advertisement ty of fibel, the innendoes in the advertisement not amounting to the construction put upon them by the plaintiffs. With reference to the second defence—that of justification—counsel reviewed the evidence of Mr. Stone and Mr. Morse with regard to the plaintiff having received certain commissions which he definitely denied receipt of, and also of his having written to his brother in Philadelphia with regard to the same. That was the justification for the clause in the advertisement with reference to the connection between defendants and plaintiff having been severed. Connect then cited Campbell on been severed. Counsel then cited Campbell on Agencies, and various decisions with regard to the difference between an agent and a factor, the former of which designations applied to plaintiff's position, and as such he was under the obligation to pay in all movies received on behalf of the Company by which he was employed.

At this stage an adjournment was made till

On the Court reassembling after the tiffin Mr Lowder resumed his address to the Court, and pointed out that assuming that the plaintiff's assumption that he was a partner in the defendant company was correct; he had not, as he himself had admitted he was bound to do, turned over the to the company, excessing himself of the company, to the company, excessing himself on the ground that he had a right to retain such monies until the end of his agreement. It was necessary to take into consideration that it was not until be found into consideration that it was not until he found it was discovered him he was in possession of the monies referred in that he admitted receipt of them. The concealment commenced with the receipt of \$100 from the Philadelphia Engineering Co. in May 1896. It was the duty, according to plaintiff, of the defendants to give him a statement of account at the end of June, as they did do, but it was impossible for them to make a full statement until they had received the account from him of what he they had received the account from him of what he had received. The continued concealment of these receipts, including that of the \$3,200 in January, tecepts, including that of the \$3,300 th January, 1897, from the logersul Company, amounted to an act of dishonesty. Counsel then reviewed the evidence and read several of the letters received from the manufacturers in America who had carried out the orders of the defendant company, from which he submitted that it was shown that decep-tion had been practised by plaintiff from first till last untille had been found out, and confession made to Mr. Morse on the night of the 13th May, and which he submitted that it was shown that to Mr. Morse on the high of the 13th May, and repeated on the morning of the 14th. With regard to the complaint made by plaintiff with reference to his treatment by the defendant company in connection with the Worthington Company's submitted that the evidence produced counsel submitted that the complaint altogether fell to the ground, and consequently his argument regarding his reasons for making special terms regarding its reasons for making special terms with the Ingersol Company as regards the payment of commission, was altogether groundless. With regard to plaintiff's advertisement in the Kogyo Zasthi, calling himself sole agent of the Worthington Pump Co., it was proved that at the voortington Prints Co., it was proved that at the time the notice was inserted until it was will drawn, plaintiff was well aware he was no lunger agent of the Company mentioned. It was from May or June 1896 that commissions were received by and retained by the plaintiff, and that conceal-ment commenced. In conclusion counsel submited that on the grounds stated by him, the petition be dismissed.

be dismissed.

Mr. Litchfield, in addressing the Court for the plaintiff, commented on the interpretation put upon the Japanese advertisement complained of and on the law of agency. With regard to the translation of the alleged libel, he submitted that the words used conveyed to those to whom it was addressed an impression of dishonesty. He argued that the word fitsei used, even if in certain instances translated as unions. myself, till the change of agency of the Worthington Co., but I don't think our relations could be called cordial. As a rule I communicated the contents of the letters from the head office concerning engineering matters to Mr. Hay: generally, be got a press copy, sometimes I only communicated the extracts to him. The letter of 19th Ang., 1896, was written by me to Mr. Hay. Mr. Hay was at when the prima facts meaning of a statement that time carrying on personal correspondence was an impulsion of improper conduct it was written to induce him to avoid giving promises and particulars to these firms so that the suppliers of the paragraph applied to plaintiff's relations about do to be led to suppose that the orders must necessarily be placed with them. I communicated of the defence was its claim for justification the gist of the letter dated 29th January, 1897, from

very small one. In the arrangement with plaintiff very small one. In the arrangement with planting in 1894 the defendants agreed to pay him \$100 a mouth and a further 15 per cent, on all business done; all commissions and rebates received by plaintiff to be paid in as part of the general profits. In the later agreement the last words were omitted, but plaintiff still held that he was bound to account for any such commissions received, while his share in the profits was raised to account. Our like agreement count lated that bound to account for any such commissions received, while his share in the profits was raised to 30 per cent. On this agreement connsel held that plaintiff was a quasi partner, sharing the profits and a portion of the losses. He submitted that plaintiff was acting as agent for the companies in America who were doing business with the defendant firm, and that plaintiff had no obligation to make any account to them till the end of the term of agreement, in his statement of account. Under these circumstantances there was no question of concealment on plaintiff's part, in spite of the statements about the changing of his bank account. Counsel then commented on the loss that would be suffered by the plaintiff by the transfer of the agency of the Worthington Company should he sever his connection with the defendant firm, and also on the reasonableness of plaintiff's belief that until receipt of the final letter he was regarded in a certain way as an agent by the Worthington Company, and also that after the defendants had absorbed one of his agencies, plaintiff was justified in imagining that they would do so with others. Plaintiff had sought a full enquiry in Court and had not attempted to hide anything. After a further review of the evidence connected with plaintiff's fast intertempted to hide anything. After a further review of the evidence connected with plaintiff's fasti nterview with Mt. Morse, and what followed, counsel closed his address, submitting that the libel had bean proved.

His Honour said there was a volume of correspondence to go through and it might take some time to write out the Court's decision, so adjourn-ment would therefore be made till 3 p.m. on Wednesday, for judgment. The Court then rose.

#### WEDNESDAY, DEC. 29TH. JUDGMENT.

His Honour delivered the following judgment: In this case, the plaintiff, A. Stanley Hay, claims damages of the American Trading Company, defendants, by reason of the publication by de-fendants of a certain advertisement in a periodical known as the Kogyo Zatshi, or Engineering Jour-

known as the Kogyo Zassa, or Engineering Johnnal, printed in Japanese ideographs and published
at Tokyo: which advertisement it is alleged, defamed plaintiff's character and is libellous.

The defendant company in their answer plead
mot guilty; admit the publication of the advertisement complained of, save the heading, which they
aver was inserted at the office of the said journal; deny malice, and set up justification.

" Libel has been well defined to be a malicious publication, expressed either in printing or writ-ing, or by sign or pictures, tending either to in-jure the memory of one dead, or the reputation of one alive, and expose him to public hatred, con-tempt, or ridicule,"

From the evidence it appears that the plaintiff, a young man, was a mechanical engineer representing a number of manufacturers of machinery in Japan. Not having means to carry on his business, he entered into certain agreements with the defendant Company in order, as plaintiff put it, "to have them finance his business for him."

"to have them finance his husiness for him."

The first of these agreements was for the period of one year, beginning July 1st 1894, by the terms of which plaintiff was to devote himself to general engineering business for said-defendant Company, to be paid 100 yes per mouth and a further sum equal to 15 per cent. of any profits or commission which might be earned by business done directly or indirectly through plaintiff, who, on his part, agreed to put in any commission which he might receive from the manufacturing concern represented by him, the same to ing concern represented by him, the same in go in as part of the general profit. A second agreement was entered into by the same parties agreement was entered into by the same parties in July, 1805, for a further period of two years, that is until June 30th, 1807, by the terms of which the plaintiff was to have charge as Manager of the American and English Engineering Department of the delendant Company, and as compensation was to receive 30 per cent, of the net profit realized from business done in this department; the sum of 200 yen per month to be advanced to him as his share of prospective profits, and in the event that such profits did not equal that amount no claim was to be made against plaintiff, amount no claim was to be made against plaintiff, the same being understood to he his guaranteed share of the profits. Business was to be done in the name of plaintiff as Manager of the Engineering Department of the American Trading Company, all correspondence relating to the business

to pass through the bands of defendant Company's

It was also understood that plaintiff had no an It was also inderstood that plaintly had no an-thority to draw cheques upon the banking account of the defendant Company, nor to pledge its credit, and that the counter-signature of defendants was necessary to the validity of all orders placed by

necessary to the validity of all orders placed by him.

It is also shown that among others, plaintiff was the agent for Japan, of the Worthington Pumping and Engine Company, and the Ingersoll Sargent Drill Co, and that by the terms of plaintiff's contract with the Worthington Co, the same could be terminated at any time after 30 days notice given of such intention. That on January 3rd, 1896, plaintiff was notified by said Worthington Company that they had withdrawn their agency from him, to take effect February 3rd, 1896, and had appointed the American Trading Company their sole agents for Japan.

It further appears that on or about January 8th 1897, plaintiff caused to be published in Japanese ideographs in said Kogyo Zasshi, or "Engineering Journal," an advertisement of said Worthington Pumping and Engine Company, in which he represented himself to bethe sole agent of said Company for Japan, which notice was published in each

for Japan, which notice was published in each issue of said journal up to and including the month of September 1897, plaintiff not informing the defendant Company of said publication. That in the issue of said periodical for August 22nd last an advertisement was inserted by the American Trad-ing Co. in which said Company stated that they were sole agents of the Worthington Pumping Co. for Japan, and in the same issue of said journal (Aug. 22, 1897) there also appeared an advertise-ment inserted by the defendants which constituted the libel complained of. The plaintiff's said advertisement and the alleged libellous advertise-ment were farther published in the issues of said ournal for the month of September, 1897, were then taken out and have not since appeared.

Turning now to the advertisement the publica-tion of which is alleged to be a libel we find some difference of opinion among the witnesses as to the exact meaning of cortain Japanese ideographs. The plaintiff furnished the translation given in the petition, and the defendant Company submit another rendering. Upon this point we think it is

ther rendering. Upon this point we think it is clearly shown:

1. Ist. That the original of said advertisement was furnished the publisher of the Rogyo Zasshi in Japanese without the beading thereto, which was turnished in the office of said journal.

2nd. That the ideograph in said heading translated "fraudulent" and those translated "dishonest" in the complaint, have been given a larger and stronger meaning than is justified by the use either of Japanese scholars or colliquially, and that as used in this advertisement they should be translated "false" and "improper" or "not right."

3rd. That a Japanese on reading the advertisement would receive the impression that the person therein referred to had been (a) falsely represent-

therein referred to had been (a) falsely represent-ing himself as agent and (b) doing things that were improper, not right.

Coming now to another branch of this cause, it appears that under date of January 9th, 1897, plaintiff wrote the Ingersull-Sargeant Dill Co. that he should soon send them an order for machinery and asking them to credit him with the muchinery and asking them to credit him with the commission, and that under date of January 18, 1897, he sent them an order for machinery amounting to \$8,027,30 gold, accompanying this order with a personal letter in which the referred to his communication of January 9, again requested them to credit him with the commission and keep the correspondence confidential. In accordance therewith the said Company did on March 30, 1897, remit direct to plaintiff the sum of \$3,231.68 June nees currency. 88 and for a commission of 20 perses currency. nese currency, as and for a commission of 20 per cent, on said order, which money on Alay 7, 1897 plaintiff deposited to his own credit in the Alusan Bank in order to obtain interest thereon.

It is further shown that from and after either the latter part of June or first of July, 1896, up to May 13th, 1897, plaintiff received from sundry manufacturing companies certain sums of money, as commissions, discounts or rebates, morders placed by him through the defendant Company of which he retained possession, and the re-ceipt of which he did not communicate to the Ametican Trading Co. until the night of May 13th last. Further that no May 18th, 1897, after demand made, plaintiff paid over to detendant Company the sum of \$3.231.68 Japanese currency as and the sum of \$3.231.00 japanese currency as and for the commission so received by him from said logersof-Sargent Company, and on July 6 thereafter, rendered a statement of account to defendant Company of certain mories received by him from sundry manufacturing companies as commissions, telestes or discounts on business done roubles, have be by him through defendant Company. As in these St. Petersburg.

matters the plaintiff contends that the agency of the Worthington Pumping and Engine Cumpany was taken from him through misrepresentations made by the defendant Company and that he was in correspondence with the Worthington Company up to some time in August last with a view to making business arrangements with them, and that making distinces are algements with them, and that the tenor of this correspondence warranted him in advertising himself as their sole agent for Japan. As to this we have to say that, after a careful examination, we can find nothing in the correspondence submitted in evidence, either in the letters of the Worthington Co. to the plaintiff or to the defendant Company, which sus-tains plaintiff's contention; on the contrary said correspondence shows that the Worthington Pumping Co. offered their agency to the defen-dant under date of Oct. 15, 1895, and again under date of January 3, 1896, giving purely business reasons for the change, and that these facts were communicated to plantiff by defen-dant Company. As to the matter of ugency, there is nothing in said correspondence authorising plaintiff to act or advertise himself as the sole agent, or agent for Japan for said Promping Com-pany, and it appears that when the Worthington Co. were advised that plaintiff was so advertising times! they notified him under date of Aug. 25, 1897, that they could not permit the same, and that he must within an their name from his printed. plaintiff or to the defendant Company, which sus 1897, that they could not permit the same, and that he must withdraw their name from his printed

Plaintiff further contends that his interest in contingent profits made him a partner in the business to that extent, and thus warranted him in withholding and retaining in his own possession money, that came into his hands by reason of business done by and through the defendant Company. We can find nothing in the contracts or contract of the parties to support this claim, but assuming plaintiff's contention to be true, that he was not required to account for and turn over moneys thus coming late his hand notif the explication of the year, his action in concealing his receipt of such moneys, and in denying the same when charged with it by the defendant Com-pany was not compatible with the fiduciary relation to seeks to establish prelations as to which the law is zealous in requiring perfect good faith and openness of conduct.
We therefore find that defendant was justified

in printing and publishing the advertisement in the Kogyo Zosshi, upon which the plaintiff's charge

of the and claim for damages is founded. Judgment is rendered in favour of the defendant, with costs of the proceedings to the plaintiff.

JOHN F. GOWSY, Consul General, Acting judicially. We concur.

Various rumours are current here with regard to a rapprochement between Great Britain and Japan in view of recent events.

THE GERMAN EMPEROR AND QUEEN VICTORIA.

It has transpired that on his recent visit to the Queen at Osborne on his way to the Far East, in command of the German-China Squadron, Prince Henry of Prussia handed Her Majesty a long letter from the Emperor William.

EMPEROR WILLIAM AND THE TSAR.

A good deal of significance is attached here to the speech of the Emperor William at the frontier fortress of Graudenz, in which he alluded to the Tsar as his dear friend, whose political views were the same as his own.

CHICAGO COLLISEUM BURNT DOWN.

A disastrous fire has occurred at the Colliseum, Chicago. The building was destroyed. Nine persons lost their lives, and fifty sustained more or less serious injuries.

FATAL FIRE IN EAST LONDON. A woman, together with her nine child-

ren, has been burned to death in a fire at Bethnal Green, in the East End of Loudon.

#### MOVEMENTS OF THE BRITISH SQUADRON.

London, Dec. 20.

At the Admiralty it is believed that the British Squadron is in the vicinity of Port Hamilton, but the statement that it was at Chemulpo is officially discredited.

#### RUSSIA AND KOREA.

The last American mail conveys the text of the Russo-Korean agreement whereby M. Alexieff replaces Mr. Mc-Leavy Brown as Financial Adviser to Korea, Russia securing the financial control over the country for an indefinite period.

FRANCE AND CHINA.

Later. M. Pichon, French Minister at Rio de Janeiro, has been transferred to Peking. THE PLAGUE IN BOMBAY.

A serious recrudescence of the plague is reported from Bombay.

LORD CHARLES BERESFORD. Lord Charles Beresford has been selected as the Unionist candidate for York in place of the late Sir F. Lockwood.

THE GOVERNORSHIP OF CRETE. Russia has proposed Prince George of Greece as Governor of Crete.

PROBLEM No. 352. By G. J. SLATER. (From Nuova Revista degli Scatchi.)

J W.E., and D.D.

then just finished. We temarked at the fine that Black had resigned on the 22nd move, but we would have been more correct if we had said that Black lost the game on the 22nd move "by default." No reply to "Nemo's" last move having come to hand after 3 weeks' patient waiting, we concluded that Mr. Fardel had given up and there fore decided the game in Nemo's favour. Last week, however, the missing move came to hand having travelled all over Vokohama, back to Kumamoto and finally, re-addressed, to the Japan Mail office. Mr. Fardel now complains of the injustice done to him and requests as to have the game continued. We regret being meable to comply with Mr. Fardel's request. If the letter had miscarried through the fault of the Post Office we should indeed be placed in an awkward position. As it is, the mishap occurred owing to faulty tion. As it is, the mishap occurred owing to faulty addressing, for which Mr. Fardel alone must be held responsible. We therefore abide by our

#### A PRETTY POSITION.

The following shows, says the Chess Ptager's Chronicis, a most marvellous example of the unlimited power of combination at the disposal of a player in certain cases. Here we have an open position, not humpered or protected by me mass of pawns. The White King, with one solitary piece at his disposal, is in the middle of the board, surrounded by the Black Queen, Rooks and pieces. More than that, White has no check at his disposal whereby he can force his powerful adversary to a mating position. It is only a simple, yet beautiful combination which enables White to win, eg.:—

1-B to B 4 2-B to Kt 5

1-P takes P 2-Any move

#### SINGAPORE.

A consultation Tournament has commenced at the Singapore Cliess Club. As the games occupy a longer time than usual, two late club evenings have been arranged during the course of the tournament, on Wednesdays and Saturdays.

#### \* A GREEK GIFT.

The old saying, "I fear the Greeks even bearing gifts," in finely illustrated in the following game. White gives the odds of K Kt.

_	
White-McDonnel.	Black-Mr,
t-P to K 4	I-P to K 4
2-B to B 4	2-Kt to K B 3
3-P . Q 4_	3—Kt takes P
4-Pinkes P	4-Kt takes K B P
5—Castles	5-Kt takes Q
6-B takes K B P, ch	6—K to K 2
7-B to Kt 5, mate	

Moral-Look several times before you accept Queens .- Literary Digest ..

#### GAMB No. 351.

The six game match between Walbrodt and Janowski having resulted in a draw, the contest-It is six game match between with root and Janowski having resulted in a draw, the contest and sagned to play three additional games to decide the affair. Of these games Janowski won two, and so Walbrodt withdrew, declining to play the remaining game as the result would not be affected thereby. The fifth game, which we give below, is the best of the series. The opining was of the usual character; Black committed the error of judgment of playing his heights we imagine our Chess readers will not find fault when they hear that Mr. Cleland was the one-time class champion of New Zealand and the inventor of "The Ladder," now in use at the Yokuhama Chess Club.

"Japan Mail." Correspondence Tourner.

"Japan Mail." Correspondence Tourner.

On the 1th inst. we declared this event closed, and published the last game, Nemo v. Fardel.

ing up the pawn was that he imagined he would be able to get up a counter-attack, and get the pawn back; but White instituted a second attack pawn back; but White instituted a second affack of a more powerful nature, beginning with 30-R to Kt 6, and continued in very clever fashion with 34-R to Q 4, 35-R to Q 8, &c. Janowski's move of 38-R to Kt 5 forms a very pretty conclusion to this successful manageure. He threatened mate by B to Kt 6 ch, the rook, therefore, could not be taken; after a few more moves Black's game became utterly hopeless.

#### Notes.

A return telegraph match between Hougkong and Suigapore is planned at an early date.

Showalter will play a match with Pillsbury after

Commenting upon the late tournament at Beilin, a correspondent writes:—" The result was a surprise, as tournaments generally are, new men coming mexpectedly to the front, Charousek in this case looming up and taking first prize, with a record that must needs make Lasker tremble for his honours as champion of the world. Lasker has thus far risen head and shoulders above all competitor, although he has no more worlds to competitor, and has determined to abandon the chess field, devoting his future to mathematics, having a professor's clair within his teach. I do not think he will be permitted to retire from the chess areas. without preeting Charonesk in contest for the clampionship of the world or allowing it to go by default. Pillshury apparently has not proved up to the high expectations formed of him after his phenomenal success at Hastings, especially since his match with Showalter. Showalter's good showing was a surprise to every one. Pillsbury will have to do something starting to hold his own, but he is yet young. Steinitz flits around the warious chess rooms, playing simultaneous and blindfold matches. I saw him play two simultaneous games blindfolded at the Metropolitan Club against the whole club. He wan both games.

Dr. Courad Beyer, Austrian problemist, and the Dutch player, Lennep, died recently.

Another player, says the Kobe Herald, who has passed over to the silent majority is M. Clauda Louis Eugene Februet, who succumbed to an attack of paralysis on the 13th Oct., at the age of 72. M. Februet during the monthles of 1870 was a captain of the Paris National Guard. He settled in tain of the Paris National Guard. He settled in London soon after the war, and became a regular frequence of Simpson's Divan, where his vivacious play and remarkable skill as a problem solver made him popular, notwithstanding that he never aucceeded in mastering the English language. The Morning Post says many amateurs who owe their skill in a great measure to practice with M. Febret and the many friends that he made among all ranks of chess-players will hear of his sudden decease with deep regret. The lively game that he cultivated did not lik him for match play, and he took part in but few competitions, the most important is which he figured having been the Vizayanagram Tournament of 1883.

#### DEATHS.

At the General Hospital, Yokohama, on the 7 inst., Thomas Rybing Green, aged 63 years.

At the General Hospital, Yokohama, on the 2nd inst., H. E. Harries, of the Hongkong and Shanghai Bank, son of Benjamin Harries, Esq., Tenby, Wales, aged 26 years.

#### SUMMARY OF NEWS.

An Anglo Japanese alliance has been advocated by Lord Charles Beresford in a speech delivered

THE state funeral of the late Prince Shimazu Tadayoshi is to take place on the 9th instant at

A JAPANESE telegram states that Germany has demanded of China the session of Kiao-chon for go years.

RINDERPEST, which broke out in Kanagawa Ken towards the close of last year, has now been stamped out.

THE British fleet is making a demonstration in Korean waters, according to some; others believe it is still off Chusan.

THE total length of land telegraph lines in Japan at the end of last year was 15,432 miles, and of submarme cables 227 miles.

THE Tokyo-fu Agricultural and Industrial Bank will commence business on the

next. Mr. Matsuda Hideo is the Chief manager of the Bank.

THE buildings of the Military College (Toyama Gakko) at Ushigome, Tokyo, were destroyed by fire on the morning of the 3rd inst.

SEVERAL regiments of British troops have been despatched to Egypt, owing, it is said, to the Dervishes preparing for an advance northward.

THE more influential merchants in Formosa are doing all in their power to induce the Government to undertake the construction of the proposed railway:

THE coming of age of the Crown Prince is to be celebrated in February next, when the year's mourning for the late Empress Dowager will have expired.

THE Japanese was-vessel Tsukuba, which has been engaged in surveying the coasts of Korea for some time past, left Fasan for home on December 30th.

VERNACULAR papers report that the Nippon Yusen Kaisha purpose raising their rates of freight from 10 to 20 per cent, from the end of the current month.

THE 11th of January being the first anniver-sary of the death of the late Empress Dowager, religious services will be performed at the Senzan Mausoleum, Kyoto.

WHILE a meeting was being held this week at the City Hall. London, Ontario, part of the flooting collapsed, and twenty eight persons were killed and a hundred injured.

On the 31st of December last the amount of convertible notes issued by the Bank of Japan amounted to over yes 226 000,000, the excess over the legal limit exceeding yen 47,310,000.

WARS and rumours of wars occupy the attention of Baron Reuter. The Soudan expedition is to be resumed; the Afridi war continues; while in China war clouds still obscure the horizon.

It is authoritatively stated that whatever privileges another Power may obtain from China, Great Britain will demand adequate compensation, and do her unnost to uphold her existing rights in China.

A TARGRAM received in Tokyo reports that Count Leyden, the new German Representative to Japan, will leave Berlin about the 10th of January and arrive in Tokyo towards the end of February next.

THERE have been several skirmishes in Formosa during the last month between the insurgents and the Japanese troops. A number of the former were killed and a few of the Japan. ere soldiers and gendarmes were wounded,

THE construction of a tramway between Shinhashi and Shinagawa was completed recently and the line was opened for traffic on the 30th of December. The passenger fare between Shimbashi and Yatsuyama is 5 sen.

On the morning of the 4th instant about 11 o'clock Count Matsukata, Viscount Takashima, Baron Nishi, Mr. Hamso, Baron Yamada and other Ministers of State proceeded to the Palace and paid a complimentary visit to the Emperor,

NATIVE papers report that the Russo China to the state of th Bank has proposed to the Chinese Authorities

ment has circulated orders to the Commanders of the Army throughout the Empire to prepare for emergencies at a moment's notice.

On the 3rd fast w 2.10 a.m. fire broke out in a bath house at No. 9. Higashi Kuromon-cho, Shitaya, Tokyo, and over 600 houses were reduced to ashes before the flames were subdued. During the fire 16 firemen were more or less injured.

THE Japanese Standing Squadron is now m Yokosuka, It is composed as follows:—The Fuji, Yashima, Chinyen, Itsukushima, Matsushima, Hashidate, Akitsushima, Suma and Isumi. The Isukushi is now at Shanghai, the Akagi at Takao, the Chokai in the Korean sea, and the Zsukuba on her way in Japan via Port Hamilton.

FREQUENT interviews have taken place since the 30th ult., principally at Oise, between Marquis Ito, Count Okuma, Count Itagaki and other statesmon, with a view to the formation of a coalition Cabinet, but it appears that the parties led by the two Counts—the Progressiouists and the Liberals—cannot be brought to agree on any practical platform, and that Marquis Ito will have to form the best Government he can without the cooperation of these two stalesmes.

THE Import trade during the past week has naturally been very atagnant in most lines of business owing to the New Year holidays, New purchases were out of the question until settlements had been made for former business. In shirtings and other piece goods, as well as yarns, there is consequently nothing to report; and nearly the same may be said with regard to metals, though some little business has been done in bars and sheets, and enquires have been made in other lines. A latie spurt occurred in the kerosene market between the 31st ult., and the 2nd instant, resulting in the settlement of some 17,000 cases for the interior - slight reductions on former rates. Next to nothing has been done in sugar, either brown or white refined, but prices are firm and a revival of sales is expected before the end of the month. The total imports of sugar into Yokohams for the past year show an increase over the previous year's figures of about 20 per cent.; showing that luxuries are increasing in the land. war scare in China has caused local coal depôts to be entirely depleted of Cardiff and other smokeless coal, a very large supply being now aftest for the British and Russian fleets. Exports-the only line to be considered mailk. A good demand has continued both for raw and waste, the former principally for the United States market, and prices are firm, with an up-ward tendency. Over 3,900 piculs of raw have been placed since the middle of last month, and 4.480 piculs of waste. The export of raw silk during the past year was, to America 35.09 t bales; to France 23.900 bales; to Italy 2,485 bales; to Switzerland 601 bales; to Russia 225 bales; and to other countries 282 bales; total 62.593 bales. Stock in hand only amounts to 9 410 picula against 18,440 picule at same time hast year. Nothing worth mentioning has been done in ten; the remaining atock is small and of low grade, and the serson may be considered over. An improvement has to be noted in the Japanese yarn trade, considerable parcels of stock having been disposed of for the interior and for China about the end of the year, but few of the spinning companies will be able to pay a dividend for the past balf year. Ex-Smugadias comproved for Shanghai and India, It is also said that the Chinese Govern gold rates being unchanged, with silver up isth.

#### SPIRIT OF THE VERNACULAR PRESS.

The Jiji Shimpo speaks in gloomy terms of the year just past. Commercial affairs and political affairs reached their lowest depths of depression and mismanagement, according to our contemporary's opinion. The introduction of the gold standard proved a complete failure. It was to have opened the door for an inflow of foreign capital, thus succouring the distress of the industrial classes and producing an appreciation in the price of public securities. reign capital has not come in, neither have public securities appreciated. On the contrary, we have seen an ever increasing preponderance on the side of imports, a corresponding out-flow of specie, and a steady fall in the quotations for consols and war bonds. Nor in that all. The effect of the demonetization of silver has been fatal to the most promising of all Japan's in-dustrial enterprises—cotton-spinning. Its chief market has been closed against it, and the prosperity that distinguished it at the end of 1896 was replaced by adversity at the end of 1897. As for the administration of State affairs, its history is humilisting. The Government has been almost wholly forgetful of the empire's foreign interests, paramount as is their importance. Failing to see that the addition of one iron-clad to Japan's fleet has more effect upon foreign opinion than any incident connected with the Diet, statesmen have directed their whole attention towards obtaining a majority in the Lower House, whether by intriguing with political parties or by bribing unprincipled members. The cause of the nation has been prostituted by Ministers to the selfish purpose of retaining their own portfolios, and the reputation of the country has suffered greviously in the eyes of foreigners. It is an old experience, however, that when things are at their worst, they generally begin to mend. The winter of Japan's discontent is likely to be soon changed into a spring of satisfaction.

The Nichi Nichi Shimbun alleges that the Government has had under profound consideration three lines of policy among which a choice has to be made at the present juncture. They are the policy of abstention and defence (tairei), the policy of peace-making (cho tei) and the policy of advance (chin ho). The first consists in refraining from any demonstrative action of any kind and merely standing ready to defend the country's rights. This is the policy said to have been adopted by the Cabinet. Its advocates contend that any demonstration of activity on Japan's part must greatly aggravate a situation which, if not accentuated by fresh interference, may be trusted to settle itself amicably. It has to be remembered, of course, that Japan's position at Wei-hai-wei and her possession of the Pescadores render it impossible for her to stand entirely aloof from complications involving a re-adjustment of the balance of power in the Far East; but impredent inter-ference might have the effect of precipitating such complications. The policy of peaceful intervention looks tempting, and, as a matter of fact, has been essayed. The Japanese Representative in Peking has made strenuous efforts to bring about an arrangement between Germany and China. But failure was inevitable. for Germany has projects more fat-reaching than the issues involved in the mere question of man the issues involved in the mere question or murdered missionaries, and Russia is pursuing her own aims, quite independently of Germany. Naturally naval and military men advocate a policy of demonstration and advance, but the difficulty of following such a line is that it involves a choice between Trailand and Parsin milescent involved. England and Russin, whereas it would be a mistake to suppose that those two Powers must necessarily be antagonistic with regard to thir Far Eastern problem. They may very possibly agree to settle it amicably. Moltke's saying that defence can not be effective unless there is strength to attack, is very true, but does not mean that attack is essential, above all the complexion of the occasion is more than uncertain. Thus, finally, the Cabinet has been achieved since the Restoration. Clan has been achieved since the Restoration and the line of the Restoration a

defence. There is, of course, no reason to suppose that the Nichi Nichi Shimbun truly interprets the views of a Cabinet to which it is bitterly opposed.

The Nippon has a violent and abusive article. the gist of which is that the change of Cabinet now about to take place will not be an altera-tion but a mere substitution. Marquis Ito's Cabinet fell to pieces in 1896 on account of its post-bellum programme of armament expansion: the question of finance wrecked it. Count Matsukata fully understood the circumstances of the time; fully understood that he came into office to put the finances in order. Yet he unhesitatingly adopted Marquis Ito's programme and plunged the nation in a contiqued flood of expenditure. Finance has now proved the ruin of his Cabinet, and Marquis Ito, in turn, comes back, smiling, to follow the Same route. If Count Mataukata endorsed Marquis Ito's financial policy in 1896, m he must have done since he adopted it himself when he came into power, why did he not assist, instead of impeding, its consummation? If Marquis Ito approves Count Matsukata's financial policy, as he must do since it is identical with his own, why has he stood aloof nor stretched out any hand to assist Count Matsukata, and why does he now erect his own Cabinet on the ruins of Count Matsukata's? Can covered in such proceedings? The fact is that the two statesmen are "foxes from the same hole." The substitution of one for is a more shuffling of the class cards. The voice of the nation has no genuine influence in directing the change. These Meiji statesmen are counterparts of the Korean aristocrats who toss the ball of administrative power from hand to hand. One hears of the Min, and the Bin, and the Kim and the Li displacing each other, but one knows that there is nothing of the Korean people in it all; that it, is merely a transfer of offices and emoluments from one clique of aristocrats to another. The Itos and the Matsukatas and so forth of Japan present a parallel speciacle. They discovered in 1894 and 1895 how potent is a successful foreign war to restore the decaying prestige of the clan oligarchs, and they pledged themselves at once to a programme of military expansion The profits connected with carrying out such a programme far exceed the ordinary emoluments of office. The commission on one war-vessel suffices to enrich several officials for life. So it results that while one group of statesmen assist to bring about the plunging of another group into a financial quagmire, they immediately leap into the same quagmire themselves when they get the opportunity. The profitable programme of military expansion must not be abandoned whatever else goes to the wall. all this where does the nation come in? (Is should be noted that the Nippon has long been a vehement opponent of army expansion on the

Before sanitation became a science it used to be said that the average man's life might be measured by 30 years. The Meifi era has now passed its thirtieth year and is entering its thirty-first. If that period suffices to produce marked changes in the individual, how much more significant should be the alterations noticeable in the case of a nation subjected, as Japan has been, to all the modifying influences of a wholly new civilization? The Melji era was inaugurated by a great national movement in the direction of progress. Feudalism fell, and the spirit that destroyed it overflowed into the realm of old institutions and old fashious, sweeping away the antique and substituting the novel in all directions. But there was a certain element of superficiality in these changes. National ways of thinking were not radically altered, and as years went by, conflicts between the old and the new were witnessed here and

affect the general tendency to advance which is the rule of civilized societies. The nation pushed forward, becoming daily more cognisant of the anomalies that it found in its path. One of those anomalies was government by class statesmen, a veritable relic of the past. other was the reverence in which those statesmen were held by the bulk of the nation. At the outset, the class statesmen regarded party politicians as their enemies and struggled implacably against them, the politicians on their aide fighting with equal fierceness. But by and by the former began to appreciate the necessity of winning the latter's friendship, and the untion also was educated to perceive that only by coalition between the two could its interests be really promoted. Thus, little by little, the principle of government in accordance with the will of the majority, government by the people and for the people, received practical recognition, and last year saw its virtual consumma-tion. For though the Cabinet dissolved the House of Representatives rather than afford an open demonstration of the incompetence of any administration when unsupported by the Diet, there is no possibility of hiding the fact that the Cabinet itself fell because it failed mecure the support of the Diet. Whether the straggle of the Ministry to secure that support destroyed their own collesion, or whether they dared not continue the task of administration in the face of the Diet's opposition, there can not be the smallest question that they went out of power because the House of Representatives refused to give them its mandate. That is the great, the signal, change which calls for record as the Meji era enters its second generation. principle of party government triumphed. Such are the views of the Mainichi Shimbun.

The Kohumin Shimbun, conspicuous hitherto for its support of the Matsukata Cabinet. writes a somewhat weak article, couched in very general terms, the gist of which is that the time demands a Ministry representing the whole nation; that a Cabinet allied several political parties can not hope to govern smoothly; that every effort should be made to construct one great party, and that the best talent available should be collected from all quarters to administer the affairs of the nation at this critical juncture. The Kolmmin's position is somewhat embarrassing, and its invertebrate homily reflects the fact.

The ends to be simed at by the Cabinet, the ends to be aimed at by political parties, and the ends to be aimed at by the peoplethese are the subjects of three articles in the Yomiuri Shimbun. In the first category a multitude of objects are jucluded -administrative reform, development of facilities for communication, preparations for the operation of the Revised Treaties, improvement of local government systems, the adoption of some intelligent and decided policy in Formosa, the adjustment of the national finances, and the consummation of the post bellum programme. As to this last, the *Pomiurs* trenchantly observes that within two years of the time of the post bellum pro-gramme's elaboration, its foundations have been proved illusory, so that while one set of politicians cry out for reductions in the scheme of inilitary expansion, another set want to impose taxes. In order to be forcible, the Yomiuri in essentially pessimistic. Its writing conveys the impression that everything remains to be done, that nothing has yet been effected, and that the task awaiting the new Cabinet in the 31st year of Melji is colousal. It goes even to the length of asserting that the material, moral and political progress of Japan has been seriously impeded by the clan statesmen, though less prejudiced observers are disposed to give them the chief credit for everything that has been achieved since the Restoration.

petent to consummate the victory and to profit by it worthily. That is the duty devolving on the parties and on the nation at the approaching general elections. In short, the Yomiuri regards the 31st year of Meiji as a vital epoch in the country's career, and would fain have everybody rise to the occusion.

#### THE BUDGET.

CHAPTER I.—REVENUE AND EXPENDITURE.

The Budget for the 3 tst year places the estimate of revenue at 212, 114,119 Fen and that of expenditure at 229,438,587 yes, showing a deficiency of 17,324,468 yes in revenue. Compared with the Budget for the previous year, a decrease of 37,410,551 yen is noticeable in revenue, and 14,149,650 yen in expenditure. The deficit in revenue mentioned above was to have been supplied in accordance with a special financial programme formulated for presentation to the Diet,
CHAPTER II—REVENUS.

The estimated Revenue for the 31st fiscal year of Melji amounts to 212,114,119 ven, of which 129,603,366 ven is Ordinary, and 82.510,753 ven Extraordinary Revents. Compared with the estimates for the previous year the following figures are obtained :-

	Estimates for	Estimates for
Revenue.	the 31st fiscal	the 30th fiscal
	year.	yest.
	Yen.	Yen.
Ordinary	129,602,266	121,406,818
Extraordinary.	82,510,752	128,117,851
Total	212,113,018	249 524.669
	Increase.	Decrease, Yen,
Odinary	8,196,547	
Extraordinary		45.607,098
Total	. —	37,410,551

In enumerating the most important points relating to the increase or decrease of revenue, it may be mentioned that, although an increase of 13.721,913 yen in expected in ordinary Reventte derived from taxes on Sake, Customs duties. Tobacco Monopoly, Postal and Telegraphic receipts, Railway profits, &c., yet as a diminution of 5,532,366 yen occurs in receipts from stamps, interest on deposits and other items, the balance shows an increase of 8,196,547 year only.

The Extraordinary Revenue has decreased by 48,596,288 yen, principally in the items of public loans, appropriation of indemnity for slipbuilding expenses, and the amount brought over from the previous account, but a sum of 2,989,185 yes having been secured by the sale of forests and fields, the balance shows a decrease of only 45,607.098 sen.

CHAPTER III .- EXPENDITURE.

The expenditure for the 31st fiscal year amounts to 229,438,587 yen, of which 126,972,-199 yen represent ordinary expenditure and 103.466.390 yen extraordinary outlays. Compared with the estimates for the previous year the figures are as follow:—

Expenditure, 3		. 3	o⊪h fi≼cal yea
	Yen.		Yen.
Ordinary Extraordinary	126,972,197		110,580,752
Extraordinary	102,466.390	***	133,007,485
Total	229,438,587		243.588,237
	Increase.		Decrease,
Ordinary Extraordinary	16,391,444		_
Extraordinary	_	***	30,541,095
Total	-		14.140.650

The most prominent items of increase or decrease in ordinary expenditure are-in the Foreign Department, the establishment of new legations and consulates, and the increase of salaries of diplomatic officials; in the Home Department, the salaries of a number of new officials for Cities and Prefectures, increased police expenses, increase of subsidies and allowances for the preservation of old temples and shrines, and appropriations made for Government railincrease in the amount of expenses for the Digitized by GOOGLE

Tobacco Monopoly Office, payment of pensions, and of interest on public loan bonds; in the War Department, the expansion of the army, revision of the system of organization and ex-tension of offices and schools in connection therewith, increase of exponses caused by the rise in price of provisions and fodder; in the Naval Department, the additional expenditure consequent upon the increase of vessels; in the Judicial Department, increase in the number of Public Procurators and in the salaries of clerks; in the Educational Department, increase of teachers in various schools and of their salaries, and increase of allowances to teachers in primary schools; in the Agricultural and Commercial Department, increased expenses for the improvement of stud horses, and for the encouragement of deep sea fishing and the inspection of silk worm eggs; in the Communications Department, increase of outlays in connection with telephones, parcels post, and the development of means of transport, as well as the establishment of Harbour Offices: these itms combined show an increase of 18 017.280 yen in expenditure; but a sum of 1,625,835 ren on account of reductions in interest on deposits and from the abolition of the Colonial Department being subtracted, a balance remains of 16,391.444 ren on the whole.

In the extraordinary section of expenditure, it became unnecessary for the Home Department to reserve payments for the reconstruction of the river Yodo, on account of a reduction being made in the yearly instalments; or to make any payment for the Yokohama Water Works; or to grant any special expenses for Okinawa no disbursements were required from the Finance Department in connection with the subsidy to the Japan and Kinshin Railway Companies, a reduction being made in the bounty to the Sanyo Railway Company, and expenses for the establishment of the Tobacco Monopoly Statious and for the granting of special rewards were separately treated; in the War Department the expenses for repairs a d for the purchase of stores, expenses for the maintenance of fortifications and artillery barracks, and for new fortifications in the Kii and Awaji Straits, the expenses for the extension of arsenals and work shops, for the Gendarmerie in Formosa, etc., were all reduced as far as possible. In the Naval Department appropriations have been reduced in connection with the expansion scheme, the establishment of a Gunpowder manufactory at Shimonose, the construction of ironclads undertaken in the 26th year of Meijt, the building of Sasebo Admiralty Office, etc. In the Judicial Department reductions was made in the yearly installments for the building of the Osaka Appeal Court and the Osaka District Court. The Educational Department cancelled the tems for the construction of a new laboratory for practical chemistry, metallurgy, and mine-ralogy, for the Third High School, and also the expenses connected with the organization of the said School. In the Agricultural and Commercial Department no outlay was needed in connection with the establishment of an Iron Foundry or the opening of the 2nd Marine Exhibition, or with the inspection of weights and measures at fixed periods, the expenses for which were expunged. In the Communications Department, a reduction was made in the aunual outlays for the expenses of telegraphs between Tokyo and Sapporo, for the laying of new lines to Yetorofu and for the pur-chase of ships. Owing to the above re-ductions, the amount of the estimated expenditure was decreased by 42,507,437 yen, but an increase of 11,966,341 yen having been made on account of the following items, the estimate represents a reduction of 30,541,095 yes on the whole:—In the Foreign Department -au increase of the annual amount for the coustruction of Consulates in Tientsin and Amoy; in the Home Department,-an increase of an nual allowances for the construction of defence works for the rivers Sone and Kiso; of industrial expenses for Hokkaido and for the ways in Hokkaido; in the Finance Department, control of the general election of representatives of the Loves House; in the Finance Depart- Original from

ment, expenses increased by the construction of various offices attached to the Kobe Custom House, those required for introducing alterations in the system of taxation of land and other matters in Okinawa prefecture; in the War Department—construction of batteries at Tsushima, Kelung, and the Pescadores, and other expenses in connection therewith; increase of annual allowances for similar constructions in the Naruto Straits, in Kure, and in Sasebo, and also in the Kii and Awaji Straits; reconstruction of shooting ranges in Tokyo; in the Naval Department,—augmentation of annual outlays for the construction of arsenals; expenses incurred for the construction of crulsers and despatch vessels undertaken in the 26th fiscal year; increase of shipbuilding funds for the Admiralties, establishment of a brick factory; reconstruction of the 1st dock of the Saseho Admiralty and of engineering schools; in the Judicial Department—reconstruction of Kobe District Court; in the Educational Department -reconstruction of class-rooms for physylogy, hygiene, and materia medica,i a the Medical Section of the Imperial University; construcof new class-rooms for the Agricultural college necessitated by the former pre-mises being burnt down; organisation of an Imperial University in Kyoto; expansion of buildings for class-rooms and workshops for the Tokyo Technical School; establishment of a ship-building section in the Osaka Technical School; Agricultural and Commercial Department—expenses for the International Exhibition to be held in Paris; inspection at regular periods of local weights and measures; and special investigation of State forests and mining districts; in the Communications Department—increase of expenses for the expansion of steamship services and for the improvement of existing government railways; construction of commercial schools and bureaus for the control of communications, etc.

(To BE CONTINUED.)

#### THE CROSSING OF THE RED SEA.

Dr. Barlett, who has undertaken to show that the first six books of the Old Testament are an accurate historical narrative consistent throughout with the results of recent investigation, writes as follows concerning the passage of the Red Sea :--

Extensive shoals extend far out in a southeasterly direction, and a long, carrow sand-bank reaches toward them from the eastern shore, being at low tide a small channel some 780 feet wide and from three sud half feet deep. But at high tide the widdis about three miles, and the elaborate map of the Suez Canal Company gives the difference between the highest and lowest known seas as ten feet and seven fischer. Here are the conditions for the asfe crossing of the Israelites and the drowning of the Egyptians. The statement of the Scripture narrative that the Lord "caused the sea to go back by a strong east wind all night" conforms to the fact mentioned by the travellers Wellsted, Schubert, and Tischendorf—namely, the great effect produced on the height of the " Extensive shoals extend far out in a southeasterly namely, the great affect produced on the height of the waters by a long-continued northeast or southeast wind in connection with the title.

"Dr. Robinson makes a computation to show the

"Dr. Robinson makes a computation to show the feasibility of the passage of two millions, moving at the rate of only two miles an hour, within the silutted time; a dry space of half a mile or more would admit thousand persons abreast, and a column two thousand in depth, two miles or more from front to rear, this would require an hour for the entire column to enter the channel, and two hours more to move over the distance of three or four miles, making, on this last supposition, two hours and a half in all. It may be added that if, on account of the flocks and herds, we suppose the time to be doubled, the interval between sunset and sunrise in April, being about twelve hours, would still allow ample time for the safe passage of Israel, and, when the waters were driven back in full volume, for the destruction of the pursuing host. It would undoubtedly be a difficult movement to arrange and execute with such a company as the Israelites, but a Moses or a Napoleon would be capable of effecting it."

#### THE POLITICAL SITUATION.

Friday, Dec. 31. There is nothing new to tell about the political situation. No doubt is entertained as to the fact that Marquis Ito will be Minister President, but that was a foregone conclusion from the outset, in our opinion. The question now is whether the Marquis will ally himself with Count Okuma, or with Count Itagaki, or with both. The leading Tokyo newspapers discuss that point in most uncertain terms. It would appear that there is a strong desire on the part of the Meiji statesmen to leave Marquis Ito entirely free in or-ganizing the new Ministry. Marquis Yamagata and Count Kuroda were present when Marquis Ito was received in audience by the Emperor, but they both retir-ed so soon as the Marquis had consented to undertake the task of forming a Cabinet, their object being to avoid any share in the subsequent conversation. We ourselves have no special grounds for forming any opinion, but we find difficulty in believing that Marquis Ito will turn his back on Count Itagaki and the Liberals. They supported him when he was last in office, and he gave a signal proof of his loyalty by resigning so soon as it became certain that Count Itagaki could not be persuaded to remain in the Cabinet. It appears most improthe cost of his friendship with the Libeshrewdness. On the other hand, there is no blinking the fact that a really strong Cabinet can not be formed at present without the cooperation of Count Okuma. His figure is as conspicuous in the field of politics as Marquis Ito's is in the field of officialdom. The country wants a strong Cabinet. No student of the times can deny that never since the Restoration did Japan stand in such urgent need of the best talent she can command as she stands to-day. We venture to say that if a plebiscite of the whole nation could be taken to-morrow with reference to the control of finance, an overwhelming majority of votes would be cast in favour of Count Okuma first and Mr. Shibusawa Ei-ichi second. To bring Count Okuma into the Cabinrt, however, would mean an alliance with the Progressionists. Would that involve a rupture with the Liberals? There lies the question. Marquis Ito seems to us to be in the position of the man in the middle: he could be happy with either were 'tother dear charmer away. From a purely selfish point of view he would be more pleasantly situated with the Liberals than with the Progressionists; for among the former he stands out haud æquus aut secundus, whereas among the latter he is brought into immediate conflict with the powerful personality of Count Okuma. But as a patriotic statesmen he should subserve every consideration to the urgent needs of the time. The Far East has reached a truly parlous stage of its history and Japan is at a crisis in her own affairs, financial as well as political. If she is to be steered into smooth water, it must be by the hands of men like Marquis Ito and Count Okuma. It is most unfortunate that Count Inouye adheres to his resolution not to accept office again, for his insight and courage The above would certainly be the strong-would be invaluable to his country at pre-est Cabinet organized since the Restora-Ministry appears to be entertained,

as follow:-

ITO CARINET. Minisur President, .... Marquis Ito.

Minister ofForeign Affairs ...... Marquis Saionji-

Commerce... Baron Ito Miyoji.

Minister of-Foreign Affairs ..... Marquis Saionji.

Home Affalis Viscount Yoshikawa.
Finance Vescount Watanabe, or
Baron Iwasaki, or Mr. Shibusawa
War Viscount Kalsura.

Our contemporary adds, however, that Baron Nishi may remain at the Foreign Office or that Marquis Ito may take the portfolio himself, in conjunction with the duties of Minister President; and that in the coalition Cabinet Count bable that he will seek new allies now at Okuma may be at the Finance Department and Count Itagaki at that of Home Afrals, nor would such a course be at all fairs. The latter hypothesis as to the consistent with his reputation for political positions of the two Counts seems to us very probable.

> Tuesday, Jan. 4. A coalition Cabinet seems to be now regarded as not unlikely. It would be welcomed by the nation and by Japan's foreign friends also, for the country has never needed a strong Ministry more than at the present moment. An anonymous member of the Diet, talking in the columns of the Nippon, essays to prove that a Cabinet formed by uniting the leaders of the Liberals, the Progressionists and the National Unionists with the Meits statesmen, would be, not a coalition Cabinet, but a cabal Cabinet. It is exceedingly difficult to decipher the line of reasoning which leads to that conclusion, but the gist. of the argument is that men whose policies differ so materially could not possibly combine in such a manner as to further the interests of the country and promote its prosperity. A curious contention, assuredly, seeing that what puzzles foreign observers is to discover any appreciable difference whatever between the principles of the various political leaders and those of the Meiji statesmen. Leaving such questions aside, it may be interesting to note that the coalition Cabinet spoken of as feasible, would be composed thus:-Minister President,..... Marquis Ito.

Minister of-Lient-General Viscount Rats
The Navy Marquis Saigo,
Finance Count Okuma.

Justice Viscount Yoshikawa.
Education Marquis Saionji.
Communications Baron Ito Miyoji.
Agriculture & Coun, Mr. Sone Arasuke,
Governor General of

Formosa ............Viscount Katsura (or Baron Nogi).

Digitized by Google

The Jiji Shimpo forecasts two Cabinets, its formation. We doubt the possibility follow:— of inducing Counts Itagaki and Okuma to serve in the same Ministry. It can not be forgotten that the proximate cause of the disruption of the Ito Cabinet in 1896 was Count Itagaki's retirement when the alternative was combination with Count Okuma. Since, then, Marquis Ito's natural allies are the Liberals, and since he, too, went out of office the year before last rather than turn his back on the party which had supported his programme of post-bellum measures, the simplest solution of the present problem may seem, at first sight, to be a renewal of the alliance with the Liberals, Count Itagaki's inclusion in the Cabinet, and Count Okuma's exclusion from it. But a new difficulty presents itself here—the nation wants to have Count Okuma in the Ministry. That, we think, may be taken for granted. And it may also be assumed that Marquis Ito wants him. In fact, next to Marquis Ito Count Okuma now enjoys the largest share of public confidence, and it is to a union of the two statesmen that the people look for a stable and competent Cabinet. What, then, is to be done? The Liberals ought not to be thrown over, yet their leader will not serve with Count Okuma, and without Count Okuma a satisfactory Ministry can not be organized. Apparently the only way out of the dilemma is to take Count Okuma into the Cabinet and leave out Count Itagaki, making some other arrangement with the latter's party. We do not profess to have any clear idea as to the outlines of such a compromise, but are nevertheless disposed to anticipate it. Baron Ito Miyoji, for example, is virtually a Liberal Header, and that he will receive the portfolio of Communications or Agriculture and Commerce, we take to be tolerably certain. The Liberals, of course, are not what they were. Several of them have shown themselves unworthy of trust or consideration, and it would be wholesome discipline if the party were made to suffer now for insignificance resulting from disgraceful causes. So far as Liberal principles are concerned Marquis Ito is doubtless prepared to push them without much stint, and on that understanding, reduced, perhaps, to some clearly defined points, the Liberals might be induced to give their sup-port to the essentials of Marquis Ito's policy. It looks now as though reduction of the Army-expansion programme and increased taxation would be among those essentials. Viscount Katsura is confidently spoken of for the portfolio of War, and Viscount Katsura is known to maintain that the ante bellum establishment of the Army was amply sufficient for Japan's needs. Count Okuma, on the other hand, in his recent interview with the editor of this journal, practically admitted his will-ingness to endorse an increase of taxation, though he regarded the moment as inopportune for adding to the Land Tax. A compromise on all sides appears to be in the air.

Wednesday, Jan. 5. The Jiji Shimpo gives an account of the progress of the negotiations for the organization of the new Cabinet, from which we learn that, in addition to the difficulty of coming to an arrangement with the three parties—the Liberals, the The above would certainly be the strong- Progressionists and the National Unionists —there is the further embarrassment that sent. But no hope of his return to the tion, but we confess that we ourselves are the Progressionists are virtually divided not very sanguine as to the prospects of into three sections. It appears that the

first person to whom Marquis Ito addressed himself on receiving the Emperor's order, was Count Okuma. The latter explained that many obstacles stood in the way of his accepting office, and asked for time to consider. The result of his consultation with the Progressionists was to show that the north-eastern section and justice that it would be extremely unwise the former "reform party" (Kakushin to) to enter into a hard and fast agreement were definitely opposed to his accepting with parties which, for ought that is known office and to allying themselves with an to the contrary, may be on the eve of Ito Cabinet. These form the left wing, disintegration. The general elections are or the extremists, of the Party. centre, or Hatoyama section, were in favour of two months hence may be composed of union with the Cabinet provided that of very different elements from the one half of the portfolios were allotted to Liberals of to-day, and the same is true the Party's leaders. The right wing, con- of the Progressionists. sisting of Count Okuma's immediate fol- ble to predict that conditions favoured lowers, declared themselves content with by either party at present will have the two portfolios, including Count Okuma's, endorsement of the future representatives assigned to the Party. It was thus evident of that party. The Marquis is reported to that Count Okuma's entry into the Cabinet have declared, further, that it is not for would involve the partial disruption of the him to attempt the task of reconciling the Progressionists. If, indeed, the seceding Liberals and the Progressionists. If, after section comprised only the left wing, the matter would not be very serious, but it might also include the centre, since Marquis Ito could not possibly agree to give one half of the portfolios to Progression-ists. On the other hand, Count Itagaki and the Liberals declared their unwillingness to ally themselves with a Cabinet including Count Okuma and supported by the Progressionists. One of the plans proposed under these circumstances was that each of the three statesmen, Ito, Okuma and Itagaki, should have the fixing of two portfolios. Thus Marquis Ito would dispose of the Minister Rresident's posi-tion and that of the Foreign Minister; Count Okuma, the portfolios of Communi-cations and Agriculture and Commerce; and Count Itagaki, those of Justice and Education, the remaining four portfolios-Finance, Home, Army and Navy-being given to non-party men. This too being found impracticable, the next idea was to settle the holders of the portfolios of War and the Navy first—namely, Lieut.-General Viscount Katsura for the former and Marshal Marquis Saigo for the latter—, and then to try and persuade Baron Iwasaki to take the direction of Finance. The Baron had already refused once, but might possibly yield to persuasion. If not, Marquis Ito could appoint Viscount Watanabe. The Marquis further desired to have a nonparty-man, Viscount Yoshikawa, at the Home Office. Thus it does not appear, so far as this account indicates, that things are in a very forward state nor are there many indications that Count Okuma's much desired cooperation can be secured.

Thursday, Jan. 6. The latest news from Oiso is to the effect that no prospect exists any longer of forming a coalition Cabinet. The practical impossibility of a union including Count Okuma and Count Itagaki has already been explained. But up till very recently it seemed more than probable that an understanding between Marquis Ito and Count Okuma would be reached. are concerned, there does not appear to be anything to keep them apart. Their policies and aims are practice. That any section of a party should break away from the counted a delirious and amissing to be appeared to be anything to keep them apart. That, too, is now declared to be hopeless. policies and aims are practically identi-ing, to be eschewed by every possible cal. But the two Counts can not move contrivance. We who have hope and conwithout their parties. To use a familiar fidence in the future of the Japanese Diet, Japanese law does not recognise the conillustration, it is the tails that wag the would like to see some reflection of the cubine as such. A woman may be regist-

he is not prepared to offer up his whole policy on the altar of a Liberal and Progressionist alliance. He is not prepared, indeed, to pledge himself to any definite list of stipulations formulated by a political party. Even were he disposed to adopt such a course, he argues with much The to take place very shortly. The Liberals It is impossithe general election, the two parties can come to an understanding on the lines indicated by their leaders, Counts Okuma and Itagaki—lines which the Marquis himself finds reasonable and enlightenedthe entry of the two Counts into the Cabinet will be heartily welcomed. But, in the meanwhile, the Marquis will discharge, to the best of his\_ability, the\_duty entrusted to him by the Emperor. He will organize a Cabinet of statesmen such as seem to him most competent to discharge the functions of administration and conduct the foreign affairs of the State in the manner demanded by the circumstances of the time, and he will take care to secure unity of thought and action on the part of the Ministry.

One lesson taught by this incident is that the political parties have to learn discipline before they can pretend to administrative competence. Instead of following and obeying their leaders, they expect their leaders to obey and follow them. So little notion of subordination seems to exist that we hear of the Progressionists being divided into three sections, each of which has a different notion of the conditions that should be exacted as the price of giving its support to the Cabinet, and each is equally resolved to insist upon its own notion. Some time ago the whole series of Volumes comprising Hansard's reports of the British House of Commons' proceedings were offered for sale, and Mr. Kaneko Kentaro, then Chief Secretary of the House of Peers, strongly advocated their acquisition by the Japanese Government. We do not know whether his advice was adopted, but if it was, no more useful study could be commended to party politicians in this country than those truth-speaking volumes. The grand fact that the story of the British Commons enshrines is the recognition given by political parties-the Irish excepted-to the necessity of subordination, loyalty and obedi-ence. Incidents like Mr. Robert Lowe's Cave in 1866, and Lord Randolph Chur-chill's Fourth Party in 1880 owe the salience with which they stand out solely to their exceptional character. That any section

Friday, January 7.
Speculations continue to be indulged in by the vernacular newspapers with regard to the new cabinet, but we need scarcely occupy space by reproducing them. All the indications at present discernible go to show that neither Count Okuma not Count Itagaki will have a portfolio, and that the composition of the Ministry will be entirely independent of political parties. Marquis Ito, for the rest, seems disposed to hasten slowly. He knows the value of time as a solvent of difficulties, and he probably thinks that the loss of a few days counts for little compared with the misfortune of an unstable Cabinet. We doubt whether anything definite can be expected before the 10th, or perhaps the

#### THE SOCIAL EVIL AND SOCIAL MORALITY.

It does not seem right to dismiss this subject without a word of reference to the letter from a correspondent published elsewhere in our columns. We have, in the first place, to correct an error for which we are solely responsible. Seeing that our correspondent speaks in his second letter of Governor Hennessey, we have turned back to his former communication in the Hiogo News, and we find from it that he there also indicated Governor Hennessey, whereas we have been speaking of Sir George Bowen. Our correspondent's account of Governor Hennessey's views stands uncontradicted, therefore, so far as we are concerned, and we have to apologise for the confusion. As to the geisha and their performances, we did not intend, and do not for a moment intend, to deny that they sometimes transgress the limits of modesty. That depends altogether on the company in which they find themselves. But if they are suffered to follow the regular customs of their craft, the strictest purist could not detect a shadow of immodesty in their behaviour. Time and time again we have seen them perform their conventional rôle of attending at Japanese dinners and dancing or otherwise entertaining the convives afterwards, and we can only repeat that the most fastidious lady would not have found any cause to object. But the geisha is not always a demure, strait-laced little person. She can assume a very different character if circumstances suggest the advantage of doing so. Our correspondent must not suppose, therefore, that we claim for her anything like per-manent immaculateness. What we say is that she can be immaculate when she pleases; that she is nearly always immaculate when summoned to assist at social réunions in polite society, and that it is a mistake to regard her as an invariable exponent of evil. There are, indeed, certain bodies of geisha-the very best artistes of their class, too-who to unfailing modesty add a very strict standard of virtue. But, on the whole, the geisha is undoubtedly a demoralizing and dangerous influence, nor are her mischievous potentialities lessened by the refined graces and studied delicacy of her general demeanour.

Concerning the legalization of concubinage, we assure our correspondent that dogs in their case, and the tails refuse to see some tenection of the conered in various capacities, though she is a
be fitted together. As for Marquis Ito, fusion of Japanese political associations.

be registered as a concubine, nor has a concubine any legal status whatever. That point presents no difficulty, of course, for the person making the registration. No inquisition can be attempted into the real habits of a woman who lives in a private house and is duly registered as some kind of domestic. The law can not prescribe the number of maid-servants in a house, or examine whether they are truly what the register shows them to be. On the other hand, the law, we believe, will not grant a divorce to a wife merely because her husband keeps a concubine. In that respect namely, in so far as the indirect penalty is concerned—the law of the United States must be said to be the more strict.

We need not, perhaps, refer specially to the subject of missionaries and their usefulness. Our opinions on that point must be well known to readers of this journal. It is our desire to say, however, that even though there were no abuse in this country calling for missionary de-nunciation except the shocking and barbarously cruel abuse of keeping concubines in the same house with wedded wives, the presence of the missionaries would be amply justified. It is only necessary to ask any Japanese lady what she thinks of the aid that Christianity can contribute towards relieving her sex from that source of bitter sorrow and often life-long suffering. The answer will clearly indicate one work the achievement of which would earn for the missionary a nation's blessing.

#### THE VOLUME OF THE CURRENCY.

It has always been a perplexing problem to determine the volume of currency suitable to the requirements of the Japanese people. In 1882, an empirical belief prevailed in some quarters that a hundred million yen was the proper figure, neither more nor less. Fiduciary notes were then the principal-indeed, almost the onlymedia of exchange, and it happened that a hundred and eighty million yen of such notes were found to have been issued by the Treasury just when their depreciation had proceeded to such a point that their ratio to silver was as 180 to 100. That arithmetical coincidence seemed very striking to certain publicists, and they set themselves to compile tables for the purpose of showing that every million of notes issued in excess of a hundred miltions involved a depreciation of one per cent., from which it followed, of course, that a hundred million yen represented the exact volume of currency needed by the nation. Inclusive of hard money the volume now in circulation is about three hundred and twelve millions, and again attempts have been made to demonstrate that the general rise of prices recorded during recent years is due to an inflated currency. Nothing can be less trustworthy than these essays to trace relations of cause and effect where coincidences alone may exist. It does not follow for one moment that because the volume of media of exchange circulating in a country is apparently large, the prices of commodities must be high. Many factors fatal to such an assumption can be discovered without much thought, and no fact is better known to economists than that convertible tokens of exchange can not be forced into circulation in excess of a nation's requirements. Fiduciary notes may

their purchasing power. But the case is different with notes convertible at any time into precious metal. In Japan's case, who is to determine what addition ought to have been made to the currency during the past three years of extraordinary industrial and commercial expansion, or who will venture to assert that, even on the hypothesis that 100 million yen sufficed in 1882, three hundred and thirty millions are excessive in 1897? A hundred million yen represented 19 million pounds sterling in 1882—apart from the question of fiat currency, which does not enter into this calculation-and three hundred and thirty million yes represent 33 millions sterling to-day. Surely - even accepting the very doubtful estimate of a hundred millions as sufficient in 1882-an increase of 74 per cent. in the volume of the currency during fifteen years of such extraordinary development as the past fifteen years have been, can not be called excessive, and can not possibly be charged with having produced a general appreciation of prices to the extent of over a hundred per cent? The latest contribution to our data for calculating this question is made by Mr. Amenomiya. He says that when Hideyoshi, the Taiko, introduced the coinage system of the Keicho era-the first system of gold and silver coins worthy to be so called in Japan-the volume was fixed with reference to the yield of rice, that cereal having been the real measure of values from time immemorial. The average annual production of rice was then 20 million koku, and the keku being officially valued at I rivo, Hideyoshi determined the volume of the currency at 20 million rive. mediately prior to the war with China, rice was quoted at 8 yen a koku, approximately, and the volume of the currency, including metallic media, then stood at 320 million yen, the yield of rice being about 40 million koks. Thus the ratio between the yield of the staple cereal and the quantity of the circulating media was preserved, and the money market did not show any embarrassment. But rice has now gone to 13 yen per koku, at the most moderate calculation, and if we take the yield as 40 million koku, the volume of the currency ought to be 520 million yen, whereas it does not exceed 330 millions. No wonder, says Mr. Amenomiya, that industrial enterprise languishes, that companies have to stop working and that bankruptcies are frequent. He strongly advocates the introduction of foreign capi tal to the extent of 200 million yen, and that it should be obtained at the lowest possible rate of interest, the State railways being pledged as security, private railways also being purchased by the Government and similarly hypothecated, if necessary. Such purchase would serve to add the borrowed millions to the floating capital of the nation, or, if need be, the process of redeeming War Bonds might be resorted to. This is an interesting theory, but scarcely credible in its entirety.

#### THE RECENT LIBEL CASE.

The public have probably been amused, though certainly not edified, by the dis-cussion to which the libel suit recently tried in the United States Consular Court

greater their depreciation and the less is particularly vague, if such a wide difference of opinion can exist with reference to the force of words in almost daily use. To us, however, the incident constitutes rather an illustration of the facilities that modern legal tribunals offer for confusing a simple issue. The question was whether a man is entitled to claim that his character has been injuriously defamed when he is accused of having committed an act called sasko, and adopted a line of procedure to which the term fusei applies. Counsel for the plaintiff, concerning whom this language had been employed in a Japanese newspaper, claimed that his client had been libelled, counsel for the defence denied that the words were libellous; each side produced expert testimony in support of its contention, and the Court came to a conclusion practically endorsing the view urged by the defence. Now 25 to the word fusei, to which the plaintiff assigned the meaning "dishonest," there can not be the smallest doubt that it is sometimes used in that sense. But equally certain is the fact that it does not necessarily signify "dishonest." It is a term of wide import, corresponding almost exactly to the English adjectives "incorrect" and "improper." Thus the act of a Minister of State who shows partiality in appointing his subordinates may be described as fusei. but so may the act of a judge who sells his judgments. It can not be alleged that the term fusei carries a defamatory import in all cases. On the other hand, what is quite certain is that when a Japanese speaks of fusei na hito, he intends to indicate a person unworthy of trust; a person who can not be counted on to act correctly or properly in a given con-tingency, whether pecuniary interests or principles of abstract morality are at stake. Equally certain is it that no Japanese writer or speaker, possessing any linguistic discrimination, would apply the term fusei to a mere error of fact not wilfully misleading. He would not think of using the word unless he desired to imply moral obliquity, whether of major or of minor degree. Concerning the second expression in dispute, sasko, the defence contended that it does not convey the significance of a fraudulent act, and that its true sense is simply "false re-presentation." In connexion with this point, frequent reference was made to the fact that the term for "fraud" found in the Penal Code is sags, and it appears to have been thought that the ideograph as alone, without the conjunction of gi, could not be interpreted to mean "fraud." But if the advocates of that view had examined the Penal Code more thoroughly, they would have found that, in Art. 231 Sect. VIII., sasho, the very term in question, is classed as a crime involving a fine of from 2 to 20 yen. Indeed, that Article sets forth the very offence indicated in the alleged libel, namely, shokugyo wo sasho suru (to misrepresent one's trade or calling). The idea of frandulent purpose, or, at any rate, intent to deceive, is unmistakably involved. In short, whatever room there may be to dispute about fine shades of equivalence or variance in English translations, it is beyond all dispute that any educated Japanese, reading the words which constituted the alleged libel, would, if he believed them, conceive a radically bad opinion about the person to whom they were applied, and would carefully avoid him in business transactions. That is the be issued to an almost unlimited extent, has given rise. An impression must have plain fact, very successfully obscured by because the more copious their issue the been produced that the Japanese language the defence, but patent enough to any

atudent of Japanese. Whether the plaintiff has obliged her best friends to look deserved to be thus labelled "unsafe" another question, upon which we do not touch here.

#### GERMANY AND CHINA.

We are at length in possession of information finally settling the much discussed question whether Germany gave any notice to China, or opened any negotia-tions with her, before seizing Kiao-chou. A Washington telegram to The Times, dated Nov. 19th, says :-

When it was learnt that the bandits in the district of Ru-yeh had killed two Gorman missionaries the Governor of Shan tung was ordered sionaries the Governor of Shau tung was ordered to instruct the high officials of the province immediately to arcest and punish the offenders. On the 15th inst. the Governor reported by telegraph that four arcests had been made. This was communicated to the German Minister, but the German warships had on the 14th landed troops and given the garrison 48 hours in which to retire. The Minister did not give the Tsung Il-Yamén any sotice of this step. The news of the landing of the Germans arrived at Peking on the 15th inst, and caused the greatest supprise. the Ishding of the Germans arrived at Peking on the 15th inst. and caused the greatest surprise. The Chinese Government thereupon, in view of the friendly relations existing with the German Government, ordered the Governor strictly to control the gerrison and to withdraw the troops, enjoining them not to move without instructions.

We have from the first refused to believe that the occupation was made without warning of any kind. No one was warranted in believing anything of the sort so long as a different hypothesis could be entertained. But the above telegram places the matter beyond the range of doubt. Of course such action can not be reconciled with any principles of civilised intercourse. There will be no second opi-nion about that. Germany ought to have formulated her demands, whatever their nature, and given the Chinese Government a reasonable opportunity of rejecting or accepting them before she proceeded to extremities. If her method of dealing with China were to become a precedent, there would be no such thing as security of in-ternational intercourse. A country might at any moment invade the territory of a friendly state in a time of profound peace, and might subsequently justify its violent action by formulating a grievance, real or action by formulating a grievance, real or imaginary. It is greatly to be regretted that a Western Power should have adopted such a course, and we are much mistaken if the German nation itself does not ultimately condemn it, for sounder instincts of morality are not to be found anywhere than among the Germans. The explanation, of course, will be that China, by repeated failures to discharge her treaty obligations, has placed herself beyond the pale of ordinary diplomatic usages, and that the only way to rouse her to a sense of her duties is to show her that by neglecting them she has forfieted all title to respect, and incurred the danger of disintegration. Conceding to such an excuse its fullest value, there remains still the final test of necessity. Nothing short of imperative necessity can justify a great, self-respect-ing and eminently civilized State in making a radical departure from the rules of civilized usage. Was there an imperaof civilized usage. Was there an impera-tive necessity in this case? We can not detect it. We can not see how recourse to armed pressure would have been less efficacious as against China or more difficult for Germany had it been preceded Adviser in the Legations. "Thus Averill in by negotiation. Germany has put Averill succeeds"—His Honour the British herself in the wrong where she might have been conspicuously in the right, and at Shanghai being the new appointer's father. Original from

UNIVERSITY OF ILLII

askance at a situation in which she would otherwise have had universal sympathy. It is a pity, especially in the eyes of Englishmen, who, though they recognise in Germany a strong industrial and commercial rival, and though they have had many reasons of late to resent her action, nevertheless confess to themselves that the Germans are closer to them than any other European race, and that a serious quarrel with them is scarcely possible. It were futile after this Kiao-chou incident to preach to Oriental nations the tenets of international integrity. They will naturally reply that if the practice of a Power like Germany differs so widely from the principles professed by Europe, canons of conduct cease to have appreciable value.

#### A CHINESE LOAN FROM RUSSIA.

The telegram from Peking with reference to a Russian loan to China is probably true, so far as the main fact is concerned. There appears to be a strong likelihood that the loan will be made, but of course the alleged conditions must be regarded with considerable doubt. China's treaties with Western Powers deprive her of competence to discriminate in favour of any one of the treaty states to the exclusion of the others in such matters as the construction of railways or the working of mines. When the Emperor of China signed an agreement declaring that "should he, hereafter, from any cause whatever, be pleased to grant additional privileges or immunities to any of the subjects or citizens of foreign countries, the same privileges and immunities should be extended to and enjoyed by British subjects," he divested himself of the power to give to Russia exclusive privileges of the kind referred to in the telegram. As to the Customs, if they are to be hypothecated as security for the loan, it is con-ceivable that Russia might ask to have them placed under the superintendence of one of her own subjects. But there is a previous mortgage on the Customs, and its holders would be entitled to object to any such change. We are disposed, therefore, to dismiss all these conditions as apocryphal, and the same may be said of the assertion that a tract of territory is to be given as security. China knows that she can obtain a hundred million taels in England without hypothecating any part of her empire, and it is hard to see why she should turn to Russia under such circumstances. Finally, with regard to Pehtang and the Siberian Railway, that is a very far cry. Pehtang lies a few miles to the north of the mouth of the Pelho. It is the place where the Anglo-French expedition land-Latest estimates indicate ed in 1860. that the Siberian Railway is not likely to be finished for the next ten years. What could Russia want by talking now of extending it to the Gulf of Petchili? The thing sounds somewhat unpractical, and suggests a general programme very difficult to conceive.

Mr. H. P. Wilkinson, says the N. C. Daily News, has received by wire the substantive appointment of Crown Advocate and Legal Adviser in the Legations. "Thus Averill in Averill succeeds"—His Honour the British

#### THE " NARA MARU."

Unhappily little room remains to hone that the dimensions of the Nara Maru disaster were exaggerated by the first telegrams received in Tokyo. Out of 177 persons, only 5 appear to have been saved. There is some doubt as to the total number, 177. A message despatched from Taipeh on the 28th ultimo speaks of 85 persons having been on board. But the details of the larger aggregate are given very clearly by another telegram, namely, Commander Yasuda and 100 seamen of the Imperial Navy, 16 ordinary passengers —all first-class, apparently—and a crew of 60. The saved are two naval seamen and three of the crew. The man of-war Tenris and the steamers Anning and Takao were sent to the scene to succour to any that might still be living, but the tempestuous state of the weather rendered the attempt abortive. Among the corpses cast ashore, one has been identified as Commander Yasuda's by documents found in the pockets.

We may add that the idea of Mr. M. Kirkwood's having been a passenger in the *Nara Maru* appears to be unquestionably erroneous. It was suggested by a telegram sent by Mr. Kirkwood himself to the Judicial Department in Tokyo, in which he spoke of the Nara Maru's loss and his own safety. But it is now plain from a comparison of dates that the Nara Maru was en route for the Pescadores from Kelung when the dis-aster occurred, whereas Mr. Kirkwood was in the Pescadores at the time, having gone thither from Anping a few days

previously.

#### COMPARATIVE NAVAL STRENGTH IN THE FAR EAST.

The Japan Gazette publishes an interesting table slowing the relative strengths of the squadrons of the various Powers in the Far East, the result being that England and Japan muster 31 ships with an aggregate displacement of 147,307 tons-including four line-of-battle shipsagainst 22 vessels representing Russia, France and Germany, with a total dis-placement of 114,851 tons. We observe are apparent inaccuracy. Among the French ships our contemporary includes Among the the Jeanne d'Arc, an armoured cruiser of 11,270 tons. The Jeanne d'Arc, unless we are mistaken, is not yet in commission. The correct name would be the Jean Bart, second-class unarmoured cruiser of 4,109 lons and 19 knots speed. This reduces the displacement of the Freuch squadron to 19,921 tons, and that of the three allied squadrons to 107,690 tons.

#### FIRE ON NEW YEAR'S NIGHT.

On Saturday night fire broke out in the kitchen of a residential house in the Settlement, No. 119, occupied by Mr. H. Albers. The alarm was given at 9.30 p.m. and very shortly afterwards Superintendant Morgin, of the Yokohama Fire Brigade, with a party of men of the Brigade, and a couple of hose-reels and standpipes were upon the scene. The roof of the kitchen was then blazing up merrily, but the flames were very soon extinguished with water from the neighbouring hydrants, before any damage had been done to the main building. The origin of the fire has not been discovered.

#### THE FAR-EASTERN QUESTION.

RUMOUR is not slow to magnify the perils and menaces of the situation that has been created in the Far East by Germany's action at Kiao-chou and Russia's at Port Arthur. Again we hear the old wail about England's decayed prestige, and again omniscient journalists are pluming themselves on the prescience they displayed two or three years ago when they predicted that this Power would do this and that Power that, and when they declared that if England did not do something she would be condemned for ever to inaction. Prestige, indeed! What is prestige? If the recent proceedings of Germany and Russia, as interpreted by these auxious observers, are to be counted evidences of well supported prestige, then in truth the strength of that much discussed abstraction varies directly as a nation's immorality, and its most brilliant displays consist in international maraudings. The assumptions upon which they base their ideal of prestige are that Germany, in a time of profound peace, suddenly and without warning of any kind, made an armed irruption into the realm of a friendly State, and under pretext of avenging the murder of two missionaries by Chinese banditti, executed a preconceived design of obtaining possession of Chinese territory and securing exceptional privileges of mining and railway building in a Chinese province; and that Russia, baving joined with Germany and France to guarantee the safety of the Chinese capital by driving Japan from a position which she had won in fair warfare, has now turned round and seized the same position for herself, thereby declaring, in effect, that her action in expelling Japan was a dishonest intrigue, prompted, not by any solicitude for China's safety, but by a desire to remove all obstructions from the path of her own greedy aggression. These are the hypotheses underlying the critics' admiration of German and Russian prestige, and because Great Britain has not gone and done likewise, her star is suphas suffered solely at the hands of English detractors and sensationalists, who, piecing together fragments of rumour, construct imaginary complications, and then abuse British representatives and the British Government for not rising to situations which do not exist. If Gerought to be proud that his country has interests threatened. Rumour alleges,

Powers directly concerned in these Far- usual. Russia has not taken any step Eastern events, she towers head and beyond seeking permission for her ships shoulders not only above each of the rest, to winter in Port Arthur, and availing but even above the other three combined, herself of the permission when granted. We speak of a combination, but is such a She may intend to hold the place perthing practically conceivable as a combination of Russia, France and Germany against England in the Far East? Discriminations between the Occidentand We do not intend to suggest that the the Orient for the purposes of warlike alliances are not supposable. If a belligerent coalition between Germany, Russia and France be possible in Asia, then it is possible in Europe also. Can any sent to a warlike issue, or even to the one seriously contemplate the latter con-immediate partition of China. Still less tingency? Have there not existed, ever is it a situation suggesting any loss of since 1870, insuperable obstacles to anything of the kind? From a strategical effort of self-assertion on England's part. point of view also it is quite plain that Japan is much more concerned to enter the three Powers could not hope to make the arena. Her rights admit of no dispute. head against England in the Pacific unless they crippled her in the Mediterranean and, moreover, obtained the command of session less than three years ago by force of her coaling stations along the route arms. Her troops actually held the whole from Aden to Hungkong. With Eng- of southern Shinking and her officials adland holding the Suez Canal, not a German, French or Russian ship could find its way eastward to reinforce the allied squadron, whereas the route would be clear all the time for British vessels. Any one can appreciate what that means. Again, suppose that the combat had broken out and that Japan were neutral. Where could the ships of the allies go to coal or to repair? The plain fact is that such a fight is out of the question. And, indeed, we see no reason why there should If, as is very probable, the present "exbe any talk about it. A German naval station at Kiao-chou need not impair Exceptional conces-British interests. sions as to mining, railway building and so forth are another affair, but with regard tion of her right, she had better lose no to that, one of two issues is certain: time in showing that she recognises it either no such concessions will be granted, or they will be granted to England and Germany alike. We can be quite sure that the British Minister in Peking has been sufficiently emphatic in his representations to the Tsung-li-Yamen on that subject. It remains to be seen whether Germany has any intention of establishing herself permanently at Kiao-chou, but posed to have set. The fact is that if even granting that she has, her presence England's prestige has suffered at all, it there need not trouble England. As for Russia, she has asked for China's permission to use Port Arthur as a winter station for her ships, and China has granted the request. Why should England be thrown into a flutter by proceedings of that nature? When Russia made similar application for Kiao-chou, and actually many and Russia have acted in the employed it as a winter harbour, there was manner alleged by several of the Eng- no public excitement, nor any talk about lish local journals, every Englishman England's prestige being lowered or her not followed their example. Happily for indeed, that Russia is fortifying Kin-chow. Great Britain, she is not obliged to have That, of course, would point to something recourse to such coups. Her prestige more than a mere winter station, such as rests on an incomparably more solid and Nagasaki and Yokohama used to be for pairing the confidence that foreigners feel respectable foundation. It rests on the the Russian squadron. But rumour ap- in the integrity of the Japanese Govern-

manently, but until some plainer evidence of such intention is apparent, England sertainly need not take any decisive step. situation is without elements of uneasiness, or that it may not ultimately necessitate a conference of the Powers. But it is not a situation pointing at pre-British prestige or demanding any violent The Liao-tung Peninsula and the northern littoral of the Yellow Sea were in her posministered its affairs. She retroceded the district to China in deference to a united protest from Russia, Germany and France that her tenure of it would render the independence of Korea illusory and threaten the security of the Chinese capital. If the three Powers, or one of them, contemplates occupying, or otherwise alienating from China, any part of the territories retroceded under such conditions, Japan has the clearest possible title to protest. cursions and alarums" eventuate in a conference of States, Japan has the most distinct right to occupy a place at the council board. But to secure the recogniherself. The squadrons of Russia, of Germany, and of England are already in the sphere of disturbance, but no Japanese squadron is visible. People ask what good purpose can be served by Great Britain's naval demonstration at Port Hamilton and Chemulpo. Simply this, she shows herself upon the scene. She intimates that the future of the Korean peninsula and its adjacent islands shall not be settled without her consent." Why does not Japan also make "act of presence"? It will be intensely humiliating and injurious for her to find herself quietly ignored on the day of settlement, and that is what will certainly happen II she maintains her present attitude of apathy.

#### THE CUSTOMS AND THE "BU" QUESTION.

HE question of silver bu and the Japanese Customs still occupies attention and is still employed as a weapon for imfact that among the four Great Western pears in this instance to be wrong, as ment. We propose to devote a few Original from

words to the subject in the hope of apparently entertained in Kobe. One Notification the price of the bu in terms of may be noted at the outset. It is charged of Japanese importers, the dollar being that the Japanese Government has never thus worth 3.17 bu.\* On the other hand, vouchsafed any explanation of the matter, but that at last "the Mail, after waiting mitted to pay the duties in bu: they had some three years, has ventured in where to present dollars. As between the foofficials feared to tread." circumstances a statement of that charac- every dollar presented by the former was ter disfigures a controversy. But when reckoned at 3.11 bu only, while every a distinct misrepresentation is implied, dollar presented by the latter was reckonthe statement becomes wantonly mischievous. The Japan Mail took up the per cent., approximately, in favour of an accusation formulated in the Kobe in a moment. Here we confine ourselves a falsehood. There has been no "at last" understand that its explanations and reasons were long ago submitted to the Foreign Representatives. to have taken place, it is simply because the matter is still under discussion.

The chief charge with which we undertook to deal, the only charge, in fact, with which we were concerned at the moment, was that the Japanese Government, in 1874, had issued secret instructions for the purpose of discriminating in favour of their own nationals and against foreigners in the matter of the payment of import duties. Let us consider first the question of secrecy. There was no secrecy. The whole affair was just as open and above board as any other legislative measure adopted by the Authorities. In September 1874, the following Notification was issued by the Japanese Government:-

Notification No. 93.—9th month, seventh year of Meiji. Although a comparative table of values of old nurrency was published in the fourth (intercalary) month of the 1st year of Meiji, the Mint Department, having now revised those values, as in the subjoined table, after a minute analysis, will issue new coins in exchange for the old at the rates given therein until the 12th month of the sighth year of Maiji. Persons nossession at a rates given by Maiji. Persons possessing old coins may apply to have them exchanged at their respective local offices. Until the lapse of the above term, the old currency may be used in the payment of taxes and in all other payments to the Government except the customs dues, but is henceforth prohibited in transactions among the people.

REVISED VALUES.

Ichibu-gin	31 5 sen
Ichibu gin (old)	35 1 13
Ichibu ban (new)	32.8 ,,
Ichibu ban (Ansei, gold)	88-2 ,,

To make the matter clear it is necessary to explain that the specific duties set forth in the Import Tariff were assessed in terms of the silver coin called on. Any one tendering payment of such dues might do so either in bu coins, or in dollars. The value of the dollar in terms of bu for the purposes of foreign importers was fixed by Treaty: one bu 31.5 sen.

represented 32.154 sen, the dollar being dispelling the very erroneous impressions thus worth 3.11 bu. But by the above is explicitly stated. point, though of an unessential nature, the dollar became 31.5 sen for the purposes Japanese importers were no longer per-Under any reigner and the Japanese, however, since ed at 3.17 bs, there was a difference of 2 subject in direct and immediate reply to the Japanese. We shall recur to this point Chronicle. To talk of "at last" and of to the matter of secrecy. There was, we "some three years' waiting" is to suggest repeat, no secrecy. The Notification was publicly issued and took its place among nor any "three years' waiting" so far as the laws of the land. That no steps were the Japan Mail is concerned. With re- adopted to bring it to the knowledge of fogard to the Japanese Government, we reigners was because it affected Japanese subjects only. It interdicted the use of the silver bu by Japanese, but the in-They will terdict could not be extended to foreigners doubtless be published when diplomatic since they were entitled by treaty to convenience permits. If any delay seems use the bu. It was, in fact, a purely domestic regulation, and such regulations are not announced to foreigners in any country. But a foreigner interested in matters of the kind could have made himself acquainted with the Notification as easily as with the Press Law or the Mining Regulations. Moreover, a glance at the Customs Returns of that epoch would have at once illustrated the working of the Notification. We alluded but many times, the charge has been to this point in a previous issue, but have been met with the retort :- "To discover the existence of the discrimination foreign merchants would have had to take the Customs Returns, ascertain the total value be construed in such a sense. So far as of the goods passed by Japanese upon the Treaties are concerned, the Japanese which specific dues were charged, discover Government might remit import duties what proportion of the sums paid in by altogether in favour of its own subjects. Japanese were for specific duties, and then Under the Revised Treaties nothing. by a process of subtraction and compari- of the kind would be lawful, since son eventually arrive at the number of by they secure national treatment for to the dollar which Japanese paid." That the subjects or citizens of the contractis true of the Customs Returns as compiled ing parties. But the Treaties now in during recent years but is not true of the Customs Returns at the epoch in question. In the latter the quantities of each particular class of goods imported by foreigners and invidious discrimination. That, however, Japanese respectively and the duties paid is a point of sentiment. If facts alone be were clearly distinguished, item by item, so that not the least difficulty could have been experienced in comparing the rates. How secrecy can be alleged in the case of a procedure determined by public Notifications and publicly indicated on the Customs Returns, it is difficult to apprehend. Moreover, if any further evidence of publicity be needed, it is furnished by the Mint Report for 1874, where the

adoption of the new rate by the Customs

With regard to the disadvantage at which foreign importers were placed, it was obviously confined to payments made in dollars. The intrinsic value of the bu being 31.5 sen, and its demonetization having been effected by the above notification, its price in the market must always have been less than 31.5 sen. As a matter of fact, it was generally quoted at much less. Hence the foreign importer could exchange his dollars in the open market, and pay his duties with bu which he had procured at a lower rate than that allowed by the Customs to Japanese importers. Twenty million bu were actually handed in by foreigners under these conditions between 1874 and 1894. It is of no use denying the fact on the evidence of an official who "never remembers seeing a single bu paid in." The Customs records show, in black and white, that the yearly payments-varying from over 3 millions in 1875 to less than two hundred thousand in 1894-aggregated 20 millions. On the other hand, foreign importers discharging the Customs dues direct with dollars, suffered a discrimination of 2 per cent., and of course the total loss thus incurred exceeded the total gain on payments made with bu.

It has been most confidently asserted that the action taken by the Japanese Government in this matter of the bu was a distinct violation of the letter and the spirit of the Treaties. Not once or twice, made. None of those advancing it, however, has attempted to prove it. The task would have been impossible, for the Treaties do not contain a word that can operation impose no restriction of the kind. The Government would be unwill. ing, we presume, to resort to any such considered, the statement that the Notification quoted above was in any sense a violation of the Treaties will not hold water for a moment.

The steamer Iyo Maru, secently built at the Kawasaki Dockyard, Kobe, for the Ito Steamship Company, made her official trial trip off Awaji on the 25th ult., says the Chronicle, with satisfactory results. She developed a speed of 15 knots an hour. The new steamer is 180 feet long and her gross tonnage 745. She is fitted with triple expansion engines, and the cabins are fitted with electric light. She is to make her maiden voyage from Osaka on the 6th prox. to Oshima, Satsuma, via Moji, Hakata, Naga-saki, and Kagoshima.

<sup>·</sup> In a recent article we inadvertently wrote that the value of the dollar was fixed by this Notifica-tion at 3.15 bu, whereas we should have written that the value of the bu in terms of the dollar was

#### RUSSIA AT PORT ARTHUR.

If it be true that Russia has sent a force of marines to Kin-chow and is throwing up defensive works there, the fact is full of significance. Kin-chow-or Chinchow as it is also called-lies at the neck of a narrow isthmus connecting the southern and central parts of the Liaotung Peninsula. It is 25 miles distant from Port Arthur, and it may be called the back-door of that important harbour, for a comparatively small force posted in the vicinity of Kin-chow could effectually bar any advance against Port Arthur from the land side. The first fatal mistake made by the Chinese in connexion with the Japanese invasion of Liaotung, was their failure to make effective provision for guarding Kin-chon. The place fell after a very brief struggle and the road to Port Arthur lay open. It is quite plain, however, that if Russia be occupying Port Arthur merely as a winter station for her squadron, the defences of Kin-chow have no manner of concern for her. We must the refore conclude either that she has really undertaken to restore the fortifications of the place in China's interests, or that she intends to be a permanent occupant herself. Under any circumstances this Kin-chow news imparts to the whole incident a complexion very different from that originally assigned to it.

#### EVIDENCES OF CHRISTIANITY.

Some time ago, a newspaper controversy between Mr. Takahashi of the Japan Times and the Rev. E. Snodgrass, editor of the Shepherd's Votce, led to the issue of a challenge—by the former gentleman, we think-to hold a public discussion, and argue the pres and cons of Christianity on the platform instead of in the press. The challenge was accepted, but as a considerable interval elapsed without any steps being apparently taken to complete the arrangements, the public began to think that the affair was "off." The debate is to take place, howwas "off." The debate is to take place, how-ever, in Tokyo on the 8th and 10th instant, at a place amounced in our advertisement columns. The propositions are :--

columns. I he propositions are !—

s.—Affirmed: That Christianity as a social institution is useful, but in its dogmatic sense is but a ghost of superstition and an entirely usefus institution now—Mr. Islambashi affirms.

a.—Affirmed: That Christianity as a social institution is useful, and that in its dogmatic asses is proven to be both rational and credible on the evidence of historical records: and is, therefore, necessary to the highest development of the human race——The Rev. E. Snodgrass.

#### DEATH OF MR. H. E. HARRIES.

We regret to have to record another death from typhoid fever, which occurred on Sunday last, when Mr. H. E. Harries, of the Hongkong and Shaughai Bank, succumbed to the disease after a very short illness. The burial aervice took place at Christ Church on Monday morning, the Rev. E. C. Irwine officiating, and concluded at the Cometery, where there was a large attendance of friends of the deceased and officers of the Bank. The pall-bearers were Messrs, C. Guinness, J. Maclean, W. Reid, G. C. Murray, H. W. Fraser, E. Hutchinson, J. G. Watson, and J. MacArthur. Many beautiful wreaths were sent by friends, amongst others by Mr.
and Mrs. H. M. Bevis, Mrs. Wheeler, Mr. and
Mrs. E. H. R. Manley, Mr. and Mrs. W.
Campbell, Mr. and Mrs. J. C. Nicholson, Mr.
and Mrs. R. Home Cook (of Kobe), Messrs. J.
Lias, V. Blad, E. J. Libeaud, W. B. Clayton,
G. W. Middleton and F. C. V. Ribeiro, the
Hougkong and Shanghai Bank, the Chartered
Bank, the National Bank of China, the staff of
the General Hospital, the Kobe branch of the Asiatic provinces, and that a revolt is also feared

#### FORMOSA.

"The Beautiful Island" maintains its reputation for unruliness and violence Baron Nogi has again to report various outbreaks of rebellion and various measures of restraint. His telegrams just published relate to events which occurred last month, from which delay we infer that the operations described were in localities more or less remote from the regular lines of communication. The details do not convey explicit information, but it will be as well to translate the telegrams accurately :—

OPERATIONS OF THE FIRST MIXED BRIGADE. The insurgent bands under Lo, Ya and Su Lick having assembled in force, and made irruption into the hilly district on the north of the Kolung River, where they gave themselves up to general pillage, three companies of in-Kelung, under the command of Major Hirooka, on the 7th of December, to disperse them. On the approach of the troops the rebels fled in all directions, and no encounter of any consequence look place. The troops camped out in the hills and instituted a thorough search of the district, with the result that, on the 23rd of December, the insurgents were brought to bay, and two bodies under Seh Ko and Sui Hwan-kink were engaged by the gendarmes, the rebel casualties being 13 killed 40 or 50 wounded and 2 taken prisoner. Or the side of the gendarmes there were one killed, one wounded and one missing.

OPERATIONS OF THE SECOND MIXED BRIGADE. On the 21st of November the insurgents at Taipui-chin and Tok-to-cho were attacked and scattered, but at the close of the month they re-assembled; and in the beginning of Decemher, some two hundred of them, under the leadership of Ho Tiat and Ting Sai sian, made their appearance in the Chik-kow hills, entrenched themselves strongly, and made as trenned manageres arrongly, and made as though they contemplated an attempt to recover possession of Ta-peng-ting. On the 7th of December, therefore, the Brigade sent five single-companies of infantry, a battery of artillery, together with detachment of engineers and ambulance and a squadron of mounted gendarmes, to attack them. On the morning of the 13th, the assault was delivered from three directions, and the rebels, after some resistance, abandoned their entreachments and fled in all directions, with a loss of to killed, 26 prisoners, including one of their leaders. Nai Gi, and 40 wounded, including Ho Tist The Japanese casualties were three wounded, including a sergeant of engineers. A part of the attacking force was stationed near Kai-kowshan, and the remainder was withdrawn.

#### OPERATIONS OF THE THIRD MIXED BRIGADE.

At the close of November, about 200 insurgents assembled at Hwan-tsu-shan, under the command of Chai Ai ai and Chai Hiong, and raided the surrounding districts. Two companies of the Brigade which were returning, on relief, from Sin-eng and Chian-pa-fu, attacked and dispersed these insurgents on the 7th of December. But it having been ascertained that a large force of insurgents were holding a fort in the vicinity of Kiu-ti-ong, Major Inonye was despatched on the 8th to disperse them, having under his command two companies of infantry, a squadron of cavalry, a detachment of artillery and a detachment of engineers. The rebels

the General Hospital, the Kobe branch of the Asiatic provinces, and that a revolt is also feared in the Caucasus.

Asiatic provinces, and that a revolt is also feared in the Caucasus.

The stock remaining in the Caucasus.

#### JAPANESE FACTS AND COMMENTS.

Immigrante to Hokkaido have been steadily increasing year by year, says the Tokyo Asahi, the number for the 29th year only having decreased an compared with the previous year. Immigrants in 1895 totalled 59,671; in 1896, 50.396, a decrease of 9,275. This unusual falling off was attributable to the war with China. This year the number of emigrants has considered ably increased, and although no accurate statistics have yet been compiled the total number in supposed to exceed 60,000. The majority of these immigrants come from Ishikawa, Aemori, Niigata, Toyama, Kagawa, Yamagata, Akita, Iwate, and Tokushima, some of trese prefectures sending more than 7,000 immigrants each every year.

With the progress of the business of the Isdustrial Bank the advantages of obtaining loans repayable on yearly installments have made themselves clearly recognisable. Applications for such loans are steadily increasing, especially in industrial communities. The spinning com-panies, excepting those in Ozaka, Settau, and Miye, have all applied for loans. Some of them have already settled contracts and others are now negotiating for the same. The Plax Manufacture ing Companies in Hokkaido and Shimotsuke are also on the list, and their example has been followed by some of the silk manufacturers in the country. The amount of loans thus issued by the Bank is said to exceed 1,500,000 yes, which will be increased to 1,800,000 yen in January next. Complaints are heard from all directions as to the tedious procedure of the Bank in the issue of loans. But as the Bank's contract extends generally over twenty years, in spite of the imperfection now noticeable in its machinery for the inspection or appraisement of land or other securities for loans, elaborate investigations are required in most cases, making delay in-evitable. From next year, however, the Bank promises to afford greater facilities in all its transactions. A branch of the Central Bank is to be established in Ozaka immediately after the collection of the second call on its shares, Many of the provincial banks are to be commissioned to act as branches or agencies but no change will be made in the rate of interest for the present year.

The revenue payable into the Treasury for this year, according to the Hecki, amounts to 212,114,119 year while outlays to be made after next Spring are estimated m follows:—Redemption of loss bonds, 6,906,500 yen for 1898; 7,170,239 for 1899; interest on public bonds, 3,862,482 yen for 1898; 3,848,928 for 1899; interest on loss bonds, 1,875,000 yen for 1890; interest on loss bonds, 1,875,000 yen for 1899; interest on Public Undertakings Bonds, 1,409,858 yen; 1,778,202 yen for 1899; 10 per cent, of the military and naval armament expansion expenses, 6 358,647 yes for 1897; 4,449,428 yes for 1899; 5 per cent. of general administrative expenditure, 4,253,434 yes for 1897; 3,625,781 yes for 1898.

Since the new coinage system came into force in October last up till the 28th December gold coius exchanged for notes amounted, gold coits exchanged for notes amounted, according to the Mainichi, to 10,186,000 yen and for silver to 3,166,925 yen, making a total of 13,352,925 yen. It is for these reasons that the export of bullion in November shows an excess. The foreign trade for the year can not be definitely tabulated yet but it is beyond doubt that the excess of imports which characterized the 27th year of Meiji still continues to exist, The sums brought into the country by the Indemnity have no longer to be reckoned with, and an outflow of gold must inevitably be expected.

The silk market, asserts the Mainichi, was glutted with 33,066 bales in the beginning of last year. Naturally holders were anxious to realize and prices steadily fell. Trade revived a little in April, but on the whole business in the last half of the season hardly came

not exceed 16,300 bales. In the 29th year of Meiji 43,585 bales of silk were exported while in the 30th year 80,408 bales were shipped abroad from the beginning of the new season. Quotations were at first fixed at 860 yen-though at one time they fell to 840 yenbut eventually rose to 900 yen at which price the market enters upon the new year. scarcity of silk in foreign markets and the orders now coming in from abroad will certainly tend to enhance the value of present stocks; though February is always considered a hopeful month for ailk dealers.

The following comparative table shows the amount of silk received at and shipped from Yokohama during the latter half of each of the past three years :-

	Halos.	Bales.	Balos.
Stock	866	16,581	5.525
Activals	114.569	73,132	98,812
Sales	58,896	36.366	66,797
Direct export	13,198	8,638	14.093
Reinroed	8,629	12,469	7,116
Stock brought over	43.714	32,238	15,948

Arrivals of raw and waste silk in Yokohams from January in December last year were as follows :- Raw Silk, filatures, 84,140 bales; Sakuri, 21,843 bales; hanks, 25 bales; ori kaishi, 12,193 bales; shioisuke, 1,197 bales; miscellaneous, 167 baler; total 119,571 bales; waste silk—noshi, 21,838 bales; skin, 21,206 bales; tama. 264 bales; pierced cocoons, 708 bales; floss, 28 bales: miscellaneous, 6,178, total, 50,222 bales.

According to the Mainichi, the amount of kerosene oil imported from Russia and America during last year was 1,886,118 and 1.743.771 cases respectively. The import of Sumatra oil increases day by day though it does not yet exceed 100,000 cases per year. Last year this oil was at one time quoted at 2.33 yes. but it afterwards fell to 2.10 yen. Comet brand is the cheapest of the oils now imported being sold at from 1.90 yen to 2.03 yen. Arrivals from Russia and America have been brink since October last and considerably more business lies been done than in the previous year. Russian oil alone totalled 302,000 cases against 130,000 cases last year, while Ameriean oil exceeded 256,000 cases. Demand now begins to decrease. The tightening of the money market as well as the general depres-sion of trade have deterred provincial dealers from entering upon large contracts and a full im prices is expected.

#### HERBERT SPENCER'S KNOWLEDGE.

John Fiske, the historian, relates the follow ing incident about Herbert Spencer :-

John Fiske, the historian, relates the following incident about Herbert Spencer:—

"I remember one evening, many years ago, hearing Herbert Spencer in a friendly discussion regarding certain functions of the cerebellum. Abstrase points of comparative anatomy and questions of pathology were involved. Spencer's three sutagonists were not violently opposed to him, but were in various degrees unready to adopt his views. The three were Husley, one of the greatest of comparative anatomists; Hughlings lackson, a very eminent authority on the pathology of the nervous system; and George Henry Lows, who, although more of an amateur in such matters, had nevertheless devoted years of study to neural physiology and was thoroughly familiar with the history of the subject. Spencer more than held his ground against the others. He met fact with fact, brought up points in anatomy the significance of which Huxley had overlooked, and had more experiments and clinical cases at his tongue's end than Jackson could muster. It was quite evident that he knew all they knew on that subject, and more besides. Yet Spencer had never been through a course of 'regular training' in the studies concerned; nor had he ever studied at a univarsity, or even at a high school. Where did he learn the wonderful mass of facts which he poured forth that evening? Whence came his tremendous grasp upon the principles involved? Probably he could not have told you..., When I mentioned this to Lewes, while recelling the discussion on the cerebellum, he exclaimed — Oh, you can't account for it! It's his genius. Spencer has greater instinctive power of observation and assimilation than any man sinco Shakespeare, and he is like Shakespeare for hitting the bull's eye every time he fires. As for Darwin and funley, we can follow their intellectual procasses, but Spencer is above and beyond all; he is inspired!"

#### CALENDARS.

The most beautiful of all the calendars we have received this season is that of Mr. Tamamura, the well known photographer of Yokomura, the well known photographer of Yoko-hama. The upper part of a thick sheet of cardboard with acolloped edges and finely pitted surface, is occupied by a coloured phototograph, the subject an avenue gate within which stands a daintily dressed girl bowing to a lady visitor. Beside the gate hangs a sign-board with the legend, Omdeto Tamanurs. The tones of the picture are most charming, but we are obliged to confess that the colour of the almanack fastened in the lower part of the card is not altogether satisfactory

The Methodist Publishing House (No. 2 Shichome, Giuza, Tokyo), which has now become an institution of considerable importance, sends out a thoroughly practical calendar, the year, the month, the days of the week and the days of the month, all marked in different colours, large, well arranged and conspicuous. Unlity rather than beauty was evidently the object of the compilers, and they have attain-

The Insurance Offices have not made any new departure. They send out calendars designed and decorated pretty much after the fashious of last year. The North British and Mercantile (Yokohama agents, Mesars, Findlay, Richardson and Co.) is the colosaus of the number, from a pecuniary point of view. Its funds on the 31st of December, 1896, were £12,954,532, and its revenue in the fire department for that year was £1,577,029. The card is pretty and refreshingly chaste; it owes its good looks solely to skilfully blended colours and handsome lettering; there is no attempt at pictorial decoration.

The Manchester (Yokohama Agents, Messrs, Kingdon, Schwabe and Co.), with its total funds and securities of 21 millions sterling, distributes a pretty altest, artistically coloured and distinguished by a view of Manchester at night, a portion of the city burning with lurid flerceneus.

The Phoenix, which is, perhaps, the most aptly named of all offices, justly glories in having paid losses aggregating more than twenty million pounds sterling during the 115 years of its career. The cosmopolitan charac-ter of its operations is suggested by a flaming city in which mosques, minarets and pagodas are associated with churches, cathedrals and chambers of commerce. The Yokohama Agents are Messrs. Kingdon, Schwabe and Co.

The Northern (Fire and Life), of which Messrs. W. M. Strachan and Co. are the local agents, has funds aggregating £4,893,000, and receives fire premiums amounting to £700,000 and life premiums totalling £243,000. Its calendar is a fine specimen of designing in solid colours.

The Imperial, which, during a life of 94 years, has paid losses exceeding 143 millions sterling, possesses reserves and assets aggregating 2 millions, though its paid up capital is only three hundred thousand pounds. The Yokohama agents are Messrs. Browne and Co The calendar of this company, specially prepared for Japan, furnishes a quantity of useful information. Among the tables inscribed on its face there is one recalling the melancholy fact that silver, which is now quoted at some 26ld. per ounce, sold for 61 pence in 1869.

We have to congratulate the Japan Gazette on sending out a calendar excellently designed and in all respects very tasteful. It offers a good deal of useful information, and as a specimen of printer's work does great credit to the resources of our contemporary's office. Indeed, the typography and general "get up" do not suffer by comparison with the outcome of London establishments.

Among the pictorial sheets distributed by the Japanese newspapers, we notice as specially !

attractive the Tipi Skimpo's chrome-lithograph of a girl with a lap-dog in her arms, typifying the fact that 1898 is the year of the dog, according to the old Japanese calendar. The girl's face and costume are really fine producstions, but the drawing of the dog shows all the weakness generally observable in Japanese efforts to depict animals.

The Nichi Nichi Shimbun presents to its readers a capital portrait of Marquis Ito, in full uniform, wearing a galaxy of decorations This is a particularly timely choice of subject, and since it must have been made some time ago, it does considerable credit in our contemporary's prescience.

#### MONTHLY CUSTOMS REQUENS.

#### A CORRECTION.

We have to apologise to the Kobe Chronicle for inadvertently translating its assertions into named, by Count Okuma. The correction, however, is purely technical: it does not in any way affect the argument. The Kobe Chronicle explicitly endorsed Count Okuma's view by undertaking to demonstrate that he was correct in asserting that the funds for building the Fuji and the Pashima had been granted by the Dist. That was the whole question at issue. Our Kobe contemporary, with its wonted magnificence about irrelevant trifles, makes a great deal, a very great deal, of the fact that we put Count Okuma's words into its mouth, and by flying along that side route, evades the original problem altogether. It takes the position of a parson who should object to being credited with using the words of the text on which he preaches. Neither has it yet learned the every-day lesson that evil suspicions are always a subjective revelation.

#### PICTURESQUE PENANG

We have received three more sheets belonging to the remarkable series of pictorial posters for the preparation of which the various foreign communities in the East have put up considerable sums of money. The public is now aware, on the authority of Mr. Wellesley Farker, that from the funds subscribed for the manufacture of these flaming horrors only a small per-centage goes to the advertising agent, the remainder being divided between the producer of the sheets and the newspaper associated with Mr. Parker in the enterprise. Hence, according to Mt. Parket's account, the newspaper's method of dealing with advertisers determines the quality of the so-called "picturesque abeets." Then we can only say that the newspapers have hitherto behaved very badly. These affairs are fit for nothing but to be pasted on the shutters of a travelling caravan. Penang and the Malay Peninsula have now been done in red, blue and yellow, pretty much after the execrable fashion that has already produced an epidemic of nausea in the case of the Straits Settlements. We can only hope that Yokohama will be a magnificent exception.

#### THE DREYFUS AFFAIR.

The Paris correspondent of The Times, in a letter dated November 19th, speaks thus of the Dreyfus affair :--

letter dated November 19th, speaks thus of the Dreyfus affair:—

If the Dreyfus affair goes on becoming more and more complicated, if it continues to bring forward new personages, if the newspapers continue and did fuel to the fames by violently taking aidea, if M. Esterhazy, M. Lebloiss M. Hazilke, and, indeed, all those who are more or less implicated or interested in the affair, go on speaking writing, giving interviews, and calling at newspaper offices to deny the uterasoes imputed to them—if this imborglio, these surprises, this exchange of insults, and this clash of cacial passion is prolonged drance will soon asem like a mad-house. Happily, the world does not take it seriously, but knows that this is a transient outbreak; in which even phody tries to drown his neighbour's voice. There has eni-ted, moreover, for ay years, a system, almost a passion, of pareding national sores in the eyes of the world. Frenchmen are in the habit of proclaiming that civic corruption and political immorabity here reach their climax, and they console themselves after the fashion of the citizens of Chicago when they boasted that their fire wan the greatest on record.

This is what has occurred in the Dreyfus case. It might have been minimized. Silence might have been imposed on Chamber. Senate, and Press. Interviews and confidences all this apparatus of deafening uproar might, and in any other country would, have been prevented, but this has not been done. Evarybody is exciting himself and others. For some months France had been calm, and had begun to yawn. Perhaps, for a diversion, the Cabinet would have been overturned, but the Dreyfus affair has come up, and, even if M. Hanotaux offered to recognize England's protectorate in Egypt on condition of Cleopatra's Needle being sent over an a pendant to the Luxor Column, nobody would pay any attention to the case and the decided whether E. Esterhazy or Captain Dreyfus and the documents which show that if the vendors were traitors the buyers were simpletons.

CHINESE ITEMS.

The process of belittling the British Govern ment in order to establish one's own reputation for asgacity is industriously carried on by the N. C. Daily News. Discoursing on the text of how The 2 imes and the Foreign Office poohpoohed its information about the Causini Convention, our contemperary says:—"Now the F. O. is in the undignified position, as we learn from Reuter, of having to run round to the various Courts asking them what they think of warned by us two years ago—and getting snubbed for their pains." The only trouble about this poem of self-laudation is that it is based on a myth. Reuter has not told us anything of the kind. He has telegraphed that "the German Foreign Office professes no surprise, &c.," and that "the Washington Government having been sounded as to its views on Chinese affairs, replied, &c." That these independent statements of the views entersained by the Berlin and Washington Cabinets were obtained by the London Foreign Office after undignified running round is a pure fiction, illustrating the general trustworthiness of the political criticisms penned by the Shanghai journal. It never seems to occur to such writers that a British journal might find a worthier métier than to malign the British Government, minimize Great Britain's in-fluence, and endeavour to prove that Englishmen in the Far East have a supreme contempt for the capacity of their country's Ministers.

Concerning the above case, it is only fair to note that the following letter has been published in the columns of the N. C. Daily News:—

Sig.—The editorial reference in the N.-C. Daily News of yesterday's date to the Bennertz case is not just to China. China does not wish to prolong a settlement; she

China does not wish to prolong a settlement; she does not wish either to starve or embarrass Mr. Bennertz, nor can China be held responsible for what a lawyer may say in arguing a case in one of her Courts. There can be no doubt that the case was properly before the Chinese Court, and that jurisdiction was given the Churt on it by treaty, Sir Nicholas Hannen was present at the time, remained in court during the whole of the trial, as is provided by treaty, and, after the decision of the Court, filed a protest as is also provided by treaty. Sir Nicholas did not think the decision just, and he said so in his protest, but he also said in his protest that he was treated courtenusly by the Taotai and that his personal relations with the Taotai were pleasant. How then can you say that Sir Nicholas was insulted by China?

When a treaty provides where a case shall be tried and it is tried there, the losing party to the case may teel that he has been unfairly treated, but if his Government should undertake to say how the Court must

teel that he has been untairly treated, but it his Government should undertake to say how the Court must decide, why provide by treaty where cases should be tried; why have a Cont at all if the powers of the Court are to be annulled or usorped by the Government of the usuccessful party to the case? To establish such a principle would destroy all confidence in the aystem of Courts provided by treaties.

It is within the knowledge of this writer that China has made accounted footnets a valid the Bonnette was

It is within the knowledge of this writer that Chies has made repeated efforts to settle the Benneriz case, that she desires to sustain friendly relations with the British authorities, but British justice and no other kind of justice requires China to pay the Benneriz debts. Nothing could be more unjust than to ask China to liberate Mr. Hennertz from the claims of his creditors; they were not parties to the case, and Mr. Benneriz may owe one pound or a million.

It can be stated with entire accuracy that China earnestly desires an amicable settlement of the Bennertz case, but there will be no settlement, and there ought not be any, when the measure of Mr. Bennertz' indebtedness is made the measure of the amount China might pay.

I am, etc., December 20th.

The celebrated new rapid on the Yangtze, which has caused so much loss of life and inspired so many paragraphs, seems likely to be removed at last. Sir Robert Hart-the deus ex machina in all Chinese affairs—has despatched foreign engineers to the scene with two tons of dynamite to assist in removing the rocks.

With reference to the Bennertz case, in which the Shanghai Chinese Magistrate took advantage—it is alleged—of Sir Nicholas Haunesn' absence to deliver judgment unfavourable to Mr. Bennertz, eloquent paragraphs appear in sion in the Shantung Promontory or the Liaothe Shanghai press, explaining that the un- tung Peninsula. Here is some food for their

fortunate Mr. Bennerts is on the verge of rain, and that it will be impossible for him to wait until the slowly moving wheels of diplomacy grind out a measure of redress for him. The idea seems to be that a public subscription should be raised to enable him to wait for instice.

Covaul-General Jamieson has returned to Shanghai, accompained by the Misses Jamieson.

The closing of the Peiho by ice seems to have been later than usual this year. The tags and lighters were not docked until the 16th of

Credit seems to be gravely given in Shanghai to the stories that the Russian Chargé d'Affaires in Peking has demanded the diamissal of all in Peking has demanded the dismissal of all British employes on the Chinese railways and suggested the removal of the German officers at Woosung; that the Russo-Chinese Bank has offered the Chinese Government 120,000 stand of Berdan rifles on credit, and that the has been accepted. It appears to us quite impossible to imagine that the Russian Representalive can have taken such a line, and we cannot suppose that the Chinese Government is so impecunious as to require credit for a transaction involving less than a million dollars, or so extremely silly as to purchase rifles under such conditions.

It is alleged that the Chinese Government has issued orders for the mobilization of the forces in Chili and the Liantung Peninsula. The commanding officers in the former are Generala Nieb and Ynan, and the commanding officer in the latter, General E-ko-t'ang-a, who fought so well against the Japanese on their advance towarda Mukden.

Another story, very like a "bunder," is that the indemnity demanded by Germany in connexion with the murder of the two missionaries, is six million tacls, not six hundred thousand. and that the German Representative in Peking has sat loftly in his Legation, and compelled the Chinese plenipotentiaries to repair thither for the purpose of negotiating. In all China's complications with foreign Powers, there have been political newsmongers who devoted themselves to the dual task of exaggerating the hu-miliation and incompetence of their own Government and magnifying the injustice and haughtiness of the foreigner.

Resolute efforts are at length being made to place a better class of steamers on the Shanghai-Tientsin line. The trade between the two places is enormous, but the steamers that mono-polise it are, for the most part, very mediocre craft, though their charges are sufficiently exorhitant to justify the employment of the best description of boats. We read in a Shanghai exchange that the Chinese Engineering and Mining Company has secured two five steamers, the Hisping from Germany and the Kwangping from Scotland, with a carrying capacity of 2,180 tons, a length of 265 feet, a beam of 42 feet. a draft of only 14 feet, loaded, and a speed of from 10 to 11 knots.

We observe that a Chinaman who assaulted a foreigner at the Shanghai Feather Cleaning Works, was sentenced in 1,000 blows and a month's cangue. A terrible sentence, truly. Justice is a very lop-sided affair in China. We do not remember to have heard of any exemplary punishment inflicted on a foreigner for assaulting a Chinaman, though such incidents, of the most aggravated character, used to be frequent enough at one time. The same tribunal that ordered a thousand blows and a month's cangue for this assault, was content to order 500 blows and a week's cangue for "a well known thief who had committed a number of larcenies from houses in Hongkew, and stolen property to the value of

Some publicists are in the habit of denying that British commercial interests are in any degree affected by German or Russian aggres-

reflection, furnished by the trade report of Messes. Bush Bros. & Co. of Newchwang, under date November 26th ;--- Business is completely at a standstill owing to the occupation of Kinochan by the German fleet and the rumour that Port Arthur has been annexed by Russia. Merchants who usually buy produce freely on the closing of the port are deterred from so doing fearing they will not be able to dispose of their stock in the spring, and the panic has paralysed exchange and effectually stopped the usual circulation of money, drafts being practically unpurchasable."

The three cyclists, Mesure. Fracer, Lunn and Lowe, reached Shanghai on Sunday, December 18th, and were enthusiastically received. A hundred and twenty-four Shanghai wheel-men and wheel-women escurted them from Soochow to Shangbai.

An interesting case is reported from Amoy. A Chinese born in Singapore and therefore a British subject within the limits of the Straits Settlements, recently visited Amoy, where he was arrested by the Chinese Authorities and thrown into prison, at the instance of the Ger-man Consul, for a debt alleged to be due by him in connexion with the chartering of a steamer that plied between Amoy and the Straits. He had visited Amoy under a pasaport issued by the Governor of Singapore, and had secured a certificate of registration from the British Cousal at Amoy. When his property in Amoy was distrained by the Chinese Authori-When his property in ties, he applied to the British Consul for assistance, but being informed that nothing could be done for him, proceeded to the German Consulate to make inquiries, and was these promptly arrested. Ha is now lying in prison, whence he has addressed to the Governor of Singapore a petition saying that the Chinese Local Authorities are gradually extorting from him his whole property, and that they are not likely in release him until they have stripped him of everything.

The Chinese in Shanghai have subscribed \$2,360 to purchase land for enlarging the Margaret Williamson Hospital.

It is said that the Chinese in Shanghai are beginning to show excitement about the Kian-chou affair. Three insults to foreigners—two of them ladies—are reported, but no reason is assigned for the hypothesis that these incidents have any relation to the seizure of Kiao-

It is reported that several of the bandits who took part in the murder of the two German missionaries have been arrested, and that the local officials are doing everything in their power to apprehend the remainder. The chief official of the district where the catastrophe occurred, Mr. Hau, is said to be a great friend of foreign-ers and fond of foreign things, but neither he nor any one else has been able to devise means for effectually checking the robber raids to which the locality is subject.

The machinery for the Changtu mint has passed up the Yangize, and probably reached its destination by this time. The mint is to coin dollars and smaller pieces for

Shari, the nawly opened port on the Yangtze, appears to be an unhealthy place. The foreigners who have settled there report much fever and rheumatism. Trade with the outer world has made little progress, but is said to be slowly growing, and the volume of commerce with the interior is evidently immense.

The Formosa correspondent of the N.-C. Daily News Writes :-

It is nechans not generally known that the finest building in the island is the German Consulate at Twatutia. It is on the bank of the Tamuni viver, conveniently located and a great ornament to the city. The English Consulate is established down the river at Hobé, although a Consular office has been opened at Twatutia. It is reported that the

Spanish and French Consuls would also establish themselves permanently here if suitable quarters could be obtained, but regardless of the construc-tion of many new buildings there is still a great demand for houses which can be rarely satisfied and only then at an excessively high rental, The report published in some Shanghai paper

from an Amny correspondent regarding the great preparation the Japanese are making to defend the island (presumably against the French) and the island (presumably against the French) and the large numbers of transports carrying troops to Formosa, is a pure canard. There are no preparations out of the ordinary in progress and no transports are arriving with troops—it might be well for the internal peace of the island if there were. The report regarding the Rench and Rormosa does not appear to have disturbed the Japanese in the least. Should the Franch ever come to Formosa it will be necessary that they come better equipped than the last French expedition to the island.

The country in very much disturbed, reports of

The country in very much disturbed, reports of attacks by stuted bands of robbers coming in nearly every day. Travel in the interior is missafe at present. Not much improvement can be expected until after China New Year.

Kinnoneh, a small town situated on the same bank of the Yangize as Chungking, from which it is separated by the Kialing, has always been noted for its anti foreign spirit. On the 7th of December, Dr. F. M. Woolsey, of the Methodist Episcopal Mission, was stoned by the people, and though not seriously injured, seems to have had a parrow escape.

#### NEWS OF THE WEEK.

The German steamer Martha was towed into Manila on the 16th December by the N.Y.K. steamer Famashiro Maru, having lost her pro-

A London telegram dated Nov. 17 reports that the new British torpedo-boat destroyer Crane, in her official trial in Stokes Bay, made n run of 32.49 knots per hour.

At the match between Stoddart's XI and Victoria II Melbourne, a sum of £2,222 was paid as entrance money. And yet Australia is paid as entrance money. And yet Australia is said to be in financial difficulties, remarks the China Mail.

Great satisfaction is felt at Marseilles at the fact of its superseding Brindisi as the Continental port of the Peninsular and Oriental Company. From the end of January the Company's steamers will go direct to Marseilles.

A very amusing story is published, says the China Mail, in the native papers at Shanghai to the effect that it is the Kaiser himself who is coming out to China, disguised as his brother Prince Hemy, in command of the German Squadron!

Mr. Takáhashi, the station-master at Kyoto, was killed by a train on New Year's day, says the Kobe Chronicle. A Tokaido train arrived at Kyoto at 1.30 p.m., and the passen-gers began to open the doors of the carriages get out while the train was still in motion. The station-master was trying to prevent them when he accidentally fell on to the rails and was run over by the train and killed,

We understand that Dr. Munro has arranged to deliver at the Yokohama General Hospital, Bluff, a course of St. John's ambulance—firstaid-to-the-wounded-lectures every Saturday afternoon during the winter months. The introductory lecture was given on Monday afternoon, but the first practical exposition begins at 5 o'clock on Saturday next. Further particulars can be obtained of Dr. Munto.

The comparative ratio between the total outlays of the State and the yearly expenditure on education in Japan and the countries of Europe is as follows:—Japan, r.17; Great Britain, 10.60; France, 5.01; Russia, 2.90; Germany, 5.33; Austria, 2.61; Italy, 2.44; and Belgium, 6.96. As will be seen from this table, Japan is far behind in the matter of education when compared with western countries.

Pinnacle Rock Fund, in open a credit of \$300 with the Hougkong and Shanghai Bank, to be used by the British Consuls at each of the nine ports including and south of Shanghai, in giving awards of from \$10 to \$50, according in the importance of the danger divulged, to native giving information of the existence of previously unknown rocks on the coast.

Many will read with regret, says the Hyogo News, the announcement of the death of Mons. E. Tissot III an early age. The sad event occurred at Marseilles on the 12th of November. M. Tissot was well known and much liked during his stay in Kobe as second in command at the M. M. Agency, and all regretted the break-down in health that occasioned his being invalided home.

A European lady missionary, dressed in Chinese clothes, happened to be on board a Canton river-boat the other day when some pirates boarded her. The men treated the lady very rudely and eventually, after beating her, rob-bed her of 40 dollars. Soon after a launch was sighted and the pirates transferred their attentions to it, but before they could loot the boat, they had to kill one of her crew.

From Australian papers we learn that Superintendent Braidwood, of the London Fire Brigade, was killed during the big fire in Cripplegate, London. The area destroyed covered 42 acres, and the greatest width of the fire was a quarter of a mile. The Goldsmith's Com-pany are the principal owners of the freehold which has been devastated. Four thousand workpeople were thrown out of work by the destruction of the premises in which they were employed.

At seven o'clock on New Year's eve sixty-five sailors sat down at the Seumen's Mission for a high ten. After ten, songs and games provided recreation. At 9.30 those who wished to return to their ships were conveyed on board by the Mission launch. At re o'clock, after refreshments had been served, a Watch Night Service was held, conducted by the Chaplain. There was an attendance of nowards of fifty seamen. The Mission lannch made a second trip at 12.30, returning all safe on board their respective ships.

Mr. Obaldo Kluth, Secretary of the Club Concordia, Shanghai, committed suicide on the 24th December. Deceased covered his face with a handkerchief, heavily saturated with chloroform, and enveloped his head in a hood, thus providing against the escape of the deadly fumes and ensuring a speedy and painless death. He had been Secretary and Manager of the Club Concordia for about five years, and prior to that was Inspector of Police in Shanghai, having been 17 years in the force. He leaves a wife and several children, all girls, the eldest of whom is between 17 and 18 years of age.

A series of articles which are attracting much attention, headed " Marching Backward, been appearing in the Daily Mail. The writer shows that Britain I falling behind in the great industrial race and has demonstrated how the United States, France and Germany can show increased exports to the amount of £25,000,000 in the twelve years from 1883 to 1895. It is further proved that the imports of the United Kingdom in the same period decreased £9,000,-000 (\$45,000,000). Commenting upon this showing, the Daily Mail expresses the opinion that the main reasons for this falling off in British trade are want of business instinct and want of genuine patriotism, "as evidenced by ship-owners carrying foreigners' goods at lower rates than Britishers."

Readers will recollect, says the Hiogo News, that the American yacht Tolna was injuid on the night of September 20th last by the German steamet Mária Rickmers swinging on to her bowsprit after paying out chain in a stiffish blow. At first no suggestion for a settlement would be entertained by the steamship representatives in Hongkong, where the steamer was held until English Consul desires to establish the Consulate the Hongkong General Chamber of Com- Hongkong, where the steamer was held until here and is tooking for suitable quarters. The merce has decided, in connection with the accurity to meet the case instituted by Count

and Countess Festetics de Tolna was given. Counsel for the latter asked \$1,200 in full satisfaction, and received an offer of \$500 in return. Two days were occuped in taking evidence on commission and considerable expenses were incurred. Then came a renewed offer from the defendants, and finally the suit was compromised This sum has now been paid, and a capital illustration is afforded of the soundness of the advice to settle with your adversary quickly while he in in the way.

It is rumonred that H.M.S. Swiftsure, an armoured screw battleship of the third class, at present at Portsmouth, is un be stationed at Sydney as a drill guard-ship. It is also stated that H.M.S. Invincible and H.M.S. Iron Duke, also armoured screw battleships of the third class, are to be stationed for similar purposes at Esquimault (Vancouver) and Colombo re-

One of the staff of the Kobe Railway Station was unexpectedly arrested on Tuesday after-noon by the police acting under the direct in-structions of the Preliminary Judge, and charg-ed with embezzlement of Government monies amounting to about 1,700 yes. At the same time, says the *Hiogo News*, a suspected ac-complice was summoned to the Saibansho and held in custody while a domiciliary visit was paid by the officials to his quarters.

A Peking despatch, says the N.-C. Daily News, reports that the Emperor will appoint General Tung Fuhsiang, the soldier who crushed the recent Mahommedan rebeilion in Kansu, to be Generalissimo of the Imperial forces in Chihli province and at Shanhaikuan, Apropos of the above, an Imperial edict of the 25th Dec. grants the above named the privilege of riding on horseback in the "Forbidden City." General Tung is now in Peking where he arrived about a fortnight ago from Kansu.

A Washington special telegram says:—The A Washington special telegram says:—Inc U.S. cruiser Raleigh, now at Smyrna, under command of Rear-Admiral Selfridge, has been ordered to the Asiatic station. The vessels which will be in Eastern waters on the arrival of the Raleigh will be the Olympia (flagship) the Boston, Petrel, and Monocacy. The Helena New York in a few days for the East will leave New York in a few days for the East via the Suez Canal, but her orders do not require her to report to the commander-in-chief at the Asiatic station until next summer. Marietta and Concord also soon proceed to the East. The Marietta is now at Sitka, Alaska, and upon being relieved by the Wheeling will cross the Pacific and join Commodore Dewey's fleet.

An important legal question has been submitted for the decision of the Court of Crown Cases Reserved. The case involved the issue as to whether a person entering a restaurant where he was turknown and ordering a dinner for which he was unable to pay, was liable to be criminally convicted for obtaining, goods or otherwise for obtaining credit under false pro-tences. In October last, a man named Jones entered a restaurant and ordered and ate a 40. dinner, for which he was unable to pay, having only \( \frac{1}{2} \)d. He was charged and sentenced to three months' imprisonment, and the point now raised was whether the transaction involved a question of contract or one of fraud. Judgment was reserved.

A very deserving charity is being brought before the shipping community of Yokohama at the present moment, in connection with the Liverpool Homes for Aged Mariners, excellent institution is situate at Egremont, Cheshire, and provides an ideal retreat for 120 men who have gone down to the deep in ships and have spent their lives on the great waters, as the Hebrew essayist so sonorously puts it. Mr. T. H. Ismay, to commemorate the Diamond Jubilee, made a large donation to the funds of the institution and the public are asked to aubscribe a further amount so as to enable the that afternoon, rushed off to the Singapore Club Association to utilise this gift to the full in to look for a Magistrate before whom to sweat

to so/- month: a very excellent idea indeed. Since the institution was founded in 1870, upwards of 19,000 deserving cases have been re-lieved. Captain Martin, Captain J. Turner Harrison, and Mr. T. M. Laffin are circulating the lists in Yokohama.

Foe Chong, a well-known coal-merchant, speculator in opium, metals, etc., of Shanghai has suspended payment. His liabilities, the Mercury says, reach Tls. 350,000, against which his assets are estimated at about Tls. 250,000. His failure is believed to be due to over-speculation in sharm of all descriptions, besides losses in his own business. It was thought that the settlement of the 31st December would be considerably hampered by the snapping of this solid link in the chain of share-dealers. Several of the native bankers have seized his books and are examining into his accounts. A meeting will shortly be held to ascertain the possibilities of carrying him over the difficulty, and it is held that he will be able, if sufficient time is given him, to meet his liabilities.

The human mind is still evolving, in the view of Dr. R. M. Bucke, as expressed at the Montreal meeting of the British Medical Asso-By slow and dubious steps taken in the long ages of mental darkness our remote ancestors wearily climbed to simple conscious-ness, he affirms, and after another immense interval they reached self-consciousness. This cannot be the end. Our old mental faculties are some of them fading out, others advancing toward greater perfection, and alongside of them new ones are springing up, some of which will, without doubt, be of overshadowing im-portance in the future. So-called telepathy and clairvoyance seem to be specimens of such nascent faculties. But of infinitely more importance than these in that superimposed upon self consciousness, as it appears that a third and higher form of consciousness is at present making its appearance in our race. We have had occusional and increasingly numerous examples of it for 2,000 years. In the course of a few more milleniums there should be born a type of men possessing in its completeness this higher consciousness, and the advent of this higher, better, and happier race would justify the agony of its birth through our past.

A petition from Mr. Quong Tart was pre-sented to the New South Wales Legislative Conneil on the 31st Nov. by Sir Arthur Renwick with reference to the Coloured Races Restriction Bill, praying that some modifications may be made in it in the direction of allowing Chinese merchants and others who have business in New South Wales and may desire to go to China for a short visit, or merchants residing in China who may desire to come hither for business purposes, to travel, either to from the colony, without having to encounter the disabilities imhe Chinese residents in the colony are a peaceable, law-abiding, and industrious class of residents, whose sojourn in the colony is con-ducive to the production and expenditure of wealth. The number of Chinese in gaol in the colony bears a much lower percentage to the whole than is the case in respect of any other nationality; 62 out of every hundred males there are primary producers of wealth, while of the whole male population of the colony only 20 in every hundred come under that category; and the Chinese residents expend about £250,000 a year, or about £18 per head, in food and clothing products of the colony, in addition to petition was received and read.

The following breezy story is taken from the Singapore Free Press :-- In connection with the prosecution of the clerk in the Land Office for criminal breach of trust a rather amusing incident happened on Saturday just at 2 p.m. Mr. Michell, who was due to play in a cricket match

match, and just on the point of leaving the Club for the Esplanade. Duty before pleasure of course, and Mr. Michell was in a hurry to get his "swear" off his chest. A prolonged search, however, in the precincts of the Club failed to discover a bible. Then the Secretary's office was visited, but there was no sacred volume there. A clerk, however, had the presence of mind to say that in the adjoining office, the Chamber of Commerce, there was a native clerk of pious repute who would be sure III have one. To the application there, however, for a loss of a "Christian Koran," as it was styled, there was no result, not on the premises; and the Magistrate and the Land Officer looked at each other in dismay. There was, it was true the Hong-kong Bank, close by, there was the Post Office, there was Motion & Co., the watchmakers, Lyon the engineer's, Hartwig, the water-contractor, and Gaggino, the ship chandler, with Capt. Craufurd at the Shipping Office, as a dernier researt. Needless to say the chance of discovering the volume wanted at any of these places were not accounted worth the trouble of going round. But a divine inspiration struck the Magistrate. "Kelly and Walsh, by Jove!" Off the pair san, in their cricket blazers, at top speed to the aforesaid renowned emporium of literature. "Oh yes, certainly, a hundred, if you like." "One would do, thank you." And so at a table the deed was done, the swear aware, and Mr. Michell was safely relieved of the in-formation which he was bursting to deliver. And so to cricket, with the comforting consciousness of duty nobly done.

"In trade and commerce the Japanese continue to maintain their reputation for 'push-fulness,' sars the Glasgow Herald. "The latest filustration of their energy comes from Hong-kong. Sir William Robinson, the retiring Governor of thar Colony, has sent home his final report, and while he is able to sum up the his-tory of his administration in the single word 'progress," he feels it necessary to utter a warning se to the strides made by the Mikade's people. This applies more particularly to manufactures and shipping. The British flag is still predominant in the entrances and clearances at Hongkong but there are two facts in connection with the matter which Sir William Robinson is careful to dwell upon. The first is that British tonnage does not bear the same relation to foreign tonnage that it used to do. Only two or three years ago it represented yo per cent. of the total tonnage; now it only represents 53 per cent. The second and still more striking fact is, that while the British tonnage at Hongkong increased last year by 5% per cent., and German tonuage by 23 per cent., Japanese tonnage advanced by no less than 195 per cent. Taken by themselves, these figures would seem to prove that the large sums voted by the Japanese Diet for the development of commerce are not being apent in vain. But more remains behind. The Japanese are flooding the market of Hongkong and of China with cotton yarns, and thereby displacing the Indian product. They appear to have appreciated the aituation caused not merely by the unfavourable rate of exchange, but by the closing of the Bombay mills, and to have taken full advantage of it. Cotton factories are being multiplied in Japan, and through them China is being applied with goods which she formerly obtained from Europe and India. To Sir William Robinson's credit be it said that he foresaw this commer-cial revolution some years ago, and did his best to prevent it. Why, he argued, should not cotton mills be established at Hongkong? He knew of several eligible sites for them, which belonged to the Government, and he promised to obtain liberal terms for capitalists. His advice was not heeded then, but though the crisis has become more acute it may not be too late to recall the Governor's offer. The introduction of additional local industries at Hongkong, such as cotton-spinning and weaving, would not only benefit the Colony directly, but would Association to utilise this gift to the full in granting to look for a Magistrate before whom to swear tend to stem the advancing tide of Japanese granting to 500 mariners who have come to the an information. He there fortunately found trade invasion. The Mikado and his officials practical end of their life's labours sums of 10/- Mr. Wolferstan, also due to play in the same are deserving of little consideration at our

hands. Ouite recently they have displayed an utter disregard of international courtesy by refusing to recognise certificates of competency granted to British captains by our Board of Trade. Some of these navigators were anxious to remain in Japan after taking out new ships built on the Clyde and elsewhere. But they failed to reckon upon the consent of the Japanese Nautical Board. This tribunal insisted upon a new test, and had the temerity to pluck men who had commanded ocean liners and had passed their examinations at home with flying colours. Such procedure must ultimately re suit in benefit to our own mercantile marine, but its lesson is obvious. So long the Japan-ess are so absurdly exacting at home where British subjects are concerned, no encourage ment should be given to their operations abroad." The writer of this article is not entirely behind the scenes. He does not know, ee imagine, that the British Board of Trade refused to give Capt. Nirei, one of the most competent shipmasters in the N.Y.K. service, a British Master Mariner's Certificate when he applied for one some years ago. The Board's explanation was that Capt. Nirei had not served his time on a British ship; his Japanese service and experience did not count.

#### CORRESPONDENCE. LAND AND FOREIGNERS.

TO THE EDITOR OF THE "JAPAN MAIL."

Str.-The question of "land and loreigners seems to become more and more complicated, at least in the brains of foreign newspaper men. least in the brains of foreign newspaper men. And yet it is so simple, if only people would cease interpreting Japanese law from the point of view of English law, The misconception fallen into by hearly all the writers on this subject in that they nik up "lease" and "superficies," which error may be traced to the fact that the English law uses the expression "leasehold" for a right somewhat similar to the fact that the English somewhat the English may be traced to the fact that the sure inserts the expression "learshold" for a right somewhat similar to the Japanese superficies. In Japanese law, however, "lease" and a superficies" are legal conceptions of a quite different nature, and the rights of the lease are in no way identical with those of the superficiary. If, for instance, a building is the object of a lease, the building remains the property of the lessor, but it thecomes the property of the superficiary in case of a superficie. Act. 265 of the Japanese Civil Code says: "A superficiary has the right to use the land of another for the purpose of owning upon it buildings, trees or bamboo." Of course use the land of another for the purpose of owning upon it buildings, trees or bamboo." Of course it is quite indifferent whether the buildings and already standing on the land or are to be erected by the superficiary. The latter is the true purposer of the building, and the owner of the land is excluded from any use of it, by which the right of the superficiary might be affected. There right or the superficies—chijohen to the reis no doubt that a superficies—chijohen to the
may be acquired by foreigners under the new
treaties. That such shall be the case is specially
stated in a protocol affixed to the new GermanJapanese treaty the right of acquiring a superficies is reserved to Englishmen in Act. 3—not by the wording
"may lease land" but—by the words "may own
houses, manufactories, etc."

Another difference between lease and superficies

Another difference between lease and superficies is the time for which each right may be acquired. The duration of a lease is limited to twenty years, Art. 604, a quite reasonable restriction, which is also contained in the new German Code (68): also contained in the new German Code (GO):
thirty years). As to the duration of a superficies
the following may be mid:—It is a generally acknowledged principle of law that any right
may be acquired for any time, unless the law conmay be acquired for any time, times the law con-tains a special restriction in regard to a certain right. In the Japanese Civil Code such limits of time are found in regard to the hining of things movable and immovable (lease), as explained before, to the hiring of services, as to which Art. 626 says that, if such contract is made for more than five years or for life, it may be dissolved at

1.-Art, 265. "Chijôkensha wa tanin no tochi ni oite kōsakubutsu mata wa chikuboku wo shoyû suru tame ni sono tochi wo shiyô suru kenri wo yūsuru,

地上推審の他人ノ土地ニ於テエ 作物又へ竹木ヲ所有スル為三其 土地フ健用スル権利サ有ス

- 不動産質 Judosanshichi, is different from mort-gage, it confers on the pledgee the right to the posses-sion of the immovable pledged to him and to use it in lieu of interest on his claim.

any time after five years have elapsed, on three months' notice. Furthermore a pledge's of an immovable thing is limited to a period of ten years (Art. 360). Finally as to the right of "emply-tensis, ekosakuken 永小作業" which means a right to carry on agriculture or keep cattle on the land of another on a rental, Art. 278 of the Civil Code says:—"The duration of the emplytensis is between twenty and fifty wears. If it is establish. between twenty and fifty years. If it is established for a longer period, such term is shortened to fifty years." In all these cases it appears that the law distinctly draws the limits for the dura-

tion of each right.
On the other hand no limit of time is made for On the other hand no limit of time is made for the right of property, possession, servitudes, mortgage, for a sale, donation, etc., and thus it follows from the general principle stated shove that agreements relating to such matters can be made for any time convenient to the parties concerned. The same rule applies to a superficies. The time for which it can be acquired is wholly left to the will of the parties, and only in case the latter have omitted to fix the time themselves, the law supposes that their intention has been to make an agreement for a period of between twenty and fifty years, and only in this case the Court is entitled to determine the proper time within these limits on application of the parties concerned. The only way for me to prove that such is the real meaning of the law is to render the provision itself. Act. 268 of the Civil Code runs as follows: law supposes that their intention has been to make

"Where in the case that a time of duration has ont been agreed upon in the contract, no different custom exists, the superficiary may at any time renounce his right.

"If the superficiary does not renounce his right according to the before mentioned provision, the

Court, on application of the parties concerned, is to fix the duration of the right, between twenty and fifty years." Here we see clearly that a limit of time is stated for a certain case only, namely if time is stated for a certain case only maney in the parties concerned have omitted to fix the duration of the right in the contract. The law only interferes in this point as far as it is neces-sary in order to remedy such omission. The clear consequence thereof is that whenever the parties the parties for the time of duration of a superficient themselves fix the time of duration of a superficies in their contact, such agreement is effective and cannot be altered either by one of the parties or by the Court. It is a matter of course also that the Court cannot after the amount of rent agreed upon by the parties on the conclusion of the contract

Thus the right of superficies as established in the Japanese Civil Code may show a different face according as a time of duration has been fixed by according as a time of duration has been fixed by the parties or not, and the following cases may be distinguished:—t. The time of duration has not been fixed in the contract. Then the superficiary may (a) remource his right, or (b) apply to the Court to fix the time of duration between twenty and fifty years according to the circumstances of the case. These provisions under t, however, only apply as far as no different custom exists. 2. The time of duration has been distinctly fixed in the contract. Then the rights and duties of the the contract. Then the rights and duties of the parties concerned are regulated entirely by the provisions of such contract, as explained before.

After all no hindrance exists to the acquisition of a superficies for any reasonable time, say fifty, a hundred, or even if a man should be anxious to provide for his most distant posterity, for a thousand and one years,

I have now studied law-day by day for about

3 I have omitted that part of the article which has no relation to the matter in question.

4 The law says, setteikoi the things, which means properly any art by which a private light may be acquired, f.i. also a will. As I do not know a corresponding English word. I used the word "contract," because this is the only case which is important for foreigners.

5.—Ari. 268; Setteikoi wo motte chijôken no sozokukikwan wo sadamezarishi baai ni oite betsudan no kwanshu naki toki wa, chijokensha wa nandoki nite mo sono kenri wo hôki suru koto wo u. "Chijokensha ga zenko no kitei ni yorite sono kenri wo hôki sezaru toki wa saibansho wa tojisha no

seikyu ni yorite junen ijo jugonen ika no han-i-nai ni oite sono son≇ukukikwan wo sadamu.''

設定行為ヲ以テ地上權フ存績期 間ヶ定メザルシ場合コ於ラ別段 ノ慣費ナキトキの堆上機者の何 時ニテモ其權利チ抛棄スルコト ヶ得 地上權者ハ前項ノ規定=依リテ 其権利ヲ抛棄セザルトキハ裁判 所へ當事者ノ請求ニ因リニ十年

以上五十年以下ノ範圍内ョ於テ

a quarter of a century, and for many a weary night I have cogitated upon Chinese characters and Japanese laws, and therefore I hope it will not be overbold if I say:—"There is no uncerto the overload it I say: "There is no inter-tainty whatever on the question whether according to the Japanese Civil Code the right of super-ficies can be acquired for any period of time to be fixed by the more agreement of the parties."

[Lis a matter of the highest importance in the

foreign residents in Japan to have a clear know-ledge of their future rights in this direction. This ledge of their future rights in this direction. This is the reason why I have undertaken once more to explain this question apparently so complicated and yet so easy for any person accustomed to legal reasoning. If I again should not succeed in convincing the sceptics, I must console myself with the fact that there are things on earth against which, as a German proved puts it, even gods would fight in vain.

Your obedient servant,

DR. L. LÖNHOLM,

Tokyo, December 28th, 1807.

Tokyo, December 28th, 1807.

#### THE SINGLE TAX: A "PANACEA."

TO THE EDITOR OF THE " JAPAN MAIL."

Str.—As you kindly connect my name with "a Panacea," I take the liberty of presenting a few thoughts on the subject of the Single Tax and what thoughts on the shiper, of the Single 4m and white it is claimed it will do. It is especially appropriate to devote a little attention to the subject, since the death of Henry George, the great representative of the idea, has taken place so recently. I believe the Single Tax will do wonders and that it is as near a panacea as anything, yet I always regard it as a part of a greater whole—the Gospel of Christ.

I generally refer to it as an important factor in most reforms, without which it is useless to ex-pect complete success. The first question is, "Is it just?"

I affirm that the rent of land in justice belongs

affirm that the rent of land in justice belongs

I affirm that the rent of land in justice belongs to the whole community, because they, by their presence, create it. I deny that the landlord class, as landlords, have any right to the cent of land, except what they have as citizens in common with the test of the community.

I have claimed that the equation: Production:=Wages+Interest+Rent, teaches us the true limitations of Individualism and Socialism, the rent of land only being social in its nature; however, it should here be noted that tailways, telegraph lines, gas lines are land functions and are classed as land by Single Taxers, and have been decided to be such by Courts.

You can call upon your readers to give a reasonable answer to the question, as to what the landlord does for the community or the tenant that corresponds to the rent he receives.

I have never found a single person who could give a reasonable answer to the question.

There is no use of reasoning about what the Single Tax would do, if it be not decided that it is

If it is right then other taxes are wrong, ciety or socialism violates individualism by taking private property (by taxes) for public use, and inprivate property (by taxes) for public use, and individualism takes public property (land taxes) for private use, we can easily see a transendors factor has been neglected in the reform programmes. All it requires to see the truth of the Single Tax is a little study, a clear head and a pure heart, and then having had its position explained it becomes as simple as the trunning principle of the bicycle.

Mr. I ambeth the Catholic privat who exceeds

Mr. Lambeth, the Catholic priest, who answered Robt. G. Ingersoll's criticisms on the Bible so dollars to refute Henry George's theory. He studied with a view of trying to do so, but replied,

"He is unansweable."

First thee, I premise the Single Tax to be right. As I have already trespassed on your space, con-necting the subject of the S. U. and providution, I will omit further reference to that subject. I have mentioned the S.T. in connection with the question of war. Mon do not individually nor collectively naturally love war, and in my opinion most wars of aggression, (and one party, or both have to be aggressive to start a war) are started

with a view to robbery.

There is somewhere in every was question, either There is somewhere in every was question, either before or after, a land question: the reader versed in history can review the subject for himself. Were it acknowledged that the rent of the land in India belonged to the people of India, and wages and interest of the people of India belonged to them and not to the English, England would not hold India and June and Pague as flighting and not to the English, England would not hold India one day. Germany and France are fighting over land, practically. Spain and Coba, Japan and Russia. The Single Tax idea would destray this aggressive matter of war, there would be no advantage or profit in holding distant territory, trade would be free among all countries, and,

Formosa and Kores.

The Liquor Question:—
To reverse a Japanese expression, I believe "liquor to be the chief of a hundred poisons."
But the legal settlement of the question will, I am persuaded, never be attained while a liquor monopoly is fostered by high licenses.
The salogu keeper is not respected and he is a

posy is tostered by light itemses.

The saloon keeper is not respected and he is a corruptionist in society and politics, and is in it for revenue only. Make a way for him to live without such a business and he is apt to select exactles.

Again, there is as much drinking caused by poverty as there is poverty caused by drink. The extremely rich and the extremely poor do most of

extremely rich and the extremely poor do most of the drinking. Miss Willard, the greatest authority on temperance work, quotes from Proverbs, "The destruction of the poor is their poverty."

If the possibility of living easily and surely is open to men they are less apt to drown themselves in the forgetfulness of liquor. I do not say the S.T. will alone settle this matter but it is a factor

in the forgelithness of liquor. I do not say the S.T. will alone settle this matter but it is a factor that can not be safely neglected.

Voluntary Poverty:—

It has been claimed that the S.T. would do away with voluntary poverty. The principal cause of poverty is the lack of opportunity of employment. Periodically thousands are thrown out of employment. A very small part of poverty is caused by laziness, and not such a very large per cent, by liquo—the great cause is lack of opportunity. The land is monopolized, and this monopoly is the foundation of other monopoles that cause the race to-day. We are always regaled with the Scripture, "the poor have ye always with you," but never with Dent. 15, 4 (N.V.) "How be it there shall be no poor among you." In the Sermon on the Mount, it is forbidden to be rich. "Lay not up treasures on earth." "Behold the birds of the air." "Consider the lilles of the field." God feeds and clothes them. "Seek first the Kingdom of God and his righteousness." and all these things will be added to you. Recognize that the present the trainer and the first factor in right.

need. God feeds and clothes them. "Seek first he Kingdom of God and his righteousness" and all these things will be added to you. Recognizing that universal right is the first factor in righteousness—result poverty and wretchedness. Private Property in Land is Atheism:—The Single Tax is part of my religion. By this new economy I can understand, as never before, what Christ meant, when he said "thou shalt love thy neighbour as thyself;" "Do unto others as you would have them do unto you." "The gloomy science," is turned to the luminous one, the hopeful one. With the increase of society, all are bound together by closer bonds, and with the increase of land rent the social more and more helps the individual. Under private property in land, the landless are slaves. The wicked (ich revelling in luxury and the deserving poor grovelling in the dirt, causes the former to say "Who is the Lord?" or the latter "to sleal or profane God's name." There is a strong atheistic tendency in it all. The compelition under the Single Tax will The competition under the Single Ta he free and helpful, that at present restricts pro-

duction and destroys.

What the landlord gains, others lose, because there is an "unearned increment." In closing let me quote:—"The love of money is a root of all kinds of evil." Covetousness may be in the heart, but the occasion of its activity is in the open. portunity of getting something, as the landlord does."

The Single Tax would cut this tap-root of cove-The Single Tax would cut this tap-root of cover-tousness—this root of all kinds of evil—and in this way it is a panacea—as nearly as one thing can be, for the ills of the individual and of the body politic. The latest news from Australia, England, America, and Canada, indicates clearly that the Single Tax will soon be in operation, and then we will be able to see what it will do. However, the Single Taxets might be mistaken in the exact de-gree it is to change affairs; they are not mistaken in their assertion, that the land belongs to the people

ancient or modein, to support me in my assertious, and that, consequently, my opinion should have no weight with the Court. With the permission of Mr. H. C. Lüchfield, counsel for the plaintiff, I may state that subsequent to Mr. Martin's testimony, I placed in Mr. Litchfield's hands a document containing my reasons for translating the advertisement as I did, and I gave authority for the various statements I made about the ideographs. If Mr. Litchfield had considered it expedient to recall me, I could have given a complete explanation of the ideographs in dispute and supported my statements by books of reference. As a considerable amount of discussion has taken place regarding this translation, I enclose herewith a copy of the paper handed to Mr. Litchfield, and I think, after perusing its contents, wery fair minded person will come to the conclusion that I have very strong reasons for adhering to my there would be local self government, in India, ancient or modern, to support me in my assertions, There very strong reasons for adhering to my original translation.

With regard to my linguistic qualifications, it

was not stated in court, but, as a matter of fact, I have spent eleven full years in Japan and during the whole period I have made a thorough study the anguage, both spoken and written, and this should be enough to qualify me to speak with some authority on the subject.

Thanking you in anticipation for the insertion of this later.

of this fetter, I am, Sir, Yours respectfully,

J. M de BECKER.

Yakohuma, Dec. 29th, 1897.

With regard to the translation of the Japanese advertisement appearing in the Rögyö Zasshi (or Engineering Journal), dated 27th of August, 1897, there seems to be considerable difference of opinion as to the correct rendering of the Japan-

opinion as to the correct rendering or the Japanese into English.

The first thing that strikes a person acquainted with the Japanese language is that this advertisement is a translation from the English and that it has nothing essentially Japanese in its composition, i.e., that it is not put in the way in which a Japanese would compose such an advertisement, if he had not some foreign copy as a basis to work upon.

To take the meaning seriatim, the characters heading the advertisement are Dairi Sasho ft 理能避

Dairi means " Agency."代理

Sa means " Fraudulent or deceifful."

Shō means "Representation." ##
I should therefore translate that heading as
Fraudulent misrepresentation with regard to "Fraudulent this representation with regard to agency." It has been advanced by persons claiming to be experts that Sa does not mean "Fraudulent," and that it only means "False," In support of this view, Mr. C. K. Marshal Martin brings Art. 214, of the Penal Code of Japan, where he says the sense in which the word is used is "False." In turning to the original Japanese, I find that the only sense in which "False" is used in this Article is when such falsity is fraudulent, because the Japanese says

is in an indicated the content of t

Penal Code.

In Arts. 231 and 232, of the Penal Code, it is quite true that the English translation of the word Sasko appears in one place as "False" and in another as "Unduly." The sense, however, of these two Articles is this:—That the usurpation of costnines, insignia, titles or decorations, etc., comes under the heading of crimes against the public trust and comes under the calegory of various classes of fraud. Mr. Martin says the ideograph Sa means, "To make up," or "Fabricate." So it does, but, at the same time, I do not take the contraction to be the same as that stated by him. In their assertion, that the lead belongs to the people and hence the rest belongs to them.

Three Cheers for the Single Tax!

CHAS. E. GARST.

44 Tsukiji, December 17th, 1897.

A. S. HAY VS. AMERICAN TRADING CO.

To the Edition of the weathing of the meaning of Sa the "Yakubun Suchi," compiled by Matsumoto Guzan, Matsumoto Guz

nense of fraud or fraudulent is thoroughly brought out. In the word Sabô, which is translated by Capt. Brinkley as "A deceptive device, an evil imagination or strategy," this should have been translated, in addition to the above meanings, "A fraudulent scheme." On page 1161, of Brinkley's Dictionary, Sa-jutsu is translated as "a stratagem." In the Civil Code of Japan, in the "Book relating to Property," Art. 204, Sa-jutsu is used in the sense of a fraudulent scheme. In the Civil Code of Japan, in the "Book relating to Property," Art. 30, appear the words Sa-gai no kō-i (許貴子行為) which are used in the sense of a fraudulent act which is calculated to cause loss to a creditor or injure such creditor's interests. sense of fraud or fraudulent is thoroughly creditor's interests.

Then in a translation of Bouvier's Law Dictionary, made by Ucabe Sliözö, a barrister of Tokyo in 1890, the "Statute of Frauds" is translated;-

in 1890, the "Statute of Frauds" is translated;—
Sate! Forst which means: ###, Se
Frand, tel Fix, determine or settle, Forst Sixtute,
The above illustration will show distinctly that
it is not necessary to add the character Gi to Se
in order to preserve the sense of "fraud" in the
first character. My contention is that when Se
precedes another ideograph, although a second
sense may be produced, still the idea of fraud is
preserved in combination. Taking the experience
of eleven years of hard reading and constant in
character So is used at the heading of the adventisement in question with the intent to express the
word "Fraudulent," because there are a great
many other ways of expressing the same meaning. many other ways of expressing the same meaning, as, for instance, in place of Sasho (能解) could he used Gi-koku (儒管) and then it would simply mean "A deceifful or false notification; or King! Ko-koku could be used

(旅傳廣告).
As regards the word Fusei, Mr. Martin has brought forward an old out-of-date book as reference to prove the meaning of Se, so I may perhaps be permitted to bring forward, for the meaning be permitted to bring forward, for the meaning of Fussi (TME), an English-Chinese Dictionary, published in 1866 in Shanghai, by the Rev. W. Lobscheid. In this dictionary Fussi is given as the equivalent of dishonest. In a Dictionary of the English language, published by Shimada Yntaka, 6th Edition, 1897, "Dishonest" and "Dishonesty" are both translated with the word Fussi. The character Soi (also can be read Sho) means "Houset; upright; real; true; gentuine; straight;" etc. In Japanese, the character can be read as Tadashii. Thus, Tadashii hito, according to Hapburn, page 620, and according to Brinkley, page Tadashii. Thus, Tadashii hito, according to Hepburn, page 529, and according to Brinkley, page 1440, is translated "An honest person." The reverse in Japanese would be Tadashtkarasara hito (E>n? I have and unthing else. In Brinkley. Fusei, is not rendered "Dishonest," but "Unjust; improper; wicked; bad; wickedness." Now, "honesty "is the disposition to act justly, honestly, especially in business transactions, or in relation to the rights of property, and the autonym of this is "lacking honesty; destitute of integrity or good faith; having or exercising the disposition to cheat or defrand; untrustworthy; knavish." When the word Fu-sei is employed, the Japanese will understand it as the exact autonym of lionesty. Hepburn gives as an equivalent for of honesty. Hepburn gives as an equivalent for the word "Dishonest" Fu-shôfiki na, but the Fu-sho of the above word could be read as Fu-se; and it does not require jiki (can also be read " choku") to complete the sense

In Art. 262 of the Commercial Code of Japan, Fu-sei no i is translated as " Dishonest intention." Fu-sei no i in translated as "Dishonest intention," but I am willing to admit that in a great many instances it is also used in the Codes in the sense of "Incorrectly," and "Improper." However, when it is translated "Incorrectly" or "Improper," it is always in a place where I sandulent intention is implied. In a Dictionary by Tanahashi Ichiro, 5th Edition, 1887, the word "Dishonest (want of probing is the sense given) is translated "Fu-sei." I cannot find in any place "Improper" to be translated Fu-sei, but it could be translated as Fu-so. If the translator of this advertisement from English to Japanese had had in the original the words "Improper conduct" and had translated them correctly, he would not have used the word Fusce, but he might have used the words Fusce.

Digitized by Google

wicked and criminal one. In the Commercial Code, Art. 257, Fu-sei im translated as "Improperly." This, as a matter of fact, is right, in its way, but it is not strong enough. Still, it will be noticed that it is used in connection with a punishable offense, and the idea is to prevent fraudulent entries or omissions in the list of shareholders. Mr. Ozawa, in his testimony, went so far as to say that Fu-sei could not be translated as dishonest and vice versa. The examples which I have given above show that this is entirely incorrect, and I do not consider it necessary to even refute his remarks, under the circumstances.

incorrect, and I do not consider it necessary to even relate his remarks, under the circumstances. After all, the various objections which have been raised and the various theories which have been advanced on the side of the defendant Company amount simply to juggling with words and nothing else. The effect produced on the mind of a Japanese when seeing an advertisement headed with characters among which is the ideograph Sa, is to immediately-make him think of the word Sagiwhich is the legal word for Iraud, and the sense in which Fu.sei is considered by a Japanese seeing the advertisement is "Dishonest." The whole advertisement is likely to produce a very deep impression on the minds of readers and calculated to seriously damage the character and reputation of the person in question.

to seriously damage the character and reputation of the person in question.

Although I have cited authorities in support of my interpretation, I do not consider that the iprediction of even the best lexicographical authority should be taken as final on the subject, as at present the available dictionaries are not complete and I would not entirely depend upon them. My translation has been made in the light of practical analysis and I raise monthly own personal experience and I rely upon my own personal knowledge of the language in giving the characters employed the signification I have done.

#### THE "SOCIAL EVIL."

TO THE EDITOR OF THE " JAPAN MAIL."

SIR.—The chief feature of your reply to my acticle in the Hyogo News was not unanticipated. It was not therefore either ignorance or obtuseness which led me to give to the term "Social Evil" a wider meaning than "the arithmetic of prostitution and the wisdom of the licensing system." I did this deliberately and for several

reasons:

First because in the mind of the public the wider meaning of the term is by no means uncommon, I doubt very much if "A Missionary" meant to represent Col. Bacon as confining himself in his addresses to the limits of the question given by yourself. That others of your readers do not do so is clearly shown by the communication of your lady correspondent "E.S.P." who concludes her letter in these words:—"And I am not alone in thinking that II the globe-trotters who come to criticise, and the missionaries who come to criticise, and the missionaries who come to convert, the Japanese people, would only stay at home, and expend their superfluous energies in at home, and expend their superfluous energies in endeavouring to cleanse their own cities, instead of coming to countries where the conditions are totally different, leaving the latter to be altered and improved where necessary, by the laws of the country, as will happen naturally and in due course, they will be doing a better work, and would show more satisfactory results than they will ever achieve amongst a people whose minds are both critical and analytical." I will say frankly that it was in part because I feared your article, entirely without and anamicat. I will say trangly that it was in part because I feared your article, entirely without intention on your part, would strengthen one class of your readers in the opinion that "if the mis-

of your readers in the opinion that "if the missionaries who come to convert the Japanese would only stay at home \*\* they will be doing a better work," that led me to write in criticism of it.

Secondly, I have a firm conviction that social morality and the Social Evil are so closely related that they cannot really be separated, that they are in a true sense one and the same question. When you can separate a river from its source or a plant from the soil out of which it grows, then and not till then can the social evil be treated without reference to social unrality. As a living British reference to social murality. As a living Bittish scholar has recently said:—" It is vain for the men of a nation to practise impurity and fancy that nevertheless they can keep their wamankind chaste." chaste.

You declare that I have made misstatements in

the writer said—the article is before me as I write —"Kare ga konnichi kozen sho to shite kosekibo ni Taka who is to-day publicly registered as his con-cubine is the daughter of——a lumber dealer cabine is the daugh living in Fukagawa.)

I wrote my article knowing that concubinage is common in Japan, and believing it to be so in the case mentioned; I knew, too, how carefully every Japanese is registered; and so with the above sentence in mind—it indicates an examination of the records—I wrote as I did feeling quite sure of my ground.

I know your acquaintance with Jepanese law is lar greater than mine and if, as I think not improbable, it turns out that in following the Yorosu Choho, I was technically wrong in the statement made, is it not still true that persons known to be concubines are registered as jochiu, kashimoto, or sobame? If so, would the negative statement, "Concubinage, though illegal in the United States, is not so in Japan," be incorrect?

I accept your statement as conclusive that the I accept your statement as conclusive that the demonstrations made by the late Governor Hennessey at the geisha entertainment in Kyoto were those of approval and not of disapproval and offended dignity. But I am not ready to admit that the latter sentiments were never expressed. My informant was an Englishman not now in Japan, a gentleman of the highest character, and a former resident of Hongkong, and I understood him to claim positive knowledge. My explanation is that at the time the Governor expressed the accreval and delight claimed, but that afterthe approval and delight claimed, but that after-ward when he found that he had been enter-tained by a dance by women of evil reputation his indignation, as has been the case with other visitors, was strong, and strongly expressed. Having now disposed of two apparent misstate-Having now disposed of two apparent misstatements in my article allow me to call attention to statements in yours which seem to me decidedly questionable. You say, "No foreign lady, could be offended by the contributions which the grisha makes to social convivialities," If you were compelled to spend as many nights in Japanese inns as some missionaries do, often-times with only a shoji between you and a company of merry makers, you could not I am sure make such a statement. If there is nothing offensive in their presence why—if I am correctly informed—did General Nogirefuse to attend a public entertainment in Sendai during the present year unless the plan to have geisha present were given up?

ment in Sendai during the present year unless the plan to have geisha present were given up?

In your issue of Dec. 4 you speak approvingly of "the Japanese plan of relegating the evil to remote quarters of the cities and confining it there." One of the main contentions of my article was that it is not so confined. I showed, and I could show still further, and even bring, witnesses to prove that the Social Evil—even in its narrower sense is not confined to remote quarters but that the lottels almost everywhere are full of it. Of this there is there can be no ourse. full of it. Of this there is, there can be no ques-

I am glad to read Pour outspoken words as to the character of the gisha, and your opinion that "their abolition would be a salutary step." I am glad too to be assured—though I had not before doubted it,—that on many points connected with this great question we think alike.

Asking your pardon for the length of this article on the ground of the importance of the subject discussed. I remain very truly your.

discussed, I remain very truly yours

THE WRITER OF THE ARTICLE IN THE "Hiogo News"

#### ASIATIC SOCIETY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The recently published decision of the apan Branch of the Asiatic Society, is of course, matter to be decided by the subscribers; but as a matter to be decided by the subscribers; but as one of the outside general public who is specially interested in the sphere that the said Society was established to influence, I beg to be permitted to offer some observations bearing on the question in the future.

As the Suciety acknowledges failure in the en-couragement of contributors, I venture to suggest a thorough reorganization; and as the Revised Treaties will ere long be in operation, let Japa-nese and foreigners be precisely on the same foot-ing; remove all restrictions, admit any one paying the subsection and the basic productions.

not mere dilettanti, and on subjects now "cold shouldered" but interesting to the majority of but interesting to the majority of

shouldered "but interesting to the majority of the savants and more intelligent reading public, a steadily increasing number.

The preparation of a "paper" involves much expenditure of time and careful thought, even with all the material to hand; and any one having command of a wider circle of readers than the Journal of such a Society as that under notice, will not offer the results of so much trouble to the censorship of a Committee such as usually acts as Executive in a small community composed principally of the elements to be found in such a place as Tokyo for instance; and only to be emplace as Tokyo for instance; place as Tokyo for instance; and only to be em-balmed in pages that furnish pabulum to the in-

dustrious literary back.
The most vigorous societies in London, and the dustrious literary back.

The most vigorous societies in London, and the writer is familiar with many, as Member and Lecturer, are those giving facilities to wider membership and having the largest audiences, the greatest freedom of discussion and the most extensive circulation of their Journals (or Reports, Proceedings, Transactions, &c.), such as the Society of Arts, Adelphi, the patron of which was the late Prince Consort; and to which the late Admiral Rider, when Commander in-Chief at Portsmouth, altuded in a private letter to the writer as "being like an elephant's trunk, nothing was too great or too small for it to take up."

The most learned amongst the Yamatologists are still dependant upon Japanese for the information that furnishes the basis of all contributions; and why not have the authorities at the meetings, with interpreters for the benefit of those who have not acquired the necessary knowledge of Japanese? The original in Japanese could be printed at a very small cost, as well as a carefully revised translation. Japanese subscribers would not be the only persons pleased with such a feature.

So long as the range of subjects acceptable is restricted to the arrow range of the ideas of the

with such a feature.

So long as the range of subjects acceptable is restricted to the narrow range of the ideas of the propagandists of a creed, in any of the numerous sectarian forms which is in competition with the indigenous cultus and other ancient beliefs, there will be limitations to the usefulness of a Society the estensible raison d'efre of which is (or should be) Oriental Research; and the encouragement that ought to be afforded, becomes non existent. non existent.

A long list of subjects occurs to the inditer, suggested by questioners met with when travelling and lecturing in Europe and America, upon which information is desired; and in years to come there will be increasing difficulty in obtaining "unsophisticated" information.

It is sincerely to be hoped that scientific, systematic research will have organized encouragement in the near future; and I therefore advocate the establishment of a solid institution on a broad and liberal basis.

Lam, yours, &c., C. PFOUNDES. January 5th, 1898.

#### AUSTRALIA AND JAPAN.

(FROM OUR CORRESPONDENT.)

Sydney, November 26.

The Colonied Races Restriction and Regulations Bill, introduced by the New South Wales Government, has every prospect of being adopted by the colonial parliament, although whether it will receive the assent of the British Government remains to be seen. It is aimed principally at the increasing number of Afghan, Syrian, and other Asiatic peoples in the colony, the difficulty being that many of them claim to be British subjects, and is based upon the measure which has proved so successful in Natal. Practically it will exclude only those desirous of settling in the colony, the exemptions being numerous and comprehenthe exemptions being numerous and comprehe

sive.
In Queensland the Labour party is clamouring for legislation of a drastic character, with a view to preventing the employment of Japanese in the Northern Queensland sugar country, the large number of Japanese settled on Thursday Island being made an excuse for action in the matter. Recently in the Queensland parliament, the Premier, Sir Hugh Nelson, stated that the action taken by the Queensland Government with a view to the stoppage of Japanese immigration "had not arrived at such a stage as will admit of its being made public." This reply has given rise to a considerable amount of press comment. The Queenslander, for instance, says:—"The slow You declare that I have made misstatements in regard to two points of fact. One of these is in my statement:—"Japan has, America has not legalized concubinage." This you say is "diamout trically opposed to the truth," and you go on to say, "concubinage is not more legal in Japan han it is in the United States. The law does not recognize it in any way." When I wrote I was strongly of the impression that concubines were registered as such. I had in mind an editional article I had read months before in the Korodsu Choho. Speaking of the immorality of the Head Priest of the Eastern Hongwanji sect of Buddhists

Digitized by

Couragement of contributors, I venture to suggest at the Council to contributors, I venture to suggest at the Premier, Sir Hugh Nelson, stated that the Premier, Sir Hugh Nelson, at the Premier, Sir Hugh Nelson, stated that the Premier, Sir Hugh Nelson, stated that the Premier, Sir Hugh Nelson, at the Premier, Sir Hugh Nelson, at the Premier, Sir Hugh Nelson, stated that the Premier States and the Premier, Sir Hugh Nelson, stated that the Premier States and Instance, same stated that the Premier States and Instance, say stated that the Premier States and Instance, say stated that the Premier States and Instance, s

gravity of the evil, and were doing their very best to have it met, the answer brings us again in view of the fact that the Government is in actual negotiation with that of Japan on the subject. It negotiation with that of Japan on the subject. It is well to remind ourselves of that fact in discussing the position. If realous anti-Japanists do not forget it they do worse; they write and speak after a lashion which can only embarrass the negotiators and prejudice Queensland in the negotiation." The columns of the Brisbane Courier have been filled with correspondence and articles the strict of the strict the lattices. have been filled with correspondence and articles bearing upon the question, among which the latters written by Mr. James Clark, from Thursday. Island, occupy a leading place. Mr. Ctark insists that the Japanese should not be allowed to monopolise the pearl fisheries of Torres Straits. He admits that they came at the invitation of the white capitalists, and would have nothing to say I they had remained in a condition of servitude. Their great sin, in his eyes, is that they have practically become their own employers. He would have them excluded from Queensland soil, but the colonists would not agree to anything of the kind. On this point the Brishaus Courier says:—
"Gavernment and Parliament with hesitate before dealing with Japanese now fishing in Queensfore dealing with Japanese now fishing in Queens-land waters in the manner recommended by Mr. land waters in the manner recommended by Mr. Clark. Such measures as he would like to see adopted would probably be taken as an affront by the Government and people of Japan. It is one thing to say to Japanese in Japan who may be thinking of emigrating to Queensland "You shall not land here;" or, "If you come here it can only be on such and such condition." tions. We will not have you as capitalists. You shall not own or hire boats in the peadshell fishery. tions. We will not have you as capitalists. You shall not own or hire boats in the pearlshell fishery. You may only enter the employment of white capitalists for so many years at wages that may be agreed upon, and then return to you own country." It is quite another thing to turn upon the Japanese now in the country, and impose disabilities upon them, even to taking the ownership of properties out of their hands. Australia has put an end to Chinese immigration, but it has not imposed irritating disabilities on the Chinese already in the country. We have not rescinded their naturalisation papers, or compulsorily bought them out of industries in which they have honestly earned their livelihood. The politicians who were resolute in terminating Chinese intangration were just as resolute in maintaining that the Chinese mow in Australia must not be disturbed in the enjoyment of rights and privileges. Is it reasonable to expect that the Government of Japan would tolerate a treatment of Japanese in Australia which compared hadly with the treatment of Chinese? If the Government of Japan were willing to agree to each stringent measures as Mc. Clark thinks ought to be adopted, we should soon, have other interested white contraints clamparing Clark thinks ought to be adopted, we should soon have other interested white capitalists clamouring for the Government to similarly run the Chinese and other coloured aliens out of ownership in other and other cajoured afters out of ownership in other industries. If the Japanese naw in Queensland ought not to be permitted to compete with Mr. Clark and other white boat-owners in the pearlshell industry at Thursday Island, ought the Chinese growers of bananas at Carus and Geraldton to be permitted to compete with the European growers of bananas there and elsewhere in Overal tast? European growers of bananas there and ensewhere in Queensland? Where could this thing stop, short of excluding coloured persons now amongst us from all ownership and control in the industries? And would that policy of harsh disability to the stranger within our boundaries, who came here when disability did not exist, be a policy that Britons could be proud of? Would it be a policy that the policy of the production with the R trial both of emerging in a Britons could be proud of? Would it be a policy consistent with the B itish habit of engaging in a capitalistic capacity in the industries of other countries?"

The Queenslander, releasing to the arguments employed by Mr. Clark and those sharing his employed by Mr. Clark and those snaing mappinion, says that one of them seems to give away the whole case. "It is that the Japanese have so heated the British in Japanese to deserve the treatment it is proposed to measure out to them in Queensland." Now let us understand them in Queensland." Now let us understand where we are. If our action is to be put upon the basis of Japanese desert, what becomes of the previous pleas of necessity urged in total independence of desert? We do not remember that much trouble was taken to show that the Chinese deserved the restrictions laid on them, say in the matter of the goldfields; the convinc-ing argument was the necessities or convenience of the white Queenslander. Desert is a dangerous plea when it is really a question of what we can wisely or safety do to secure our own interests And its dauger has seldom been better illustrated than in this very instance. It falls at every point: it even lives its edge against the whites. Much has been made of the embargo laid on British journalism in Japan. That does not amount to much But it has been shown that there is no embargo. the mount of the prospect or being superseded to the markets of a subsour that English memorf-war are displaying But it has been shown that there is no embargo. The East by the merchants and manufacturers of a subsour that English memorf-war are displaying But it has been shown that there is no embargo. This newly-active power; may prove a desirable great activity in the Gulf of Pechili. You will be Original from UNIVERSITY OF ILLINOIS AT

What has hannened, according to the editor of the Fapan Gasetis, is "a delect in the disting of the treaty," under which British journalism is liable to testly, under which such purchase by be extinguished in 1890; but the delect, it is thought, will be easily rectified upon representation made. This surely is a matter for negotiation rather than the proposed irrelevant reprisals. Then it has been complained that British travellers in Japan are restricted in their movements, have to provide themselves with passports, and are dogged by soldiers and policemen. This is Mr. Clark's great complaint. But it has been met by the principal Japanese resident of Thursday Island in a manner which should shame newspaper correspondents. ner which should shame newspaper correspondents ont of further reference to it. Mr. Torajiro Sato shows that the treatment Mr. Clink complains of was in reality a privilege of protection conferred on him and British subject under existing treaties. Nearly forty years ago it was agreed that British subjects in Japan should be protected by British law, and it became necessary for the Japanese Government to follow British travellets in order to secure them their legal privilege. It is not to the credit of disputants that they persist in twisting this exceptional privilege, which would be scouted with tidicule if proposed for the Japanese in Queensland, into an offence justifying severity on our part. And again we have to urge that misrepresentation of this kind does not help the Governmental negotiation. We only add that Governmental negotiation. We only add that we take this line of remark not from any lukewe take this fine of remain not from any func-warmness in our desire me see a white Australia, but from the conviction that, is on relations with Japan, it is only by a careful observance of reason and of justice, not to say international courtesy, that we can being the desire to happy fruition."

The tone adopted by the Queenslander very fairly represents that of public options generally thoughout the colony, if not the whole of Australia. Nowhere is all the world are the Japanese more respected appreciated than in the Australian Colonies, the whole of the trouble has miginated with the lower sections of the Australian labouring classes who affect to see in the Japanese workers formid-able industrial competitors in the next forme.

The establishment of schools for the complete commercial education of Japanese youth has naturally attracted some little attention in New South Wales, where the commercial element so largely predominates. The Maitland Mercury, after describing the educational curriculum remarks that:—"It will be interesting, for those who live long enough into the coming century, to observe whether this somewhat mechanical plan observe whether this somewhat internation plan of producing a commercial nation will succeed. Those political constitutions which have been marked by the most painful elaboration, and in chich endeavour is made to auticipate every development of the working of the political machine, have not been so conspicit usly successful as de-vices of government as has proved that unsym-metrical and unsystematic polity under which metrical and unsystematic polity under which Bittons live. And it may be that thorough and complete as is the system of Japanese commercial complete as the system of Japanese the education described, it may yet be deleated by followers of rough-and-teady and unscientific methods. Some of its will see. Meanwhile, on the surface we may fairly say that the Japanese designs merit respectful attention on the part of signs merit respectful attention on the past of England. Recent Lapanese progress may be, as The Times remarks, only a spirit. Yet it will be prident for English mechants and manufacturers to assume that they have in Japan a forman worthy of their steel. Nothing is much more foolish in a serious contest than to inderestimate your enough a trength. All this systematic and scientific training of Japanese lads for hearing a great part in a future commercial development of the mation may move to be wasted energy. But it the nation may prove to be wasted energy. But it may be also, to use Million's phrase, the process of a giast mewing its youth, and preparing to become puisseant in commerce as in war. We can well inderstand that merchants and captains of industry who are learned in political economy and in the whole province of the world's trade, to whom commercial and producing conditions everywhere are mercial and producing conditions everywhere are an open book, who have absorbed theoretical and practical commercial knowledge when the mind is plastic and memory receptive, whose buddy vigonithas been made to keep pace with the growth of their mental activity and alermess, and who have been disciplined in a morality resembling one aspect of that exalted morality given to the world by the Wise King of Israel, and that Greater One who spoke matchless words—that such merchant and industrial leaders may nowe formidable comwho spoke matchless words—that such merchant and industrial leaders may prove formidable competitors to the fields of the world's commerce with Englishmen and other Europeans, practised as they are by centuries of experience. We do not doubt the ability of Bottain to hold her own with Japan if she exert berself. And it is probable that the prospect of being superseded in the markets of the Earth with the prospect of being superseded in the markets of

spar to English folk, and embedy a warning against letteracy, and embody a warning against letteracy, and against toolding any antagonist too cheap. Moreover, a good policy is to learn of an adversary, as Peter the Great learned of the Swedes. We have called the morality inculcated in these Japanese commercial schools a morality resembling one aspect of the Christian morality, British production and commerce may hecome partified by incorporation into its methods of that higher aspect of Christian morality where-is we learn that a false weight and a deseiful balance are an abomination to the Lord.

#### NEWS FROM RIAO CHOIL

(TRANSLATED FROM " DER OSTASIATISCHER LLOTD," FOR THE " N.-C. DAILT NEWS.")

A sign that, netwithstanding our military occu-pation of the bay of Kieo chou, the friendly rela-tions between Germany and Clina have not been broken off, is visible in the non-interruption of telegraphic communication between the new Ger-man stations of Kieo-chou and Thinasand telegraphic communication between the new German stations of Kiao-chou and Tsingtao and the outside world. It is evident that the Chinese Government as well as our own, is carnestly striving for a poscelul solution of the present difficulty. In Tsingtao the little Chinese employee of the administration retains his post, clad in his elegant peach red gown; but his pedantic, reticent bepeach red gown; but his pedantic, reticent be-haviour compares very unlavourably with that of the sallors and non-commissioned officers—telethe sations and non-commissioned officers—tele-graphic experts—who have have been adjoined to him. Unfortunately, at Kiao-choustation, the next on the line from this, a like arrangement of the telegraph office was not practicable: there the lelegraph office was not practicable: there the Chinese telegraph clerk concluded to do politics on his own account and abandoned his post in an access of Germanophobia, to which he gave expression in a telegram sent in English to Tringtan in language not fit to be repeated. According to another story, he took French leave upon the approach of the Germans, fearing to be called to account for his telegraphic heart-outpourings. In any case his action led to a breach in telegraphic communication which lasted over a week, but which, although it disturbed our official traffic, did little harm to us personally, as the Ottariatischer Lloyd is hardly yet the "World-paper" to be able to wire its correspondence to its subscribers, even had we the necessary permission in use the wire. Consequently we must be gonreaders to have patience for a time which will happily not be long. We have to thank the Telegraph Administration for sending a fresh clerk and so restoring communication.

Otherwise peace and quiet reign absolutely. The detachment of 500 marines and sailors sent to Chino has been withdrawn, now that all the Chinese troops have left the neighbourhood. Chinese troops have left the neighboushood. It was a bitter cold day, the thermometer at 19 E, and a northwest gale blowing, as the men marched back in high spirits singing their soldier songs, (wind was at their backs) with a high colour from the wind and sin. And why should they not hook healthy? Is it not the home climate in which we are living? Rice and banners grow here no mark than they do at home; and our peasurts would soon learn to accommodate themselves to the mosquitoes and the somewhat higher sumants temperature. What a nity that this fire country is already soon learn to accommonate themselves to the most quitoes and the somewhat higher summs temperature. What a pity that this fine country is already fully occupied by the children of the yellow race and that they cannot be driven out or extensionated with the aid of powder and alchohol like the aborigines of Africa, Australia, and Polynesia. But if the Chinese, with life and reproductive powers equal to our own and so few wants, no idea of displacement is entertainable. Under these circumstances, never will China offer a field for colonisation to the surplus population of Europe. And yet here, too, we have what cannot withstand Western civilisation with its strange disintegrating influences; its Christianity and love of one's neighbour out the one hand; on the other, the reckless selfishness and individualism of our European industrialism—both backed by modern war methods—and this is the ancient empire of China. It is a hopeless invalid, whose decease is It is a impeless invalid, whose decease is unly a question of time. By the help of that Western civilisation which has destroyed it must the Chinese empre be again restored. In this work of the coming century we shall now take our part, starting from Kiao chon. From this point of vantage we shall be in a position to support a modern Chinese government with word and deed, as well as to watch over the safety of our mission-spies in the interior of China and to push the extension of our trade.

extension of our trade.

The English cruiser Undaunted which put is an appearance here on the 9 to of December, left as again on the 11th. Before that a small English maniof-war, the Algerine, our old friend from Shanghai, had arrived and is still here. There is

URBANA-CHAMPAIGN

better informed as to their movements in Shanghai than we here. Is it possible that, owing to our action here, England has been excited to a more active policy in China? Are complications between England and Russia threatening in regard to Korea? Such are the indications in the news brought by the German steamer Swalow yesterday. The arrival of a steamer is an event in this remote, newspaper void, Bay of Kiao-chou. So far only the German steamers chartered by the Admiral of the squadron come to this port. English steamers are said ill have rebetter informed as to their movements in Shangthis port. English steamers are said III have rethis port. English steamers are said in liave re-fused to call in here because, according to treaty, they render themselves liable to confiscation by calling at a non-upen port. But the German steamers by no means limit themselves to the con-veyance of letters and dispatches. The Loongveyance of letters and dispatches. The Loongmoon, which has made several voyages between this and Shanghai, has brought—besides fresh and preserved provisions in large quantities—numbers of ponies, timber for building, stoves, beds, and other faculture. The Loyal came in from floughoug with coal recently. To-day I noticed on the landing jetty the cargo being landed from the steamer Swatow, doors and windows made in Shanghair chairs and tables; sentry boxes to protect our sentires from wind and windows made in Shanghai's chairs and tables a neutry boxes to protect our sentires from wind and weather, and which will be shortly painted with the German colours,—black, white, red: streel-lanterns for roads and barrack yards, huge kettles, great loads for the depôt, and numberless other things which soint to the fact we intend to install ourselves both in comfortable and military shape. And wandering through the old Chinese camps, in which our brave blue-jackets are now housed, one seas the men all busily at work planking the floors and fitting doors and windows into their place. The yamen in Tsinglao—that magnificent range of buildings formarly occupied by the Chinese general in command—is now being fitted out for dwellings for our own Head Command and the higher officers. From the landing place to the magazine go trains of coolies and small Chinese carts, drawn by a mule or pony, laden with stores for the different camps and returning emoty. The remotes mentry boxes to protect our sentries from wind and go trains of coolies and small Chinese carts, drawn by a mule or pony, laden with stores for the di-ferent camps and returning empty. The country people move about them pursuing their ordinary occupations. Now we come across one of our well-known Shanghai wheelbarrows with the guest sitting on one side and her luggage on the other side of the wheel. It is a rather suspicious-looking small-footed beauty, decorated with white powder and deep rouge. What is she doing here? Has the come from the interior of the country la visit a and deep rouge. What is she doing itere? Has she come from the interior of the country to visit a or has she been imported by some specurelation or has she been imported by some specu-lative. Chinese in order here, like Eve, to under-mine the morals of our bardy warriors? Here we have a decidedly more innocent picture,—a little assied by a countryman, out of the baskets slung across, on either side peep out the heads of two little children who gaze with autonished eyes upon the "Red Devils." Of course there is been proed on the abusive language so freely bestow-ed on the European in China-often with the accompaniment of stones, fifth, and clods of earth, -not even in the interior of the occupied territory must even in the interior of the occupied territory. You may wander alone or ride through the surrounding villages and you will be absolutely numolessed; indeed around Tsingtao you mostly get a friendly salute copied from our military salute. May it ever he thus!

When the wind blows strong from the North, s when the wind blows strong rum the North, a walk through the country or even a shoul through the atreets of our little town of Tsingtao, does not afford much enjoyment; walking against it, the wind fairly takes away one's breath and one does well to cover up the ears. Then on the broad waters which look so pleasing from afar white combast the numbers and combast the numbers and provides the numbers of the property of the prope combers the mp, unpleasant enough when one is close to them and which, though they leave our stately men-of war undisturbed, play havoc with the small steam-launches and the drafts of men being landed from them at the pile jetty. But, when the stiff breeze drops, and the sea is once more like a mirror, and the sun warms up the landscape once more, then we gladly set out on a walk over hill and dale. The various hill ranges lie right across our direction and close to us. Some dozen higher and lower peaks project from the range, some crowned by most marvellously-shaped rocks. The highest peak, as already stated, harely exceeds after the relation of the relation of the ing the villages which nestle in the valley bottoms. The hard, rocky, and fezen paths are had for our

the approaching stranger. The Chinese seem to have left him alone formerly, not caring much for game. But now that buyers for the dainty reast are steadily to be found in Tsingtao, the Chinese are pursuing it with great energy, driving them into nets, as, fortunately, they do not possess fire arms. This will soon make an end of possess fre-aims. This will soon make an end of the hares in this neighbourhood and when our German forester arrives on the spot, there will be little for him to do; for it will be long before it will be possible to put in force game laws against the Chinese. Pheasants are also said to exist but I have so far seen none. On the other hand, linge flacks of wild geese are to be seen, as also the heron, a large handsome grey bird; one sees dozens of these beautiful animals in their long line of flight; it seems to take the place of the stock with us and, to judge by the appearance of the Chinese houses, here fulfils his delicate office far better than does his lang-legged brother in the old home.
Tsingtao, 13th December.

#### A NEW YAPANESE ENTERPRISE.

Much feminine attention has lately been directed to a novelty which illustrates nothing less than the fact than an altogether new and wholly unforeseen rival to the needlewomen, not only of our own metropolis, but of Paris, Berlin, and Vienna, has spring up out of the East, and that phicky, co-sourceful Japan is prepared to place upon our counters dressing gowns and bedroom jackets that may well effect revolutions alike in the fashions and the prices of these useful articles. This new trade (says the Daily Telegraph) is entirely the result of Japanese "push," and, although it has only been in existence about eighteen months, it is already assuming large dimensions. Furmerly these dressing gowns were not wholly unknown in London, but they were then imported by half-dozens, and sold at a high price as emiosities, Shortly after the conclusion of the war with China a young Japanese commercial traveller presented himself in this country, furnished with all credentials, and pointed out to leading firms that Euronean visitors had always expressed themselves peam visitors and aiways expressed themselves pleased with the warmth and comfort of the quilted and wadded silk dressing gowns they had seen and worn in Japan, and that some people were now in the habit of obtaining such articles though private channels. He had come, therefore, in the hope of opening up a trade in this direction, and he offered terms which considered the offered terms which considered the opening to the opening the constant the opening the vate channels. He had come, therefore, in the hope of opening up a trade in this direction, and he offered terms which proved bim to be quite conversant with the ordinary commercial practices of the trade. Some declined the risk, some lesitated, but Messrs, D. H. Evans, risk, some lesitated, but Messrs, D. H. Evans, who some years ago organised with marked success a scheme for giving the needlework of fine underwear direct into the hands of kish peasant women, took it up, with the result that a single slipment recently comprised no less than a thousand descine compared six land. a single shipment recently comprised no less than a thousand diessing-gowns and six hundred diessing jackets, whist an exact "repeat order" as to colouring, sizes, and numbers has been given. It should be added that there are two other wholesale importers of Eastern goods two other wholesale importers of Eastern goods in the City who are bringing over consignments of considerable bulk. Yokohama is the seat of the new industry, which engages men as well as women. The system by which English tastes and requirements are met is for the Japanese agent to for ward to his European principals the whole range of fine soft silks the has available for the gown itself, and for the linings. Sir Thomas Wardle, the President of the British Silk Association, and the leading authority on the chemistry of dyes, stated, in answer to direct inquiries on this subject, that the Japanese have now acquired a mastery of the subtlest secrets of aniline shading; while if they are substituting for the old-fashioned pure vegetable combinations the product of coal-tar, they are doing so with a remarkable perception of their best application. Certainly, there are scores of the most charming fints available, and when the of the most charming tints available, and when the of the most charming tints available, and when the Western expert has decided to order, say, half a dozen of the quies blue, lived with ceam, a dozen of delicate moss-green, allied with bright rose-pink and a like number of warm crimson, in conjunction with shot pearl and peach, the patterns are attached to specially prepared cards, and when the sizes are indicated there is no further trouble. Japanese taste may be confidently left to carry out the embolderies, either unit-

tieme partisan either of free trade or of protection to draw a moral from it. In the great market of cheap clothing we have suffered too long from the competition of the German pocket-money needlewoman and half a dozen other rivals to raise any cries about another nail in the coffin of poor women's homework; and if so much money has to leave this country annually that our drapers' windows may be filled with attractive, showy wares, it matters very little whether it goes to Berlin or Tokyo. Even if Japan does not supply us within our generation with "Paris model" dresses and millinery, with Savile Row frock coats and tall hats, it is perfectly conceivable that her daily improving silk throwing machinery and power-looms will send us in a year or two mainfactured silks that in colour and price will fight quite fairly the weighted and adulterated productions of Crefelt and Como. Men's ties, ladies blouses and fronts, and even petiticats, may well follow a year or two hence the dressing-gowns of to-day. The boot and shoe trade handly realises how fast a great industry in footgoar, saddlery, contempting apprains treme partisan either of free trade or of protecto-day. The boot and shoe trade hardly realises how fast a great industry in fobtgear, saddlery, portmanteaus, and leather generally is growing up in Campore, or how a touch of the magic wands of capital and energy might convert the city of the mutiny's darkest memories into a powerful commercial rival of Northampton. But many more such instances might be cited in which goods long the manupoly of European factories are being produced where labour is abundant and are being produced where tallott is absoluted and strikes do not occur, and in surveying them it can only be said now-a-days with extreme reservation that "East is East and West is West, and never the twain shall meet," so rapidly is industrial development bridging the gulf.

#### PIRATICAL ATTACK ON HAIPHONG.

The Courrier d'Haiphong of the 18th Dec. gives a detailed account of the attack on Haiphong that accured in the early morning of the 16th Dec. It states that several days previously information had been received by the authories and the European residents, through the Spanish missionaries, Annamite officials, and domestic servants, of the intended rising, but no importance seems thave been strached to the warning by the officials. The pirates had assembled eight days before at the Elephant's Hill, and had been regaling themselves with spirits and meal. They had made no secret of their intention to attack Haiphong, and had said that they had received orders from Heaven to exterminate the Europeans and the dynasty of Nguyen (the Annam dynasty), which was to be replaced by that of the Mac. On the morning in question they separated into two bands, each from 150 to 200 strong, and at 5 a.m. entered the town of different directions. One section made its way the Quan An's house setsection made its way \$\exist\$ the Quan An's house setting fire to the numerous matsheds and houses en rouse. The Quan An (a native military official) had been apprised of the intended attack and had left only the previous evening with about 100 militin, under the command of inspector Lambert, to meet the robels at the Elephant's Hill. His body guard, which was left behind, stubbornly defended the place and opened fire on the assailants, of whom a great musber were killed and wounded. The other band happened to pass the house in which Mr. Gauthier, of Mr. A. R. Marty's firm, was living. This unfortunate young man was awakened by the alarm and tried to escape, but was pursued by the pirates and backed to death. His features were so hortibly mutilated that they were unrecognizable. As section made its way = the Quan An's house setribly mutilated that they were unrecognizable. As employe of Mr. Faussemagne was also wounded. At 4 o'clock the troops were awakened by the alarm, but no one thought that the situation was so grave. but no one thought that the situation was so grave. Thinking that it was merely the question of a fire a small hody was sent out with a pump. As soon as this body realised the situation they hurnied lack to their quarters, and at six o'clock a company divided into two sections started in pursuit of the pirates. One of the sections came upon some stragglers from the bands and charged them with fixed bayonets. About fifteen of the pirates were either killed or severely wounded, and three banners were captured, hearing the following priates were either killed or severely wounded, and three banners were captured, bearing the following devices, "Let us obey the order from heaven. Exterminate the Buropeans, Exterminate the dynasty of the Nguyen. Dynasty of Mac." On each of the bodies of the slain was found a chip of bamboo bearing the characters "Soldiers of heaven." It is averted that the vising is general in the Delta and that exverted other pour have likewise been the sizes are indicated there is no further touble. The hard, rocky, and forcen paths are had for our ponties, but at times we come upon the sandy beds of watercourses where we can gallop our animals. Most picture-que are the ravines winding upwards between rocky walls, as they are cut deep into the earth; the broken rock material lends itself to most faminatic shapes. We have before us a model of the earth's evolution under the action of wind and water.

The sportamen, too, need not wander in vain over these fields and mountains. Our old German friend, the hare, is seen everywhere fleeing from heaven. Exterminate the devices, "Let us obey the arder from heaven. Exterminate the Buropeans, Exterminate the Buropeans, Exterminate the Buropeans, Exterminate the devices, "Let us obey the arder from heaven. Extending the characters where the notice is no further touble. Is panese taste may be confidently tentionally of the Nguyen. Dynasty of Mac." On each of the ling the colours or effecting a daring but has bodies of the slain was found a chip of the slain was found a chip of the Nguyen. Dynasty of Mac." On each of the logities of the slain was found a chip of the Nguyen. Dynasty of Mac." On each of the slain was found a chip of the Nguyen. Dynasty of the Nguyen. Dynasty

#### PROBLEM No. 353. By MAX KARSTEDT.

(First Prize, Tägliche Rundschen Tournament.)

White mates in two moves,

The Chess Editor of the Fapan Mail intends offering a small trophy to the solver of the largest number of problems appearing in this column this year.

#### CONCERNING PROBLEM 349.

The New York Evaning Past has some words on "Chess Problem Coincidences" and "unconscious imitation," which gives Mr. O'Hata the benefit of the doubt concerning the charge of plagiarism brought against him. We are told that the Judge had an idea that he had seen the that the Judge had an idea that he had seen the position or something like it, but he had no proof that it was a plagiarism. The Evening Post gives several positions where there is a "striking termiblance," but The Sporting and Dramatic Newsdeclares that O'Hara's problem is a facsimile of one by Pospisil. It is not difficult to understand how a composer may make a problem resembling another, but the plea of "unconscious imitation" will not convince the jury that a facsimile is an original work.—Literary Direct. original work .- Literary Digest.

#### "JAPAN MAIL" CORRESPONDENCE TOURNEY. (To the Chess Editor.)

(TO THE CHESS EDITOR.)

SIR,—I noticed in last Friday's Chess column, someremarks concerning my game with Mr. Fardel, and should like to say that although you have finally decided the game in my lavour, I shall be very pleased to continue it with Mr. Fardel by private correspondence. For I regret that that gentleman should think that he has been unfairly treated and might otherwise have accounted defeat freated and might otherwise have escaped defeat from my hands. Should Mr. Faidel accept my proposition and turn the result of the game in his favour, I shall not fail to provide you with the score. "NEMO." I am &cc.

#### YOROHAMA CHASS CLUB.

The meetings in the first week of the New Year were well attended, several match games being played, new challenges in the I adder Tonnament were handed in, and last not least, two new members elected, one of whom, Capt. Weithach, will be one of the chub, which we have the been a walked required. Mr. Sachs promises to become a valuable acquisition, being foremost in the ranks of our pupils at the free instruction classes. Digitized by Google

At a committee meeting held last Thursday it was decided to commence the Championship Four-ney in the third week of January. Entries will close on the 15th inst, and will, we believe, com-prise eight of our strongest players, Mr. Griffin, on ex-champion however, excluded, who, we regret to say, will be unable to enter for the event this year,

#### THE GREAT JUBILEE TOURNAMENT.

The following from a Hamburg paper is the latest news concerning the great Vienna tournamont of 1898 :-

"In colebration of the fiftieth anniversary of the reign of Emperor Juseph the Vienna Chessplayers will arrange an International Masters' Tournament, to begin in May. The tourney is scheduled to last eight weeks, and only prizewinners in previous international contests will be allowed to enter, the number of entries to be limited to twenty. leasmuch as each competitor will have to play two games with every other man, thirty-eight rounds in all will have to he played. There will be six prizes, the first to be 6,000 kconers (about \$1,500). Entries will be taken up to April 31."

Reichelm, in The Times, Philadelphia, gives the

ones of the players who are eligible: America—Steinitz, Pillsbury, and Lipschutz. Great Britain—Bird, Blackburn, Burn, Mason, and Owen.

France-Janowski and Rosenthal.

Geimany-Bardeleben, Lasker, Lipke, Mieses, Riemann, Schallopp, Tarrasch, and Walbrodt.
Anstria-Hungary-Charousek, Berger, Grensberg, Makovetz, Marce, Marozav, Puges, Schlechter, A. Schwartz, J. Schwartz, Weise, and Wittek.
Rinssia-Alajein, Scheppers, Tschigorin, and Winawer.

The Philadelphia Times has discovered that the critical plays an important part in the game of Chest. As long ago as 1857, when Morphy played Paulsen, the former played badly in the opening games of the match through the persistent opening games of the match through the persistent concentration of his mind on the board during the entire game. In the later games, as if aware of his mistake, he withdrew his attention from the game when it was not his turn to move, and at once returned to his normal, beautiful, brilliant style of play. The theory of this was that Morphy, as a child of the South, was peculiarly susceptible to the stronger will of the Northern Paulsen, which the latter succeeded in imposing, unconsciously perhaps, on his more negaposing, unconsciously perhaps, on his more nega-tive opponent as long as Mr. Morphy gave him the opportunity of doing so by dwelling continuously on the game.

Messes. Crane and Jacobson are at present en-aged in a match for the championship of Austcalls. The Sydney Mail, says:-This contest appears to be one in name only, for Mr. Jacobson is scoring game after game without even a draw to break the monotony. Mr. Crane's play is dis-appointing to himself and his friends.

appointing to himself and his friends.

The fifth game, which was adjourned at an interesting stage, was resumed at the chess room, Hotel Arcadia. Mr. Crane's sealed move was 18—Kt to K R 2, to which Mr. Jacobsen made the powerful reply of Kt to Q R 3. The attack then passed into latter's hands, and he conducted it in his characteristic brilliant style to a successful issue. Mr. Crane seems to have made the best defence, but the position and weight of material were against him. Score: J. L. Jacobsen, 5; W. Crane, E.

We give below the score of this beautiful game,

We give below the score of this beautiful game ether with a diagram of the situation at its most critical period.

Mr. Pillabury has started a correspondence thess association in the United States, the idea has taken on, and over 100 players are now engaged in playing a correspondence tournament. The only objection to this interesting form of playing chess is that any event must necessarily proceed at but a very slow rate. New York chess chubs have also combined for the first time into a competition similar to that which exists in London under the name of the London Chess League.

#### VARIATIONS IN CHESS GAMES.

The first player in Chess has twenty moves to on his first move, and whichever of choose from on his Brist move, and whichever of the twenty he lakes, his opponent has the same number of replies," said Browne of our Club the other day, smoking a Criterion cigarette as he stood with his back to the fire, "as of hat," con-tinued he, "there may be four hundred games of

he stood with his back to the fire, "so that," continued he, "there may be four hundred games of Chess, only one move played on each side, and yet each position different."

"Prove it!" said Jones.
"Prove it!" splied Browne, with a voice full of scornful disdain.

"Yes, prove it," cried Jones. Jones, was rather a big man, with a wonden leg, which he took off and placed by his side when playing a game of Chess. He generally won, for there was a great dead of noral smastion about that leg. Browne said it was the only soft part about him.

"Mr. Jones," replied Brown laftily—he was always polite when lotty—"after I have finished giving the Club the information that I have culled for their benefit, I will condescend to argue with you. When your moves have been played, "he went on, "there may be 318,979514,000 games, each position being different."

"Prove it!" shouted the insochle Jones, who looked as if he wished it done on the spot.

"Gentlemen," continued Browne, not noticing the interruption, "the two kings alone—alone, Gentlemen," with solemn emphasis, for the cigarette was nearly finished—"the two kings alone, though never standing on adjacent squares can be placed in 3,612 different positions."

"Prove it!" interaled Jones, now getting his wooden leg into position should it be required for the purpose of moral suasion."

"And finther, gentlemen," said Browne "seven Chessnen, say four white and three black may occupy 128,746,434,575 809—"

Chessmen, say four white and three black may оссиру 128,746,434,575 809— "

But the sentence was never finished. A booming noise, caused by a wooden leg in mid-air, sug-gested to us a rapid setteat, and the last we saw was Browne ducking his head as if to avoid moral

## THE GREATEST WONDERS OF MODERN TIME

#### HOLLOWAY'S PILLS.

DERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

purity can be maintained by the use of these Pills. She Sakus Barra, in his work entitled "The Nile Tribut traine in Abysiola," says—"I ordered the dragoman Mahomete inform the Pakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In I short time I had many applicants, to whom I served out a quantity of Itoloway's Pills. These are most need to an applorer, as, pussessing unmistabable jurgative properties, they create an undentiable effect upon the patient, which satisfies them of their value."

#### SIMPLE, SAFE, AND CERTAIN.

#### HOLLOWAY'S OINTMENT

Is a certain emedy for had legs, had breasts, and ulcerations of all kinds. It acrs unfraculously in healing ulcerations, curing akin diseases, and in arresting and subdining all inflammations, Ma. J. T. Course, in his account of his extraordinary travels in China, published in 1871, 1887—11 had with me a quantity of holloway? Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, mills, fowle, butter, and horse feed poured in upon us, nutil at last a teaspoonful of Ointment was worth a fewl and any quantity of pees, and the demand became to great that I was obliged to lock up the small respaining "stock."

Sold by all Chemista and Medicine Venders throughout the World.

May 'stock."

#### SUMMARY OF NEWS.

THE plague has broken out again at Bombay.

A new Portuguese Club was opened at No. 168 Yokohama on the 9th instant.

THE Yokohama Electric Light Company has declared a dividend of 61 per cent. per annum THE Oraka Shosen Karalia s eleamer Forthern

Maru has been chartered by the Military Authorities to run between Wei-hal-wei and Osaka.

SUB-LIBUTENANT MATSUKATA TORAO, sixth son of Count Matsukata, died of consumption on

THE cruiser Kongo Kan is to leave Japan for a cruise to Australia in February, with a party of naval cadets on board.

THE state funeral of the late Prince Shimagu took place at Kagoshima on the 9th inst. with considerable pomp and ceremony.

H.I.H. PRINCE ARISUGAWA entertained Six Einest Satow, British Minister to Japan, at his palace at Kasumiganeki, at noon on the 7th inst.

THE first anniversary of the death of the late Empress Downger was observed on the 11th inst. The Court came out of mourning on the

THE official trial trip of the Nippon Yusen Kaisha steamship Inaba Maru took place on Wednesday afternoon. The steamer made an average speed of 14.211 knots an hour.

THE Tokyo Stock Exchange has declared a dividend for the latter half of last year at the rate of 32 per cent, per anunm, and the Osaka Stock Exchange a dividend of 16 per cent.

On the 7th inst. at 5.45 p.m. a train collided with some trucks on the line at Soma-gun, Fukushima Prefecture, and one person is re-ported to have been killed on the spot and three others neverely wounded.

THE first steamer of the line opened by the Osaka Shosen Kaisha on the Yangtsze river, the Tenryu Maru, arrived at Hankow on the 7th inst., with, it is reported, a full passenger list and plenty of cargo.

The following are the totals of the foreign trade of Japan during December: - Exports, ren 19,275.762; imports, yen 11,170.103. The export of gold and silver bullion amounted to yen 6.530.362 and the import to yen 676,182.

NEWS from the Soudan is to the effort that the Dervishes continue massing. The Nile force in being pushed forward. The army comprises a force of 18,300 Egyptians and several British battalions in addition to a flotilla on the river.

THE public trial of Nagai Keizo, charged with the murder in September last of a seaman belonging to the British steamer Glenericht, in Isezaki-cho, Yokohama, will take place at the Yokohama Local Court on the 21st instant at

VISCOUNT TSUTSUMI, Vice-Minister of the Imperial Household Department, was thrown out of a finrikisha in Kojimachi, Tokyo, on the 8th inst, and had his right wrist broken. He is now receiving surgical treatment at the Red Cross Hospital.

In the U.S. Consular Court, on the 12th inst. judgment was given by Consul-General Gowey, who sat with Associates, in a suit for breach of contract instituted by J. L. Meyers against A. H. Emanuel. Damages for 650 pen and costs were awarded to plaintiff.

THE cotton spinning mills in Kansai district, contrary to expectations, will declare (avourable dividends this year. The Setted Spinning Company will declare a dividend of 20 per cent, the Hirano Company 30 per cent, the Kishi-wada 15 per cent, and the Senshu 12 per cent.

Chefoo and Kobe. The steamer Takas Meru, now plying on the coast of Formess, will be placed on the run. The Company expects to secure a special Government subsidy for this service.

THE Russian proposals for a loan to China to enable her to pay off the balance of indemnity to Japan, and for other purposes, are reported to liave lapsed, and a loan of sixteen millions sterling is to be made to China by England, at 3 per cent., guaranteed by the British Government.

It is reported that, subject to audit, the Hongkong and Shanghai Bank will pay a dividend of £15/- per share, and add to Reserve Fund \$10 lacs. (one million), and carry forward to next half year \$3 lacs. The Reserve Fund will then stand at \$80 lacs. (dollars, eight millions).

A case in which Messre. F. Polzen and J. Allmacher, German subjects, were charged with having assaulted Mr. F. Schroeder, editor of the Eastern World, in his office a forinight since, concluded in the German Consular Court on the 13th inst., when the two accused were convicted and sentenced to 14 and 13 days' imprisonment respectively.

THE new Cabinet was installed on the 12th inst, and is composed as follows:—Minister President, Marquin Ito; Minister of Foreign Affairs, Baron Nishi; Finance, Count Inouve; Home Affairs, Viscount Yoshikawa; Education, Marquis Saionji; War, Viscount Katsura; the Navy, Marquia Saigo; Agriculture and Commerce, Baron Ito Miyoji; Communications, Baron Suyematsu; Justice, Mr. Sone-Arasuke.

THE negotiations between Germany and China regarding the lease of Kiso-chou to the former Power have been completed, and it is reported that Germany will receive 200,000 tacls from China for building a church and 10,000 tacls compensation to each of the families of the murdered missionaries. Germany has also obtained a concession to construct railways between Kino-chou and Che nan-pho and to work mines situated within 3 Chinese miles along both sides of the route.

THE Import market, so far as piece goods and yarns are concerned, still remains stagmant with no immediate prospect of revival, though the financial position after the new year settlements is better than had been anticipated. The Banks for some months before the close of the year exercised great discretion in husbanding their resources, while at the same time granting absolutely necessary accommodation to their clients to enable then to tide over the settlements, A little business has been done in some lines of metals, principally bars and sheets and the prospects of the trade look brighter than for some months past. Not much has been done in augur, the transactions effected having been on a small scale for immediate requirements. The kerosene market is quiet and stocks have increased by one cargo from New York. In Exports the principal item has been silk, in which a fair business has been transacted at well sustained rates, holders being very firm in view of the small stock remaining, which is only half the amount of last year at the same time. Of the minor exports some small business has been done in rice, but the price is still too high to allow of any large shipments, while nothing is doing in copper, or in tobacco, the Government monopoly of which came into force on the 1st instant. The business of the spinning mills has panned out much better than was expected for the past helf-year and Daka Shosen Kaisha will shortly open at rates of from 12 to 20 per cent per annum.

The between Newchwang, Takul Theman Skittang College 1995 AT SPIRIT OF THE VERNACULAR PRESS.

The Jiji Shimpo, always quick to read the signs of the times, expounds a policy which has been of late very apparent to thoughtful observers of the situation in the Far East. It is that if Japan hopes for an alliance with a Western Power, she must endeavour to establish a community of material interests with her future ally, Our contemporary frankly declares its own earnest wish to see an understanding between Japan and England. The English, however, are people who carry a award in one hand and an account-book in the other. They will never move unless they can plainly discern profit for themselves. After all, the factors that really make for peace in the world are commercial and financial interests. The nations of Europe stand, to-day, armed to the teeth, jealously watching each other, and apparently ready to strike at a moment's notice. Yet peace is preserved. Complications that seem to necessitate an appeal to arms are amicably arranged. The chief reason of such patience, such an absorbing desire to avert war, is that immense material interests are always making for peace. The Alabama affair would certainly have plunged England and the United States into war had not the immense volume of British investments in America exercised a calming infinence. Nearer home, an example in the same sease may be seen. When the campaign between Choshiu and the Tokugawa disturbed the long peace that Japan had enjoyed for two and a half centuries. the excitement among the Japanese was in-tense, but foreigners gave themselves no concern whatever about the matter. But when the Imperial forces marched against the men of Aizu at the time of the Restoration, foreigners showed the nimost anxiety, and were keenly anxious to see tranquillity restored. What was the cause of the difference? Simply that the silkproducing districts being the scene of the fighting against Aizu, the foreign merchants III the open ports understood that their business interests were involved. These considerations indicate clearly that for political reasons alone the introduction of foreign capital would be a most beneficial measure at the present juncture. Japan raised a substantial loan in England, this country would at once occupy a place of importance in the eyes of the British. It happens, however, that the political argument is strongly re-inforced by economical facts.

Japan is grievously in need of capital. She wants it not merely to strengthen her navy—an imperative duty—, but also to develop her wealth-earning resources. Everything, therefore, suggests that she should boldly enter the field, and seek financial aid from England. Let foreigners be joined with Japanese in the enterprises started by means of the imported capital. It would not matter though even more than one half of the enterprises were controlled by foreigners. As for honds, shares in companies and so forth, let the privilege of holding them be freely extended to foreigners. Let them be permitted to own land also. In abort, get them to assist directly in developing Japan's resources, and then they will take a genuine interest in her well-heing, and have no hesitation in coming to an understanding with her. The apprehension entertained in some quarters that to contract any large indebtedness abroad would expose Japan to dangers like those which beset Turkey and Egypt, in based on ignorance. Such perils may be dreaded by semi-civilized nations, but need not cause any concern whatever to

The lesson taught by contemporary history is that wise alliances are the chief source of national strength. England, owing to her isola-tion, is steadily losing her position of eminence in the Far East. Russia, owing to her alliances, is steadily mounting to the throne of supremacy. The dominant influence that Great Britain once wielded in China has been stolen from her by wielded in China has been stolen from her by of the era. Since then, however, they have be-Russia. In Korea she has been similarly oust-come hateful to the nation because their plain ed. Her struggles to retain her place are purpose has been to trade upon their own paralysed by her isolation. No elaborate argu- activements, and make national progress a con
Digitized by OSE

UNIVERSITY OF ILLINOIS AT

ment is needed to show that where two countries have identical interests, they can best promote them by coalition. England and Japan are in that position. It is the common object of each to preserve the status quo in the Orient. England desires to secure her possessions from Hongkong to India against attack. Japan desires to ward off the approaches of strong and dangerous Powers. Their object is one, and by combining they can certainly attain it, while, at the same time, conferring on the Orient the blessing of peace. What, then, holds them apart? Nothing except a mutual want of understanding. England regards Japanese civiliza-tion as skin derp. She thinks, too, that Japan is an aggressive Power. Further, she is of the opinion that Japan threatens to become a formidable industrial and commercial rival. Some Englishmen hold, too, that it would be better to come to an agreement with Russia than with Japan. On the other hand, certain Japanese imagine that England has entered her period of decrepitude. Others believe that her interests being scattered over the whole world, she can not devote much strength to the Far East. Others, that her policy is too selfish to consist with an alliance based on fair grounds. Others, that her dislike for war is so great as to make it scarcely possible that she should be a stannch ally in troublous times m well m in tranquil. It is most unfortunate that these mistaken views of each other should exist between two Powers whose interests manifestly draw them together, and upon whose friendly cooperation the peace of the East, and therefore the happiness of the world, depend. How to unite them is the question. Evidently the matter does not rest with the two Governments alone. It rests in a far larger degree with the peoples themselves. No one should shrink from any effort calculated to remove misapprehensions and to effect a sounder mutual knowledge. These are the opinions of the Kokumin Shimbun.

The Nichi Nichi Shimbun endeavours to awaken the political parties to a sense of the fact that their functions are not limited to des tructive attacks upon the Government, and that constructive responsibilities also devolve on them. The article, though not sparing the Liberals, is chiefly directed against the Progres-These came to a kind of agreement with Count Matsukata that he would put the finances in order before the fiscal year 1898-9. On that ground they base their opposition to the scheme of increased axation. But there is no possibility of concealing the fact that they are directly responsible for the situation which calls for such an increase. It was they that voted the continuing expenditures for the greater programme of Army and Navy Expansion, and it is for them to indicate how that programme can be carried out without imposing additional taxes. They have no right to talk now about financial economy and about cutting down the dimensions of the military scheme. Their voices were the agent by which the scheme became law. They can not shrink from the direct consequences of their own doings. If they oppose increased taxation, what other source of income have they to suggest? Blind to their public duties in this important matter, their thoughts seems to be bent solely upon securing portfolios and political positions for themselves. We need not follow our contemporary's auguments. Their drift can easily be guessed, and, besides, their chief interest lies in the political indication they afford. If there were any prospect of an alliance between the Ito-Cabinet and the Progressionists, we presume that such criticisms would not be found in the columns of the Nichi Nichi Shimbun.

The Nippon publishes one of its wonted attacks upon the clan statesmen. It makes a kind of tardy and reluctant admission that they did not play the part of traitors in overthrowing the Tokugawa Government, but obeyed the impulse

sideration quite secondary to their own tenure of power. They were driven by sheer necessity to seek alliances with political parties, but the unions could not hold because the clan states. men continued to obey their unconstitutional instincts. The Nippon, after rating them soundly, tenders them certain advice. First, that they should recast the programme of national armaments so as to being civil and military affairs into equilibrium. Secondly, that the portion of the Indemnity still owing by China be excluded from the ten-year armaments programme, since on no sound principle of finance can such an uncertain asset be set down as certainly accraing. Thirdly, that the heads of the Army and Navy Departments be no longer chosen from men on the active list, such a false system being limited to Germany and Russia. Fourthly, that the preservation of peace be made the first object of the country's foreign policy. Fifthly, that either a large part of the administrative duties be delegated to local governors, or that the number of such officials be reduced by one half. Sixthly, that the development of means of communications be treated as of paramount importance. Seventhly, that official interresence in the sphere of commerce and industry be abandoned. The Nippon is quite persuaded that unless these points be attended to, changes of Cabinets are futile.

Some advice is tendered by the Fominri Shimbun to Marquis Ito with regard to the formation of the new Cabinet. The gist of the suggestions is that a majority of the portfolion should be given to the young statesmen who have full confidence in the Marquis, and who may be counted on to work harmoniously with him. There is an opinion in some quarters that in order to command respect at home and abroad a Cabinet must include a large number of the elder Meiji statesmen, but the Yomiuri instances the Cabinet of 1892 as a proof that no such theory holds in practice. There is nothing particularly interesting in our contemporary's views.

the Liberal Party, we find an article the import of which is that Marquis Ito must either form a Cabinet with the support of the Liberals or decline the Imperial mandate. It has long been evident that no attempt to carry on the administration without the cooperation of the Diet can be successful. Marquis Ito recognised the fact three years ago, and finding himself confronted by the grave national problem of consummating the post-bellum programme, he formed an alliance with the Liberals and by their aid achieved that object. The Matsukata Cabinet acknowledged the same necessity by cementing a union with the Progressionists. The principle, then, being publicly accepted, Marquis Ito has now to consider what alliance he will seek. In the natural sequence of procedure he should turn to the Progressionists, by whom the Matsukata Cabinet was overthrown. It is evident that he did so and that the negotiations could not be carried to a satisfactory issue. It remains for him, then, either to re-new his relations with the Liberals or to announce to the Throne his inability to organise a Cabinet. The days of independent Ministries are finally past. Were an independent Ministry formed now, its life would be as short as was that of the Matsukata Cabinet. Murquis Ito, an eminently shrewd politician, the first statesman of his era, appreciates that fact perfectly. His plain course, therefore, is to again to his old allies. The Liberals will be ready to meet him half way. All that they ask is recognition for their progressive aims. The Tokyo Shimbun hints that the Party was more or less disintegrated by improper methods on the part of the Maisakata Cabinet, but asserts that such devices can never succeed with the true Liberal representatives. They are to be moved by principles only. The article virtually amounts to an invitation to Marquis Ito to take the proferred hand of the Liberals.

in vernacular newspapers on the subject of clanatatesmen and party Cabinets. The theme having been worn threadbare in the past, we re-The theme frain from any detailed analysis of these various dissertations. Brief reference may be made, however, to an article appearing in the Osaka Asaki. The point of the writer is that un-selfishness is absolutely essential to friendship. It is impossible for two men to be on terms of amity and confidence if either pursues his own selfish ends to the exclusion of the other's feelings and desires. That is the invariable rule of every-day life, and it holds with absolute truth in the case of a government and a nation. If there be one thing more certain than another, it is that the Sat-Cho statesmen have forfeited all popularity in Japan, and have even become objects of national dialike. What is the reason? It is simply that they have made personal aggrandisement their principal aim. The spectacle of such continued self-seeking has become so unsightly that the people have gradually united to correct it, and it is owing to that sentiment that the various political parties have been organized to over-throw Clan Cabinets. There is no denying, of course, that politicians also are more or less swayed by selfish considerations. Many of them are influenced by the prospects of office and emoloments rather than by the principles of honest progress. But on the whole they are comparatively free from such blemishes, and they represent a healthy impulse towards sounder bases of administration. Therefore they have the nation's support, and unless the Clan Statesmen are entirely lacking in the shrewdness which their political successes in the past auggest that they possess, they should no longer labour under the smallest doubt that the time for purely self-seeking administration has irrevocably passed, and that they can not remain within reach of the places of power unless they adapt themselves to the plainly indicated inatincts of the people.

#### FOREIGN TRADE OF THE YEAR.

With regard to staple imports into Isoan the Shogyo remarks that an abnormal increase in the import of sugar was noticeable during last year. Yokohama alone received no less than 3,035,982 yen worth of brown and 6,534,874 ven worth of white sugar. These figures show an increase of 36 per cent, for the former and 48 per cent. for the latter as compared with the previous year. Towards the close of last year, however, demand began to decrease, and a considerable amount of stock was brought over to the new year,

The large import of foreign yarns the year before last led to serious embarrassment both for foreign and native merchants, and its consequences were still felt at the beginning of last Nevertheless, trade revived gradually, and 8,117,518 cattles, valued at 5,221,739 yen passed through the Yokohuma Custom House in November last. Yet compared with the total import for the corresponding period of the year before last, the figures show a decrease of 2,509,687 cattles in quantity and 1,236,018 yes in value.

Turning to rice it will be found that the partial failure of the crop in the interior revived the import trade to a consider-able extent. In Nevember last, Yokohama alone imported 107,612 piculs, valued at 3,447,636 yen, showing an increase of six times in quantity and seven times in value over the figures for the year before last. With regard to flour, contracts have already been entered into by Mr. Abe and other prominent merchants for the import of flour to the amount of 250,000

Shirtings show a diminution of 20 per cent. last year m compared with the year before last. The import of calico and T-cloths together amounted to 614,650 tan, worth 2,351,250 yen.

Trade in these commodities was depressed towards the end of last year and still greater depression is expected this year.

Foreign woven goods appear to have shared the same fate as shirtings, on account of an the risible faculties. excessive amount having been imported the year

before last. Most of these goods remained unsold at the beginning of last year and formed ample stocks for sale in the interior without any fresh supplies. In September and October last, contracts were made for muslin, chintzes, and Turkey reds, as by this time trade began to show signs of revival. But owing to a serious de-pression in Osaka, the market again assumed a laigns of revival. deplorable aspect, and a big stock remained on hand until the new year. Unless the provincial demand revives, the goods now in stockare likely to be sold at "throwing prices."

Iron continues high in foreign markets, and native dealers had to withhold orders during November and December last. A deficiency of supply is likely to be felt in April, May or June, whenvalues will be considerably enhanced. But the manufacturing community in general having adopted a policy of economy, such activity as was noticed last year and the year before last can hardly be expected. The import of machinery last year shows a considerable increase, having reached 7,839,346 yen in value by November. The increase amounted value by November. The increase amounted to 25 per cent, over the year before last. The financial world, however, does not indicate any signs of improvement, and the necessity of disposing of stocks contracted for during the latter half of last year can hardly fail to produce serious effects upon demand this season.

#### " CONFUSION" AT THE PUBLIC HALL.

A mis-placed baby, the misunderstood present of a pug-dog, and the reading of private telegrams by people to whom they are not addressed man cause more disturbance to the philosophy understood and followed by members of a middle class family temporarily sojourning at Maidenhead-that delightful Thames side village—than ordinary folks dream of. At least that is the moral of the farcical comedy presented by amateur players at the public Hall, Yokobama, on Saturday evening, Fames (Mr. W. Y. Showler) and Maria (Mrs. H. M. Bevis), being married, are blessed with offspring, but being obliged to work for their living in the line of life to which they have called-domestic servants-have to send out the haby to nurse, and engage themselves m man servant and house-maid respectively under different surnames to a family living a short distance out of town. This family consists of a maiden aunt of uncertain age, Miss Lucretia Itekteoy (1913. 1910-1911)
liams), and Mr. Mortimer and Mrs. Rose
Mumbleford (Mr. W. G. Bayne and Mrs. A.
Carter Read)—newly married; Mr. Christopher
Blissard (Mr. A. C. Read), uncle to Rose;
Violet (Miss Thomas) engaged to Rupert Sunage, Miss Lucretia Tickleby (Mrs. McWilberry (Mr. E. C. Davis), young friends of the be-fore mentioned folks. Now Blissard, out of love for his niece Rose, promises to get her a pugdog; Mortimer, the husband, rather objects to the presence of such an animal, but uncle and niece resolve to secure the dog and spring it upon the family as a surprise. Meanwhile the baby belonging to Maria and James falls ill and an urgent telegram is dispatched to the mother which impels her to seek for an alternoon off to visit her offspring. Christopher Blizzard, who, by the by, has fallen in love with the old maid Lucratia, is likewise summoned to town by telegram to take delivery of the pug, and this leads to the thickening of the plot. For both telegrams are accidentally dropped, only to be picked up and read by the wrong people, so that what with the reasons for secrecy on both sides, the simultaneous arrival of the baby and the pug, and the placing of both in equivocal positions, the fun waxes fast and futious. We leave to our readers' imaginations the situations that are created and the devices pursued by all and sundry until the complicaence were worked up to a pitch of humourous appreciation that necessitated all through the evening peals upon peals of laughter to relieve

The honours of the piece fell to Mrs. McWil-Digitized by Google

liams and Mr. A. Catter Read, the old maid and the old bachelor uncle who discover "an affinity" in the autumn of their days. Nothing could have been better than the simpering humours of the former and the "old-boyish" joviality of the latter: both played their parts splendidly. Mrs. Read has been seen to better advantage—her rôle was not congenial, but her great charm as an actress redeemed a bald and uninteresting part from any suspicion of inanity. Mr. Bayne was extremely commendable in a very trying part, and he held the house time and again. Mr. Showler was capital as James, and his frequent allusions to "my hoffspring" were always hugely appreciated. We welcome Mrs. H. M. B vis (Maria) to our local boards; her debut was an undoubted success, the part being sustained in an inimitable manner all through. The secondary parts of Rupert Sunberry and Violet were well carried out, both Miss Thomas and Mr. Davis showing distinct advances upon previous appearances. Very satisfactory also were the characters of Dr. Bartholomem Jones (Mr. A. M. Chalmers) and Mussle (Mr. Eddison.) The piece was exceedingly well stage managed and passed off without a hitch, reflecting credit upon all engaged in its production.

But why cannot somebody tame the fierce energies of the Town Band? It is really painful to sit through the intervals of a performance in the Public Hall when these conscientions in the Public came when these up the spare musicians take a hand in filling up the spare momenta hetween the acts. They develop moments between the acts. They develop enough force to subdue and completely heat down the shouts of a Derby crowd when the favourite has got first past the post; such an exhibition of lung power is entirely misplaced within the confined space of the Public Hall. Surely with the amount of instrumental talent now available, the getting together of a small amateur orchest a such as that which so delightfully filled up the intervals of "The Passport, is not beyond the capacities of our amateur

Thespians' capable stage-manager!

#### THE BISHOPRIC OF SOUTH TORYO.

The death of Bishop Bickersteth, says a home paper, brought to a termination the arrangement by which the C.M.S. was responsible for a moiety of his stipend, the S.P.G. undertaking the other This arrangement commenced when the first Bishop of the English Church was appointed, Bishop Poole, and was renewed for Bishop Bickersteth. In each case the Society's engagement was limited to the tenure of office of the Bishop about to be appointed (the appointment resting with the Archbishop of Canterbury), or, more correctly, to the period during which he should be the sole Bishop of the Church of England in Japan. This latter condition ceased when in 1894 the dioceses of Kiushin and Hokkaido wete formed, and Bishop Evington took charge of the former; but the committee then undertook to continue their grant during the lifetime of Bishop Bickersteth. Since then Bishop Fyson has been appointed to Hokkaido, and the Diocese of Osaka has been taken from what remained of Bishop Bickersteth's diocese. The C.M.S. is responsible for the stipends of the Bishops of Kinshin and Hokkaide. Under the altered circumstances the committee have not felt able to renew the arrangement to provide a moiety of the stipend for Bishop Bickersteth's successor. Remarks having been made as to the causes of withdrawing the grant the Intelligencer states :- The committee's decision was taken wholly on general grounds of expediency, having regard to the general condition of the Episcopate in Japan, and without any reference whatever to the pending appointment of which his Grace the Archbishop had courteously given an intimation.

Mr. H. P. Wilkinson is acting Chief Justice of H.B.M. Supreme Court, Shanghai, during the absence of Sir Nicholas Hannen at Bangkok. The latter has gone to arbitrate in a case that has arisen between the Siamese Government and the executors of the estate of a late American resident in Bangkok. Original from

#### THE NEW CABINET.

Monday, January 10th. An opinion has been gaining strength for the past few days that the new Cabinet will stand aloof from all party connexions and be composed wholly of independent statesmen. One of the most prominent difficulties appears to be that to establish relations with a political party on the eve of the general elections would create an embarrassing situation. The Liberals, for example, were very willing to join hands with Marquis Ito, as they did in 1895, but they considered that such an alliance should carry with it the portfolio of Home Affairs for their leader, Count Itagaki. The functions of the Home Minister, however, bring him into direct contact with the various local governments, and consequently impose upon him large responsibilities with regard to the preservation of peace and order at a time like that of the general elections. If the Liberal leader presided at the Home Office while his Party was engaged in a struggle to win the votes of the constituencies throughout the empire, it would be hopeless to convince the people that his attitude was entirely impartial. From that point of view it would evidently be more prudent to refrain from any entangling alliance until after the general elections, at all events. Hence the question has apparently resolved itself into this-shall the Cabinet be organized entirely with independent statesmen; or shall it include one of the Liberal leaders, as Mr. Hayashi Yuzo, for example, in a comparatively unimportant post; or shall a vacancy be left in view of future contingencies, the Prime Minister discharging the duties of the unfilled office ad interim. We do not know how this question has been answered. There was an impression that some decision would be quickly reached, and that Marquis Ito would repair to the Palace on the 8th inst., to submit the list of the new Ministry for his Majesty's approval. The latter expectation was not fulfilled, however. In a previous issue we stated our opinion that the 10th instant would be the earliest date on which a definite announcecould be expected, and the prediction has been verified in one sense, at all events. Meanwhile, from two different sources—the Chuo, representing the National Unionists, and the Mainichi, representing the Progressionists-we obtain identical forecasts of the new Ministry. They are as follow:--Minister President ..... Marquis Ito.

Finance ...... Count Inouve. Foreign Affairs Baion Nishi, Home Affairs Viscount Yoshikawa. War Lient General Visco Katsura.

Instice Marquis Saionji.
Education Baron Suyematan.
Communications Baron Ita Miyoji.
Agriculture and Com-

Tuesday, January 11th.
On the 10th instant, the elder statesmen visited the Palace, and were received in audience by the Emperor for the purpose of consulting about the constitution of the new Cabinet. It is understood that a decision has at length been reached, and, so far as we can ascertain, the Mini- audience by the Emperor. His Majesty stry will be composed on the lines indi- said that with so many important ques-

statesmen" we mean Marquis Ito, Mar- for a day, without the fullest ministerial having been officially indicated as the statesmen should unite to organize a Cabi-Empress Downger, the announcement of contingency of two or three changes of the new Ministry will be deferred until portfolios after the general election. Count the rath instant.

Wednesday, January 12th. There is little to add to what we have already stated with reference to the new Cabinet. It is expected, as we explained in our last issue, that the ceremony of commissioning the new Ministers will take place to-day (12th) at the Palace. Our readers may remember that our original forecast was the 10th or the 11th, but in mentioning the latter date, we failed to take note of the fact that it would be the first anniversary of the late Empress Dowager's death, when, of course, no official business of any kind would be transacted. Vernacular newspapers allege that Count Inouve, having been asked to accept the portfolio of Finance, made a frank statement of his opposition to the scheme of post-bellum measures, in so far as the expansion of national armaments is concerned. The Count is also said to be averse to the adoption of gold monometallism. Such, at least, in the construction attaching to a paragraph in the Kokumin Shimbun, which speaks of him as disapproving "the reform of the finance" (saisei kaikaku), a form of expression generally applied, now-a-days, to the demonetization of silver, though it may obviously bear many other significations. At all events, the main point is that Count Inouye advocates reduction of the scheme of military expansion, and it was because of that attitude on his part that Marquis Oyama received a summons to attend the council of elder statesmen in the Palace on the 10th instant, the Emperor being desirous of hearing the Field Marshal's views on so important a subject. As for the results of the Council, they are not yet publicly known, but a general conviction exists that the Cabinet is to be what is called a Chösen Naikaku, that is to say, a Cabinet independent of political parties. The Tokyo Asahi contains the fullest journalistic account of the Council's proceedings. We read there that, on the 8th instant, Marquis (to repaired to the Palace, and submitted to the Sovereign a detailed report of the efforts he had made to organize a Cabinet, adding that, in view of his failure, he must conclude himself incompetent to undertake the task, from which he accordingly begged the Emperor to relieve him. The Emperor, however, repeated his mandate, whereupon the Marquis said that he had only to bow to the Imperial will, but that as his unaided strength did not suffice to solve the problem, he begged his Majesty to summon whatever statesmen enjoyed the confidence of the Throne and to question them on the subject. The sequel was the despatch of messages through the Grand Chamberlain, Marquis Tokudaiji, to Marquises Ito, Yamagata, Saigo and Oyama, and Counts Kuroda and Inouye. These six statesmen assembled at the Palace on the 10th instant at 10 a.m., and were immediately received in

quis Yamagata, Marquis Saigo, Marquis attention, and that he invited expression Oyama, Count Kuroda and Count Inouye, of opinion from the six statesmen. Count It is possible that to-day (11th instant) Inouve stated that, in his opinion, the six first anniversary of the death of the late net at once, having in view the possible Kuroda, Marquis Oyama and Marquis Saigo are said to have endorsed that view. The Council remained in session from to a.m. to I p.m., when the six statesmen had the honour of lunching with his Majesty, after which the discussion was resumed and lasted until 3 p.m. It appears to have been acknowledged that all previous Cabinets, since the convocation of the first Diet, have had relations—growing closer as the epoch grows more recentwith political parties, whether such rela-tions were overt or covert, but the conclusion was nevertheless come to that an independent Cabinet should now be formed.

The difficulty of the situation is, of course, very evident. Not one of the so-called "Messi statemen" is an acknowledged member of a political party, in the English sense of membership. Even Count Okuma, though the Progressionists look up to him as their leader, has never attended their meetings, "stumped" the country openly in their interests, or discharged any of the functions ordinarily devolving on a party man. Would it be expedient, therefore, to draft into the Cabinet at the present juncture men who will offer themselves to the constituencies next month as Liberals, or Progressionists, or, it may be, National Unionists? Would it even be expedient to form with any political party such relations as would justify its candidates in presenting themselves at the hustings as acknow-ledged partisans of the Ministry? There is an evident element of fiction about the whole condition of affairs. theory of party cabinets may be said to have received recognition for legislative purposes, but all the Meifi statesmen shrink from allowing the fact to find expression in the mechanism of the parties or in the procedure of the Diet. It is difficult to foresee what kind of events are destined to break down these artificialties, but until they are broken down, party Cabinets, as the word is understood in England, are an impossibility. The members of a Cabinet which enjoys the support of the Liberals, for example, must be prepared to face the ordeal of a general election in Liberal interests, and must be prepared to associate themselves openly with the policy proclaimed by the Liberals to the constituencies. A constitutional change also is necessary. The Cabinet change also is necessary. Ministers must sit in the Houses of the Diet, either ex officio or by election, and must take part in the debates as exponents and defenders of the Government's policy. A Minister of the Crown has a Constitutional right to be present in either House and speak at any time on any subject, but he does not belong to the House, is always treated as an outsider, is listened to with more or less impatience, and finds his appearance in the rostrum welcomed as an opportunity for badgering or insulting him. It would be much better from every point of view, we think, that Ministers of the Crown should never enter called in our last issue, though uncertainty tions of domestic and foreign policy pres-the Diet at all than that their occasional still exists with regard to the holders of sing for treatment, it was most undesir-presence there should give rise to the one or two portfolios. By "the elder able that the country should be left, even scenes so often witnessed of late years-

Digitized by Google

scenes which nearly always have the effect of embittering the relations between the Government and the Lower House. At all events, if there are to be party Cabinets, the members of the Cabinet must sit in the Houses as members of the party supporting them, and must be prepared to address the constituencies as exponents of the party's platform, as well as to canvass the country in its interests. Things seem to be a long way from that in Japan still, but who knows?

Thursday, January 13th. The members of the new Cabinet were duty installed yesterday (12th instant) at the Palace.

Minister of-Fureign Affairs ...... Baron Nishi, Finance Count Inouve.
Home Affairs Viscount Yashikawa,
Education Macquis Salonji, Agriculture and Commerce...Baron Ito Miyoji,

Count Matsukata is relieved of office at his own request, the Emperor ordering that the privileges of his previous position be continued to him; and the resignations of Viscount Takashima, Count Kabayama, Viscount Nomura, Mr. Kiyoura, Mr. Hamao and Baron Yamada are accepted. At this moment of writing the Gasette has not announced any new offices for the retiring Ministers, but it may be presumed that, in the case of some of them at all events, Privy Councillorships or Court Councillorships will be provided. Mr. Hamao's position is especially unfortunate, for he left the permanent and distinguished post of President of the Imperial University to take the portfolio of Education, and now, after a few weeks' tenure of the latter, he is without an appointment of any kind.

It has generally been the custom to consider the clan affinities of the statesmen forming a Cabinet, and though we think that such questions have ceased to possess any practical significance, it may not be uninteresting to make the usual analysis on the present occasion :-

Marquis Ito (Minister President)	Charlin
Canat Indaye (Finance)	
Visconut Katsura (War)	da,
Mr. Sone (Justice)	do.
Marquis Saigo (Navy)	Satsuma.
Baron Nishi (Foreign Affairs)	do.
Viscount Yosbikawa (Hunte)	Tasa.
Marquis Stionji	Kure
	t Noble).
Buren Ito Miyoji	Hizen, 🖟
Davide Commission	

Thus six out of the ten portfolios are held by Choshiu and Satsuma statesmen, four by the former and two by the latter.

Four of the new Ministers have never before been members of a Cabinet, namely, Viscount Katsura, Baron Ito Miyoji, Baron Suyematsu and Mr. Sone.

and in 1885 we find him a Counsellor of the Legislative Bureau. Subsequently he served as Chief of the Bureau of Archives in the Cabinet and as Secretary of the Legislative Bureau. He had by that time established such a reputation for acumen and tact, that when the Diet was convoked for the first time, he was nominated Chief Secretary of the House of Representatives, and had to sit, ex officio, as acting President of the House during the stormy debates with which its proceedings opened. His conduct throughout that difficult time greatly increased the confidence reposed in him. After the second session of the Diet had ended in the dissolution of the Lower House, Mr. Sone resigned his official appointment, and offered himself as candidate for the fourth district of Yamaguchi Prefecture in the general elections. He was returned and the Lower House chose him to be its Vice-President. In May, 1893, he re-entered official life, receiving the appointment of Japanese Representative in Paris. Mr. Sone is strongly life with Marquis Yamagata.

Baron Ito Miyoji was born in 1857 in Nagasaki, and therefore enjoys the distinction of becoming a Cabinet Minister in in his forty-first year. In 1877 he received an appointment in the Kobusho-Department of Public Works-, and subsequently served as Assistant-Secretary in the Home Department and in the Cabinet; as Junior Secretary in the Cabinet, and as Secretary of the Senate. In 1882 he accompanied Marquis (then Mr.) Ito to Europe, visiting Russia when the Marquis proceeded thither as Special Ambassador. On his return he became, in succession, Assistant Chief Secretary of the Cabinet, Private Secretary to Marquis Ito and Chief Secretary of the Cabinet, and when Marquis Ito went to China in 1885 as Special Ambassador, Mr. Ito Miyoji accom-panied him. Marquis Ito, after his return, became Minister President of the newly organized Cabinet, and appointed Mr. Ito to be his Private Secretary. In 1886, the Emperor of Russia conferred a decoration on Mr. Ito, and in that year he was appointed Secretary to the Privy Council, becoming, subsequently, Chief Secretary, and —in Sept. 1892 — Chief Secretary of the Cabinet. Mr. Ito was sent to Chefoo in May 1895 to exchange the ratifications of the Shimonoseki Treaty and was raised to the peerage with the patent of Baron for distinguished services on that occasion, and during the war with ability, and his entry into the Cabinet has guished himself so much as to receive a long been regarded as a mere question of life pension of 250 koku of rice annually. through his agency that the Liberal Party own charges for purposes of study, and gave its support to the Ito Cabinet in 1895. was fortunate enough to follow the Prusbe associated with the Liberals in the thus acquiring invaluable experience, eyes of people in general that when the After 3 years' study, he returned to Japan inexpediency of establishing any rela- in December 1873, and in January 1874 was tions with a political party at the present gazetted a captain of infantry, receiving his Mr. Sone may be said to have made his début at the Restoration. He served with distinction in the Government army, and in 1858 was appointed to the command of a company of the Imperial Guards. In 1872, the War Department sent him to study in France, whence he returned in always to be successively of the following have to be successively and the late Viscount Inouye Ki used 1882, he became a Colonel of Infantry, and always to be successively and the following near model his third to be command and the late Viscount Inouye Ki used 1882, he became a Colonel of Infantry, and always to be successively and the following near model his third to be command to Germany as military attaché in March, to Germany as military attaché in March, probability of Baron Ito's accepting a pointed, successively, Secretary and American Successively. study in France, whence he returned in always to be spoken of as the Four Deva the following year, made his third trip to May 1877, and two years later became a Kings (Shi-tenno) who served Marquis Ito Europe in the train of Marquis (then Mr.) Seventh-class official of the Department, as the supreme being. Viscount Inouve Oyama, Minister of War. After his receiving, in 1881, the additional post of was the first to obtain Cabinet rank, as return, in 1885, he was raised to the rank

confidently spoken of as the most probable Minister of Agriculture and Commerce.

Baron Suyematsu Kencho was born in the province of Buzen and received his education at the School of Foreign Languages in Tokyo. He became a member of the Nichi Nichi Shimbun's staff, and received his first official appointment as an employé of the Cabinet in October 1875. He accompanied Count Kuroda when the latter was sent at that time to obtain satisfaction for the Korean outrage and to conclude a treaty with the peninsular Kingdom, and after his return, he became an official of the Department of Public Works in 1876, being employed at the same time in the Legislative Bureau. He rose to be Assistant-Secretary in the latter Bureau, and then saw some service in the Satsuma Rebellion when he was attached to the Staff of the Commander-in-Chief. In January 1878, he undertook a series of investigations into English and French historical compilations, and was then transferred to the Foreign Office as Third Class Secretary and appointed to the Legation in London, but he soon resigned that post for the purpose of studying at Cambridge University, where he obtained the degrees of Bachelor of Law and Bachelor of Arts. Returning to Japan in 1886, he became a Counsellor of the Department of Education, and was afterwards transferred to the Home Department in the same capacity, rising to be Chief of the Bureau of Local Government in that Department in 1887. Two years later, he obtained Chokumin rank, and also had the honour of being among the first batch of Japanese scholars upon whom the degree of Hakase was conferred, his title being Doctor of Literature (Bungaku Hakase). In 1892 he became Chief of the Legislative Bureau. For distinguished service during the war with China he was raised to the nobility with the patent of Baron. Mr. Suyematsu, like Mr. Sone Arasuke, resigned his official position in 1893 and entered the Lower House, where he showed considerable ability as a debater. He is recognised as a man of strong talent and great force of character, and he has an

exceptional faculty of winning friends.
Lieut.-General Viscount Katsura, like many prominent Japanese of the Meiji era, has had a career partly in the civil service, partly in the military. He began life as a soldier, and in his twentieth year (1868) commanded a company in the force that marched to Oshiu against the China. He is a man of extraordinary Aizu clan, on which occasion he distintime. The public understands that it was In 1870, he proceeded to Germany at his Indeed, so closely has Baron Ito come to sian forces in the war with France Secretary to the Cabinet, then called Minister of Education; Barons Ito and the Dajokwan. His next position was that of Governor of Oita Prefecture, Mr. Kaneko Kentaro was at one time Minister in 1886. His next post was Chief Original from

General, receiving the command of the Third Division in the following year. He commanded a Division in the Army that marched from Söul *viá* Ping-yang and Wiju into Manchuria, in 1894, and he sub-sequently directed the operation of the wing of that Army in its campaign from the littoral of the Yellow Sea to the Liao River and Newchwang. His success in the field was very marked, and the Emperor recognised it by raising him to the nobility with the patent of Viscount. This distinguished officer was nominated Governor-General of Formosa after Count Kabayama's resignation of that post, but he did not proceed to the island and resigned the office when the Matsukata Cabinet came into power. He speaks German fluently, and has shown himself to be possessed of military and organizations of the history and organizations. ing capacities of the highest order.

It is worth noting that, out of the 10 Ministers forming the new Cabinet 9 speak foreign languages; thus - Marquis Ito (English), Count Inouye (English), Viscount Katsura (German and English), Mr. Sone (French), Baron Nishi (Russian and French), Marquis Saionji (French), Baron Ito (English), Baron Suyematsu (English) and Viscount Yoshikawa (English).

The policy of the new Cabinet must remain for the present a matter of conjecture. It has been generally understood that Count Inouve and Viscount Kalsura are in favour of reducing the scheme of Army Expansion. Not, indeed, to the extent of re-placing the Army on its old footing, as has been asserted in some quarters, their idea is less drastic. Count Inouye is reported to advocate an expansion of fifty per cent. compared with the former establishment, instead of a hundred per cent, as contemplated by the pro-gramme passed by the Diet. It was recently alleged that Count Inouye had insisted on that change as a condition of his accepting the portfolio of Finance, but the Jifi Shimpo denies that he did so, and explains that the advantages of such a measure would be few at the present juncture, while, on the other band, the circumstances of the time are opposed to it. Nevertheless Count Inouye and Viscount Katsura entertain certain views about reform of the Army administration, Irade. and to that they intend to give effect.

Marquis Ito, according to the Chuo Shimbun, has admitted very frankly that statesmen in power can no longer afford to turn their backs upon political parties. At the same time, the Marquis comments politicians in calling upon the Ministry to pleasanter or more satisfactory for statesmen than to shape their policy in accordance with public opinion, but the question is, where can an exact expression of public opinion be found. After the war with China the Japanese people's estimate the East, yet the statesmen that control it cannot not find themselves always in touch with public opinion. As for Japanese public opinion, it is far behind the point the nation at a dead loss to themselves.

The Nagasaki Press observes:—It is said that the secret shipping of women from Japan is greatly on the increase, and that new regulations with soon be promulgated for dealing with this question.

of a Bureau in the same Department, and attained by public opinion in Europe, in 1890 he was promoted to be Lieut. nevertheless Japanese statesmen have to keep their foreign policy in touch with the foreign policy of European nations. It is a difficult task, and the party politicians who claim for themselves the credit of representing public opinion, would do well to consider the facts with a little care.

#### Friday, January 14th.

It does not by any means appear that the relations between Marquis 110 and the Liberals have been severed. The Nicht Nicht Shimbun says that some mistaken ideas of that nature having circulated among the Party, a certain amount of excitement and agitation became apparent from the 11th instant. Count Itagaki was considerably disturbed about the matter, but owing apparently, to representations which he found himself in a position to make at a meeting of the Party's Standing Committee on the 12th instant, quiet was restored. Our contemporary adds that Count Itagaki had an interview with Marquis Ito on the evening of the 12th, and that he doubtless reported the result to the Party Committee on the 13th.

#### THE NIPPON YUSEN KAISHA.

Vernacular newspapers announce, with some display of excitement, that the directors of the Nippon Yusen Kaisha intend to raise their rates of freight by 30 per ceut, from the 15th instant. Such action on the part of a company which is in receipt of a subsidy of 880,000 yen yearly, and which seeks to obtain a further annual reasonable to find fault with the railways if they, too, proceed to raise their fares to 14 sen a mile. We have no independent information about the intention of the company's directors, but we fail to see that sentiment should find any place in this question. It is a pure matter of business. If the company perceives that it can not place its transactions on a profitable basis without an enhancement of rates, why, then, rates have to be enhanced. No other exit from the dilemma is apparent. The remedy, if remedy be needed, lies in the hands of shippers themselves. The Nippon Yusen Kaisha does not enjoy any monopoly of the coastwise or over-sea carrying There is an open field for competition. Maritime enterprise is lively enough in Japan, and if cargo can be carried at lower figures than those about to be fixed by the Nippon Yusen Kaisha, carriers will soon be forthcoming, we presume. The Nippon Yusen Kaisha with some severity on the habit of party differs from a company founded on a simple basis of profit and loss. respect public opinion. Nothing could be has undertaken certain services at the suggestion of the Government, and is entitled to a corresponding amount of consideration at the hands of the State. The Diet, however, appears unwilling to recognise that very obvious fact, and the alternative is that shippers of goods will of themselves was that they had made be obliged to put their hands into their great progress, but when the facts are pockets. It is certainly hard that one dispassionately considered, the so-called particular class should be taxed for the great progress" is seen to be measured support of steamship services which are means reach the level of Occidental progress. In no direction does the foreign of view of outsiders, that the House of policy of Western States show greater activity at present than in Africa and in anomaly. Certainly nothing the factors of the states are policy of the states and in anomaly.

#### THE CIVIL CODE OF JAPAN.

Mr. J. H. Gubbins, Second Secretary and Japanese Secretary of H.B.M.'s Legation in Tokyo, has completed and published in book form an English translation of the Civil Code of Japan. Our readers are probably aware that the Code has not yet been fully promulgated. Certain portions still await the Diet's approval, and would doubtless have been passed speedily had not the House of Representatives suffered dissolution on the 25th of last month. The first three Books of the Code, having undergone exhaustive revision, were submitted to the Diet in its 1895-6 session, and having been approved by both Houses, were promulgated in March, 1896. These laws have not yet been put into opera-tion, however. Apparently the intention of the Government is to bring the whole Code into force at the same date-a date which can not be later than July next, unless the operation of the Revised Treaties be deferred. The three Books contain twenty-one chapters, which are divided into Sections and Sub-sections, the whole comprising 724 articles. We need scarcely say that, so far as we can judge, Mr. Gubbins' translation is everything that could be desired. It has not been possible for us, of course, to compare the rendering of each article with the Japanese original, but having selected various articles at random and made the comparison, we find the closest possible accuracy grant of over three million yen from the Crosset possible accuracy as becomes such a sub-the Treasury, is denounced as selfish, arbitrary and inconsiderate, and one structed phrases, and clear, forcible, Tokyo journal asks whether it will be simple English. The translator has greatly simple English. The translator has greatly enhanced the value of the work by adding the Japanese text in the margin of each article, so that direct comparison is at once possible. The volume is, of course, essential to every foreigner doing business in Japan. Mr. Gubbins' name is associated with many tasks of scholarship for which he possesses the grateful thanks of foreign and Japanese students. But he has not hitherto addressed himself much to the general public, being content rather to hold out a strong helping hand to the small section of workers who are toiling along the rugged paths that he has himself traversed with so much distinction. This new achievement will doubtless appeal to a wider audience, and ought also to receive some recognition from the British Government, for it renders immediately accessible to her Majesty's subjects in Japan information of the very highest importance. We strongly recommend the journalists who have hitherto been perplexing themselves and their readers with blundering and confused dissertations about leases and superficieswe strongly recommend them to provide themselves at once with Mr. Gubbins' translation, and to read attentively Chap. IV. Book II., and Sect. VII., of Chap. II., Book III. If their bewilderment survives the perusal of the clear and succinct provisions of law embodied in those portions of the Code, we shall be greatly surprised. We have only to add that the book is admirably printed-by the Sansho-do-and of

#### GERMANY IN CHINA.

An interesting fact has been ascertained with reference to the German occupation of Kiao-chou. The Post, a newspaper which, in Bismarck's days, used to be regarded as a semi-official organ, stood forward, immediately after the news of the occupation had reached Berlin, and denounced England for harbouring hatred and cumity towards Germany, though expressing approval with a smiling face. The British nation, according to the Post, was longing to see Germany involved in complications with Russia over the Kiaochou business, and France shared the sentiment, but the two intriguing Powers might, perhaps, find that "in certain definite circumstances the whole German enterprise was carried to a conclusion in agreement with Russia." This "attempt to represent France and England as ranged against Russia, whose best friend and client is no other than Germany," to use the words of The Times' Berlin correspondent, seemed so striking that the correspondent "took the earliest opportunity of calling attention to the extraordinary tone of the article in the most authoritative quarters," and received an assurance that "the article was neither official nor semi-official." It has to be noted, however, that the Post is not the only German newspaper which shows a determination to regard England as an enemy in this matter. The Hamburger Nachrichten-a Bismarckian organ-also That has a good confident ring. We, at writes:—"It is even possible that the this end of the world, do not think that action of Germany is welcomed by Russia, because to have Germany as a neighbour in Asia is, in any case, preferable to having England." Moreover, although the Post's official inspiration is denied, its owner and controller is Baron von Stumm, "the great industrialist, who is the personal friend of the Emperor, and who frequently poses in the Imperial Diet and elsewhere as the direct and authorized exponent of his Majesty's views." This same Post, referring to the Indian frontier campaign, has just published a series of articles which are said to be "crammed full of slanders and calumnies directed against the Imperial administration of India."

Referring to the utterances, The Times' correspondent says:—"It must occur to any one who is familiar with German methods that these writings display the nervousness which attends uncertainty and experiment rather than the native hue of Bismarckian resolution. It may be that, in exchange for promises which must have been of almost unlimited extent, Germany has secured for herself in advance the approval and support of Russia for the occupation of the only remaining harbour affording access from the Yellow Sea to Peking and not excluded by express agreement from the active sphere of European Powers in the Far East. Even on this very large assumption, the sudden action of the German Government would partake of the nature of experiment rather than of cautious policy. The "neighbourhood of Germany" might, conceivably, be preferable in Russian eyes to that of any other Power-of Japan, for instance, which has still some thousands of troops in occupation of Wei-hai-wei on the north side of the peninsula, with the route across which to

eventualities both for England and for Japan which a German annexation of Kiao-chou under these somewhat improbable auspices would bring nearer, since it may very well be that the whole object of the German semi-official apparatus, if not of the occupation itself, is to evoke that very discussion with a view to advantageous results for Germany in the sequel. If a supposition which the present situa-tion of Germany in Europe does nor render altogether absurd may be entertained, and if the occupation has taken place without any definite assurance of Russian acquiescence, the excessive protests in the Post of submission to the will of Russia are easily explicable as *ballons d'essas*. But, in that case, it may yet require a more than Bismarckian skill to pilot the German Government and the German fleet out of the Bay of Kiao-chou without any serious loss of prestige."

The Deutsche Zeitung has the following, with reference to British potentialities in the Far East :-

"All that England could do would be to fomen "All that England could do would be to foment disturbance by inciting Japan. But even with England behind her, Japan will not venture to dety united Germany and Russia. As for China, she will be thoroughly cowed by the warlike forces of Germany which will be assembled in East Asian waters in December. In view of this aspect of affairs, only the grambling of France will be heard from afar, that ungrateful State which will have to be reminded that it could never have carried out its venturesome colonial policy in Africa, in spite of English jealousy, but for the benevolent incutability of Germany."

England and Japan in combination would take much account of Germany and Russia.

The following interesting remarks appear in the Berlin correspondence of The Times, dated Nov. 23rd:-

The German Government allows little or nothing to transpire regarding its intentions of the negotiations which may possibly have preceded the landing at Kiao-chou, Information concerning events on the scene of Germany's action is almost exclusively derived from the English Press. In this connexion it is worthy of note that the Reuter telegram nationing the steps which had been taken by the Chipsee Government. note that the Rearer telegram natisating the steps which had been taken by the Chinese Government by way of reparation for the attack on German missions ies has not, so far as I can see, heen reproduced in the official or semi-official Press. The journals which, after some delay, gave it a place in their columns have hitherro abstained from commenting upon the significance. I have reasons, however, for believing that the German Grastonient makes no secret of its intention to retain kine chom in its possession. intention to retain Kino choin its possession "as a guarantee against the recurrence of similar out-ragor." It is difficult to see how the occupation of this point by a force which must necessarily consist at the outside of some 1,000 German blue jackets could contribute in any way to the safety of German missions like its line of the force of the point of the safety of German missions is in the interior of the force. of German missionaries in the interior of the proce of Shau-tung,

Strennous endeavours continue to be made by certain journals to discover symptoms of a prior understanding with Russia. Thus it is noted that imerating wan Kussia. Annis it is more than two days before the arrivatof the news of the occupa-tion, the Russian Authasandor bad a long interview with Prince Hohenlohe. There are, how-ever, reasons for believing that the chapter of negotiations on the subject with Russis, not to speak of other Powers, has not by any means been closed. Although in some quarters it in asserted hat any diplomatic commencations which have have penceeded pari passy with an interchange of views between the German and French Governments, the attitude of the Temps and the acerbity of its recent comments upon German transmission policy point to anything but satisfaction is authoritative French codes. On the Russian side the only journal which appears to have touched the subject is the Novoye Vremya, which says that the German Press "appears to have aversholded the fact that Russia has contain indicated.

ment between China and Russia by which Russian ships of war were to have the right to auchor in certain Chinese harbours, including that of Kino-chan, when Vindivostock should be frozen up.

We fail to discover the grounds of Reuter's recent telegram that the Russia had expressed dissatisfaction at Germany's action in China. The comment of the Novoye Vremya, quoted above, may, perhaps, be read in that sense, and on Nov. 24th the Novosti published an article "urging the occupation of some points of Chinese territory by Russia, France, and Great Britain, with the object of effectually counterbalancing the German occupation of Kiao-chau should the latter be maintained." But the utterances of two journals can scarcely be regarded as representing the Russian press.

#### GREAT BRITAIN IN THE FAR EAST.

An attempt has been made by a local nelish journal to prove that Great English journal to prove that Britain's attitude towards China at the present juncture is not governed by principles of international morality, and that she is following the example set by Germany in seeking to exact territorial or other concessions from the Peking Government. The journal in question avowedly bases its judgment on a Reuter's telegram, sent from London and dated January

London, Jan. 5th It is authoritatively stated that whatever privi-leges another Power may obtain from China, Great Britain will demand adequate compensation, and do her atmost to uphold her existing rights in China.

With reference to this telegram, the comments made are these :-

By this it is made apparent that England is not better that it should be, for looking forward there does not seem to be anything to choose between the present policy of Germany pending the settlement of its demands, and that of England, which has determined to demand "adequate compensation." This, when interpreted, means that if Germany should be found to have successfully sinced by squeezing what it requires out of China then Great Britain intends to follow smit, or in other words both Powers intend to profit at the expense of China in that respect,—the parity is perfect. Alas, it does not appear in the face of the news by treggram, that the pharisaical attitude which the Mail has suggested, as one of which an Englishman ought to be ground,—that his country has not followed the wicked example set by Russia and Germany, has anything upon which it can be founded, because England is prepared to act in the manner. If the conduct of Russia and Germany has a superior of Russia and Germany be as bad as represented by the Mail, by grabbing what they can from weak and helpiess China, yet all these appears to be actuated by no other motive than that of their own agencies with he absenced that the avoider of grandisement.

It will be observed that the writer of this criticism says :-- " If the conduct of Russia and Germany be as bad as represented by the Mail, etc." But the fact is that our observations with regard to Russia and Germany were explicitly founded on the representations made by other journals. Our words were :-" If Germany nals. Our words were:—"If Germany and Russia have acted in the manner alleged by several of the English local journals, &c." There can not have been the slightest confusion on this point in the mind of the English newspaper which is new se anxious to drag England down to the lowest level of international lawlessness. At the outset of its article it quotes our precise declaration that the text of our remarks was the estimate which several local foreign journals had formed Kiao-chou the Japanese general staff is perfectly familiar. But perhaps it is best to refrain from any discussion of the state that Russia has centain rights to the Bay of Kiao-chou." In German naval cheles it is supposed that this may possibly refer to some agree. In possibly refer to some agree. and expressed with regard to the proceedings of Russia and Germany. Indeed, the

Digitized by Google

astonishment that, while forming such an estimate - an estimate which, at the time, we ourselves refused to endorse -those journals should not have uttered a word of protest but should have accepted, with tacit consent and implied approval, the worst possible construction of Germany's proceedings at Kiao chou. Yet, in the face of such perfectly plain facts, this local slanderer of England quiet-ly writes "if the conduct of Russia and Germany be as bad as represented by the Mail." That part of the matter, however, is of very trifling moment compared with the singularly false complexion put upon England's action. If the Anglo-Chinese Treaty be consulted, this provision will be found in the 54th article:-" It is hereby expressly stipulated that the British Government and its subjects will be allowed free and equal participation in all privileges, immunities and advantages that may have been, or may be hereafter, granted by his Majesty the Emperor of China to the Government or subjects of any other nation." It is in assertion of the right secured to her by this provision that Great Britain has warned the Chinese Government against attempting to exclude her from any privileges or immunities granted to Germany. Her Majesty's Go-verment has not, as its local slanderer declares, announced an intention of "following Germany's suit" should the latter be found to have sinned successfully against China," or of "profiting at the expense of China." It has merely reminded the Peking Authorities that they can not, without violating the Treaty, grant exclusive privileges, whether industrial, commercial or not, to the nationals of another State, and that if privileges of any kind are granted to Germans, British subjects will be entitled to enjoy them equally. That is a procedure radically different from the course taken by Germany. It is essentially characteristic of England that she never seeks to obtain for herself by diplomacy or force of arms any monopoly of trade or industry in a foreign country. To whatever markets she opens, all the world has absolutely free access, and whatever privileges she obtains other nationals are allowed to share equally with her own subjects. What she has done in China is to recall the principle of fair play guaranteed by the most-favoured-nation clause, and to say that she will not have her subjects shut out from privileges granted to the subjects of another Power, whether that Power be Germany or Russia. To represent such natural and strictly legitimate conduct as " grabbing what she can from weak and helpless China" is to display either the crassest ignorance or the most unpatriotic malevolence.

#### THE TREATY AND LAND.

With reference to the question of the Revised Treaty and the tenure of land, the Japan Gazette raises a point which, if left find it distinctly laid down there that, in unexplained, is not unlikely to create misorder to acquire a right of property in apprehension. It says:—"The Treaty objects "over the ground" (chijo)—we mentions a lease; on the subject of super-ficies it is silent." That seems to be a complete shifting of the ground hithertotaken by our contemporary. Its contention, up to the present, so far as we of a superficies; whereas, if the tempounderstand, has been that the new rary use alone of the objects be desired, Civil Code of Japan does not create the ordinary method of letting and biring any means of holding land for a lengthy is resorted to. It follows, therefore, that period, short of actual ownership, and that, although the term "superficies" is not Digitized by COSIC

consequently, since ownership is forbidden secure building sites for a term of years factories and other structures for industrial or commercial purposes. That fallacy has now been completely ex-It was exploded long ago indeed. The reading public must be fully aware by this time that the new Civil Code provides two methods of land tenure, independently of ownership and agricultural holdings; one, the ordinary method of hiring, the other, the method to which the legal epithet "superficies" is applied; and must further be aware that, while the term for hiring is fixed at a maximum of 20 years, the term for a superficies is left to be settled at whatever number of years the contracting parties may desire. As to that phase of the problem, no shadow of doubt exists any longer. Still the Japan Gazette seems unwilling to abandon its position of protest, and it therefore takes refuge in the text of the Treaty itself, alleging that leases only are mentioned and that "there is silence on the subject of superficies." We are aware that our contemporary has often criticised the Treaty as a most defective document, and has frequently sneered at the incompetence or carelessness of its framers. the basis of the criticism, with regard to land tenure, has been that since Japanese law does not provide any satisfactory, method of tenure, short of actual ownership, some special provision to cover the defect should have been made in the It will not do, therefore, to pretext previous condemnation of the Treaty by way of accounting for the change of attitude now made. The ground of the condemnation was that the Treaty did not fill the lacuna left by Japanese law, and since it has been shown that there is no lacuna in the law, that particular form of censure has to be abandoned. Thus it is that the Japan Gazette has final recourse to the alleged silence of the Treaty about superficies and its mention of leases only.

Is the Treaty silent about superficies and does it mention leases only? Certainly not. Even though the British Treaty stood alone, there ought not to be any doubt on that point. Its words are

The subjects of each of the High Contracting The subjects of each of the High Contracting Parties may, in any past of the dominious or pussessions of the other, own or hire and occupy the houses, manufacturies, warehouses, shops and premises which may be necessary for them, and tease land for residential and commercial purificase land for residential and commercial purificase. poses, conforming themselves to the Laws, Police and Customs Regulations of the country like native subjects.

Here we have two distinct privileges with regard to residential, commercial or in-dustrial structures: British subjects may either own or hire them, and such ownership or hiring must be in conformity with Japanese law. We have to turn, then, to Japanese law in order to ascertain the provisions relating to this subject, and we are speaking here not of crops, which belong to a special category, but of buildings and trees-, the site on which such objects stand must be obtained by means

actually inserted in the British Treaty, the to foreigners, they will not be able to right of superficies may be constructively read into the document, since Japanese long enough to warrant the erection of Law is explicitly indicated for purposes of procedure, and the method of procedure That indicated by Japanese Law is superficies, where the ownership of buildings is in question. We are not obliged, however, to fall back upon inference or construction in this matter. The German Revised Treaty, negotiated and concluded subsequently to the British, places the whole question on the clearest and most explicit basis. No change was made, indeed, in the body of the Treaty itself, for, as we have seen, the necessary privileges are constructively present there. But there was appended to the Treaty a note explaining that, with reference to the residential, commercial and industrial purposes mentioned in the text of the Treaty, German subjects should be entitled to acquire emphyteutical, superficiary and other real rights in land, as provided by Japanese Law. The German negotiators went even a step farther, for they obtained an agreement that the ownership of real estate by a Japanese company should not constitute any obstacle to the inclusion of German subjects among its partners. It is scarcely necessary to point out that whatever privileges have been granted to German subjects are enjoyable by British subjects also, under the most-favoured. nation clause. In other words, after the Revised Treaties go into operation, British subjects will be entitled to acquire land in Japan by emphyteusis -i.e. for agricultural purposes—by super-ficies, or by hiring. The same privi-leges are inferentially conferred by the British Treaty, but they have been me-duced, in the German, to terms establish-ing a direct verbal conveyion with the ing a direct verbal connexion with the provisions of the new Japanese Civil Code.

In view of these facts, it is exceedingly difficult to understand the uneasiness that exists in some quarters about the question of land tenure by foreigners under the Revised Treaties, and the persistent refusal of local English journals to recognise incontrovertible facts. We are told, at one moment, that the Treaties are defective; at another, that articles of Japanese Law which stare us in the face, have no existence; and at another, that unless the provisions of the Japanese Code be specially extended to foreigners, they may be excluded from its privileges. Well, we have now shown that every one of these contentions is absolutely chimerical, and it is to be hoped that no further attempts will be made to obscure so important a subject. Perhaps the most charming complaint of all is that of the journalist who alleges that the complexity of the question is established by the length of the explanations it has elicited. We are forcibly reminded of the dunce at school who declared that the fifth proposition of the first book of Euclid must be shockingly difficult since it had cost him a month's effort to master. For the sake of that unhappy journalist, who is to be pitied rather than chided, we here set down the facts in first-primer form :-

Rights secured to foreigners in Japan by the ex-plicit terms of the Revised Treates and correlated documents, such rights to be enjoyed in accord-ance with the provisions of Japanese Law,

1. Superficies.
2. Employtensis.

3. Hing.
Nature of the above Rights, as defined by the Japanese Civil Code.

I. Soperficies—"The right to use the land of

Only her serson for the purpose of owning

thereon buildings, or bamboos or trees;" the duration of the superficies to be fixed at the dination of the superficies to be fixed at will by the contracting parties; or, if left unfixed by them, to be determinable by a Law Court, at the instance of the contracting parties, within the limits of 20 and 50 years. (Civil Code, Arts. 265 to 269 inclusive).

2. Emphyteusis—"The right, on payment of rent as a farmer, to cultivate the land of another person, or to rear upon it borses and cattle;" the duration of the emphyteusis to be from 20 to 50 years. (Civil Code, Arts.

the from 20 to 50 years. (Civil Code, Arts. 276 to 279 inclusive).

3. Hiring—"The right to use and acquire profit from a certain thing" without owing it, the duration of the contract of hiring not to exceed 20 years. (Civil Code, Arts. 601 to 621,

Underlying all the criticisms hitherto penned on this subject there seems to have been an idea that the Japanese Government is reluctant to place the tenure of land by foreigners on a liberal and satisfactory basis. We have good reason to know that such a supposition is entirely contrary to the truth. There has been no reluctance of the kind. Indeed, had Japanese statesmen alone been concerned, the right of property in land would doubtless have been extended to foreigners without reservation. But unfortunately at the very time when the task of Treaty Revision was approaching completion, the impatience of the Japanese nation took a somewhat narrow-minded form, and simultaneously with the outcry for "strict en-forcement" of the existing Treaties, a strong prejudice was developed against the ownership of real estate by aliens, and against allowing them to engage in the coast-wise carrying trade. It was impossible for the Government to ignore that feeling when negotiating the new Treaties. Account had to be taken of it, and nothing remained except to minimize, to the utmost degree, its inconvenient consequences for foreigners and its injurious effects on the development of Japan's industry and commerce. We have seen how the problem was solved. Without Without becoming actual owners of land, foreigners will be able to gain possession of it for a term of years representing something like perpetuity; a term of years amply sufficient to warrant the employment of capital in any industrial or commercial enterprise whatever. In this matter, as in many other matters, the Government of Japan has proved itself to be more advanced than the bulk of the nation, though it is interesting to observe that were the terms of the Revised Treaties now under negotiation, there would probably be no difficulty, even with regard to Japanese popular opinion, in securing for foreigners the right of actual ownership of land.

#### THE CYCLISTS.

The round-the-world cyclists are now in Japan, making their way on their wheels from Nagasaki. They are certainly three remarkable follows. The physical feat of riding some fourteen thousand miles through all kinds of countries and over all kinds of roads-or no roads-is, in itself, sufficient to confer distinction on its performers. But they have also shown themselves keen observers and clever literateurs. Their notes of travel, which have appeared in the columns of a number of newspapers, not only convey much interesting information, but are also thoroughly consistent with the conditions under which they were compiled, showing avoidable where such a rapic method of tively stable Cabinet.

Digitized by

transit is employed, and the spirit of seriousness that one might expect in men pledged to a performance so arduous. The cyclists were enthu-siastically welcomed in Shanghai. We noted in a previous issue how a crowd of brother-wheelfolks, gentlemen and ladies, went out to meet them and escorted them into Shanghai in grand procession, and we now observe that a dinner was given to them at the Shanghai Club on the 30th instant, Sir Nicholas Hannen presiding, and some sixty persons of various nationalities being present. Sir Nicholas proposed the health of the cyclists, and Mr. John Foster Fraser responded in a speech which fills a column and a half of it is, and it must have been still more attractive in the delivery. Indeed, we take it that Mr. Fraser, in addition to his remarkable power of physical endurance and his literary abilities, is a public speaker of rare facility. He ought to make his mark. We can not find space to reproduce the speech, but we quote one passage :-

When we get hime in another six months the one thing I personally will be really proud of is, not that I have gone round the world on a bicycle, for that is what anybody can de, but that I am a native of that hitle group of islands away in the north-west of Emope called the British Isles. I suppose we are all English and Scotch and Irish here to-night, and I tell you the great fact of this trip, as I am concerned, is being imbued with an enlarged patriotism. We have never been where the English name was not honomed and respected. It requires a journey such as we have undertaken to comprehend the tremendous position held on the earth by our own country. And When we get home in another six months the tion held on the earth by our own country. all over the earth there are Shanghais, settlements of Britishers, commercial men, scientists, financiers, arranging all the trade, carrying the goods of outloos, controlling the affairs of nations, in a word running the earth.

There is, perhaps, a soupcon of brassiness about the note of that trumpet, but the fanfare is softened by the evidently earnest sincerity of the speaker.

#### LIFE OF A CABINET IN JAPAN.

A Tokyo journal publishes an opportune statement of the life-span of Cabinets in Japan since the re-organization of the Government:-

Organization, Resignation, Years, Months, ... Dec. 1886 ... Mar. 1888 ... 1 ...

N.B.—This is a mistake on the part of our Tokyo contemporary. The Ito Cabinet to which it alludes took office in December 1885. The dates should be:-

Thus the average span of life is very nearly 2 years—or, exactly, I year II months. But the list brings out another interesting fact, namely, that whereas the average years and two months, the average duration of the Cabinets under the presidency of other statesmen has been only t year and 31 months. The difference is very remarkable. It is true that Marquis Ito had the good fortune to be in office at the time of the war with China, when questions of domestic politics were virtually dormant, but still nothing can deprive him her heavy stores and equipment. of the credit of being the only statesman who, since the re-organization of the Government in 1885, has been able to give at once the element of sketchiness un- his country the advantages of a compara-

#### FOREIGNERS AND THE OWNER-SHIP OF SHARES.

Our readers are aware that there has been talk lately of the ownership of shares in Japanese companies by foreigners. There is a strong tendency now-a-days to remove all restrictions against foreign participation in native enterprises, manufacturers and men of business generally having come to the conclusion that want of capital is fatally obstructing the development of the national resources, and that the introduction of foreign capital is the need of the era. Referring to this, the Chuo says that the projectors of the Formosan Railway, being particularly the N.-C. Daily News. Excellent reading desirous of placing a portion of their shares on the foreign market, applied to the Governor-General's office for permission. They received a negative reply. The Governor-General explained that one of the main objects of the principal Formosan line is strategical, and that the Government's promise to guarantee six per cent. interest was prompted by that consideration. It did not seem advisable that foreigners should be shareholders in such a railway. If the company were bent upon admitting foreigners, the Government's guarantee would have to be withdrawn. Our contemporary adds that the projectors are not satisfied with the Go; vernor-General's views, and have taken steps to appeal to the Prime-Minister.

#### PROPOSED BIWA CANAL.

Major Morgin, the French Engineer, who was present at the meeting of the Mitsui Club held on the night of the 5th instant, is reported by the Jiji to have made the following remarks with regard to the construction of the Biwa canal:—The scheme for cutting a canal from Lake Biwa to Tsuruga would require an outlay of 200 million yen. The work would lower the level of the lake from 86 metres to 45 metres, and thus in certain place would leave several extensive tracts of dry land. Europe abounds with works of this description, especially in Holland, were are to be found richly cultivated lands which, several hundred years ago, were but sea beds. Experience shows that land so acquired proves extremely fertile. According to the plan by which Lake Biwa I to be reduced to half its depth, reclaimed land to the extent of 160 million tsubs could be obtained. Although such an extensive area of land could not be sold at once, yet a prospect exists of obtaining, very readily, one yen per trube for the best portions. The proceeds would more than compensate for the expenditure incurred in the work. Moreover, from a military point of view it may be asserted that the canal would hardly fail to create facilities for converting a neighbouring lake into an inland port where docks and armament devices could be established. No enemy could reduce such a place. There is yet one more point that deserves mention. When the port is opened nothing can be more certain than an immediate development of commerce and industry in Kyoto. The proposed scheme is duration of the Ito Cabinets has been 3 therefore to be commended from both military and industrial standpoints. The Major conclud-ed his speech by saying that he was prepared to answer any question put to him with regard to further details of the scheme. Marquis Ito asked what would be the largest vessel that could be taken into the canal; the Major replied, a large ironelad of about 15,000 tons. The Suez Canal has a depth of eight metres and the warvessel Fuli was only able to pass by discharging now under consideration being nine mekes deep could be easily passed by vessels of the size of the Fuji.

> Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

#### ENGLAND, JAPAN AND CHINA.

<sup>a</sup>HE Japanese Representative in Peking is alleged to have submitted for approval by the Tokyo Foreign Office a "strong policy" scheme with regard to the complications now occurring in the Far East. It is by the Mainschi Shimbun that the statement has been advanced, and our contemporary supplements it by an assertion that although Baron NISHI is disposed to endorse the Peking Minister's views, no step in that sense can be taken by a Cabinet which is holding office only until its successors shall have had leisure to complete their preparations for relieving it. Baron NISHI having declared himself a thorough-going advocate of seems most unlikely that any intelligence of the kind published by the Mainichs can have emanated from the Foreign Office, and we should consequently leave the matter unnoticed were it not accompanied by an assertion that the talk of an Anglo-Japanese alliance is heard as loudly in Peking as anywhere else, and that a constant interchauge of visits is going on between the British and Japanese Representatives there. That may or may not subject. But we take the opportunity of referring to two ideas recently advanced in more than one quarter in connexion with the prospect of an alliance between England would be unwise to join hands with Japan since an understanding with Russia is quite feasible and far preferable; the second, that England has no mission to safeguard Japan's interests, and that she had better leave the Japanese to fight their own battles. These propositions appear different when thus stated, identical in the Far East. That, we think, is an entirely erroneous supposition. years has any policy been advocated in and Russia except the policy of a friendly understanding. We are not insensible to the immense difficulties standing in the ligations as Russia showed in the case of the Black Sea and in the case of Batoum, sword can ever be essential to the settleto engagements voluntarily concluded for will fully equal insistence, in the case of to Chilgin Terhaps we, who are so close to

the great purpose of averting a terrible and her interests in posse. There must be a otherwise inevitable collision. Without fair and open arena for competition with pursuing that branch of the topic, however, respect to any profits or advantages lawwe confine ourselves to noting that, as fully accruing from the development of consistent advocates of an entente between England and Russia, we can discuss the present complications without being suspected of any desire that does not make for peace. Thus much premised, we venture to call it an indisputable proposition that Japanese interests and English interests are identical in the Far-Eastern continent. Both Powers are anxious to threats. That, we take it, is a reasonable prevent any encroachment upon Chinese statement of England's position. Japan territories unless it has previously been is not less deeply concerned in securing made the subject of a common understanding. Nothing in the nature of an understanding for the partition of China is here reticence in all matters of diplomacy, it suggested, of course. To an iniquity of her that she should not be excluded from that kind no British Cabinet would put the neighbouring continent. But England its hand. What we mean is that if the is the one and only Power upon whose factors of unrest which China unfortunately seems unable to control, produce, from depend. She knows that wherever Britime to time, situations calling for armed tish sway is supreme or British influence interference by a foreign State, it should paramount, she can confidently count on be agreed that the consequences of such unrestricted ingress for her goods and on interference shall not be pushed so far as an open field for her enterprise of every to be unfairly prejudicial to the treaty kind. Russia, on the other hand, has shown rights of other States. England has very by her proceedings in Korea that what she large interests at stake in China, interests seeks is a monopoly for her own people in be true. We have no information on the in esse and interests in posse. Against any every department, and that she will reattempt on the part of another Power frain from no means of securing that end to exclude her from the markets of at the expense of either British or Japan-China, she is bound to offer strenu-ese subjects. Thus the identity of British ous resistance. Fair competition is and Japanese interests vis-d-vis Russia England and Japan. The first is that a question apart. But it is not fair seems clearly established. But that does competition, it does not begin to be fair not mean for a moment that there need be competition, when special concessions are any fighting of battles, or any abstention exacted by unwarranted exhibitions of from efforts to bring about an understandforce or by the application of diplomatic ing. The point is simply that, for the pressure which amounts to a menace, purpose of effecting an understanding, England may fairly be said to have opened | England and Japan in combination con-China to modern Europe. The Dutch stitute a much more powerful influence had access to China three centuries ago. but in reality they rest upon the same So had the Spainards and so had the to blink the fact that Russia, Germany basis, namely, the supposition that British Portuguese. But neither the Dutch, nor and France are a working coalition in the interests and Japanese interests are not the Spainards nor the Portuguese need Far East. There were some who regretted be considered in this context. The that England did not place herself in the question relates to Great Britain, France, At no time during the past seventeen Russia and Germany alone. It is extravagant to expect that England should regret any longer, now that they see the these columns with regard to England sit with folded hands while her rivals direction in which the boat has been steerseek to steal a march on her, by the aid of ed? Great Britain might have joined the devices which she can not conscientiously emulate, in a field to which she has inway of that consummation, neither can we troduced them. No Western State is in Englishman desire that his country should hide from ourselves the fact that a Power a position to take such wholesale and have been either a sleeping or an active which shows so little respect for treaty ob- immediate advantage of Chinese im- partner in the subsequent and still conpotence as England is, and there is not a tinuing scramble for compensation? At shadow of justice in the idea that her fordoes not inspire any strong wish for a bearance to turn her greatly preponderating that it is not operating in either English rapprochement. But it is not possible to strength to unlawful purposes should interests or Japanese interests must be imagine, at this period in the history of be suffered to inure to her disadvantage. patent to every one. That an explicit civilization, that the arbitrament of the She has, therefore, a plain right to insist understanding is the best, if not the only, that, except as a result consistent with the way of averting disastrous consequences, ment of international difficulties, neither recognised principles of international law, must be equally plain. England and Japan have we any right to assume that because there shall be no alienation of Chinese should unite to bring about such an under-Russia has trampled upon humiliating territory such as would in any way fetter standing. Readers of history know the engagements when she found her feet free the commercial privileges she now enjoys. kind of rocks against which Great Britain

China's resources, whether by working mines, building railways, establishing means of inland or coastwise transport, carrying on manufacturing industries, or what not. Such matters are not to be made the subject of special agreements extorted from China by armed demonstrations or by diplomatic coalitions constituting full and free access to China for her traders and manufacturers. It is, indeed, almost a question of commercial life or death to free-trade policy she can implicitly than either could exercise alone. It is idle same boat with them at the time of the Liaotung crisis. Can they entertain that union so far as it made for the preservation of China's integrity, but can any all events, the coalition is in the field, and to crush them, she would not be faithful Precisely the same position may be taken, has hurtled in the past by suffering herself the scene, will not be deemed presumptious if we say that something like a policy of drift may be laid to England's charge at present, and something unmistakably like it to Japan's.

#### GERMANY AT KIAO-CHOU.

HERE appears to be no room to doubt that Germany has asked China for a lease of Kiao-chou. Whether China has actully agreed, we do not know, but her consent may be taken for granted. In fact, from the moment when she allowed German armed forces to retain possession of portions of her territory pending a settlement of the questions at issue, it became evident that the concessions obtainable from her were to be measured simply by Germany's ambition. Had the final cession of Kiao-chou been demanded, China would doubtless have proved complaisant. In short, she has learned to count herself desenceless, and since her people are not sufficiently patriotic to hold the Government responsible for alienations of territory or other national humiliations, the statesmen in Peking seem prepared to purchase tranquillity at any cost short of their own displacement. There is, of course, a certain semblance of compromise in the idea of a lease instead of a cession. China, in the desert of her tribulation, has that one small stone beneath which to thrust her humbled head. But if we look a little closer the idea of compromise appears illusory. Germany does not proceed to the extreme point, does not demand actual cession, simply because she is not sure whether Kiao-chou will sait her purpose. She wants to make practical trial of the place's capacities and potentialities before seating herself there definitely. If Kiao-chou does not prove suitable, then a substitute is to be found for it. Such is said to be the understanding, and if we may credit it, Germany has acquired not only what she wants immediately, but also a prospective title to anything she may want bereafter.

Of course it would be quite idle to apply to the incident any of the recognised tests of international morality. Its sombre indifference to all civilized principles is not relieved by any scintilla of propriety. The Germans themselves know that thoroughly well, and are not at all likely to plead any excuse other than the exigencies of imperial progress. Had Kiao-chou been occupied in consequence of China's hesitation or reluctance to comply with Germany's demands for reparation, and had it been evacuated after the satisfaction of these demands. Germany would have merited the applause and received the thanks of all the Western communities in the Far East for her energetic and spirited action. But its nationals from her acquisition; but if the provisions of the new Civil Code. Nothing seizure in a time of peace prior to the latter, she will have to open it to the papibe more surprising than the attitude of formulation objemezdentand, a dies of

tention as a condition of settlement, constitute a line of procedure for which no precedent can be found in the pages of Nothing is yet known as to the views of civilized history. There is just one redeeming hypothesis, and we desire to make the most of it. It is that these extraordinary acts have been prompted by a resolve to inflict signal punishment upon China. During the past few years, murderous attacks upon foreign missionaries by Chinese fanatics, or mobs, or bandits or what not, have been numerous, and although a measure of reparation has invariably been sought and obtained in each case, it can not be said that foreign life and property are more secure in China now than they were on the eve of any of the cruel massacres that have so often shocked the civilized world. Wheduties that it has assumed by treaty, or whether it is indifferent to their discharge, the plain fact is that they are not discharged, and it is conceivable that, under her weakness places her at the mercy of any aggressor, her constant breaches of faith invite and justify aggression. If the Germany's method of procedure has been degree of her callousness, must now understand that her territorial integrity is and the forbearance of her Occidental chou certainly exists, and its topographical nations enjoy as a traditional feature of civilized intercourse, but must expect that every fresh outrage against foreign life or property on the part of her subjects will entail the loss of a section of her vanizing her into practical conciousness of her obligations, this very rude stroke from Germany's "mailed hand" should prominent items. The realization of such

Turning from the principles involved, tion, what does Germany intend to do at cal difference between a lease and a cesa cession of the place by treaty in 1860. But for practical purposes Germany will be virtual mistress throughout the district included in the lease, a district the exact dimensions of which are not yet publicly known but which is said to measure several square miles. Will the place be used as a mere naval station, or is it to be a

is precluded from obtaining from China any exclusive tradal privileges or facilities. the Berlin Government, but it seems quite certain that the German people, especially those resident in the Far East, regard Kiao-chou as a new centre of trade. The so-called "Kiao-chou District," stretches 60 miles from north to south and 30 miles inland, with a population of 200,000. It is not at all probable that such a great area has been leased to Germany. On the other hand, owing to the gradual silting up of the extensive bay, once a fine anchorage, the junk harbour of Kiao-chou is now 6 nautical miles from the city, in a swampy, unwholesome region, and the harbour for sea-going ships is distant 12 miles further, or 18 miles from the city. Hence, without ther the Chinese Government is really fuller particulars, it is impossible to form powerless to discharge the protective any intelligent idea of the locality or the extent of the area acquired. If it is to embrace the city of Kiao-chou and the harbour, it must be a very considerable tract; if it is to be the harbour alone, such circumstances, the German EMPEROR the concession loses much of its impormay have resolved to show China that in tance. At all events, the idea appears his opinion, she has forfeited all title to be to be that Kiao-chou, not Chefoo, is treated as a civilized State, and that, while the true centre of Shantung trade, and that the development of the new port would, in course of time, deprive Chefoo of all value. The doctrine can not be object has been to inculcate that lesson, accepted without reserve. If Kiao-chou were so manifestly superior to Chefoo it well calculated. China, whatever the is not easy to see why the former was not chosen in preference to the lattter by the British negotiators of the Treaty of 1858. a mere question of her own good conduct Still, a strong opinion in favour of Kiaofriends. She can no longer count on the advantages as one of the coastwise termini immunity from aggression that other of a system of North-China railways seems to be indisputable. There are, moreover, several important coal fields in the interior of Shantung, and in the large industrial programme inspired by the possession of Kiao-chou, we find that the tapping of realm. If any shock be capable of gal- these fields and the export of their produce over-sea as well as its carriage to Honan in the West and Peking in the north, are schemes must lie in a very distant future. but we mention them here to show that to we are confronted by the interesting quest the active-minded, enterprising German the acquisition of Kiao-chou commends Kiao-chou. There is, of course, a techni-litself chiefly because of its commercial and industrial potentialities, from which point sion. For instance, Great Britain obtained of view other nationals also may welcome a perpetual lease of Kowloon in 1850 and the event since they, too, are by treaty entitled to share the advantages.

#### LEASE AND SUPERFICIES.

UR readers will entirely endorse Dr. LÖNHOLM'S assertion that he has established a title to the gratitude of the foreign community by affording full and commercial port? If the former, Germany explicit information on the subject of the will be in a position to shut out other tenure of land by foreigners under the ede of all the Treaty Powers, since place the Japan Gazetta and the Kobe Chronicle

with regard to this question. Possibly the announces, with a semblance of quaint with them. former newspaper is now convinced of its error, but for a long time it clung with the in the controversy, but that really the to hold land so that he may be the abutmost tenacity to the idea that when the whole subject is sufficiently perplexing to Revised Treaties and the new Civil Code suggest grave doubts about the correctness go into operation, foreigners will not be of any hard and fast interpretation. That able to obtain land for building purposes is at once the silliest and the most disinfor a longer period than 25 years. It resolutely ignored every statement of the provisions of the Code put forward by beyond the range of a school-boy's comcompetent experts, and without having prehension; disingenuous, because the itself examined the Code or taken any steps to obtain independent information about the clauses relating to land tenure, it obstinately declared, again and the insufficiency of the term of land again, that 25 years was the limit, and it tenure possible to foreigners after the treated every one venturing to differ from Revised Treaties go into force, which is it as an impertinent prevaricator. The Kobe Chronicle has made an even more amusing exhibition of ignorance and mental has read Dr. LÖNHOLM'S last letter to this obtuseness. It seems to be absolutely journal with ordinary attention can labour determined not to abandon its false views. under the slightest misapprehension as It does not make the smallest attempt to to the Japanese law of land tenure which support its arguments by reference to the will be applicable to foreigners after the text of the Code, but is content to advance speculations, conjectures and jeers where an important question of legal rights is repeat the facts in the plainest language. under discussion. If either of these jour- According to the new Civil Code of Japan, nals has any genuine desire to discover there are two kinds of land tenure, apart the truth and enlighten the public, no from ownership. There is, first, tenure evidence of any such wish is betrayed by their methods. They have never heard of the kind of lease called a "superficies." There is nothing of the kind in English familiar to every one every where; the law, and consequently the two editors are either unable to understand that anything of the kind can exist in the laws of another country, or have made up their minds that lord. The law names a maximum limit whatever is not English must be radically for the duration of such leases, but their human voice. wrong and untrustworthy. The only excuse to be made for them—if it be an excuse-is that the term "superficies" does not explain itself, and that its ordinary meaning-the surface, or exterior, of a thing-gives no exact clue to its legal significance. Yet even WEBSTER is suf- the soil. The law does not fix any maxificiently explicit, for he defines "superficies" to be,

A real right consisting of a grant by a landed proprietor to another person of an area of ground for execting and building upon it, without parting with the ownership of the soil. In many respects this right hears a strong resemblance to the long building leases granted by land-holders in ling-land, in consideration of a rent, and under reservation of the ownership of the soil,

Even an ordinary dictionary like Wgg. STER'S, had these singularly obstinate journalists taken the trouble of consulting it, would have shown them that there may be provisions of law which, though not falling within the range of their own and practical. But without making any sufficiently lengthy period, perhaps . research whatever, or seeking any expert hundred years, perhaps five hundred. guidance, they have undertaken to controvert the clear expositions of a thoroughly qualified jurist, have ventured to expound a body of laws which they have frain from seeking, a superficies of fixed never even read, and have applied them- duration. But such circumstances need selves, as though of set purpose, to mislead not concern us: they are altogether ex-

exultation, that it has never taken part facts for the foreigner are that, if he wants genuous attitude of all: silly, because the the duration of such agreement are the subject does not present any features journal in question, though not actually engaging in the discussion, has been conspicuous in formulating complaints about the sole matter in dispute.

We do not imagine that any person who Revised Treaties go into force. Yet to avoid all possibility of error we may here by ordinary lease. This does not carry with it any right of property in buildings or trees. It is simply the kind of lease lease by which buildings and all other fixtures-as trees or shrubs-remain, like the land itself, the property of the landibterest for foreigners is confined to cases where the mere renting or letting of houses or other buildings is in question. The second kind of tenure is a "superficies." This carries with it a right of property in all buildings, trees or other objects above mum limit for the duration of a superficies: it leaves the period to be determined at will by the land-owner and the superficiary. But if they do not determine the period at the outset, then-and only then the law courts are empowered to fix the period subsequently, within the limits of 20 and 50 years, on application by either of the parties to the superficies. anything be simpler? Of course, if a man wants to rent land for building purposes, he will not dream of taking it under an ordinary "lease." He will obtain a "superficies," and in ninety-nine cases narrow ken, are still reasonable, logical out of every hundred, will bargain for a There are circumstances under which the land-owner might be unwilling to give, or the superficiary might have reasons to re-

The only really important solute owner of everything above its surface, he must enter into the kind of agreement called a "superficies" with the landlord, and that the sole factors limiting will of the landlord and the means at the disposal of the would-be superficiary. In short, so far as the tenure of land is concerned, no obstacle of any kind will exist to industrial enterprise by foreigners after the Revised Treaties go into operation.

#### THE DREYFUS CASE.

This extraordinary case which attracted so much attention at the time of its occurrence and which is again the talk of the hour, is certainly one of the strangest on record, facts in their original form are succinctly summarized in the following paragraph :-

The French Ministry of War was informed, by ame persons whose names have so far been kept secret, that a foreign government—the public is is not informed officially which government—had received copies of confidential documents on mitireceived copies in Contain Dieyfus was arrested upon information given by some person or persons whose identity is also kept in the background. He was tried by continuarital, his witnesses for the defense were not examined, and be was convicted upon the testimony of two out of five graphological expects who maintain that his handwriting in the same as that of an incriminating document said to have been "stolen" from the waste-paper basket of a foreign embassy by detectives. fus was publicly degraded, and sent for life to an unbealthy island on the coast of South America, where he is now kept in an immense wrought-iron cage. He is granded day and night by vetera soldiers, who are not permitted to speak to him.

The punishment is terrible to contemplate. For more than three years the unfortunate man is supposed not to have heard the sound of a That he retains his reason is wonderful, but it may be that hope supports What has now happened to re-direct attention to the affair is that Mr. Scheuren-Kestner, Vice-President of the French Senate, believing in the validity of certain proofs of Dreyfus' innocence, applied to the Minister of War to re-open the case. The Minister refused. Then a brother of Dreyfus openly accused Major Esterhazy of being the real culprit, and eight experts were found-two French, two English, two American, and two Swiss-who agreed in declaring that the incriminating document had not been written by Deyfus. Naturally the agitation grew more and more intense, and finally a new trial was ordered. But under what circumstances it was m be conducted we do not know. Apparently Dreyfus himself was not to be present at it. One almost incredible step has already been taken by the Authorities. A certain Colonel Picquart was summoned from Tunis to Paris to give evidence. He was to reach that city on the 26th of At 6.45 on the morning of the November. 23rd the police proceeded to the apartmenta occupied by him when in town, and made a minute search, carrying away a number of private letters. This step is believed to have private letters. been prompted by an anonymous communication to the War Office, saying :--" Search a bed-room on the sixth floor, No. 3, Rue Yvon-Villarceuve, and you will find a good deal on the Dreyfus affair." The search is reported to have disclosed matters injurious to the reputation of some ladies of high position. It must be remembered that no accusation had been preferred against Colonel Picquart, He was coming to Paris simply as a witness. It must also be remembered that the domiciliary visit was made in his absence and withthe public. Yet another local journal, ceptional, though a complete body of laws men such in late seems a shocking outrage. entering the arena stigling eleventh hour in contributions a method of dealing But in Paris, apparently people were UNIVERSITY OF ILLINOIS AT uncertain what to think of it. As for the Parisian newspapers, the part played by them has been miserable. They have devoted themselves chiefly to discovering motives discreditable to every person venturing to say a word on behalf of Dreyfus. If sentiment, passion and prejudice were the proper judges, the journals of the great city could not have worked more assiduously to organize the bench. Here is a paragraph conveying some idea of the general

The Libra Parole asserts that all the friends of the convicted man are either Protestants or Jews, or they have some Protestant or Jewish or at least foreign relatives. "It is a Protestant attack upon Resuce" have the pages. "The International of the Protestant attack brance, says the paper. The Intransigiant wants Schemen Kestner tried as a traitor for respaning the question. The Echa de Paris declared that Drayfing confessed, and it refused to insert a denial from Mme. Dreyfin. Domont, in the Libre Parole, exclaims: "Why does not a well-aimed bullet from one of Dreyfus's guards id us of the fellow!" The Gil Blus declares that a way of the tenow! The Git Bits dectates that a war will be the result if the finith is told. The Fournal assetts that Dieyfus's guards have been shown "the undeniable proofs of his guilt," but does not reveal what these proofs were. Esterhazy is equally attacked, merely because his name is not Brench.

Amid all this auxiety to discover motives, no journalist has indicated a motive likely to induce "a steady, home loving, rich man, married to a rich woman," to betray his country for a petty sum of money. It is not to be supposed, how-ever, that the field has been abandoned to journalism of the above type. Some eminent men have raised their voices in a manner worthy of France. M. Zola, for example, in an eloquent article, writes thus about the broad aspects of the affair and about the fierce attacks that have been made on the Vice-President of the Senate for venturing to assert Dreyfus' innocence:-

"M. Schourer-Kestner with his transparent M. Scheiter Kesteer with his transparent life is before its. Confront him with the others, those who accuse and insult him, and then judge. We must choose between them and him. Discuser any reason for his acts except his noble desire for truth and justice. Loaded with insults, heartbroken, feeling his high position tottering under him, ready to sacrifice everything to carry

under him, ready to sacrifice everything to carry out his heroic task, he is silent and waits. His attitude is of extraordinary grandeur.

"I will not say anything of the affair in itself, yet it is the simplest and clearest imaginable, if you will but take it for what it is. A judicial missake—the thing is deplorable, but always possible. Magistates make mistakes, officers may make mistakes. How is the honour of the army at stake in this? The only honourable part to play, if a mistake has been committed, is to repair it, and in this? The only honourable part to play, if a mistake has been committed, is to repair it, and blame would be incurred only by showing obstinacy, only by refusing, even in the face of decisive proofs, to acknowledge the mistake. There is at bottom no other difficulty. All will go well when the resolve is taken to acknowledge that a mistake may have been committed, and that there has been hesitation in confessing it. Those who know will understand me. As for the fear of diphomatic complications, it is a honey to frighten simplement. plications, it is a bogey to frighten simpletons. No neighborning Power has anything to do with the affair. This should be emphatically declared, We simply find ourselves before a public opinion examerated and worried by the most officus of

compaigns.
"The Press is a necessary force, and I believe, after all, that it does more good than harm, but certain journals are none the less culpable for certain journals are none the less culpable for allaming some, terrorizing others, and living on scandals in order to triple their sale. Blintic Anti-Semitium has inspired this craze. The purest and bravest date not do their duty for

should be said by all honest men mixed up in the affair; they should be unable to live unless they do justice."

Another utterance-that of Mr. Gabriel Monad—deserves to be quoted. M. Monad is one of the champions of Dreyfus and, of course, he has come in for a share of the passionate abuse meted out by the press to every one adopting such an attitude. The students of the Upper Normal School, of which he a Professor, seut to him an address of sympathy in view of these assaults, and in the course of his reply he wrote :- "It is your lot to live in times when the violence and corruption of a portion of the Press, always ready to impute the lowest motives to those who do not think like the crowd, deprive sensitive minds of all taste for public activity, force them to shut themselves up in the towers of science or in family privacy, and so produce selfishness and cowardice. shrink from assuming any responsibility from fear of attacks or calumines. You will guard against this weakness, and will form a new generation stronger than ours, in which men will have the courage of their opinions and respect for the opinions of others. be preserved for France her old name for generosity and courage."

In connexion with the Dreyfus affair it has been suggested that the abolition of military attachés would be a wise measure, on the ground that such officials are more or less precluded from neglecting any method, whatever its nature, of obtaining information for their Governments. Concerning this, the Paris correspondent of The Times writes thus:-In regard to certain Embassies it is admitted that the presence of military attachés is simply an act of international courtesy, and it is thought that their abolition would constitute a sort of breach of manners. For the nations of the Far East military attachés are in Europe of extreme utility, and I can vouch, for instance, having seen much of them, that the Japanese military attachés, without entering into any sort of mysterious schemings, have enormously into any sort contributed to the recent development of their army. England, for whom military attachés are less indispensable than for Continental nations, has, nevertheless, reaped many considerable moral advantages from them. The English attachés in Paris have been a model in bearing and discretion to the officers of all other countries, who have always shown them the greatest esteem and consideration. These are advantages which a nation appreciates, and the withdrawal of the English attachés, who do not excite the slightest distrust, would be an admitted loss for France even more than for England. The idea of such an abolition, however, in a symptom of the panic which can be created when interprets add to the avoicement of popular interprets." the excitement of popular imagination.

We invite the attention of the Japanese to this verdict about their military attachés, a verdict contrasting strongly with what was said about them some time ago in a French colony.

#### THE ASSAULT ON MR. SCHROEDER.

The case in which F. Polzien and J. Allmacher, were charged in the German Consular Court, upon various counts, with assaulting Mr. Schroeder, editor of the Eastern World, in his

#### OFFICIAL APPOINTMENTS

Mr. Matsuoka Koki, who held the position of Vice-Minister of Home Affairs when Marquis Ito was last in office, has been gazetted again to that post. The same Gazette announces the appointment of Baron Senoda Yasukata to be Chief of Metropolitan Police, and of Mr. Sameshima Takenosuke to be Chief Secretary of the Cabinet. Mr. Sameshima used to be Private Secretary to Marquis Ito. Mr. Nakamura Motoo, hitherto Vice-Minister of Home Affairs, Mr. Hirayama Natinobu, Chief Secretary of the Cabinet, and Mr. Yamada Iken, Chief of the Metropolitan Police, are relieved from office at their own request.

#### THE SIBERIAN RAILWAY.

It has been announced of late that the completion of the Siberian Railway could be expected within ten years. With reference to this interesting question, the Vladivostock correspondent of *The Times* telegraphs as follows, under date of Nov. 22nd:-

I have just made the journey across Manchuria, generally along the course of the projected railway. I met engineers proceeding to their stations, escorted by a sufficient number of a med Cossacks powerfully to impress the Chinese. The work has been much retaided, and it is anticipated that another year will clapse before the preliminary surveys are completed and the route finally determined. Unprecedented floods have oblinerated the work already done between Chita and Nert-

chinsk, and its restoration will require two years.
The route at present favoured crosses the fron-tier to the south of Staro and Tsurukhaitu to Khailar, crosses the Khingan Mountains by a pass still undiscovered, descends the right bank of the Chol to Chalkhoton, goes down the west side of the Sungari to Kirin, and thence to Omoso, Niuguta, and Poltafka, avoiding difficulties by crossing the Nomi at Tsitsthar and the Sungari at Petine, also the mountains between Ninguta and Lalin,

On the route selected the difficulties are greater tan were expected. The completion of the railthan were expected. The completion of the rail-way within six years is impossible. Kirin is the chief centre of activity. Its advantages are a rich country, an abundance of coal and timber, and country, an abundance of coal and timber, and its position as regards Lushuan-kan, whither a preliminary survey is to be made. There is acti-vity also at Tsitsihar and Petune. It is under-stood that there will eventually be a branch line connecting them with Biagovestchensk. The Chinese officials are rendering every assistance.

Everything relating to this railway is of vital importance to the Far East. Its completion, should arrangements be made for carrying it to an ice free port, will materially change the situation by bringing Manchuria, and therefore China also, within the spere of Russian military potentialities. The massing of troops at Vladivostock and in its vicinity, so much talked off by newspapers in this part of the world, is comparatively unimportant. Vladivostock is not only much too remote from Manchuria, China and even Korea to be a serviceable base of operations, but its line of communications with the ultimate base lies over sea, and unless Russia were mistress of the ocean, she would be unable to throw reinforcements or stores into Viadivostock in the event of war. A base of operations that lies beyond the range of supplies of men, munitions or provi-sions would be of small use for the purposes of a great campaign. But suppose the Siberian Anti-Semitian has inspired this ciaze, the purest and bravet due out do their duty for lear of being hespattered with calumny. And we have reached such a trivible condition that all sentiments are perverted, that you cannot desire justice without being treated as imbedien or corrupt. Falseboods are paradel; the absundest stories are gravely quoted by serious newspapers; the whole nature seems sticked mad, when a fittle common sense would set matters tight. How simple will all be when the amounts will be an accurate on the case was appointed, and the propose of the case was adjourned for the defendants, had addressed the Court, the case was adjourned for incompliance of thousands of miles of country into the country not yet brought within the military sone, no massing of troops on a large volverby Polizenduring his visit to Mr. Schoeder's cale at points effective for attack could be a threaten there bas also been a desire to wait before acting till every one had probed his conscience. When he has spoken of his duty, which, even at the tisk of his high position, fortune, and happiness, had him speak out the truth as soon as he knew it, he used this admirable expression, "I could not have lived." Now this is what defendants were therefore discharged.

Digitized by TOSS Railway carried to an ice-free port in Korea, the Yellow Sea or the Gulf of Petchili—then,

#### THE BUDGET.

(Continued)-

CHAPTER IV .- PRINCIPAL ITEMS OF EXPEN-DITUEE.

The following are the most important classifications of the estimates of expenditure for the 31st fiscal year of Meiji.

FORSIGN DEPARTMENT.

1 .- Establishment of Legations.

In view of the necessity of establishing new Legations in Spain and Belgium, and Consulates at Hankow, China, and Odessa, Russia, sums of 96,777 yen in the Ordinary, and 38,000 yen in the Extraordinary Expenditure-134.777 yen-were included in the Budget for the Foreign Department.

As it was also considered necessary to establish six new Honorary Consulates in Europe and America and other places, an outlay of 2,400 yen was included in Class II. Ordinary Expenditures for the Foreign Department,

2.- Increase in Salaries of Diplomatic Officials.

The revision of the regulations for the expenditures of Legations and Consulates rendered it necessary to increase the salaries of diplomatic officers, and a sum of 249,959 yes as introduced for that purpose in Class II. Ordinary Expenditures of the Department.

HOME DEPARTMENT.

3 .- Revision of Official Organization.

Alterations having been made in the official organization of the Home Department, the Prisons and Hokkaido Bureaux were accordingly established, and changes made in official grades and numbers. A sum of 67,688 yen was accordingly set down in Class III. Ordinary Expenditure, in the estimates for the Home Department.

4 .- Police and Prison Schools.

Improvements in the management of affairs relating to police and prisons necessitated expenses amounting to 22.769 yen in the Ordiexpenses amounting to 22,709 yen in the Ordinary and 8,649 yen in the Extraordinary section, a total of 31,418 yen. This amount was included in Class XXI. Ordinary and Class X, Extraordinary Expenditure for the Home Department, 5.-Civil Administration of Cities and Prefectures and increase of Salaries of Officials

in Okinawa prefecture. The expansion of local administration of Cities and Prefectures led to an increase in the number of officials and salaries, and the sum of 354,760 yen was inserted in Class XIII, of the Ordinary Section for the Home Department.

Since Okinawa differs in its conditions from other prefectures necessity has arisen for in-creasing the salaries of officials, and for this a sum of 32,037 yen was included in Classes XIII. and XV. of the Section of Ordinary Expenditure.

#### 6 .- Examination of Medical Men and Prevention of Epidemics.

In order to complete the examination system of medical practitioners and pharmacists, it became necessary to extend the hospital attached to the Medical Examination Office in Tokyo and to establish a new one under the appervision of a similar Office in Osaka. With this object in view an estimate of 52,156 yen in the Section of Ordinary Expenditure and 54,725 pen in the Extraordinary Expenditure—a total of 106,881 pen—was included in Class XIX Ordinary and Class IV. Extraordinary Expenditure.

A Special Epidemic Inspection Bureau having been organised in accordance with Imperial Ordinance No. 171 of the 30th year of Meifi, a sum of 18,570 yen was required for expenses, and was accordingly inserted in Class XIII. of the Extraordinary Section of the Estimates.

#### 7.—Reclamation of Hokkaido.

An amount of 103,496 yen required by the increase of officials and their salaries in consequence of the revision of the official organization of Hokkaido was included in Class XI. of the Section of Ordinary Expenditure.

In view of the necessity for increasing the Kocho Offices and branch police stations in ed officers and first class men of the Gend various parts of Hokkaido, an outayof 17.475 amnerie Corps despatched to Furmosa in the Digitized by

en Ordinary, and 12,182 yen Extraordinary Expenditure—a total of 29,657 yen—had to be included in Class XI. Ordinary and Class IV. Extraordinary.

Works connected with roads and drainage necessitated a disbutsement of 505,340 yen, and this item was therefore set down in Class VI., Section of Extraordinary Expenditure.

To open railway traffic in Hokkaido a sum of 227,147 ren was required and was included in Class XXVI., Ordinary Expenditure, in the Estimates.

#### 8 .- Aids and Grants.

Owing to the enforcement of the Regulations for the preservation of old shrines and temples, special aids and grants became necessary, and for these a sum of 150,000 yen was inserted in Class XX. of the Section of Ordinary Expenditures.

Since the enforcement of Regulations for the prevention of epidemics necessitated an outlay of 50,790 yen for expenses in the various Cities and Prefectures became necessary. This amount was entered in Class I. of the Extraordinary Section of the Estimates.

Aids were also required for engineering works, for preventing landslips and for this purpose a sum of 70,000 yen was included in Class II. Extraordinary Expenditures.

Necessity having arisen for increasing the regular steamship services to the Ogasa islands, a vote of 10,000 yen was included in Class 1., Extraordinary Expenditure,

Necessity having also arisen for opening a regular service between Ogasawara and the more distant isles of the group, an estimate of 780 yen was included in Class I., Extraordinary Expenditures.

-Control of the election of Representatives of the Lower House.

A sum of 73,686 yen required as expenses for the control of the general election of Representatives of the Lower House was inserted in Class XI., Extraordinary Expenditures.

#### 10 .- Reconstruction of Prisons.

The reconstruction of the Hokkaido Penitentiary and its branch in Sorachi became absolutely indispensable. The cost of the work was estimated at 33,284 year, to be defrayed as continuing expenses until the 32nd year of Meiji, and the amount—20,902 yes—for the 31st year was included in Class IV. of Extraordinary Expenditures.

Owing to the limited area of cemeteries for foreigners in Hiogo prefecture, a new establishment became necessary, and a sum of 28 642 yen for this purpose was inserted in Class IV. Extraordinary Expenditure.

#### FINANCE DEPARTMENT.

11 .- Formosan Affairs Bureau,

The above Bureau having been established in accordance with Imperial Ordinance No 295 of the 30th year of Meifi, an ontlay of 25 040 year was included in Class X. of the Ex traordinary Section of the Estimates.

13 -Extension of covered places and platforms at Kohe Custom House.

As it has become necessary to extend the covered sheds, and platforms for dealing with articles of export and import, in view of the large development of trade in Kobe, the total cost of the work, 168,575 yen, was introduced as a charge to be continuously defrayed until the 32nd year of Meiji, and sum of 32,000 yen for the 31st year was included in Class III., Extraordinary Expenditures.

13 .- Revision of the System of Taxation in Oklnawa Prefecture.

In order to revise the system of land and general taxation in Okinawa, expenses amounting to 23 412 yen were included in Class II. of the Extraordinary Estimates.

#### WAR DEPARTMENT.

14.—Relief of the Gendarmerie in Formosa.

The term of service of the non-commission-

29th year of Meiji, expired during the current fiscal year, and a sum of 211,382 yes for the cost of their relief and return to their native prefectures was included in Class III., Extraordinary Expenditure.

#### 15 .- Construction of Batteries.

A sum of 487.373 yen being required for strengthening the batteries in Tsushima, the same was included as continuing expenses for four years. The first installment, for the 31st year, viz., 125,800 year, was therefore entered in Class I., Extraordinary Expenditure.

The construction of batteries for the protection of Kelung and the Pescadores requires an outlay of 457,360 yes for the former and of 456,320 yen for the latter, to be defrayed in four yearly installments. The first installments, for the 31st year, amounting to \$1,840 yen for Kelung and \$1,580 yen for the Pescadores, were included in Class I. Extraordinary Expenditure.

The batteries to be constructed in Tsu-shima, Kelung, and the Pescadores necessitated the manufacture of arms and ammunition to fit them out at a cost of 2,401,633 pen., to be de-frayed in four yearly installments, the first portion of which, for the 31st year-600,430 yen-was included in Class I, Extraordinary Expenditure.

15 .-- Repairs of Buildings and Purchase of Stores.

Along with the construction of batteries in Tsushima, Kelung and the Pescadores, the construction of barracks, as well as provision of stores, became indispensable, and the expenses for the preliminary equipment being required to the amount of \$20,191 yen, in five yearly installments, a sum of 332,001 yen for the 31st year was introduced in Class IV. Ex traordinary Expenditure.

17.-Reconstruction of Shooting Ranges for the Regiments in Tokyo.

Owing to the development of the range of firearms, bullets were often found to travel beyond the shooting ranges, causing no little damage so the neighbourhood, and the reconstruction of these ranges became a matter of absolute necessity. The gross cost of the work was estimated at 479.386 ren as continuing expenses till the 32nd year, the first installment of which, for the 31st year, was included in Class II., Extraordinary Expenditure.

## NAVAL DEPARTMENT.

18 .- Despatch of Artisans Abroad.

The necessity for despatching artisaus to foreign countries for the purpose of obtaining a practical knowledge of shipbuilding and the manufacture of arms led to an outlay of 64.453 ven being required in three yearly installments.
Of the first of these, 145,161 ven, for the 31st year, was included in Class XII., Extraordinary Expenditure.

#### 19 .- Coke Manufactory.

Since ordinary coal is unfit for direct use in military or naval purposes on account of its being smoky and soft, the establishment of a coke factory became indispensable, the estimated cost of which was 393.333 yes, to be disbursed in three successive years, and the first installment, for the 31st year, amounting to 145,168 yea, was included in Class XII., Extraordinary Expenditure.

so .- Reconstruction of No. 1 Dock, Sasebo.

Slight cracks having appeared in the cemented portion of the walls of the No. 1 Dock at Saseho Admiralty Station, defensive measures were adopted, but the crack having gradually extended to the side walls, the use of the dock had to be suspended, and radical repairs became absolutely indispensable. was estimated to cost 573.705 yen, which might be defrayed in three yearly installments. A sum of 160.500 yes, representing the 1st in-stallment for the 31st year, was therefore in-cluded in Class XIII., Extraordinary Expenditure.

JUDICIAL DEPARTMENT.

22.-Increase of Public Prosecutors and of Salaries for Clerks.

As it was found to be of paramount importance Original from

to distribute Public Prosecutors among various local Courts where such officers had not previously been appointed, and also to increase the salaries of Clerks, a sum of 273 828 yes, covering the whole expenditure, was included in Cisss II. Ordinary Expenditures.

23 .- Rebnilding of the Kobe District Court.

A sum of 296,994 yes is required for the reconstruction of the Kobe District Court, to be disbursed in four yearly installments. The first amount, 66, 162 yen, for the 31st year, was included in Class I. Extraordinary Expenditures.

EDUCATIONAL DEPARTMENT.

24.-Revision of Official Organization and other matters.

For the establishment of a Practical Education Bureau and Library, in accordance with the revised organization of the Department, and to carry out alterations in the personnel and in the ranks of officials, an outlay of 30.563 pen was introduced in Class I. Ordinary Expenditures,

In view of the necessity for increasing the number of teachers and officers and their salaries, for the various government schools, and of increased expenditure consequent upon the increase in the number of students in each school, a sum of 258,835 ven was inserted in Class IV. of the Ordinary Estimates.

25 .- Reconstructions of Class-rooms.

Necessity having arisen for constructing class rooms for instruction in anatomy, pathology, and medicine in the Medical Section of the Imperial University, a gross sum of 414,600 yes, to be defrayed in six yearly installments. was set down in Class r, Extraordinary Expenditure, the amount for the 31st year being fixed at 9000 yen. The construction of increased class-rooms and workshops for the Tokyo Technical School necessitated an outlay of 254,765 yen, payable in five years, the rat installment for the 31st year being 30,000 yen, which sum was inserted in Class I. Extraordinary Expenditure.

A sum of 79.915 ven, to be defrayed in three pearly installments, was useded for the esta-blishment of a shipbuilding section in the Osak4 Engineering School. The first install-Osaka Engineering School. ment for the 31st year, amounting to 15,000 yen was inserted on Class IV. Extraordinary Expenditure.

26 .- Representation of Japan at the Fourth International Zoological Conneil.

In order to despatch commissioners to the Fourth International Zoological Council to be hold at Cambridge in September of the 31st year of Meifi, expenses amounting to 7,000 year required and the sum was inserted in Class VIII. Extraordinary Expenditure,

AGRICULTURAL AND COMMERCIAL DEPARTMENT. 27.-Revision of Official Organisation

The revision of the official organisation of the Agricultural and Commercial Department having led to the establishment of the Commercial, Industrial, and Marine Products Bureaux, in consequence of which alterations in official personnel and ranks became neces sary, the number of officers was increased owing to the expansion of both commercial and industrial affairs, an outlay of 45.512 yen expenses for the same was inserted in Class I., Ordinary Expenditure.

28,-Increase of Mine's Superintendence Offices.

The establishment of a new office for the above requires an outlay of 15,505 yen, and the item has been included in Class III., Ordinary Expenditures.

29 .- Inspection of Stud Sires and Silk Worm Eggs.

Owing to the promulgation of the Laws for the inspection of Stud Sires and Silk-worm Eggs, an expenditure of 114,507 was inserted in Class X. and Class XII., Ordinary Expenditures.

30 .- Encouragement of Deep Sea Fishing.

The establishment of the Law for the Incouragement of Deep Sea Fishing has necessitated a disbursement of 74,149 ven, and a vote therefor was included in Class XI., Ordinary Digitized by Google

31 .- The periodical inspection of Weights and Measures.

In order to undertake the inspection of weights and measures throughout the empire. in accordance with the Law for Weights and Measures and with Imperial Ordinance No. 116 of the 30th year of Meiji, it became necessary to make certain allowances to various local government offices. A sum of 392,070 yen for this purpose was estimated as a continuing outlay to be made till the 32nd fiscal year, the first installment, for the 31st year, be-146.720 yes, which was inserted in Class VII. Extraordinary Expenditures.

32.-Compensation for the prohibition of cutting trees in Preserved Forests.

Compensation being needed in regard to the prohibition of cutting trees in Preserved Forests, in accordance with the Forestry Law, an emimate of 4.530 yen was included in Class X., Extraordinary Expenditures.

33 .- Restoration of Government Forests in the Copper Mining District of Ashio.

The restoration of Government forests at Ashio required an outlay of 46,400 yen, which was inserted as a separate item in Class XI Extraorninary Expenditure.

34.-International Fishery Exhibition.

As commissioners are to be despatched to the above Exhibition to be held in Berlin in May of the 31st year of Mei/1, expenses to the amount of 15,632 yen are required, this sum, therefore, was inserted in Class XII. Extraordinary Expenditure.

35 .- Special Investigation of State Forests,

Expenses amounting to 45,297 yes for the investigation of the forests to be dispensed with by the Government were noted in Class XIII. Extraordinary Expenditure.

#### CHRISTMAS IN POOREST YOKOHAMA.

(CONTRIBUTED)

For this Christmas, we had to yen and some clothing contributed by kind friends of the poor; and a list of persons known to be in actual distress. Our Santa Claus spent half the money in a blanket and cotton flaunel cloth, and started. She visited first a blind man, formerly a teacher, whose wife, unused to manual labour, finds great difficulty in "keeping the wolf from the door;" their joy over the warm blanket and flannel was more than compensation for all the trouble, but she hastened on to where an old woman of seventy-nine, crippled with rheumatism, was lying in hopeless pain.

Next, to a poor, blind, old woman whose invalid son is in the charity hospital. She having no fire in her house, had started to find a warme place in the sunshine, but, having no one to lead her, had fallen and hurt her knee badly; she was suffering from the pain as well an from

the cold and hunger.

Another poor woman, not on the list, was found in the street, in very sail straits. Her husband, unable to pay his tent, had run away leaving her in delicate health and with a child of three to care for; the trate landlord refusing to let her stay longer in the house, she had left it for the streets, but a night out of doors had nearly been their death, and she was in despair.

The next was a poor widow with four children. Her husband, a jinrikisha man, had earned enough for their needs from day to day; but, in his effort to get enough shead for the extras needed in the New Year, he had run too bard; and died suddenly-of heart failure in December. She is earning six sen per day, and her little daughter of eight, three sen, embroidering bandkerchiefs.

The list included neveral others, a blind girl; an old woman descried by her grand-daughter; a scissors grinder and his wife, forced by his sickness to sell all their poor belongings; a rag-picker, whose eyesight had failed him; an old man, struggling hard to support his two old man, struggling nare to support the south British Insurance company, and an old man, helpless from theumatism—adheres to its partimilarly neat and serviceable Original from

were all remembered ; and it was worth a great deal, the acting Santa Claus declared, to bring a little joy into such poor homes. The gratitude of all, especially the poor women in the street, was almost painful; the rest of the money was spent in food and fuel; and in the

one case, in providing temporary lodgings. We feel sure that all who contributed in any way (the money was almost entirely given in the boxes kindly allowed for charity in the Grand and Club Hotels, in Nishimura's Hotel, the Station, and the Beverly House), must have found their own Christmas the sweeter for having done so; certainly we, who had the pleasure of seeing the needs and giving the gifts, voted it the very best Christmas we had.

#### CALENDARS.

The Nippon Yusen Kaisha's Calendar for 1898 is certainly "a thing of beauty." On the face of a neutral-tinted card of spacious dimensions we have an exceedingly pretty sea-scape in a fan-shaped frame, a circular medallion enclosing pink and white cherry-petals in a blue field, and a square calendar printed in white on a coffee beau ground. The heading consists of the company's title in English and Japanese under crossed flags, and the tail-piece, to use a technical expression, is a tastefully arranged statement of the services performed by the Kaisha's steamers, 74 in number with a gross tonnage of 210,000 tons. This is certainly the prettiest and most artistic calendar among the many that we have received this year. Mr. Ogawa, of Tokyo, who is responsible for the chromo-colletype, deserves the highest credit for the technique of the work. The design, we presume, is due to some of the Company's officers.

Messrs. Bagnall & Hilles, Importers of and Contractors for all kinds of Electrical Apparatus and Machinery, have sent out a calendar which is a very pretty specimen of designing. It is in the form of a Japanese Kake-ji, or scroll picture, the calendar being at the bottom, in a frame flanked by two puppies to typify the zodiacal relation of 1898. The name and description of the Firm occupy the centre of the scroll, and in the remaining portion pictorial medallious and plum sprays are gracefully disposed. The printing and lithographing have been done at the office of the Box of Curios, and they deserve unstinted praise. The designer is evidently a Japanese artist. He seems to have been a little puzzled about the tint and dimensions of the border-always a subject of perplexity-and we are not sure that he has entirely succeeded. But perhaps such a reflection is hypercritical, At all events, the ensemble is pleasing, and one is obliged to confess that the capacities of Tokyo and Yokohama for art work of this nature are thoroughly attested by the calenders of the Nippon Yusen Kaisha—spoken of above and Mesars, Bagnall and Hilles.

Although not belonging strictly to the cate-gory of calendars, Mr. S. Iida's decerative card for the New Year demands a word of com-mendation. Most, if not all, of our readers know the celebrated silk store in Kyoto called "Takashimaya," of which the proprietor is Mr. S. Iida; the store where so many beautiful ob-jects in the shape of embroideries, cut velvets, brocades and so forth are always to be seen, Mr. Iida's card, whereon, in the quaint phrase-ology from which English speaking Japanese find such difficulty in escaping, he "hopes you may have a Happy New Year and that all things may prosper to you," has for device a congeries of overlapping rectangular medallions of various sizes and various colours-red, yellow, blue, green, and white-, each enclosing an advertisement of his business, the whole set in a field of black profusely over-spread with clusters of cherry petals in silver. It is a gay and pretty conception, and we feel at ouce grateful and hopeful when we read the legend, "With many thanks for your past favours, expecting you for your future orders."

form of calendar, the characteristic feature of which is that it is made to look like a frame of solid leather supporting a block calendar in m silver case. These calendars, though the Company is kind enough to send out fresh company is kind edough to send out fresh copies every year, are, in fact, perennially useful week-days, numerals, and months being independently shiftable. The local agents are Messrs. Smith Baker & Co., and the Company, with a capital of £1,900 000, his a record of losses paid aggregating £2,982,725 since 1872.

The Calendar of the Lion Fire Insurance Company, of which the local agents are Messrs. Dodwell, Carlill & Co., is in the old familiar form, a magnificent head of the monarch of beasts overlooking a subscribed capital of £739,000.

The Royal Exchange Life, Fire and Sea Assurance Company is one of the veterans of its class. It was established in 1720, and it has paid claims totalling thirty-eight millions sterl-ing. Its funds exceed four millions sterling, ing. Its funds exceed four millions accoung, and the local agents are Messrs. Butterfield and Swire. The calendar is of simple but very tasteful design. A statue of the Queen occupies the centre, and is flanked by circular medallions, enclosing exterior and interior views of the Royal Exchange (where the Company has its offices), the medallions being framed with floral wreathes and arabesques which are led thence blended. These calendars bear eloquent testimony to the progress made in the art of decorative designing within the past twenty years.

#### VERNACULAR JOURNALS.

An interesting list of vernacular newspapers which circulate minimum aggregate of a million copies annually is given by the Japanese Statistician. A total sale of a million copies signifies a daily circulation of about three thousand four hundred. The list is this:—

NAME OF PAPER.	TOTAL ANNUAL SALES
	COPIES.
Yorozu Choko	24,458,240
Chuo Shàmbun	21.026.020
Shogyo Shimpo	14,704,355
Tokyo Asahi	
Miyaka Shimbun	10,926,077
Kokumin Shimbun	, 10,801,601
Yamato Shimbus

Shokyo Shimpo	1,447,533
Shōji	

The figures are in some respects surprising We can not tell how far they may be trusted.

#### EUROPEAN COALITION AGAINST ENGLAND.

Reuter sends the following to The Times from St. Petersburg, under date of Nov. 19th :--" Prince Mestchersky, managing editor of the Grashdanin, who lately visited Paris with the object of enlisting the support of French politi-cians and journalists in advocating the idea of a rapprochement between France, Russia, and Germany as directed against Great Britain, ad mits in a letter written to his newspaper that every one in Paris, without distinction of party, whom he addressed on the subject positively declined to lend countenance to any such scheme. Prince Mestchersky recognizes that his efforts have not met with a merely temporary check, and expresses his firm conviction that no rap prochement between France and Germany will be possible, even through the intermediary of

The foreign trade of Formosa, the Fiji says is increasing satisfactorily. Investigations made by the Governor-General's Office show the imports and exports from January to October last to have been as tollow :-

30th Years, soth Years, Increase, 

Thus the imports and exports for the 30th year amounted altogether to 21.812.939 other special occasions:—
yen, showing an increase of 4.832.913 yen, or Vessels of foreign style—From 10 a.m. to 4 28 per cent. over the previous year.

The increase of exports is chiefly attributable to six new ports being opened to trade, in consequence of which shipments of tice and lea have especially increased. The imports appear to have increased partly on account of the opening of the additional ports to special import and export and partly from great improvement in the export from China of cotton fabrics, pigs, kerosene oil, cut tobacco, opium, and lumber. The customs receipts have, to a certain extent, decreased, but if the import duty on opium be substructed from the amount the balance remaining, 611,748 yen, shows an increase of 111,870 yen over the previous year. The staple imports except rice and shirtings, are all on the increase, particularly Chinese cotton fabrics, pigs, cut tobacco, &c. In the staples of export a decrease is noticeable in camphor, sugar, and fruit, but rice and tea have largely increased. The export of the previous year.

The Chus states that at the meeting of practical business men held on the night of the 5th instant at the Mitsui Assembly Hall, Marquis Ito, in the course of his speech remarked :-Ever since my return from Europe last year I have been honoured with frequent invitations from the practical business community of Tokyo. But my stay in the capital having been very short, I was unable to fix a day for meeting them. It gives me great pleasure now to accept the cordial invitation of the practical business gentlemen, and to listen to their discussion of financial topics. While I was yet in retirement found the Cabinet resolved upon resignation, to my great surplies. I have in consequence received an Imperial message on the subject, and am exercising all my energy to obey it, I cannot as yet talk to you about all my thoughts and designs. Nor is it possible for me to furnish you with stories of my European trip that would prove of any interest. I have no lei sure to do this, and it is with great regret that I have to decline your request for a speech. Yet I have the plessure to say one word here in parting with Major Monzon, and request your attention to it. In my east trip to Europe in company with Prince Arisugawa, the country in which I first strived was Fisnce, from whence I proceeded to England. Returning again to France, I made a trip to lealy, Austria, and Belgium. In the course of these travels I entered thrice into France. Each time I was most hospitably treat d by the President, the Minister for Foreign Affaics, and other dis-I have also to remember that France is the centre of the fine arts and the financial administration of Europe. The Marquis then took cordial leave of Major Monzon.

The fees for apecial permission to land or ship goods, and for the special opening of the Custom House or its sub-offices in Formosa have

JAPANESE FACTS AND COMMENTS. ordinary and special days: - Vessels of foreign model - From 4 p.m. to 6 p.m. 30 yen; from 4 p.m. to 12 midnight, 90 yen; from 4 p.m. and after midnight, 190 yen; from sunrise to 10 a.m.,

Note.—This last provision, however, does not apply to cases when the House is kept open from the previous day.

Vessels of Chinese style-From sunrise to 10 a.m. and from 4 p.m. to sunset, 5 yen per hour; from sunset till sunrise, 7.50 yen.

Fees for special permission to open the Custom House or its sub-offices on holidays and

p.m., 50 ren; from 10 a.m. to 6 p.m., 80 ren; from 10 a.m. till III p.m., 140 ren; from 10 a.m. and after midnight, 240 pen; from sunrise

to 10 a.m., 40 yen.

Note.—This last provision does not apply to cases when the House is kept open from the

previous day.

Vessels of Chinese style. From sunrise till sunset, 7.50 yen.

The Fees for the discharge or shipment of cargo on ordinary days are calculated from sunset to sunrise, 3 yen per hour, for vessels of foreign style, and 1.50 yen for those of Chinese style. The fees on holidays are from sunset to sunrise, 2 yen per hour, for vessels of foreign style, and I yen and 1.50 yen respectively for those of Chinese style.

Since the Industrial Bank opened on August and up till the end of December, applications for loans poured in so continuously that the Bank found it impossible to comply with all demands, coins totalled 3.018.270 yen, indicating an its capital being insufficient. Great discrinicrease of 377.094 yen on the 1,641,176 mination was therefore made, only the most yen of the previous year. The import of coins trustworthy securities being accepted. Of the aggregated 5.507,486 yen, an increase of sum of 1,376.503 yen issued, 206.703 yen was 607,795. yen on the figures 4,899,690, yen for loaned to public corporations, 353,200 yen to criculturalists, and 816.600 years to desired. agriculturalists, and 816,600 yen to industrial companies. Loans which the Bank declined amounted to 2,708,888 yen, while further applications for 2.016,811 yes are still under consideration. Leans having been issued to the amount of 1,376,503 yes, the balance remaining of the paid up capital does not exceed 1,120 000 yen. Even this will be disbursed in loans within a few months, and then the Bank will be obliged to issue bonds. But there is scarcely any room for doubt, as the bonds are of 100 yen face value owing to the existing Bank regulations, that a widespread subscription is impossible. The regulations will therefore have impossible. to be revised to allow of the issue of bonds of 50 yen face value. The subscriptions for the first period will amount to two million ren, steps to of interest on loans redeemable at fixed periods will be nine per cent., and on loans payable in yearly installments eight per cent.

> According to the Jiji, the number of post offices throughout the empire (Formosa excepted) in March last year totalled 3,725; postal agencies and savings banks aggregated 551, making a total of 4 276. The average ares of each postal district extended over five square miles, comprising average populations of 9,988. Postal routes measured 12 748 rs, of which 11.769 rf represented ordinary roads and 979 rf railways, the whole distance being 14.736,139 ri.

Statistics published in the Nichi Nichi show that the amount of foreign and domestic loans tinguished personages. Nothing indeed was fine 1897 reached 638,733,500 yen, of which wanting in the way of my entertainment. I recollect, with deep gratitude, the rare hos pitality thus shown to me, and at the same time 572,582 yen. Loans to be raised during the raised from the 3rd year of Meiji (1870) till 318t fiscal year are estimated at 41,582,500 yen. and the amount to be appropriated for redemp-tion of bonds and payment of interest is 32 087,006 yen.

The scheme for the establishment of a Russo-Korean Bank was recently consummated and Russia, so long as the question of Alsace.

To House or its sub-offices in Formosa have the president is now staying in Soul to make Lorraine subsists, and this in spire of the hostility felt by a great part of the French public towards Great Britain."

The objects of the Bank, according to towards Great Britain."

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

loan in Russia for the benefit of Korea; to secure the management and control of the Customs tevenue, and of all other funds coming into the Treesury.

According to the Tekyo Shimbun convertible notes issued up to the end of last year reached 220 million yen, while the issue above the legal limit aggregated a little less than 50 millions. Compared with 198 millions issued at the end of the 20th year, the amount shows an increase of 27,880,000 yen, which clearly proves how brisk the money market was in December. On the 4th instant, however, the Nippon Ginko is reported to have received a million yen in repayment of loans, and a is expected that a gradual return of funds will now take place.

According to the Toket Shuthi (Statistical Magazine) income taxes received during the past ten years were as follow:—1887, 80,383,330 yes; 1888, 80 860,755 yen; 1889, 78,881.863 yes; 1890, 81,047.372 yeu; 1891, 82,059,320 yen; 1892, 83 453.130 yen; 1893, 91,313,444 yes; 1894, 99,470,716 yen; 1895, 107,553.679 yen; 1896, 127,250.758 yen.

The foreign trade of Japan for December last as compiled by the Finance Department is as follows:—Exports in December, 16,275.762 yen; up till November, 146,859.206 yen; total, 163,134.968 yen; imports for December. 19,170.103 yen; up till November, 200,130,665 yen, tasking a total of 219,300,768 yen. The aggregate total of imports and exports for December were 35.445.865 yen, and until November 346,989,871 yen, making a total of 382,435.736 yen. The excess of imports amounted for the 30th year to 56,165,800 yen, of which 2,894.341 yen represent the figures for December, and 53,271,459 yen the total up till November. The export and import of gold and silver aggregated 19,219,163 yen and 81,465,74 yen respectively, the excess of exports in December last having reached 5,854,180 yen. The excess of imports however, amounted to 68,001,730 yen up till November, increasing to 62,247,550 yen by the end of the month.

Investigations conducted by the Bank of Japan and published in the Tokyo Keisai Zasshi give the prices of domestic staples as below:—

(N. B.—In this calculation, prices of commodities in January of the 20th year of Meiji A (1887) are taken at 100). The appreciation and the commodities of the price of the commodities of the commodities

commodities in December last year exceeded 72 per cent, as compared with January, 1887, but a fall of 2 per cent, is noticeable as compared with the previous mouth. It may be worth while to give below the average values of commodities for each of the past ten years, and in each mouth of the 30th year:—

Avera	ge p ice.	30th year.	Averau	e price
1887	103	knuary		146
1888	107	February		147
1889	112	March		152
		April		
		May		
1892	115	Jane		150
		aly		
		August		
		September		
		"October "		
1897	161	November	46	174
1897		December	********	172

Prices last year had an upward tendency, the influences of the previous year being still powerful. Although they fell slightly in June and July, they again began to rise in August, cul minating in November. By December, however, a tendency to fall became apparent, and was regarded as a most pleasing phenomenon. Nevertheless, the volume of currency still continues to augment.

The Sun publishes the figures of rice production and the market prices during the past ten

The public, says the Nichi Nichi, were disposed to attribute the present depression in the financial world to three causes—the expansion of currency, the augmentation of Government undertakings, and the boom in industrial enterprises. Different opinions were expressed and different schemes for amelioration were proposed. The number of attisants or workmen of various callings employed on continuing works undertaken by the Government is reported to aggregate 38,840.003 for the 30th fiscal year and 37.790.016 for the 31st. If the working days of each labourer are 300 per year, the amount of wages to be paid will not fall short of 18,185,136 year for the 30th year, and 16,822,761 year for the 31st.

#### HIGHWAY ROBBERY IN YOKOHAMA.

A young man named Massey, a Syrian by birth, who arrived here by the City of Peking, was set upon by a gang of Japanese lootpads in Honmura, near the bridge by the Engine and Iron Works, on Saturday afternoon, beaten insensible and robbed of \$80 in gold. It appears that the young man entered an exchange shop in Honmura Road and changed some money, of which he put \$80 in a bandkerchief in his trousers pocket, while he had \$400 more in a belt cound his waist. It seems that he was watched coming out of the exchange shop by some roughs who followed him and after he had crossed the bridge they jostled against him and then set upon him with stones, rendering the poor fellow insensible. When he came to his senses he found that the \$80 had been taken from his pocket, but the \$400 in his belt was safe. He took a jinrikisha and proceeded to report the assault and robbery to the police, but was sent from one station to another until, accompanied by Mr. Scidmore of the U.S. Consulate, he went to the Central Station, where the matter is now being investigated.

The Nagasaki Telephone Exchange, now in course of construction at Deshima, will, the Nagasaki Shimpo saya, be open to the public in a pril next.

#### KOREAN ITEMS.

There was a rumour in circulation recently to the effect that the editor of the Soul Independent found himself in danger of being deported, or, at all events, compelled to abandon the field of journalism. His "suppression" was generally believed to be an outcome of Russian influence, for the Great Northern Autocrat is not always well disposed to "pestilential penmen." The rumour had no sequel. It expired quietly, and we remain to this day uncertain about its truth. But on examining the latest numbers of the Independent, we are struck by the fact that the tone of the paper has undergone a radical change. From time to time in the past we have commented on the extraordinavy measure of liberty enjoyed by it. Scarcely an issue lacked some communication or some paragraph laying grievous accusations at official doors or recounting incidents highly unfavourable to the reputation of the Administration. Sometimes, as we took occasion to remark, the limits of wise discretion seemed to be exceeded. The correspondence columns of the paper were thrown open without restraint to persons writing anonymously from the provinces, and bringing charges of the most injurious character against local officials of high rank. That sort of thing could scarcely be suffered patiently anywhere, and everybody must have been inclined to think that freedom of speech would have had a better chance of longevity in Korea if its youth had been less lusty and self-asser-tive. Still the Independent was a most wholesome and comfortable production, entirely free, so far as the editorial department was concerned, from every trace of malice or prejudice. But suddenly, as we have said, the tone of the paper has changed. From the four numbers now before us every trace of citicism, comment or reflection unfavourable to officialdom has been expanged. The alteration may be a pare acci-dent. We hope so. But it looks very much as though the editor's lease of journalistic life had been prolonged on condition that he exchanged his fine courage of outspokenness for the bated breath of a muzzled observer. That would be indeed a pity and a misfortune;

The Japanese residents of Chemulpo have obtained permission to extend the water frontage of their settlement 175 feet sea-ward, and it is thought possible that the bund of the foreign settlement may be made to match.

Mokpo does not seem to have attracted European or American enterprise as yet, but a number of Japanese houses are in process of construction there.

We learn from the Independent that of the 70 Korean youths studying in Tokyo, 24 have been required to return to their country, and the remainder are to continue their studies at their own expense, the allowance of 15 year monthly hitherto made to them by the Korean Government being withdrawn from the end of last year.

A Korean Privy Councillor has memorialized the Emperor to make Lady Om Empress, in consideration of her virtues and of the fact that she tecently presented his Majesty with a sun. The Emperor, like Simon the Cellarer, replied, in effect, that there was no burry.

The Emperor of Korea is receiving memorials advocating the capital punishment of Kim Yunsik, who was Minister of Foreign Affairs, and Ye Singo, who was Grand Master of Ceremonies, at the time of the murder of the Queen in 1895. Kim is said to have sent a despatch to the Foreign Representatives, announcing that the Queen had been deprived of her rank, and Ye is charged with having written the royal decree that reduced her to the level of a commoner. The two statesmen have been banished to Quelpart for life, but the Emperor seems uncertain whether they should not be decapitated.

will, the the public compiled rules and regulations for establishing post offices throughout the country. Important UNIVERSITY OF ILLINOIS AT

districts are to have a daily delivery, and less populated places will get their letters every second or third day. The magistrate of each district is to be post-master, and the head citizens are to do duty m postal clerks. There seems to be an artistic element of arbitrariness in the whole arrangement, for the rules direct that the head citizens are to be sent to already established post-offices to learn their duties, and no account whatever is taken of the wishes of the citizens themselves.

Robberies with violence appear to be rife in the neighbourhood of Soul at present.

#### CHINESE NEWS.

A Catholic Church of exceptionally imposing dimensions was opened on the 2nd instant at a place some eight miles east of Shanghai. The exterior measurements of the building are 216 ft. by 67 ft., with a transept of 129 ft. It is in the Gothic style, and the cost of building it was supplied entirely by M. Gouraud, whose brother is missionary of the district where the Church now stands. The ceremony of dedication was performed by Mgr. Garnier.

The Korean correspondent of the  $N_c C_c$ Daile Name writes :-

Among all the Advisers employed by the Korean Government the most remarkable mobality has been Dr. Philip Jaisolm, engaged in the United States for the high post he has filled. Dr. Jaisolm a mative-born Korean, being a member of one of allest and most aristocratic families of the Korean nobility. His Korean name was Sō Jaisolm, and he was one of the four loaders of the Progressive comp in 1884, which terminated so disastronsly for Korea and alt concerned. With Kim Ot-kinn, Pak Yōng-bo, and Soh Kwampom he fled from Korea on the failure of the émente and went to America where ability of a high order and admirable plack carried him over all difficulties. Becoming a naturalised citizen of the Republic, he secured a good classical and scientific education and graduated as a physician from Johns Hopkins University and enjoyed a lucrative practice in Washington at the time of his call to his native land. Aside from his past as Adviser to the Ministry of Agriculture, Commerce, and Public Works, he has edited on behalf of the go d of Korea the well-known paper The Independent. In this paper he has fearlessly recorded the course of events, and especially has not failed to raise his voice against every deed of cruelty and oppression which came under his notice. One man who Among all the Advisers employed by the Korean voice against every deed of cruelty and appression which came under his notice. One man who came in for the leaders editor's ontspoken rebuke was Cho Pyeng-ik, who is now at the head of everything in Korea. It is now Mr. Cho's innings and as Minister of Foreign Affairs Mr. Cho served notice on the American Minister that as Dr. Jaischu had not been recommended for his post by the U.S. Government, Korea would dispense with his services. To this Dr. Allen replied that by the U.S. Government, Roze would adjusted that the U.S. Government never recommends its citizens to other Governments for employment (an utterance of significant bearing to view of the actions of our friend from the North), and that therefore no cause exists for the dismissal of Dr. Jaisobin. However, Dr. Jaisobin's contract having only eight years yet to run, possibly the Korean Government could induce him to resign by offering him the salacy in full for his contract. This action has rather non-phissed Mr. Clin and nothing more has been heard yet as to what they will do. I think, however, they will pay the money in order to get rid of Dr. Jaisobin, for as a Korean said to me to-night:—" Jaisobin fets in too much light on the way things are going to suit the Emperor, Speyer, or Cho."

A correspondent of the N. C. Daily News, writing from Post Arthur under date of Dec. 20th, says :-

It is not accurate to say that the Russians have taken Port Arthur. Russian ships are here, one in dock coaling, one auchored in the harbour, two anchored outside, and two at Talienwan. Three altogether have coaled here; they are encroaching little by little; at first they coaled from outside, but now they go inside and lave also anchored in the harbour. The Russian Admiral told the Chinese General here to put all the Chinese menodivar, of which there are only four. in the the Chinese General here to put all the Chinese the Chinese men-of war, of which there are only four, in the mouth of the harbour, as the Euglish were coming with a fleet to take Part Arthur; and this advice was followed. H.M.S. Daphne came in a day or two after this just to see what the Digitized by

of the Immortalite and Iphigenia.

of the Inmortalité and Iphigenta.

The Russians have one vessel in the dockyard here being repaired by the Chinese workmen. They are sounding all round the harbour, and putting out small marks. All telegrams they send go through the Chinese General here, but the Russian Military Attaché came here the other day in a small boat, and went back again to Chefoo; he returned yesterday by the Petoing, which called in here on purpose to land him, and he is still here, but its ofer no Russian soldiers have arrived. The Russian naval officers are very friendly with the Chinese, constantly inviting and entertaining them on board the Russian ships; but I fancy the Chinese see through this profuse contresy. If an Englishman goes on shore, he is shadowed everywhere by Russian officers. A China Merchauts' steamer called in here the other day, two of her passengers came on shore for a day, two of her passengers came on shore for a stroll; they were followed everywhere by two Russian officers until they returned on board their vessel. The Russians tried to get the Chinese General to issue an order that no Englishmen would be permitted to land here. I forgot to mention that the Russians are amount Talen. women be permitted to said need. It to got to mention that the Russians are surveying Talien-wan, with the reported intention of making that their winter anchorage, but there are no signs of their leaving here yet.

#### THE RECENT BAZAAR IN TOKYO.

We are asked to state that the sum taken at the Ladies Bezaar recently held in the Shorei-Kai Hell, Torano-non, Tokyo, in aid of the St. Hilda's Mission was 887.645 yen, the largest amount hitherto realized. The money was distributed im follows :---

The Members of St. Hilda's Mission beg to offer, through these columns, their hearty thanks in all who so kindly assisted at the Baznar.

#### SCREENS.

From a column of The Times wholly devoted to advertising the goods of the great furnishers and upholsterers, Messis. Hampton and Sons, we cut this :---

Screens, carved and inlaid mahogany, 3-fold,

We suppose that a screen which can be sold in London for 10/6 must have been purchased in Japan for not more than 2\frac{1}{2} yes. That is something to think of. A four-fold screen, covered with some kind of black silk on which a design is embreidered in gold, for 21 yen!

#### NEWS OF THE WEEK.

The Rev. Sidney Swann, formerly Chaplain of the Episcopal congregation in Kobe, has been appointed Vicar of Blackford, near Carlisle.

Commodore Dewey, the newly appointed Commander-in Chief of the American squad-ron in the Far East, hoisted his pennant on board the flagship Olympia on Jan. 3rd.

From the latest pension figures, the New York World calculates that one in every seventy of the U.S. population is now on the pension roll. "That is to say, of every fourteen families in the United States one family is partially of wholly supported by the Government.

The Pacific Mail Steamship China, on her last voyage from Yokohama to Honolulu, made

knots; 13th, 401 knots; 14th, 400 knots; 14th, 400 knots; 15th, 404 knots; 16th, 400 knots; 16th, 160 knots,-3,393. Average, 174 knots.

It is not improbable, says the N.-C. Daily News, that Mr. James B. Angell, formerly Commissioner-Plenipotentiary III China, and now U.S. Minister to Turkey, will be transferred to Peking as U.S. Minister, in place of the present nomines, Colonel Bryan.

We understand that, subject to audit, the Hongkong and Shanghai Bank will pay a dividend of £15/-per share, and add to Reserve Fund \$10 lacs. (one million), and carry forward to next half year \$3 lacs. The Reserve Fund will then stand at \$80 lacs. (dollars, eight million).

On Sunday morning an alarm of fire in the Settlement was raised at about 5 o'clock and the bells rang out, but upon Superintendent Morgin, with a party of firemen, proceeding to the reported scene of the outbreak-No. 202 Settlement-it was found to be a false alarm.

The official trial trip in the new Nippon Yusen Kaisha steamship Inaba Maru took place on Wednesday aftenoon, under the command of Captain Bainbridge. The steamer made three runs up and down the Bay, the average speed being 14.211 knots an hour—considerably above the maximum officially required.

In H.B.M.'s Court at Kobe, on the 11th inst., before Mr. J. Carey Hall, Consul and Judge, D. Kay, a seaman belonging to the ship Peter Iredale, was charged with refusal of duty, and Mr. Muxwell, boatswain of the ship Puritan, with absence without leave. Both men were convicted of the offence charged and sentenced to two weeks' imprisonment.

The personally of Sir Rutherford Alcock, K.C.B., who died on Nov. 2, was sworn at £8,544 tts. rd. His widow, Dame Lucy Alcock, in the executive of the will, power being reserved to grant probate also to Mr. Edward Acres Bagshawe. Sir Rutherford Alcock left all of his real and personal estate to Lady Alcock absolutely, or, in the event of her death in his lifetime, then in trust for his stepdaughter, Amy Hentietta, wife of Sir Lewis Pelly.

In connection with the death of Sir William Maxwell, Governor of the Gold Coast, it is strange to note, says the Singapore Free Press, that all three sons of the late Sir Peter Benson Maxwell, have died within a year. First Mr. R. W. Maxwell, in England, then immediately afterwards Mr. F. O. Maxwell (of Sarawak), in Japan, and now Sir William Maxwell, the last sarvivor. Sir William Maxwell leaves a widow and a family of seven sons.

A few months ago, a party of Burmese rebels, headed by a Buddhist monk, attacked the fort at Mandalay in Upper Burms, and committed murder in the insurrection, which ended in the death of their lender and several of his follow-Most of the rebels were captured. trial took place at Mandalay, last month. Judgment was delivered there on the 14th December. Out of the fourteen accused, thirteen were convicted of waging war and of murder. Twelve were sentenced to death, and one to transportation for life; one was acquitted.

The Sumatra, from Hongkong, reached London on 28th Nov. with Mrs. Carew. She was in charge of ex-Sergeant Phelps and a wardress. The convict was allowed a certain amount of freedom on the voyage, and treated as a saloon passenger, but was not allowed to speak to other passengers on board, and was, of course, kept under strict surveillance. She was in fairly good health, but was placed in a special cell in the female infirmary of Hollaway prison, where she was to remain about a week, when she was to be removed to Aylesbury Female Convict Prison.

systems with a view to postposing the operation of the new Treaties. It need scarcely be said that there is no truth in this. The paragraph having been brought to the notice of the British Consul at this port, the Chronicle has his authority for stating that it is a falsehood utterly without foundation. We (Japan Mail) should have deemed such a caused scarcely worth con-

Sir Robert Henry Meade, whose death is announced by Renter, had only recently retired from the position of Permanent Under Secretary for the Colonies, a post he had held since 1892 He was Registrar of the Order of St. Michael and St. George, being appointed in 1877. Previous in that he was an Extra-Groom-in-Waiting to the Prince of Wales. The late Under-Secre-tary was born in 1835, being a son of the third Easl of Clanwilliam.

Private advices from Hanoi, the China Mail says, state that the country round Hanoi is in a very unsettled condition. Chinese merchants from the surrounding districts are afraid of travelling to the capital, and there is a partial stoppage of trade with the provinces. Merchants will not order goods in large quantities; and appear to be waiting for the restoration of order and the reassertion of the power of the Executive. Small hands of subbers are still taiding the country, but the large predatory gange have been broken

The following paragraphs relating to Japan and Hawali appear in President McKinley's latest Message to Congress:---

latest Message to Congress:—

" the questions which have arisen between Japan and Itswaii by reason of the treatment of Japanese labourers emigrating to the island under the Hawaiian-Japanese convention of 1883 are in a satisfactory stage of actifement by negotiation. This Government has not been invited to mediate, and, on the other hand, has acught so intervention in that matter further than to evince its kindliest disposition toward such a speedy and direct adjustment by the two sovereign states interested as shall comport with equity and honour.

"It is graitifying to learn that the apprehensions at first displayed on the part of Japan leat the cessation of Hawaii's national life through amorxation might impair privileges to which Japan honourably laid claim have given place to confidence in the uprightness of this government and in the sincerity of its purpose to deal with all possible ulterior questions in the broadest spirit of friendliness.

A sad tragedy took place at Talay Baildings, Shanghai, on January 6th, when Mr. T. Eysel, the representative of Mesars. R. Telge & Co., shot himself through the head with a rifle. deceased, says the N.-C Daily News, and been peculiar in his manner for some days, and noticing that he seemed worse on the 6th inst., a gentleman connected with the firm went III consult Mr. Eysel's ductor, and on returning shortly before nine o'clock found the deceased atting in a chair in his private office, dead. Beside him was a newly discharged riffe, with which he had blown out his brains. Mr. Eysel had for some time been suffering from delusions, imagining that he had insulted people, and allowed this to prey on his mind to such an extent that it ended in his taking his life.

The Methodist General Missionary Conference Committee, which met in Philadelphia, appropriated for the work of 1898 the sum of \$1,129.910. Of this sum \$577,480 was given to foreign missions, divided as follows:—Ludia, \$129.066; Malaysia, \$9.100; Germany, \$36,-264; Switzerland, \$7.395; Norway, \$12,581; Sweden, \$16.490; Denmark, \$7,483; Finland and St. Petersburg, \$4,585; Bulgaria, \$9,000; Italy, \$40,438; South America, \$42,436; ern South America, \$28,812; Mexico, \$48,015; Africa, \$14,250; China, \$110.590; Japan, \$47,000; Koren, \$13,975. For domestic missions, \$151,876 was appropriated for non-English-speaking missions, \$7,411 for American Indians, \$283,143 for English work. To miscellaneous objects \$110,000 was devoted.

A telegram appearing in the Singapore Free Press, under date, Labuan, December 23rd, gives further particulars of Mat Salleh's latest exploits. The news runs :-- "A special expedigives further particulars of Mat Sanets states exploits. The news runs;—"A special expedition has been despatched by the British North Borneo Government against Mat Salleh, the Japanese on the advisability of suppressing the ab-Original from a nation peculiarly con the deviability of suppressing the ab-Original from a nation peculiarly con the nation peculiarly con the advisability of suppressing the ab-Original from a nation peculiarly con the advisability of suppressing the ab-Original from a nation peculiarly con the nation pecul

along with Messrs. Hewen, Percy F. Wise, and Geo. Ormesby. The force attacked Mat Salleh's jungle fort on Monday, the 13th December. The attack, which was delivered under heavy fire, proved unsuccessful, and the expedition had to retire, with serious loss. Adjutant Jones was killed during the attack, as were also six of the Sikh Military Police. Seven Sikhs were wounded. Mr. Hewett has returned, seriously ill." A telegram that appears in the N.-C. Daily News under date Singapore, Jan. 4th says: Limbawang, on the Pedas River in British North Borneo, was attacked and captured on the 29th of December, One Sikh was killed, H.M.S. Plover, Capt. de Horsey, has been dispatched to North Borneo.

There was a full attendance on Fridey evening at the first meeting of the year of the Yoko hama Literary Society at Van Schaick Hall: The programme included a pianoforte overture, one of Schubert's marches, by Mrs. Doering and Mrs. Thorn; a hoat song (Neid-Doesing and Mrs. Thorn; a hoat song (Neidlinger) by Mr. Hayward; a plano solo by Miss. Orth; two German songs, Schubert's "Unguld," and another, by Mr. Seel; two songs by Mrs. James Walter, "The Holy City" (Adems) and another; a duet for plano and violin, Grieg's sonata, by Mr. Mason and Mr. Poole; a cello solo by Mr. Schmid, and three recitations by Miss Schereschewsky—Long-fellow's "King Robert of Sicily," "The Tar Baby" (Joel C. Harris), and "Never mind Miss Lucy" (Anon). All the items were well received and applauded, several of the numbers eliciting encores. eliciting encores.

#### CORRESPONDENCE.

#### THE JAPANESE "SOCIAL MORALITY" QUESTION.

TO THE EDITOR OF THE "TAPAN MAIL"

Str. - A somewhat different phase of this subject having cropped up again in a letter and leader in this morning's Mail, will you allow me space for a few remarks bearing more especially upon the geisha subject, and its bearings upon the matters under discussion.

I can quite believe that, as stated in your leading article, the Geisha has more sides than one to her character according to circumstances, but I can also hear witness to the fact that, as you say, can also hear witness to the fact that, as you say, her performances, before a respectable audience are such as no lady need object to witness. I have had many opportunities of being present at geisha performances at the Maple Club in Tokyo; at the Miyado-Odori exhibitions at Kinto, and, even in the Ise Ondo dances at Yamada, which although given by the inmates of an establishment whose business I need not particularize, never

winds business three not particularize, never exceeded the bunneds of propriety and decourse. Would that the same could be said of the theatical and music half exhibitions of my own country! On one of my visits home! accompanied a young Japanese to a Melbourne theatre who wished to compare a foreign play with those of his own country, and as it mattered little what was the play, seeing that the greater part would be as unintelligible to him as is a Japanese play to the average foreigner, the selection was made more with the view of showing him the handsomest and most representative building in its interior decorations, than by referring to the programme for the night The play happened to be the comic opera of "Paul Jones," and whether some years 'te-idence in Japan had dulled my recollections of the ballet of comic opera I cannot say—but the I do know, that when the actrees who personated "Taul Jones" and her attendant ballet toope came on the stage shamelessly clad (or rather unclad) in about as much attire,—in addition to their flexis coloured tights, as is worn by the ordinary Japanese coolie in summer weather when pursuing his laborious work—then limbs and busts rounded by padding to the extremest point of voluptionsness,—I felt positively ashamed at having accompanied the young Japanese to such a spectacle, and could not have consequently to the contraction of the properties of help speculating on what thoughts and opinious on foreign ways must be passing through his mind, though hidden behind the impassive features of a ative of the East! Often as I had attended similar exhibitions in

the company of my own countrymen, I confess I never before felt such a keen sense of humiliation

every facility to Japanese heathen propagandists invading English-speaking countries, and inveigh-ing against the modern ballet girl, who also, like her sister in the East, plays more parts than one in the pussuit of her vocation. But let us hear in mind that when the Japanese geisha and the foreign ballet gift are alike suppressed, the jeunesse dors of both the East and the West will find their equivalents in some other way, for human nature will over be the same, so long as the world lasts. Presoning that your correspondent of the Hiogo News is a Missionary, and therefore probably an American, I would suggest to him, on his next holiday visit to his own country, to go through a course of Comic Opera at the principal cities in the States, where these plays are reproduced in precisely the same style as in England and Australia, and I think be will be more therefield than he has ever been at a Japanese find their equivalents in some other way, for human duced in precisely the same style as in cognition and Australia, and I think be will be more horrified than he has ever been at a Japanese hotel, and as I said in my last, will find plenty to occupy him at home, without going further afield.

In all probability, the missionaries who come to Japan, and express themselves so shocked at the immosalities of the Japanese, have lived in such a religious atmosphere hefore they came to this country, that the inconsistent indecencies of the amisements of Western life, as exhibited by the stage and elsewhere, have not been so forcibly brought under their notice as are the corresponding amisements of the East when they come here, and they forced that have not the corresponding amisements of the East when they come here, and aminements in the mass when they come nere, and they forget that many of the customs to which they take such exception here, have been handed down through centuries makered, while ours, of the nature referred to above, have been growing more glaring during the last few decades, in pandering to the deprayed tastes of a play-going public.

For I can remember the time when actresses playing boys' parts, as Rosalind in "As you like it," and others, and ballet dancers, never wore their skirts even as high as the knee, as may be verified from any old prints of celebrated actiesses and public danseuses of 50 years ago; whereas now, the skirts themselves have disappeared inch by such, until nothing has been left but a six inch feill; yet the foreigner looks on unshocked while railing against the modestly clothed geisha; and so long as such exhibitions are sanctioned by the consor of plays, and upheld by the patronage of a tently expect them to reform their national annexements?

While giving the missionaries every credit for being actuated by high motives in their afforts for the Japanese, the objection raised by those who take a common-sense view of the matter is that they undoubtedly do-unintentionally perhaps—(or if intentionally, as a means to an end) mislead the Japanese by concealing from them the fact that the very vices they wish them to amend, exist far more prominently in Christian cities than in their own, though practised in a different manner—thereby facilly leading them to infer that the people of Christian countries must be leading moral lives, because they profess the Christian

I have often been struck by the evident surprise I have often been struck by the exitient surprise manifested by notrawelled Japanese when spoken to of the iniquities going an in so-called Christian cities, and they have remarked, "Why, we never hear this from the missionaries—we thought all Christian people were good!" And by the Japanese that have travelled I have been told that when they shifted England. japanese that have travelled I have been told that when they visited England, or America, or wherever it might be, the same vices and crimes were as rife there as in their own country, and that for their part, they could not see much difference between the two.

Therefore I still maintain that the attempt to therefore I still maintain that the attempt to improve or after Japanese morality by the introduction of Christian doctrine and precept, will not result in anything but the failure which recent developments of Japanese scutiment and opinion are undoubtedly proving it to be, so long as these people can go almost as they are doing, with eyes to observe, early to listen, and brains where with to four indowers and or second to the second or and the second or any to the second or any to the second or and the second or any to the seco wherewith to form judgment, and can come back and tell their country-people of the great incon-sistency between Christian morality as taught by precept and the actualities of life as winessed by them in professedly Christian communities.

When the missionary propagandists can point to a single European city of ordinary dimensions that is perfectly free from the objectionable ele-ments they find in Japan—then, and not fill then, can they use it as a model for imitation by the Japanese; but mult they can do this, they are only laying themselves open to invidious crit Oriental! from a nation peculiarly competent to push such to dictate to the criticism to its extremest limit.

E. S. P.

#### LAND AND FOREIGNERS.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir, - In an article of the 5th of Jan., the Kobe Chronicls tries to refute my statement made in your paper that "a right of superficies may be acquired by foreigners not only for fifty years, but acquired by foreigners not only for fifty years, our for any term convenient to the parties concerned," but the arguments which it advances are quite untenable. Laws are generally written in such a way that a certain amount of logical reasoning is required to understand all their bearings, but for the point ed to understand all their bearings, but for me point in question the amount need only be very small, only one must not expect the Japanese to bring their laws into an English shape, especially as the English juridical system is widely different from that of all other civilised nations and appears—founded as it is on special national characteristics. to be unfit for adoption by another nation.

The first argument of the writer of the Kobe Chromicle is that "the right to make an agreement relating to a superficies rosts not on any definitive relating to a superficies rests not on any definitive provision in the Japanese law to this effect, but on the fact that there is no provision specially restricting the term." Now the Japanese law says that a right of superficies can be established by an agreement between the owner of land and any other person, and that, if the parties have not determined the time of duration, the latter is fixed on application by the Court. Is not this a definite provision? Does not the law clearly and definitely point out where the right of superficies is limited as to its duration and where not? Is there the least difference whether one says:—"If the time is not fixed by the parties, it is fixed by the Court." or: "The time may be fixed by the parties, and in case they omit to do so, by the cont."? Equally untenable is the further objection of the write that Japanese Courts might apply the provision limiting the lease to twenty apply the provision limiting the lease to twenty years to the right of superficies also. I do not admit, as the writer supposes, that a Japanese Court might take such a position "with considerable show of reason and justice," but I contend, to able show of reason and justice," but I contend, to the tentrary, that such Count could only do so by flagrantly and wilfully breaking the laws of its own country. For even a man who is not a lawyer ought to know that a special provision given in regard to one institution cannot be applied to another and offerent one. To say that the right of superficies can only be acquired for twenty years, because such time of duration has been fixed by the law for a lawyer would be the same as to have a third her face. time of duration has been fixed by the law for a lease, would be the same as to hang a third because such punishment is by law provided for a murderer. Even the place where the two rights are treated upon in the Civil Code is different, the provisions on the right of superficies being contained in the Second Book, Art. 265-269, and the provisions on lease, or better on hiring of things, in the Third Book, Art. 603-622. The Second in the Third Book, Art. 60s-622. The Second Book treats of real rights i.e. rights taking effect pook treats or rear rights. Let rights taking elect against anybody, as ownership, lier, mortgage ster, and the Third Book treats of obligations i.e. rights only taking effect between the parties as sale, donation, bire and other contracts.

Under the new law a person who has become a holder of a superficiary right may require such right to be registered in the Land Register of the Court—not of the Kencho—and by this he will be-Comt—not of the Kencho—and by this he will become the free proprietor of all the buildings standing on the land which is the object of the superficies. As such he may sell these buildings, motgage them, let them to another person, and when he dies, they will be transferred to his heirs. Of course his right ceases when the time fixed in the contract has elapsed, but even then he is not ablied to large the buildings to the assure of the the contract has stapsed, but even then he is not obliged to leave the buildings to the awner of the ground, but may dispose of them as he likes, taking them off or pulling them down, unless the owner of the ground is ready to pay him at once their full value. So it appears that the right of superfices—chijo-keu—it is a very important, nay the most important, eight for foreigners, while the lease is comparatively of much less significance. A man who wants a country-house significance. A man who wants a country-house for some summers, or wants a few rooms to live in, will make a lease; a man who wants to build a large residence, or in establish factories, warehouses, etc., will make a superficies. Thus I was not at all—as the writer kindly puts it—in a "confusion of man," when I compared the value of a lease in Large with the in Garagan. Japan with that in Germany.

I have for a long time refrained from writing again on this subject after the experience which I again in this singlet and the experience which is had with foreign newspapers last year, when I published a treatise's containing all necessary information on the future rights of foreigners, but the time of the enforcement of the treaties coming

nearer and nearer, I believed it my duty as well toward Japan, in whose service I am, as to-ward the foreign residents in this country, to put ware the foreign restaems in this country, to put an end to the more and more growing confusion of public opinion on this special point. It is in the interest of Japan, hecause no foreign capital will come in as long as foreigners believe that the will come in as long as foreigners better that the right of keeping houses, factories etc., is limited to a short period of time. It is in the interest of foreign residents, because they are hampered in their future enterprises, as long as they do not know exactly how far their rights on land will

Whatever I have said on the right of superfices in Japanese law, is not a subjective opinion on a doubtful question, but a statement of a clear and firmly established fact, which should be acknowledged as such by the foreign press, as there cannot be an earnest discussion on a matter on which I know everything and the other party nothing. I freely say that I believe myself to be entitled to a considerable deal of gratitude on the part of fo-reigners in Japan for giving them information which henceforth may be worth thousands of dollars for many a foreign firm.

DR. L. LÔNHOLM.

Tokyo, Sili January, 1898.

#### FOREIGN MISSIONS.

TO THE EDITOR OF THE " JAPAN MAIL."

Sir,-When a late correspondent in your coltimus said that the consensus of public opinion on the subject of mission work was that the time and money expended would be more beneficially employed in the home countries of the missionaries, the Rev. Mr. Garst, in reply, stated that "as matter of fact, about 97 per cent, of all money spent in Christian work is spent where it is raised, the small sum of 3 per cent, seems little enough for foreign fields for us," How does this statement of the reverend gentleman agree with a paragraph in your columns of to-day, which says that "The Methodist General Missionary Conference Committee which met in Philadelphia, appropriated for the work of 1898, the total sum of \$1,129,910, as follows:—To Foreign Missions (giving each item in detail) \$577,580; to Damestic Missions (giving also details) \$552,430; for miscellaneous objects \$110,000?

I am, Sir,

ONE WHO WANTS TO KNOW. January 8th.

#### IN THE U.S. CONSULAR COURT.

TUESDAY, JANUARY 11TH.

#### J. L. MEYERS V. A. H. EMANUEL.

In the United States Consular Court before F 1. Gowey, Esq., Consul General and Judge, and Mesors. W. T. Payne, and A. L. Baguall, Associates, the case in which Joseph L. Meyers sies A. H. Emanuel for \$7,200, for alleged breach of continct, adjourned on the 21st ult., came an for bearing.

Mr. Uchiyama Rossetsii appeared on power of attorney for the plaintiff, and Mr. Scidmore for the defendant.

Mr. Uchiyama read the petition and answer which were as follows:—

In the Consular General Court of the United

States of America at Yokohama. Yokohama the 6th day of December A.D. 1897

Between JOSEPH L. MEYERS, of No. 41, Yokohama, Plaintiff,

A. H. EMANUEL, of No. 164, Yokohama, Defendant

To John F. Gowey, Esquire, Judge of the above Comt.

The petition of Joseph L. Meyers, the above named plaintiff, to this honomable Court showeth as follows:-
I.—The plaintiff as well as the defendant to this

petition are both American citizens and under the jurisdiction of this honourable Court.

purisdiction of this honourable Court.

Some time prior to the 7th day of July, 1897, the defendant represented to the plaintiff that he had entered into a partnership with one L. Mondan, a citizen of France, residing in Shanghai, to start a Grocery, Provision and Supply business, and made propositions to the plaintiff to enter his firm, and take charge of the shipping and Naws upplies besides making himself greater the Navy supplies, besides making himself generally

\*3.—On the 7th day of July, 1897, the defendant the Defendant had entered into partnership with E. L. Mondon, which latter and drew up an agreement setting torth the terms of the defendant denies.

3 Dr. L. Löndolm, The Japanese Civil Code. It is a superwent setting torth the terms of the defendant denies.

3 Defendant admits the statements made in the defendant admits the statement after having the third paragraph of the Plaintiff's petition.

been signed by the defendant in the name of Emmanuel, Mondon and Company, and in the presence of E. L. Mondon aforesaid, was thereupon confirmed by the plaintiff.

4.—The said agreement (a copy of which is hereto attached) was to remain in force for a period of three years, commencing from the 1st day of October, 1897, prior to which date the plaintiff was instructed to sever his connection with the firm of Carroll & Company, where he was then employed.

Carroll & Company, where he was then employed, 5.—Inmediately upon the signing of the agreement aforesaid, the plaintiff, relying thereon and in the performance on his part of the terms thereof, gave notice to Messrs Carroll # Company, and wrote to his business friends in America requesting their co-operation with the defendant's firm; and also save the defendant much perhaphs in and also gave the defendant much valuable inlormation as to the quality and stock of goods
required in Yokohama, and also agreed in endeavone to turn over to the defendant his agencies
for several American firms, such as Fleckinger's
Fenit Packing Company, the Pacific Meat Company, S. B. Hunkins, and the Walla Walla Flour
Mills, which he subsequently succeeded in doing.
At the same time, he also handed to the defendant
a private telegraphic code of the Pacific Meat
Co., which is still in the defendant's possession.
6.—On the 1st day of October, 1897, the plaintiff
entered the service of the defendant's firm, and
faithfully performed his daties therein, until he was
wrongfully dismissed from such employment by
the defendant. and also gave the defendant much valuable in-

the defendant.

-On the 13th day of October last, the plaintiff brought with him to the defendant's premises a Japanese merchant who was desirant of entera Japanese merchant who was desiruits of entering into a contract to buy soap, when one Edward Emanuel, who was in charge of the said firm during the defendant's absence at Shanghai, informed the plaintiff that before his departure for Shanghai, the defendant had instructed him to do no more business through plaintiff.

8 .- The plaintiff thereupon wrote to the defend-8.—The plaintiff the explanation of this order and atterwards from the same day until the 6th of November, 1897, when he was finally dismissed by the defendant, tendered his services to the defendant in pursuance of the said agreement.

9.—The plaintiff is ready and willing and always has been ready and willing to perform his part of said agreement, and to serve the defendant arranging the state of the said agreement, and to serve the defendant arranging the state of the said agreement, and to serve the defendant arranging the state of the said agreement, and to serve the defendant arranging the state of the said agreement, and to serve the defendant arranging the said agreement.

dant as required by the said agreement, and has tendered his services to the defendant in that behalf.

behalf.

10.—On or about the 6th of November, 1897, the defendant called upon the plaintiff and repudiated his agreement with the and plaintiff.

11.—In consequence of this the plaintiff or the 12th day of November last wrote to the defendant referring him to Article 12 of the agreement and on the strength of that Article requiring him to labout the matter to arbitistion. submit the matter to achitration.

submit the matter to arbitration.

12.—No answer being received to the above said letter the pisintiff on the 17th of November addressed himself to the Consul-General for the United States of America at Yokuhama and begged that gentleman to use his kind offices to bring about an understanding in the matter.

13.—At a meeting arranged by the said Consul-General between the plaintiff and defendant and which took place in his presence on the 22nd day of November 1897, the defendant finally re-

and women cook place in his presence on the 22nd day of November, 1897, the defendant finally refused to submit the dispute to arbitration or to come to any understanding whatsoever.

The Plaintiff therefore prays this Honourable

Court :

I .- That the defendant he decreed to perform the said agreement, according to the terms contained, or in default thereof that the defendant be decreed to pay the plaintiff 7,200 yen as com-pensation for the breach by him of the said agreement.

II .- That the defendant may be ordered to pay the costs of these proceedings and that the plain-tiff may have such further or other colief as the nature of the case may require and as to this Honourable Court may seem fit.

In the Court of the Consulate-General of the United States of America at Yokohama, Japan, the Ninth day of December, 1897.

between

Joseph L. Meyers, of No. 41, Yokohama, Plaintiff,

A. H. Emanuel, of 16t, Yokohama, Defendant,
The answer of the above named Defendant ec-

spectfully shows :- 1.-Defendant admits the statements contained

Defendant admits the statements contained in the first paragraph of the Plaintiff's Petition.
 Defendant admits the statements contained in the second paragraph of the plaintiff's petition, with the exception that the Defendant had entered into partnership with E. L. Mondon, which latter that part the Defendant that Defendant is the Defendant of the partnership with E. L.

4.-In answer to the fourth paragraph of the Plaintiff's petition the Defendant says:—That the agreement between the said Plaintiff and the said Defendant-copy of which is attached to the said petition-was only to take effect, as therein said petition—was only to take effect, as therein stated, upon the drawing up of a proper contract by Mr. Scidmore before the 1st October, 1897. That the Defendant did not instruct the Plaint ff to sever his connection with the firm of Carroll

5.—In answer to the fifth paragraph of the Plaintiff's petition Defendant says that he has no Plaintiff's petition Defendant says that he has no knowledge of the Plaintiff having given notice to Carroll & Co., as therein stated. Defendant believes that the Plaintiff wrote to his business friends in America as stated in the said paragraph. But Defendant denies that the said Plaintiff furnished him, the Defendant, with any valuable information as to the quality and stock of goodsrequired in Yokolama. And the Defendant denies that the Plaintiff turned over to him the denies that the Plaintiff turned over to him the agencies of the firms mentioned in said paragraph. But the Defendant admits having received from the Plaintiff a private telegraph code of the Pacific Meat Company, which the Defendant still

6.—The Defendant denies the allegations con-tained in the sixth paragraph of the Plaintiff's

7.- The Defendant has no knowledge of the truth of the statement contained in the seventh paragraph of the Plaintiff's petition, and, there-

fore, denies the same.

8.—In answer to the eighth paragraph of the Plantiff's petition the Defendant says that he admits receiving a letter from the Plaintiff of the nature of the letter mentioned in the said para-graph; but that the Plaintiff was not dismissed by the Defendant, for the reason that the Defendant had never perfected an engagement of the services of the said Plaintiff.

The Defendant denies the statement co tained in the ninth paragraph of the Plaintiff's petition,
10.—The Defendant denies the statement

contained in the tenth paragraph of the Plaintiff's petition.

II. -The Defendant admits the statement con-

12.—The Defendant admits the statements contained in the twelfift paragraph of the Plaintiff's Petition.

to the thicteenth graph the Defendant says that he attended the meeting, on the 22nd day of November 1897, before the Consul General, and was then disposed before the Constit General, and was then disposed to obtain an amicable settlement with the Plaintiff; but that the demands then and there made by the Plaintiff were so unreasonable that the Defendant could not acceed to them, and, therefore, withdrew, with the impression that the Con-sul-General was not disposed to give a decision as to the merits of the case. And the Defendant had the impression that the Plant II bad the intention to force him, the Defendant, to arbitrate the dispute in question before some person other than

dispute in question before some person other than the Consul-Greneral.

14.—And for further answer the Defendant says that the Plaintiff has not performed his obligations and duties under the terms of the said letter of the 7th July, 1897; and that the said Plaintiff has since the 1st of October, 1897, engaged in private business on his own account in competition with the said Paris. tion with the business of the Defendant, and has placed orders for goods with firms in Yokobama in violation of the letter and spirit of the said document. It was understood between the Plaindocument. It was understood between the Plaintiff and the Defendant at the time of making the said agreement, that the Defendant was about to enter into a partnership with Mr. E. L. Mondon, and that until the said partnership was fully confirmed the said agreement was to be held in a hey-ance. Such partnership has not yet been confirmed and the Plaintiff has received from the Defendant due notice of the fact. On the 2nd September 1897 the Plaintiff wrote to the Defendant in these 1897 the Plaintiff wrote to the Defendant in these words:—"I do not think that you want me in your business. If you wish it we will break the contract. From what you said I think you are sorry you went into it." On the 24th of Sept. 1897 the Plaintiff wrote to the Defendant in these words:—"Think you had better write me a letter and call the contract off and oblige." On the said 24th of September, in an interview between the said Plaintiff and the said Defendant in was agreed that the

said petition of the said Plaintiff be dismissed

Mr. Uchiyama then opened the case for plaintiff, relating the circumstances of the negotiations between the defendant and plaintiff which led to the contract between the two parties and the occurrences which followed the execution of the agreement, and then called the following evidence :

Joseph L. Meyers, the plaintiff, examined by Mr. Uchiyama Rossetsu—I havebeen a resident of Yakohama off and on for 29 years, and have been connected with the firms of Langfelt & Co., Yokohama and Kobe, Stobey & Co. and Meyers & Co., Yokohama. Shortly before the signing of the agreement with defendant I had some convention with him short a large agreement with defendant I had some convention with him short a large agreement. sation with him about a large grocery, ship-chandsation with tim, about a large grocery, ship-chandlery and liquor business he was going to start with Mr. Mondon, who was going to put in \$60,000 in goods, and \$15,000 in cash. He was himself to nut in \$25,000 in goods, and a bank overdaft of \$25,000. Mr. Thorn recommended me to go into the agreement saying that Mr. Mondon had a good business in Shangbai and was a good business good business in Shangbai and was a good business man. I would not have entered into any agreement unless Mr. Mondon was going to be in the firm. I was afterwards introduced to Mr. Mondon by Mr. Emanuel. They both told me they were going to enter into a partnership. In July I confirmed an agreement with Messrs. Emanuel and Mondon. The agreement was that produced (Exhibit 8, dated July 7th). The agreement was sent to me for perusal. A postscript was added at my request and the agreement was signed by Mr. Emanuel in Mr. Mondon's and my presence. Before that Mr. Mondon's and my presence. Before that Mr. Mondon's and bjected to the terms in the postscript for \$200 living expenses to be paid the postscript for \$200 living expenses to be paid the postscript for \$200 living expenses to be paid to me. Mr. Emannel held up a letter which he said was an agreement, between himself and Mr. Mondon. There was a lot of conversation about my severing my connection with Carroll & Co. I informed both Mr. Mondon and defendant that there was a remnant of goods at Mesars Carroll & Co.'s, on which I should get a portion of the profit when they were sold. I told Mr. Emanuel I would like to sell these goods before ordering any more of the same class of goods from America. more of the same class of goods from America. I offered the stock to Emannel, Mondon & Co., to take over. They did not accept the offer. There was nothing mentioned as to the amount that should be paid in by me as a sign of good faith under clause 11 of the agreement. I was to have 25 per cent, of the profits but not to share any losses. The \$200 a month was to be a guaranteed amount for thinks agreement. losses. I'm gao a monto was to be a guaranteed amount for fiving expenses. Immediately after the signing of the agreement I assisted both Mr. Emanuel and Mr. Mondon in making out their list of orders. Then Mr. Emanuel left for America. of orders. Then Mr. Emanuel left for America. In consequence of the agreement I gave notice of severance of my connection with Messes. Carroll Co. on the 1st Sept. to take effect on Oct. 1st. I had been with Messes. Carroll & Co. over two years. They financed my hasness and Inda one half the profits. It was a verbal agreement. When Mr. Emanuel left I wrote to all my agencies and informed them I had gone with Emanuel, Mondon & Co. asking them to continue their hasiness with me. I also asked Mr. Emanuel to call Mondon & Co. asking them to continue their linsiness with me. I also asked Mr. Emanuel to call on them while in America. I went to work for Emanuel & Co. on the 1st Oct., having left Carroll & Co. at the end of September. Mr. Emanuel had returned in September. During that mouth I wrote to Mr. Emanuel offering to cancel the agreement. I received no written cancel the agreement. I received no written answer but on the 24th Sept. there was a meeting at which I asked Mr. Emanuel to cancel the agreement, but he declined to let me off. My reason for desiring to caucel the contact was that I did not like the way things were going on. I had left my desk and office furnitine at Carroll & Co.'s as I had no office in defendant's premises but I went to the latter every day to do my business. Mr. Emanuel gave me as list of the goods he had brought from America, with prices, and I started soliciting business on same. I made several sales in Yokoliama and Tokyo. Mr. Emanuel told me he had wired Mr. Mondon to the effect that he was coming to Shanghai and Mr. Mondon wired back that if Mr. Emanuel did so, he, Mr. Mondon would go to Peking. Mr. Emanuel threatened to fix Mr. Mondon, I saw treuble ahead as the bank had shut down on Mr. Emanuel altered as the bank had shut down on Mr. Emanuel ment, but he declined to let me off. My reason ahead as the bank had shut down on Mr. Emagoods or money, and Mr. Emanuel appeared to be going crazy. There was a question as to Mr. Emanuel's travelling expenses to America. In November I received a letter from the Pacific ance notification generate with Mr. B. M. Mondon should be completed. These arrangements have not yet been completed. The Plaintiff has never furnished any security as contemplated in the said agreement, and the account of the said security has never been settled.

Wherefore the said Defendant prays that the Digitized by TOOS

November I received a letter from the Pacific Ment Company referred to Mr. Emanuel having written them about the agency. Emanuel having written them about the agency strip with one of the gentlemen, and then told me to return the samples.

no business on my own account after entering into the agreement with Emanuel, except in the case of the small remnant of goods at Carroll & Co.'s in which I was interested. On Oct. 13th I took a merchant, Mr. Montin of Tokyo, to Emanuel, Mondon & Co.'s to buy some goods. Mr. Edward Emanuel was then in charge, and he took me aside and told me he could take no orders through me, as his brother had left instructions with him to have nothing to do with me.

At this stage an adjournment was made for tiffin.

tiffin.

Upon the Court reassembling at 2 p.m. the examination of the plaintiff was continued:

I have never received any commission from the Pacific Meat Company on goods ordered for Emanuel, Mondon & Co. After the occurrence on Oct. 13th with Mr. Edward Emanuel I wrote to Messra. Emanuel, Mondon & Co. on the 13th Oct. on the subject. (Letter read and put in.) I got a receipt for the letter, signed E.E. and stated that the letter would be forwarded to Shanghai to Mr. A. H. Emanuel, as the firm of Emanuel, Mondon & H. Emanuel, as the firm of Emanuel, Mondon & the office as before and saw defendant when he returned from Shanghai. He told me to wait a tittle as he expected Mr. Mondon by the next boat. I wrote again on the 5th Nov., asking for a settle-I wrote again on the 5th Nov., asking for a settle-ment of account. I had received \$50 on account of October's salary. On the 6th Nov. I received a October's salary. On the 6th Nov. I received a letter from Mr. Emanuel, the only written reply I had received to my letters. In this letter defended renavment of the \$50 which he dant requested repayment of the \$50 which he referred to as a loan. In reply I denied having received any loan, but only \$50 on account of October's salary and expressed a wish to have the relations between us submitted to arbitration.

Cross-examined—I have no employment now. My business address is Carroll & Co., No 41. Since the 1st of October I have done a little meaning the control of the set of October I have done a little meaning the set of October I have done as the set

Since the 1st of October I have done a little melp Mr. Roberts to dispose of some of the remants of goods formerly referred to. One day I took a gentleman who wanted to hay some carpets, to Messes, Lane, Crawford & Co. I sold some of the goods from Carroll & Co., in which had an interest, to Mr. Pope. They were fruits. Emanuel & Co., had no fruits at that time. They had some on the way, but none landed, I sold some things to the Grand Hotel in December, for Carroll & Co. I have done no business with Ginsburg & Co. I have done no business with Ginsburg & Co. I have done no business with Ginsburg & Co. I have done no business with Ginsburg & Co. I have done no business with Ginsburg & Co. I have done no theo who are the agents of the Pacific Meat Co. in Yokolama now. It is pretty mixed. On the 9th Oct. I wrote to the Pacific Meat Co. but I am not sure whether I told them that I had not left Carroll & whether I told them that I had not left Carroll & Ca., though on the 1st Oct. I wrote telling them that affectly left them. I knew on the 7th July that acticles of partnership were to be drawn up between Mr. Emanuel and Mr. Mondon. I do not know whether such a contact was drawn up. You, Mr. Scidmore, told me you were going to draw up both contracts and that my letter of tract. Afterwards from the way Mr. Emanuel and Mr. Mondon acted I came to the conclusion that the contract would not be carried out. I never asked to have the amount of the sum I was to deposit fixed. There was no getting any explanation or arrangement from either Mondon, who was in Shanghai, or Emanuel, who was running about crazy. I remember Mr. Emanuel coming to my office and showing me a letter he said he had received from the Pacific Meat Co., he said he had received from the Pacific Meat Co., and saying he could do for me now. Another time he saw me at Carroll \(\bigcup \cdot \color \) for and called out to me "You—tricky—", immediately after running up the steps of Mr. Roth's office opposite.

Re-examined—The goods sold to the Grand Hotel and Club Hotel have been sold since the beginning of December. Of course I expect a commission on the sales.

To the Court-I sold a lot of groceries for Emanuel after October 1st. Mr. Emanuel paid me the \$50 on the 30th Sept. or 1st Oct., by

Mori Zengi, examined-I reside in Tokyo, Miori Zengi, examined—I reside in Tokyo, Ginza No. 1, and am a wholesale druggist. have known Mr. Meyers for about three years, Towards the end of Sept. or beginning of Oct. Mr. Meyers came to me soliciting trade for a from at No. 164, the name I forget. He showed me a sample of voap and left it at my house. Later on in Oct. I accompanied him to No. 164, with the idea of doing business. It was about the middle of Oct. I have two other foreign gentlement at No. 164. While I was there Mr. Meyers asked me to wait a little while, and he had some conver-

of doing business with him. About the end of September or beginning of Oct, Mr. Meyers told me of a change in his business arrangements. He told me he had changed from his formen firm and told me no list changed from his former than and had joined Rusaued & Co. and asked me to flour tinue my custom through him in the new firm. I did some business with Emanuel & Co. in October through Mr. Meyers. The hills for goods supplied from 1st Oct. to 1st Nov. amounted to \$125.

Cross-examined—I have paid a portion of the hills referred to.

bills referred to.

Kokawa Kitchitaro, examined, deposedhead clerk at the Nitso house. I have known Mr. Meyers for a long white. Towards the end of September or beginning of October Mr. Meyers told me he had joined the firm of Emanuel Co., and solicited business from me on their account, showing me their price list. After Oct.

through Mr. Meyers. Cross-examined--I only became buyer for the Niisa from about the middle of October last.

was banto before that.

Edward V. Thom examined—I am editor of the Box of Curios. I remember speaking to the plaintiff about the firm of Emanuel, Mondon and Co. I think I first told Mr. Meyers that Mr. Emanuel was going to form a partnership with Mr. Moudan and I advised him to apply for a position. I spoke to Mr. Emanuel about it. At first to be appeared to be averse to engaging, Mr. Meyers, but later on Mr. Emmunel said they night give him a position. I was not informed by Mr. Emanuel after his return from Asserica that the firm was after his return from America that the firm was formed. Mr. Homonuch instructed me to insert the advertisement in the Box of Curio of 2nd October. It was also by the instructions of Mr. Emanuel that the same advertisement under the name of Emanuel, Mondon & Co. was omitted in the next issue of the paper on 9th Oct.

Cross-examined—I was not, so far as I remember, instructed before the 2nd Oct. to remove the advt. It might have remained in by inadvertence, if it was the second insertion it ought to have

If it was the second insection it ought to have been left out. I concenber some talk about Mr.

been left out. I tensember some talk about Mr. Meyer's threatening to throw up his contract.

Beauchamp Roberts, examined—My firm is that of Carroll & Co., No. 41. Mr. Meyers was partner in the ship chandlery business of the firm for two and a half years. He received half the profits of of the goods he sold. It was a verbal contract, which was continued after my father's death. I which was continued after my father's death, I should have continued the contract had not Mr. Meyers asked me to cancel it. This was about the 1st September, and II was to be cancelled on October 1st. He left my from or the latter date and there were some goods in our firm at that time is which Mr. Meyers had an interest. Whenever these goods were sold from time to time Mr. Mayers would be entitled to his share of the profits. Mr. Meyers did not order any more of the same goods. After September 30th Mr. Meyers was not in any way concerned in our business except so far as the small remnants of stock were concerned. He kept a desk in a room in our premises but not in our office. He asked our permission, giving as his crasm that there was no room for his desk in Mr. Emanuel's place.

Couse examined—M. Meyers is not now in our employ. He has a desk in a separate toom, not in our office. He has sold some goods for us

recently.

recently.

Re-examined—Our firm are agents for the Pacific Meat Co. I believe Mr. Meyers got the agency for us. I have never been informed that the agency has been taken away and given to any anyone else.

At this stage the hearing was adjourned till 1 30 p.m. on Wednesday, the 12th instant.

## WEDNESDAY, JANUARY 12TH.

Alfred Henry Emanuel, the defendant, examined by Mr. Scidmore-We, Emanuel, Mondon & Ca., unade a provisional agreement that if the firm ever came into existence we should have drawn up a legal document with regard to the agreement with Mr. Meyers. We should then require a cash security from Mr. Meyrs, if the firm came into security from Mr. Meyers, if the frim came into existence. Mr. Meyers came to me, I believe, at the request of Mr. Thorn. He told me be knew all about the business and he thought be could so we out frim. To the first interview I opposed the engagement of Mr. Meyers and in the first instance should have required cash security. No partnership was ever consummated between Mr. Mondon and myself. No details for drawing up a deed of partnership between Mr. Mondon and myself, or an

told Mr. Scidmore I was rather put out that Mr. Mondon had not arrived in Yokohama to form the partnership with myself. At the time of drawing the contract with Mr. Meyers on the 7th July I told him I the firm of Brianuel, Mondon & Co. should come into existence the letter between us was only the outlines of a contract supposing the proposed firm should come into existence. I informproposed tim should come into existence. Informed Mr. Meyers right along of the true standing of affairs between Mr. Mondon and myself. On the 24th Sept. I had an interview with Mr. Meyers at the Grand Hotel, after receiving two letters from him asking me to cancel the agreement. Mr. Meyers referred to his letters requesting me to cancel the contract. I replied that as no ong me to cancer the contract. I replied that as no contract had ever been made these was no mecassity to discuss the point. He then asked how about Mr. Mondon, and I replied that nothing was settled about the pattership yet. He said if I was in a fix he would help me to sell the goods and I thanked him and told him I would give him buff profits a new notes he could obtain him half profits on any orders he could obtain for me. On the 30th Sept., I think, Mr. Meyers came to me and told me he had drawn \$150 through the Chartesed Bank on Mr. Mondon, and that the dealt had come back protested. He asked me to lend him enough money to clear himself with the Bank, but I told him I could not do so, but I he pane, but 1 to 10 the 1 could not do so, but 1 hearted him \$50. The money has not been repaid. Mr. Meyers went to Tokyo to sell some goods on half profits as agreed, and in the end of October, opon my refusing to pay him \$250 he said that onless I paid him he would join Mr. Pope. With the exception of goods sold to one customer to the extent of about \$250 hy Mr. Nevers, all the others were of about \$50 by Mr. Neyers, all the others were former customers of mine and my boy could have sold them as easily as Mr. Meyers. To giving Mr. Meyers credit for his half share of profits on sales Mayers credit for his half share of profits on sales he affected for me, including my own customers, his share would be in the neighbourhood of \$18. With regard to the advertisement in the Box of Curios I told Mr. Thorn to put in soything he liked, and I told him before the \$1.0 Cr. to take out the advertisement. He did not do so till after the 2nd. Mr. Meyers did not give me any substitute information me. walushle information as to goods required in Yokohama, nor make any arrangements as to the transfer of agencies. Praintif never entered my emplay. The only reason why I was disposed to come to some arrangement with the plaintiff was that I did not care to have my name licked with his in public. I havehad no difficulty in obtaining what accommodation I wanted from the Bank. Upon my return from Shanghai, about the 28th Oct., Mr. Meyers offered to work for me on salary and to find two securites. I declined his ı ffer.

Cross-examined-The agreement with Mr. Mey ers was understood to be pendant that partnership between myself and Mr. Mondon. There was nothing inserted in the agreement to that effect, because the letter was the outline of a that effect because the letter was the outline of a contract to be made only should the fluit go into existence. I signed it "moconditionally," I should required at least \$25,000 security from Mr. Meyers before taking him into our employ. The amount Ushauld was to be decided on my return from the United States. The agreement was only an outline of a contract to be made; the signature of Emanuel, Mondon & Co. was a facsimile of the signature to signed if the firm came into existence.

Mr. Uchiyama-As a merchant do you consider you are entitled to sign the name of a firm which does not exist? -- I can sign any name I like for

Mr. Uchiyama-I will leave that answer to the

Witness, continuing—I do not know whether Mr. Meyers would have had to give notice before leaving his former employ. My experience is that any one on monthly service out here goes and comes as he likes. Mr. Meyers got a loan of \$50 from me on Sept. 30th. He was to work it out in commissions. I did not think it necessary to in commissions. I did not think it necessary to get an I. O. Us from him for the amount. I cannot remember whether there were any witnesses present when Mr. Meyers offered to furnish two securities if I engaged him in my employ. With regard to the clause in the agreement regarding arbitration in the event of any dispute occurring it was intended to apply only when the legal contract was drawn up after the partnership was concluded. concluded.

Mr. Scidmore briefly addressed the Court for the defence, confining his arguments principally to the question of the damages and relief claimed partnership between Mr. Mondon and myself, m an agreement between Mr. Meyers and the firm were supplied by me to Mr. Scidmore as proposed, the arrangement between myself and Mr. Mondon never that in the damages he was alleged to have sustained, traving been completed. Between the 7th July and Oct. 1st, I had bever alimiter views with Mr. Scidmore dated 7th July and to the terms mentioned therewith regard to negotiations between Mr. Mondon and myself, and with regard to Mr. Meyers.

sent came into force, and on this point quoted. Chitty on Contracts " and other authorities.

Mi. Uchiyama, in summing up for the plaintiff, authmitted that it was unnecessary that a document should be drawn up by a lawyer to make it binding, provided the intention was proved, in which case even a verbal agreement was perfectly valid. In the present instance it was clear that defendant had understood that an agreement defendant had understood that no agreement had been arrived at and that plaintiff was to give notice to leave his former amploy to enter upon the new engagement. If was also clear from the wording of and the signature to the contract, which was effected in the presence of Mr. Mondon as well as plaintiff and defendant, that at that time at least there was an understandthat at that time at least there was an understanding of pattnership between Mondon and Emanuel, Abr. Emanuel had also at the same time held up a letter which he told plaintiff was an agreement of partnership between himself and Mr. Mondon, If no such pattnership was believed in at the time, a forgery was committed by the signature of the name of the firm which Mr. Meyers was induced to believe actually existed. There was no clause whatever in the agreement to the effect that it was morely a conditional contract, and there was nothing to show that it was ever intended to be conditional until the trouble occurred in September between Emanuel and Mondon. As laxe as the 23 d September defendant had refused to release plain-September defendant had refused to release plaint of from his agreement, and the same day had written to the Pacific Meat Company stating that Mr. Meyers was in his employ. With regard in the claim made by plaintiff, 7,200 yen, it was my the rate of \$200 per month, the minimum he was m receive for the three years of the contract. It was not usual in such cases to grant the whole of the claim put in, and plaintiff left it to the Court to decide what in, and plaintifi left it to the Court to decide what compensation he was fairly entitled to. Plaintiff had resigned a position in which he was getting a comfortable living on the representations of defendant, and was still out of employment. In conclusion, Mr. Uchiyama referred to defendantly statement that he would have required security of \$25,000 from plaintiff before taking him into his employment. This statement was on the face of it simply idiculous. Defendant knew very well that plaintiff was not in a position to pay down such a sum, and it could never reasonably have been expected from a salesman in the employ of the firm. the firm.

His Honour reserved judgment till 3 p.m. on Thursday.

#### JUDGMENT FOR PLAINTIFF

In the above case, adjourned from the 12th insta-judgment was given on Thursday afternoon by F. Gowey, E-q., Consul-General and Judge, as

This action is brought to recover damages from the defendant, A. H. Emanuel, for the alleged breach of a Cartain contract entered into on the 7th day of July, 1897, by and between the plain-tiff, Joseph L. Meyers and said defendant und a the name of Emanuel, Mondon and Company. By the terms and conditions of this agreement

plaintiff was on the 1st day of October, 1897, to plaintiff was on the 1st day of October, 1897, to enter the service of said Emanuel, Mondon and Company for a period of three years, to take charge of the goocety and slipping supply part of the business and devote himself to the interests of the bisiness and devote binness to the interests of said first in general. As may ment for such service he was to have 25 per cent, of the net profits and to be allowed to draw \$200 year per month of said profits for living expenses.

Plaintiff avers that pursuant to this agreement

Plaintiff avers that pursuant to this agreement he severed his business relations with another firm and upon the 1st of October last entered upon his term of service and the discharge of his duties under said contract and has ever since and date held himself ready and willing to do and perform his part as therein agreed by him; that on the 6th day of November, 1897, the defendant finally discharged plaintiff turn his service and refused to longer employ him, repudiating and agreement and declining to be bound by it.

The defendant avers that the contract referred to was simply a memorandum of an agreement

The defendant avers that the contract referred to was simply a memorandom of an agreement and was to take effect upon the drawing up of a proper contract and execution of the same before the 1st of October, 1897, and was to be field in ab-yance until a certain contemplated co-partnership with one E. L. Mondon was fully entered into and consummated; and that as such co-partnership was never parfected. was never perfected, the amount of the money de-posit plaintiff was to make as security for his good faith was never agreed upon, and said proper confaith was never agreed upon, and said proper con-tract never draws up and executed, plaintiff was never in the service of the defendant and con-sequently never dismissed from his employ, z.—The evidence submitted does not clearly

sustain the contention of either party. It shows

in our opinion, the following state of facts:
That at the time the contract referred to Original from

Digitized by Google

was entered into, plaintiff was in the employ of Carroll & Company, and in consequence of said agreement severed his relations with them and entered upon the discharge of his duties in the service of defendant on the 1st of October, 1897, and continued to present himself at defendant's place of business and to tender his services until on or about the 5th day of November last, when he ceased to so present himself and offer service, for the reason that for some days prior thereto defendant and his agent had refused to recognise him, and defendant had on said last date sent him a letter demanding the return of \$50, alleged to have been loaned to plaintiff, and threatening legal proceedings in the event of was entered into, plaintiff was in the employ threatening legal proceedings in the event of the same not being paid at once.

2.—That at the time said contract was entered into (7th July 1897) and up to about the 15th of October thereafter, the defendant expected and believed that one E. I. Mondon would become his cu partner in the grocery and ship-chandlery business, and up to that date he had declined and activated activities. paymers, and up to that the man decimed and refused to consider plaintiff a sepeated requests to have their agreement caucelled, and not until defendant became fully satisfied that his proposed partnership with said Mondon could not be consummated, did he decide that plaintiff was not in his

employ.

3.—Admitting the delendant's contention that 3.—Admitting the delendant's contention that the contract and upon was a simple outline or memorandum of the terms of an agreement thereafter to be draws up and entered into by the patties, the facts are that by reason of delendant's representation and actions plaintiff was induced to leave and surrender a business he was engaged in with a reputable firm, in order to enter defendant's employ, and that in consequences thereof he has been without nrin, in order to enter defendant's employ, and that in consequence thereof he has been without employment since the first of October last, and has been damaged thereby. Taking into consideration the sum of 50 yen heretofore paid by defendant to plaintiff, we assess the plaintiff damage in the sum of 650 yen.

Independ its tendered in favour of the plaintiff and against the damage to the role of 500 year.

and against the defendant for the sum of 650 yen and the costs of this proceeding taxed to him.

(Signed) JOHN F. GOWEY, Consul-General, Acting Judicially, We concur. WM. T. PAYNE, A. L. BAGNALL, We concur. Associates.

After the judgment had been delivered defend ant's Counsel gave notice of appeal,

#### LATEST TELEGRAPHIC NEWS.

(FROM THE "JAPAN TIMES.") THE SITUATION IN THE FAR EAST GERMAN DEMANDS AND CHINESE CONCESSIONS.

London, Jan. 6. According to official intelligence from Berlin, Germany has obtained the lease of Kiao-chou together with several square miles of territory, with liberty to erect buildings and construct defences, China ceding all sovereighty to the territory in question. The proviso is further allowed, that if Kiao-chou be found unsuitable, Germany is to be free to select another port, subject to China's appproval. Shanghai, Jan. 6.

The Chinese Government has acquiesced in Germany's occupying Kiao chou for the term of ninety-nine years, and the Emperor's sanction to it has already been obtained.

Following the example set by Germany, Russia has preferred a demand to China for a similar concession as to Talien-wan and Port Arthur.

FRESH LOAN PROPOSALS TO ENGLAND.

Fresh proposals have been made to the British Government to assist China to contract a new loan, and the Government is now considering the same. The Times in aleading article declares that Great Britain entertains no design of joining in any partition of China, but aims at preserving the Chinese Empire as a vast field for the

assistance being lent to China in view of the commercial advantages accruing from such a course, and cites the Suez Canal as a precedent.

London, Jan. 11. There is a growing impression here that the Government's intention is to lend the money direct to China, defraying the sum by the issue of consols, which course Parliament would be asked to ratify.

THE GERMAN-CHINESE NEGOTIATIONS.

Peking, January 9.

The Chinese Government has acquiesced in the following points in regard to the Kiao-chou negotiation, viz., to lease Kiaochou to Germany for the term of fifty years at a certain rent, to pay 200,000 taels on account of building a church, and damages not exceeding 10,000 taels each to the survivors of those that were murdered by the bandits. As to redeeming the cost which Germany has incurred on account of dispatching the warships to Kiao-chou no arrangement seems to have been made. The question relating to the concession for laying railways in Shantung will be reported on subsequently.

THE TERM OF THE LEASE.

Peking, Jan. 11.
The report previously published to the effect that Earl Li had informed the Japanese Representative in China that the term of lease of Kiao-chou was for fifty years, is proved to have been groundless.

RAILWAY AND MINING CONCESSIONS.

Peking, Jan. 12.

Germany has obtained the concession to construct railways between Kiao-chow and Che-nan-pho and to work mines situated within 3 Chinese miles along both sides of the route.

FUNDS FOR WEL-HAI-WEL

Ujina, Jan. 12. War funds to the amount of yen 101,500 despatched by the steamer Hino Maru to Wei-

down walls are being covered with clean new paper. Among our sailors, who are busy at the unaccustomed work, are shoals of Chinese work-men. As soon as the flouring of the nom is made good the sloves are set up and then the furnitare is brought in, and the whole is like a big ant-heap; and yet there is order and system, and and yet there is order and system, and it is wonderful to see the dirty sheds of the Chinese converted into respectable dwellings for Europeans. The largest building is what was previously the yamén of the Chinese General, an extensive mass of buildings in which the German administration is taking up its official abode. Through the door, painted with fearful mythical animals, leads into the hall, on the side of which are the guard-houses; after this a courty and in which the Commandatur is being installed, with extensive Commandateur is being installed, with extensive tooms for the Commander and contribute suc-buildings for the staff. The further court has been taken possession of by the Admiral in the same way. The pamén also furnishes room for the tele-graph staff, and a big hall has been opened as the graph staff, and a big hall has been opened as the Chinese office, with endless rooms for servants, washermen, and private dwellings for the general officers. Beyond, the hospital is being arranged, and, beyond this again, more contryards and gardens adoned with trees and fancy Chinese gardens. Although the buildings me arranged on a magnificent scale, yet decay is everywhere wisible. The mass of dirt is indescribable, and all this has to be carried out of the yaméns before Europeans date to make use of them. How very different is the theat of Chinese cleanliness from what Europeans expect to see under oriental magnificence! As to confurt it does not exist at all. Chinese officials live in hyuses which a German family would not even place their servants in. Rooms for the attendants are holes such as we would not stall our cows in. In the many villages in the neighbourhood which the many villages in the neighbourhood which I visited we were generally shown into the Hall of Ancestors, the whole familiare of which consists of a shaky table, a beach, and three or turn coffins piled one above the other. As to the private dwellings they are still worse off. As forme private themings they as and was our.

Coffins were used as backs for the hard seats whenever we had occasion to sit down. As some as the
dwellings have been conpentered and planked and
furnished with stoves the greatest discomfort will
have been removed, and the warm and comfort will
rooms be pleasant to look upon. Everything that rooms be pleasant to look upon. Everything that could be done has been done with the small means at command. The scenes that have taken place in the transformation of these buildings will be among the happiest temembrances of our camping in a foreign land. Notwithstanding the unfavour-able conditions the service goes its usual come; everybody does his best.

I remember going into the Eastern Camp, in

Tremember going into the Eastern Camp, in which the medical staff have their dwellings. The building was divided into three parts by two mind walls. On the right lived the physicians; on the left the official in charge who has the Unioese histores under his care. In the middle there was a small staff which occupied the greater part of the space. There was scarcely room for the physician to spread out his instruments. As I arrived the sick were conviting into the middle chamber. One was having his foot bound, another was having a wound in the bond attended to a another was having a known in tempera me taken by other was having a wound in the bond altended to; another was having his tempera ince taken by the doctor. Here was a Chinese official in charge, with the elder of the village. The physician was doing his work to undisturbed activity, and the Chinese took everything so quietly you might have thought that this had been going on for ever.

In a former letter I described the journey to Chino, which is the hardsomest town within the limits of our occupation, but the largest and must important town is Koan chon itself. The circuit of Chino word Kinocchon consists of two dependent

Chimo and Kan-chou consists of two dependent districts within one administration. The one condistricts within on animistration. The one contains some 1,000 villages and towns, and the other about 1,50. Several expeditions have already been sent in these places. The Admiral paid his visit to Riao-chou, of which the following is an account :-

Since the occupation of Ki in those Bay by the ships of the German squadron, the occupying to doops have been quartered in a Chinese camp at Taingtan at the moment is a scene of great activity. At the carpenters from the mensod was have been commanded to put the yamén and the forts in habitable condition. Beginning every morning at eight o'clock, carpenters plumbers, and workness of every kind go on until dack, and even late into the night. Papershangers and men working at the floors are busy. The broken-Since the occupation of Kim chon Bay by the

ceedingly faulty pilots. However, as the water rose the boat drawing the most water was able m rose the boat drawing the most water was able in proceed. In the how stood a sailor taking soundings, calling out the depth is we went along. "It mete," which made no rather nervous, as we knew the boat drew 1.2 metre. The pitotcame in for a few curses, which he fortunately could not understand. However, as the water rose so our spirits rose, and the voyage proceeded in the new deep and clear bed of the river up to Tahitao, past oumerous fishing boats, whose occupants looked on with asionished faces on the white boats and the peculiarly armed squadron. About midday we reached this place and landed. This was not easy on the muddy shore, but after half annot easy on the muddy shore, but after half an-hom's struggle the troops to the number of 250 men were landed and set in motion. A great men were landed and set in motion. A great crowd assembled in the village, who seemed only incited by curiosity.

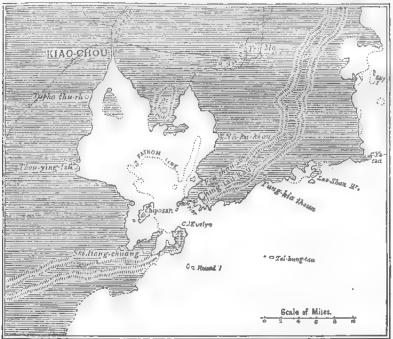

Taintao is a Customs station and during the shipping season from March to December is a very bisy place, the chief export being cabbage. Immunerable wheelbarrows packed high with cabbages and drawn by an oxor a mule were dragged over the rough streets which converge from every direction on the village. As soon as our proclamation was posted on the Customs station the proclamation was posted on the Customs statum the march in Kiao-clion was proceeded with, which was by no means pleasant, owing to the custom coads. We must give the Chinese credit for perseverance worthy of a better cause for the way they get their wheelbarrows over these abominable roads. A few small villages were passed, and at three o'clock the grey walls of the city of Kiao-chou came in sight. After a short journey over a road purely Chinese and bence cancely passable, the head of the marching column reached the gate of the marching column reached the gate and took possession of it without the slightest resistance. No signs of suddiers were apparent, and the population made a most peaceable impres-sion. After proclamations had been posted at the gate numerous readers crowded round, and the better informed read the contents to the more gate influenced read the contents to the most ignorant. Then our men proceeded to the city temple, which was taken possession of for the night's rest of our troops. Then the Almiral and Commandant made their call on the magistrate, which he immediately returned. The temple was very spacious and our men soon made themselves comfortable in it. The floor was covered with steaw mais and blankets taken out of our travelling bags. As it began to get bittely cold, hig five were burnt in each contravel, to keep up which everything combatilities was seized upon—everything that was not nailed too night to be too down. There sat our sailors round the bonfires eating their evening meal of bread, butter, and couned beef, and all seemed to enjoy themselves intatensely. A priest was soon dug up and ordered to keep hot tea going all night, which was a great comfort for our men. These pressant camp fires were the centre of groups of officers, non-commissioned efficers and the crackling fires and taking over the events of groups of officers, non-commissioned efficers and the crew, all at their ease among each other round the crackling fires and talking over the events of the expedition. Then a soldiers' song was song, in which all joined. Among the foreigners a long white-hearded priest moved round with his jug of hot tea, and accepted the chaff of the intruders with great complacency. At last the songs died down; a few groups still talked on, and then each down; a rew gamps sitt an action, and the action of the next day's work. The temple courly and were still, and nothing was heard but the steps of the sentries, who had charge of the different entrances, and nothing distincted the still startight high but their calls. To the outer court there stond the gnard, smoking and talking around the watch fices.

gnand, sinking and talking around the watch lies.
At six o'clock on the following morning we were
awakened by the reveillé of the bugles. Not a few
of us had sluvered during the coldnight, and glasses of furties telexed must offened limbs. Wheelbarrows had been hired for the transport of the
baggage to Tafotan. With the noise of durins and
fifes we then marched out of the low, with the war flag in front, which had waved formerly over the temple roofs. Here and therea brown Chinese face gazed at us out of a balf open door, called out by the unaccustomed sound of dram and fife. Other-wise the place lay in the deepest quiet. We found the magistrate again awaiting us at the city, and upon him the Admiral impressed the rules that be upon him the Admiral impressed the rules that he was to carry out. Then once more into the fine, fresh, smary maining. Our sailors struck the a joyful march and in quick time we went back to Tafutao, which the expedition reached at eleven o'clack in the morning. Being law water we had again to make a lorg junney over the sticky mad. Then the men were slopped on board and within the dead descended the river and so back to the ships. The symaments were taken off the boars; the outlong were raised; and once more the old the anchors were raised; and once more the old anchorage of Psingtao was taken possession of.

Tsingtan, 22nd December, 1807.

### KIAO-CHOU.

The Bay of Kiao-chan is a large natural harbour on the Southern Coast of the Shantung peninsula, and one of the best sheltered in Eastern China. Its local name in Chin-chu-fu. It has considerable advantages as well as disadvantages. While it possesses every other qualification for a valuable maritime station, it is unfortunately not always open. In the winter season it is usually frozen over, and the inhabitants say that the ice is then firm enough to walk across from Potato Island, at the north part of the bay, to Chi-po-so within the entrance. While the harbour is good, the country round about offers few attractions either to the traveller or the trader. It is barren in the extreme, and the dry, parched soil has a most uninviting appearance. The head of the bay consists of almost level land, about 180 feet high, faced by extensive mud flats, which lie out nearly three miles from and the dry, parched soil has a most uninviting appearance. The head of the bay consists of almost level land, about 180 feet high, faced by extensive mud flats, which lie out nearly three miles from the slove. The city which gives its name to the bay, Kinochou or Glue city, the local name of which is Chin-chu fu; stands at the north west front of the western arm of the bay, about eight miles above the opening of small river, where stands the Ta-pu-tur village, with Custom House. At one time Kinochon was the principal emperium in the east of Shantung. Twenty-eight miles eastward is another town, Ter-mei-hien, or Black link city. Both these towns have lost their commercial importance, owing to the gradual silting up of the Bay.—(Daily Graphic).

## CHAMPIONSHIP TOURNEY. YOKOHAMA CHBSS CLUB.

This Tourney, although announced to start at the end of January, has already begun, the Secretary having obtained all available entites early in the week. There are several absenters, we regret to say, several gentlemen who we expected to find among the contestants being infortunately prevented from playing this year. Still the list includes several of our best local players and we includes several of our best local players and we may expect to see some good games played. The following are the entries:—Messes. Fox. Friedlander, Hodges, Mendelson, Pollack, Tennant, Thomas and Capt, Weitbach. On Monday night lots were drawn in determine the order of play and the following were matched against each other in the first round:—

Friedlander v. Thomas. Weilbach v. Tennant. Fox v. Mendelson. Pollak v. Hodges.

Pollak v. Hodges. Weithach v. Tennant.

Each match is three wins first, draws not counting, the losers to drop out and the winners to play off in a second and finally in a third round. The first round (four couples playing) is to be finished by 28th February; the second round (two couples) by 31st March; and third round (one couple) by 30th April. We understand that the conditions for this Tourney will be strictly enforced and all games, from whatever cause, unfinished at the time indicated will be scored a loss to the defaulting party. But it is to be hoped that no occasion ing party. But it is to be hoped that no occasion will arise to enforce this penalty, as it would more

or less spoil the Tourney.
On Thursday afternoon Pollak met Hodges in a well contested game, and the former won after a brave struggle on the part of his opponent. At the same time Thomas suffered defeat from Fried lander. These are the only games finished so far; but Monday next should see all eight chempionship players a work, and we hope those members whose presence at the Club rooms we have missed for a long while, will show a renewed interest by coming up, even if it is only for a 4-look-

SINGAPORE.

The following is one of the games played in the Counditation Tournament now going on at the Singapore Chess Club, with notes from the Singapore pore Free Press :-

GAME No. 353. QUEEN'S GAMBIT DECLINED

White-Messra McIntyre and Craig.	Black-Messes, Chittenden and Masbergen.
WHITE. BLACK.	WHITE. BLACK-
and Craig.	and Masbergen.
17 R QK1sq P B4	36 P queeus RxQ
18 P B4 QR B sq	37 RxR and Black ulti-
19 P KKt4! BPaP	mately resigned.

NOTES.

(a) Kt to ■ 3 would be better here.

(b) A cisky attack on the Kt P, but White overhooks the obvious reply Q to Kt 5, threatening d. ch. B takes Q, though leading possibly to a dull game, or P takes Kt would be safer.

(c) Black has now a far superior development.

(d) Q to R 6 would gain a paws.

(e) Best.

(e) Best.
(f) If Q takes R mate speedily follows.
(g) The losing move, Q to B 3 would have left Black with a safe game.

(h) Black cannot now save the game.

#### Norss.

Black Bishop writes under date of 30th December:—"To-night at 8:30 at the Hongkung Hotel as many class players as choose to gather will have an opportunity of playing Mr. Souza or Mr. Hendley. Probably each of these will take a dozen opponents. Mr. Souza held the championship of the Colony for nearly a year, and Mr. Hendley is well known as a rapid and brilliant player." We hope the Y. C. C. will be able to give a similar treat to local Chess players before the close of the season. the close of the season.

An American Chess player on a recent journey through Europe writes as follows: - Much apathy prevailed in London chess circles during the proprevailed in London criess circles ouring the pro-gress of the recent Berlin touriney, as most of the players were in Germany at the time. I can against Mr. Bird, Mr. Lee and Mr. Van Viet, who were to be found every day at Simpson's Divan, the place which has been the head-quarters of cless for the past 150 years, and where the cless nen and hoards that Morphy and ready all the great players of the world have played with during that time are still to be found and seen by

wisters.

= Paris is not much of a class centre at present, and has not been for many years, Germany and England, if not America, taking the lead. At the Café de la Regance I did not see = prominent player. This café has been the head-quarters of player. This case has been the head-quarters of chess for the past hundred years or more, and at one time was the chess centre of the world. It refer to the days of La Boundinais, St. Amant, etc. It is not a chess club, simply a case; the recognized resort of chess-players where you call for hoards and chess-men, far which use a nominal sum is charged in addition to an order for coffee, wine, or hundred. There is one large room, beautifully freezoed, with the ornamentation entirely suggestive of chess. The ceiling represents the squares of a chess board, pieces and pawns, and the names of the greatest chess-players, both ancient and modern, are tastefully in evidence everywhere and modern, are tastefully in evidence everywhere upon the walls of the room-"

The cliess championship of Australia has been won by Mr. J. L. Jacobsen (challenger) from Mr. W. Ciane, jr. (the challenger), by six games to oil. Mr. W. H. Jones, of Sydney, intends to challenge the winner.

#### LATKST COMMERCIAL.

### IMPORTS.

The market for piece goods and yarus is still utterly stagmant. A few small transactions have taken place in Italian cloths and flaunels, and some shipments of raw cotton have been disposed of to the Spinning Companies, which have done very much better during the past year than had been expected from the general complaints published.

## THE GREATEST WONDERS OF MODERN TIME HOLLOWAY'S PILLS.

DERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sin Sames Basse, in his work coulded "The Nile Tribut taries in Abyssinis," says—"I ordered the dragoman Mahometo inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice graits. In I short time I had many applicants, to whom I served out a quantity of followay: Pills. These are most useful to an explorer, as, possessing numistatable purgative proporties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

#### HOLLOWAY'S OINTMENT

is a certain emedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miracciously in healing ulcerations, curing skin diseases, and in arreating and subduling all indammations. Ms. J. T. Course, in his account of his extraordinary travels on China, sublished in 1871, says—"1 had with me a quantity of Holloway's Ontement. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk\_fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Olintment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the analt remaining "stock."

Sold by all Chemists and Medicine Venders throughout the World.

## THE NEW TARIFF.

OPIES of the NEW TARIFF, as passed by the Imperial Diet, can be obtained at this Office in pamphlet form. Price, 25 Cents. Yokohama, April 27th, 1847.

Printed and Published for the Propietor, at 51. Main Street, Settlement, by Aribur Belland Brown, of "Norklands," No. 130, Bluff, Yokohama. "Saturday, January 15, 1898.

the Sumida River, was run down and sunk by by the steamer Toura Maru, which plies between Yokohama and Tokyo.

THE amount of foreign rice imported at this port during last year exceeded one million bags, valued at over yen 6,200,000.

THE Japanese steamer Arisoura Maru ran on a rock near Hiroshima on the 16th inst. and is expected to become a total loss.

H.I.M. THE EMPEROR will give an entertainment to the Princes of the Blood, the Ministers of State and other high personages in a few days time.

MR. DEN KENJIRO has been appointed Vice Minister of the Communications Department in place of Baron Suzuki, who is released at his own request.

THE Kamakura Railway Company, promoted by Mr. Irokawa Seiichi and others, was granted a license through the Kanagawa Prefectural Office on the 18th instant.

THE ex-Parliamentary representatives of the National Unionists, at a meeting held on the 14th, are reported to have passed a resolution to support the new Cabinet.

THE Nagasaki Town Conneil has passed a vote for extending the limits of the town of Nagasakt and the decision has been submitted to the Home Department for approval.

THE Authorities intend to lay a cable between the Bonin islands and the Seven Islands of Izu and for this purpose a vote has been included in the Budget for the 3 rat fiscal year.

THE fire in the Yubari coal mine, which occurred on the 5th last., and caused the death or serious injury of 26 men and occasioned very heavy loss, was extinguished on the 12th lust.

Mr. FRANK LINCO: N, the best melo-m nolognist that has probably visited Yokohama, gave two most successful entertainments at the Public Hall during the week and left by the Empress

THE revised Tresty between France and Japan has been ratified by President Faure. The document is expected to arrive in Japan towards the end of February next when ratifications will be exchanged.

A very enjoyable farewell dinner was given to Mr. Richard Boyes, the late hon secretary of the Yokohama Yacht Club, at the Grand Hotel on the 16th inst., on the occasion of his depar-

THE date of the general election of members of the Lower House was fixed for the middle of March at a special Cabinet Council held on the 15th inst., and the session of the Diet will open about the middle of May.

In the Nagasaki Local Court the two sampan men charged with the murder of Frank Epps, an apprentice on the U.S. flagship Olympia, on the 12th Dec. last, have been found guilty of "fuvoluntary homicide" and fined 100 year and SO wan respectively.

THE Japanese war-ship Kasagi, now in course of construction at the Cramp Shipbuilding Yard, Philadelphia, is to be launched on the 20th inst. The Chisese, building at the Union Works, San Francisco, will be launched in February next,

On the 7th inst, a Chinaman residing in Caaka was found guilty in the local Court of lesting a room in his house to two other Chinamen for

men and one Japanese woman who were found smoking in the room, being sentenced to eighteen months' imprisonment.

THE three round-the-world British cyclists, Messes. Fraser, Lunn and Lowe, arrived M Nagasaki on the 14th inst. and on the following day started for Kobe, Osaka, Kyoto and Yoko hama, via Bakan, which was reached on the 17th instant.

SIR MICHARL HICKS-BRACH, Chancellor of the Exchequer, has declared that Great Britain had no desire for any territorial acquisition in China but wished to open it to the world's commerce. But the Government was absolutely determined, even if necessary at the cost of war, not to allow the door to be shut upon it.

THE celebration of the coming of age of the Crown Prince Haru-no-miye, which would have been performed last year, but was postponed till this year owing to the Court mourning for the ate Empress Dowager, will be held in March next, when a State Ball will probably be given at the Palace.

LIET. GENERAL BARON ORV, Commander of the Imperial Guards, has been appointed Com-mander of the Tokyo Garrison; Lieut.-General Baron Hasegawa, Commander of the Third Army Division, has been appointed Commander of the Imperial Guards; Lieut. General Baron Kodama, Vice-Minister of War, is to be Commander of the Third Army Division; and Major General Nakamura, President of the Military College, to be Vice Minister for War.

THE Import market generally continues dull. but some little improvement has taken place a few lines since the opening of year. For the first time for some mouths a few sales of grey shirtings have been reported and a fair business has been done in yarns of the finer qualities, while enquiries have been made regarding fancy cottons and woollens, which, however, have not resulted in any business of consequence. There has been a fall in the price of Bombay raw cotton, owing to heavy shipments on the way. In metals no fresh business is doing but the delivery of a quantity of recently arrived stock to former orders has been going on steadily. The kerosene market is dull for this time of the year and quotations for Chester brand have received a stimulant by a reported casualty to a ship, the Alexander Gibton, from New York, which is overdue at Yokohama, and a portion of whose cargo of 75,000 cases of Chester oil, damaged, has been sold at Sydney. The sugar market is steady and sales of brown have ex-ceeded arrivals during the past two weeks. For white refined there has been a good demand and the prices are hardening. Transactions in the export market, so far as staples are concerned, have been limited to some small transactions in tea and a moderate business in silk. The holders of silk, both raw and waste, are very firm and hold the whip-hand of buyers, as the stock is only half that held at the same period last year and in average years, and they know that they will eventually get their price, though these are now quoted above the rates at present ruling in the consuming markets. The export of silk handkerchiefs and piece goods has not been brise, and in fact the business, not only for the current month, but for all last year, shows a falling off from the figures for 1896. No further exports of tice have been made, but a very much larger quantity of Rangoon and Saigon grain has been imported than in ordinary seasons. In copper and fish oil little has been done. Exchange is slightly improved on

SPIRIT OF THE VERNACULAR PRESS.

The Jiji Shimpo publishes a series of lengthy articles lutended to demonstrate two things; first, that the partition of China among foreign Powers is inevitable; and, secondly, that the Japanese are much better suited than any other people to undertake the task of governing the Chinese. As to the former point, our contemporary's writing conveys no new information. The gist of it is that although there have been a hundred and twenty-three changes of dynasty in China there has never been the slightest change of customs and systems in the sense of progress, and that it is now hopeless to expect anything of the kind. China, in short, is on the downward grade, and her descent can not be arrested. The last chance of ronsing her from her sleep was Japan's adoption of Western civilization. There is no room to doubt that the fact was appreciated by the people of Europe and America. The great assistance which they rendered in Japan in her modern efforts of reform deserve and receive this country's gratitude. But they were efforts lins country's grattude. But they were enorse dictated not solely by a desire to promote Japan's advantage: they were partly inspired by a hope that when the huge empire saw the results of its little neighbour's adoption of Occidental civilization, the long-deferred awakening would take place. That hope proved fallacious and China is doomed, It boots little to analyse the morality of the methods adopted by European nations in their assaults upon the huge country's integrity. They may be trampling under foot the principles upon which they insist in their intercourse with each other, but it is with the facts of their procedure, not the fashions, that the world is really concerned. The work of partition has commenced. Germany and Russia have set the example, and England and France will not be slow to follow. Not to-day, for the first time, does the Jili Shimpo insist upon the proposition that the die of China's fate is cast. Time and again during the past fifteen years it has enunciated the same belief. The history of the world establishes two facts, that a State, like everything else in nature, must either wax or wane, and that when progress and stagnation come into contact, the latter goes down. We are to-day witnessing the application of these principles to China's case. Western nations have long had an instinctive perception of the feast that awaited them when this garden of the Orient should be thrown open to their inroads-the garden without guards, They have been awaiting that issue, and, in the meanwhile, they have taken care that no outsider shall obtain a position of vantage. That was why Germany, Russia and France turned Japan out of Lisolung. They were de-termined that she should not gain admittance to the garden before themselves. Now that their own opportunity has come, however, they are not slow to seize it. Yet the Japanese are far more competent to govern the Chinese than any Western nation is. They thoroughly understand Chinese modes of thought and are in touch with the spirit of Chinese customs. Compare their successes in the recent war with the things achieved by France in the so-called "state of reprisals" twelve years ago. Had the Japanese been in the place of the French in 1894-5, had they possessed the ships, the weathe campaign in Tonquin have ended as it did? It may be urged, indeed, that Japan's failures in Formosa and Korea militate against the theory of her competence to administer the affairs of the Chinese or cognate races. Japan's failures in Korea and Formosa are due, not to want of innate ability, but to the fact that she has been using weapons which she does not fully understand; she has been working on the lines of Occidental institutions, with which she is not yet familiar, and her own genius has thus been cramped. Let her approach the task when to the systems recently adopted by her she can add the force of

assuredly accomplish great results. The Jiji stops there. It is too artistic not to leave anyrefrains from explaining whether its favourable analysis of Japanese capacities is intended to suggest an access of over-sea enterprise.

The Fomiuri Shimbun has too articles with reference to the relations between England and Japan. In the first place, our contemporary attempts to analyse Great Britain's policy towards this country. The line of inquiry to be pursued for that purpose, we read, is to consider Great Britain's policy in the Far East, and the index of her Far-Eastern policy is to be sought in her conduct towards China at present. Since the seigure of Kiao chou by Germany and the utilization of Port Arthur as a winter station by the Russian squadron, the British fleet in these waters has shown extraordinary activity. It has shown itself at one moment off Chusan; at another in Chefoo Bay; at another in Port Hamilton; at another, in Chemulpo. In short, it has been everywhere. But its movements have not There has suggested any aggressive purpose. been no evidence of any design against China's territory. On the contrary, the plain significance of these demonstrations has been that Great Britain is determined to preserve the peace of the East and to check any proceedings calculated to interfere with her interests. She has vast interests in China. At Hongkong, in the Valley of the Yangtze, in the Gulf of Petchili she carries on an immense commerce, and the Customs of China are under the control of her subjects. France threatens her at Hongkong; Germany has planted herself within striking distance of the Yangtze Valley; Russia menaces the Gulf of Petchili and is endeavouring to supplant Englishmen in their direction of the Customs. To one and all England's answer, traced by the movements of her ships, has been that she forbids any trespass on the sphere of her interests. Let the trespasser or trespassers be who they may, she will not suffer them. She is the Queen of the Sea. We see now what her "splendid isolation means." There is a tendency to mistake her quiescence for unreadiness or hesitation. That error was committed by the world at the time of the Transvaal complication, but England dispelled it by a coup that astonished the nations. It is not possible indeed, to speak with absolute certainty about her policy. Inferences alone can be drawn, but the inferences seem to be now pretty plain. Her views, then, are practically the same as those of Japan. This country also desires to preserve the peace of the East and to oppose any encroachments that might bar the routes of commerce. Such identity of aim existing, it is natural that the two nations should gradually draw together. England has shown herself markedly friendly to Japan during recent years. She declined to join with Russia, France and Germany in depriving the Japanese of the fruits of their victory in Lisotung. She raised no objection to Japan's acquisition of Formosa, though Japanese territory was thus extended to the neighbourhood of Hongkong. She showed the greatest civility to Prince Arisugawa at the time of his visit to London, and the Margnis of Salisbury received Margnis Ito and had a long consultation with him. Moreover, of late we have heard numerous reports about an alliance between England and Japan. The Times has advocated it; Lord Charles Beresford has advocated it; many English journals have advocated it; and the tongue of rumour has spoken of it as an accomplished fact. All these things indicate the mood of England towards Japan. What steps does Japan, on her side, intend to take?

The Aippon attempts to prove that the new Cabinet is not an Ito Cabinet, but an Inonye Cabinet. This contention is founded on the hypothesis that Marquis Ito's difficulty in organizing a Cabinet was due, not to any reluctance on his part to join hands with the leaders of

quis Ito, had he been able to carry out his own programme, would have formed a union with the party leaders and would have organized a Cabinet chiefly from the ranks of the younger statesmen. But Marquis Yamagata and his friends opposed the project of an alliance with the parties as well as the admission of young men to the Cabinet. Count Inouye, on the other hand, while endorsing Marquis Yamagata's objection so far as political parties were concerned, approved of Marquis Ito's desire to employ the younger statesmen. Thus Count Inouye represents a compromise and is the link between Marquis Ito and the elder statesmen, for which reason the Nippon calls the Cabinet an Inouye Cabinet. Its statements are purely conjectural.

An article in the Tokyo Shimbun (Liberal organ) confirms the impression produced by the recent doings of Count Itagaki, that the Liberal Party are supporters of the present Cabinet. It is explained in the article that the Party would have liked to see Count Itagaki holding the portfolio of Home Affairs, but the Count him-self objected for reasons which our contemporary, while pronouncing them sound, leaves its readers to conjecture. Indeed, there is a considerable element of vagueness in the whole explanation, but its gist is that the Liberals desire to set an example of disinterestedness in these times when the main object of parties making alliances with a Cabinet is to obtain for themalliances with a Cabinet is to obtain for them-selves a share in the sweets of office. That insinuation is plainly aimed at the Progres-sionists. The two parties are again at daggers drawn, if we may judge by the ulterances of their organs. It was the *Matnichi Shimbun*, one of the journals representing the Progressionists, that opened the combat. It roundly charged the Libergla with having made a complete the Liberals with having made a complete surrender of their principles and pledged them-selves to support an independent Cabinet. The Tokyo Shimbun replies that such an assertion must be regarded as a mean person's estimate of a large-minded man's views. The Liberals of a large-minded man's views. The Liberals understand very well that to tie a Cabinet's hands by requiring it to subscribe to certain hands by requiring it to subscribe to certain hard-and-fast, and petty, conditions is contrary to the broad spirit by which a Ministry must be animated and is inconsistent with good administration. Agreements of that kind are made merely for the sake of appearance, and can not fail to result in friction and disruption. The Liberals are setting an example of the pure heartedness and singleness of purpose by which genuinely patriotic politicians ought to be animated. It is enough for them that the Cabinet is in accord with the principles of liberty and progress for which they have always struggled. If the Progressionists can not appreciate a union on such terms, their's is the misfortune. The Liberals are no: in fault.

The Kokumin Shimbun does not think that the new Cabinet will satisfy the nation, but, on the other hand, has no disposition to attack it until its policy is plainly indicated. It is not a Cabinet that gives any promise of stability. Count Induye is understood to be a statesman of the autocratic school: he sets his face against party Cabinets. Baron Ito Miyoji believes in party Cabinets and has the Liberals behind him. Here is an immediate source of dispute. Then the difficulties confronting the Cabinet are im-It is true that they inherit them from the Matsukata Cabinet, but the Matsukata Cabinet, in turn, inherited them from the former Ito Cabinet, so that, after all Marquis Ito has to unravel a skein of his own tangling. The financial problem presses for immediate solution. What in to be done about it? Only supernatural economists could make ands meet without either reducing the Army Expansion programme or increasing the taxes. Even more important is the question of foreign policy. Marquis Ito has the reputation of showing a smiling face to everybody. His inclination would be to remain on the best be own untrammelled instincts, the quick, political parties, or on theirs to join hands with determs with Russia, with France, with England resolute, and, at the same time, sympathetic him, but on the fact that he could not induce and with Germany. But the time has passed impulses of the Yamato-damashii, and she will his Choshiu friends to endorse his views. Mar

UNIVERSITY OF ILLINOIS AT

choose between Russia and England. Thus the circumstances with which the Cabinet has to deal are of unparallelled difficulty, and the Cabinet does not promise to have strength of union. Such are the Kohumin's viaws.

#### A QUESTION AND AN ANSWER.

Tapan Gasette.

Jane 12th, 1898.
In this connexion we should like in and to what occasion, the Yapan Mail when, and on what occasion, the Yapan Gasette ever denied the existence of such rights (the right of holding land by superficies). We have no recollection of any such denial having been made during the present editorship, and we object to being made the scape-goat of others. Can the Mail quote chapter and verse? chapter and verse

Japan Gatetter

Japan Gazette,

Jan 14th 1898.
The Japan Mail deliberately asserted that we have denied that foreigners would have the right of superficies. We have challenged it me quote chapter and verse and it has not replied to the challenge. It appears to have been guilty of a malicious falsehood for the sake of enjoying a momentary triumph. We have never denied the right of superficies because we could not deny a right of whose existence we had no knowledge. ledge-

Japan Gasette. Oct. 12th, 1896. There are many things in tr. Londolm's Treatise There are many things in Dr. Londoun's Treatise which the foreigner will be glad in know. One of these in the law with regard to land. The paragraph runs as follows:—

"The most important right which foreigners will be able to acquire in land under treaties will be the sight called superfices, &c."

\*Toon Gastie.

Japan Gazette.

Japan Garette.

Dec. 3rd, 1897.

We take il that the chief application of foreign capital when the new Treaties come into force will be to start industrial and commercial undertakings. Butcapital will be shy unless it can obtain security of tenure. For enterprises of any magnitude a twenty-five years' lease is not sufficient.

Five points are established by these quota tions :- first, that on October 3rd 1896, the Fapan Gasette editorially quoted a paragraph from Dr. Lönholm's book explaining exactly what "superficies" is; secondly, that, on Jan. 4th 1898, it declared itself without any knowledge of the existence of such a right as superficies; thirdly, that on December 3rd 1897, it asserted that the most permanent form of landtenure possible to foreigners under the new Treaties would be a twenty-five years' lease; fourthly, that on January 12th 1898, it protested against being charged with having denied that foreigners would have right to hold land under a superficies; and fifthly, that on January 14th 1898, it accused the Japan Mail of "malicious falsehood" for having attributed to it such a denial.

#### FAREWELL DINNER TO MR. BOYES.

On Saturday evening some thirty members of the Yokohama Yacht Club sat down at the Grand Hotel to the complimentary farewell dinner tendered by the Club to Mr. Richard Boyes, the late secretary, who is shortly leaving Kobe, Mr. G. Hawthorne Scidmore occupied the chair, having the guest of the even-ing on his right hand and Mr. J. O. Averill on his left. Mr. Herbert Rose, honorary secretary, was vice-chairman. An excellent dinner was placed on the table, the following being the bill of fare-several of the yachts of the Club, it will be observed, finding place in the names of the dishes :-

Sour. Printanier à la Royal. Poisson Folsson.
Filet of Sole à la Normandie.
ENTRES.
Petit Pâté à la Reine.
Filet of Beef à la Ideal.
Salmi of Snipe aur Canapé. Linguage.
Celary and Juice.
ROTI.
Spring Chicken with Dressing.
Salad. Salad.
ENTREMETS.
Pudding à la Tomioka.
Tuthan de Jelly à la Marie Louise.
Eclair à la Chantilly.
Vanilla Ice Cream.

expressed the hope that in his new home at Kobe prosperity would be ever with him, and that many prizes would fall to his share in yacht racing or other aquatic sport. On behalf of the members of the Yokohama Yacht Club, the Chairman then presented Mr. Boyes with pair of handsome silver mounted binoculars. He hoped Mr. Boyes would long live to use them and that he would, when looking through the glasses, always see a friend.—(Loud ap-plause.) In conclusion, the Chairman said that they would continue to call their guest "Our Boyes," for he was only lent to Kobe for a time he hoped.—(Applause.)

Mr. Boyes, in response, thanked the members of the Y.Y.C. for their handsome gift. He wished them all success in the coming season and hoped that they would always have the right amount of breeze with them when they went affoat. He raised his glass and drank to

the prosperity of the Yokohama Yacht Club.

The next two hours were spent in a delightfully informal fashion, many witty imprompts speeches-most of them having a decidedly nautical flavour, by the way—being made by various members at the call of the Chairman. The toasts included "The Founders"; the "Timescale makers"; the Chairman; the Secretary; the Press; the Officer of Day; the Sendo; Owners; Non-awners, etc. One speaker suggested that Mr. Boyes should endeavour to arrange an interport match between Kobe and Yokohama yachis—of the 17-rating class by perference—and the suggestion met with much favour. During the evening some songs were given, Mr. A. M. Delf, contributing several.

#### "CHINESE CHARACTERS."

Mr. A. H. Lay, of H. B.M.'s Consular Service has brought out a second edition of his useful volume, "Chinese Characters for the Use of We are Students of the Japanese Language." glad to see that the work has been sufficiently appreciated to warrant a second edition. and again we have ourselves been asked by correspondents to indicate some facile method of studying the ideographs, and we have always found in such cases that our questioners were ignorant of the existence of such a book as Mr. Lay's. It is wonderful that ignorance of that kind should exist, for the book exactly meets the student's difficulties by presenting to him the four thousand ideographs in most frequent use-four thousand ideographs which are all that need be committed to memory by any one not aiming at a very high standard of scholarship. We are inclined to think that her. Lay we title is not very wisely chosen. The average We are inclined to think that Mr. Lav's man is apt to be misled when he reads the description "Chinese Characters for the use of Students of Japanese." He imagines that there is question of some special line of study, some problem of comparative philology. "It is not Chinese characters that I want," he thinks; "it is Japanese ideographs." Probably a better is Japanese theographs. Thorson a better title would have been "Japanese Ideographs in commonest use." or some similar phrase un-equivocally conveying the fact that the volume contains characters selected by an expert with reference to the frequency of their occurrence in every day literature. Mr. Lay tells us in his preface that he has carefully revised the first edition, and it may fairly be assumed, therefore, that he has made the work virtually free from blemishes. His system is excellent, and he has succeded in getting the printer to use such fine type and to do the spacing so judiciously that everything is clear and pleasant. The book should be an incalculable boon to students. No such aids were procurable five-and-twenty years ago, but times have changed immensely for the better. It is most satisfactory to find that Eng lishmen retain their prominence in the field of Tapanese scholarship.

It is deemed significant in Berlin that 120 In the course of the evening the Chairman volunteers, including a number of the aristo-rose and proposed the health of the guest. In doing so he referred in graceful terms to the Thurn and Taxis, accompany Prince Henry of services rendered the Club by Mr. Boyes; and Prussia on his expedition to Kiao-chou Bay.

#### FAPANESE & BRAIN EVOLUTION.

An American journal says :- " Professor Marsh, of Yale, has ascertained that animals of the present day have larger brains than their predecessors, that the sizes of brains of animals in the same groups increased progressively from the Eccene through the Miccene and Pliocene periods. When a species of mammal died out it was found that it had a relatively small brain. He also found that the same theory held good in regard to birds. Finally he applied it to man, who has conquered allelse on the earth.
The development of the brain has gone on with he centuries, and one race after another has dominated-always by its larger brain. In modern man, the cerebrum overshadows all other parts of the brain combined. Down to the present time the largest brained race has outmatched the smaller, although the latter usually has greater brute force. Professor Marsh has weighed the brains of modern peoples, and discovered that the average brain of the Japanese is greater than that of any other people. Fifteen years ago he was satisfied that they were to figure as a great power among nations, perhaps an overwhelming force. His conclusions at and almost in the light of prophecy. They have the brain. It is a matter of speculation how it will be used."

#### MODERN SHANGHAI.

In Shanghai, which has of late been reported booming, a very curious state of things seems to be prevailing, says the correspondent of the China Mail. Huge high houses are being run up on all sides. No superstitious notion as to Fung Shui trouble the builders. They run them up irrespective of aspect or the width of the street they are to shadow. We have therefore cutting draughts down dark alleyways, and vaultlike entrances. Every third person just now has juffuenza. And one cannot wonder. It has been somewhat unusually cold for so early in the year. And the people no longer live in luxury, eschewing north rooms. With only Belgian glass between them and the blast straight from the Manchurian mountains, people sit and shiver, thankful to have a roof to cover them, for the house-hunger still continues, whilst rents have gone up out of all proportion to salaries. Coals have jumped up too, so that it is the meanest rubbish people are burning, whilst the fashionable subject at present for ladies' tea parties is the price of butter. With salaries steadily diminishing and prices rising it is clear that Europeans will not long be able to live in this climate, unless a change comes some way. And whilst to look at the factories all round belching out smoke, and the increased building, one would think the place was making atrides towards prosperity, yet never before has the struggle for existence been so severe amongst the white population. Chinese in soft silks and satins spring in and out of carriages driven by wonderfully liveried coachmen and footmen, whilst well-known Europeans, who used to drive good horses, may be seen resigning themselves to rickshas. Again and again one sees houses inhabited by Chinamen, and the Model Settlement has been invaded and is over-run by the yellow swarms its land regulations, never by the yellow swarms its land regulations, never yet signed by the Minister at Peking, were intended to shut out. Chinese are all over the Settlement now. One cannot walk fast for substantial Chinese figures stolidly strolling. One cannot drive fast for the rickshas and the wheelbarrows all progressing at their different rates of speed. How different from Shanghai of three years ago!

If things are bad in Shanghai, they are worse in Yokohame. Here house-hunger is intensified to a degree, rents rising by leaps and bounds, quite out of proportion to the money invested in their building; while the struggle for existence, with the steadily increasing prices of domestic commodities, is also, undoubtedly, worse than in Shanghai-for salaries, never inordinately lavish here, show no tendency to rise in proportion to the increase in the cost of living.

Coffee

#### FINANCIAL QUESTIONS OF THE HOUR.

It is very true, as vernacular newspapers observe, that several questions of great difficulty and importance present themselves for solution by the new Minister of Finance. These questions may be stated

1. Briefly speaking, the revenue now accoung falls short of the expenditures indicated in the estimates of the various Departments for next year by 23 million Where is the money to be obtained? yen. Where is the money to be obtained? The Matsukata Cabinet proposed to obtain it by increasing the taxes on land and saké, the former source yielding 12 million yen and the latter, to millions. Will Count Inouye adopt the policy of increased taxation; or will he cut down the projected expenditures; or will he have temporary recourse to the portion of the Indemnity

not yet appropriated?

So far as this particular question is concerned, the journals propounding it appear to forget that the Cabinet which has just assumed office will not have to deal with any new Budget for the fiscal year 1898-9. The Departments must work on the lines of the Budget of 1897-8. Past experience enables us to foresee, however, that the Departments having, in their estimates for next year, applied for appropriations considerably larger than those made in the Budget for the current year, and there being a necessity for these increased expenditures from a progressive point of view, the figures of the 1897-8 Budget will probably be exceeded in 1898-9, and the Government will have to seek the post-facto assent of the Diet, in its next regular session, to various outlays over and above the Budgetary appropriations. Still, no financial problem in connexion with the regular income and expenditure will present itself for solution until the Diet meets next December. And when the Government comes to frame its next Budget, it will probably be able to count on an additional income of some six million yen from the Customs. The new Tariff may go into operation on the 1st of September, or, perhaps, the 1st of October. But we do not imagine that any considerable increase of revenue will accrue from it during the first six months : its effect will be discounted by importers. From April 1st, 1899, however, when the fiscal year 1899-1900 commences, the new Tariff should give a substantial increment. Of course other sources of revenue will have to be found, but the question does not press for immediate solution.

2. The second point relates to Army Expansion. Count Inouye is believed to be in favour of reducing the number of Divisions from 12, as set down in the present programme, to 9. The approval of the Diet need not be sought in effect-ing such a change. If an increase of the establishment were in contemplation, the Diet would have to be asked for the necessary funds, but for the rest, such matters are within the Imperial Preroga-It must be noted, however, that considerable doubt appears to exist with tenance, the former Army cost 13 million regard to Count Inouye's views on this yen annually, and the expanded Army is subject, and also that the Minister of expected to cost 264 millions. There

Divisions and the Guards, has never been clearly calculated by any verna-cular journal. We ourselves are sceptical whether the number of Divisions would be reduced under any circumstances. What seems more probable is a reduction of the establishment of each Division. Without discussing that phase of the question, however, let us assume the broad fact of an expansion representing an increase of 50 per cent., instead of an expansion representing an increase of 100 per cent., and let us calculate, approximately, the saving that would be effected by the change. We must be content with an approximation, for in the absence of details not accessible to the public, exact results can not be reached. The total cost of the expansion scheme on the basis of an increase of 100 per cent., is 79 million yen, in round figures. Out of that total 231 millions are for the construction and armament of forts and the extension of arsenals, works that will have to be carried out, we presume, whether the strength of the Army be raised to five hundred thousand or three hundred and seventy-five thousand. Hence it results that the sum involved in the increase of the establishment-i.e., the sum required for building barracks, stables, offices, and purchasing arms, ammunition, clothing and horses—is 554 millions. may appear right to assume, then, that on the basis of an expansion of 50 per cent. only, 27% millions, or, let us say, 28 millions would suffice, and that the saving would be 271 millions. But a preliminary question has to be answered, namely, how much of that saving could now be effected. The expansion programme on the 100 per cent. basis began to be carried out in the fiscal year 1896-7, and has consequently, been two years in operation. That means that large sums have already been expended upon barracks, offices, and stables, and that these buildings have been carried long way towards completion in the case of all the 12 divisions. We think it very doubtful, indeed, whether the construction of the various barracks and offices could Probably the most now be suspended. economical plan would be to carry them to completion, since they will be wanted under any circumstances, whatever the size of the Divisions. Hence the safest method of calculation is to rule the barracks, stables, and offices out of our estimate altogether. Now the total outlay under those headings being 25 million yen, it follows that the difference between 551 and 25 millions, or 30 millions, is the sum to be considered for our present purposes. Thus, finally, one half of 304 millions, or, say, 15 millions, is a probable approximation to the total saving that would be accomplished by the proposed reduction. Of course that saving would not be effected in one year: it would be spread unequally over several years from 1898 to 1903. Thus far we have considered the question of extraordinary outlays onlyie. outlays not connected with the maintenance of the Army on its increased footing. As to the matter of main-Finance has only one voice in a Cabinet.

The amount of economy that would be million yen in this item if the expansion for water-works are evidently supposed to involve destruction of the thoroughsion of the Army by 50 per cent., that is to say, making the establishment of Divisions and the Guards, instead of 12 the Army figures at 25½ million yen in the conference of the experts who are in the conference of the business. Preparations for water-works are evidently supposed to involve destruction of the thorough-sions and the Guards, instead of 12 the Army figures at 25½ million yen in the conference of the experts who are in conference of the business. Preparations for water-works are evidently supposed to involve destruction of the thorough-sions and the Guards, instead of 12 the Army figures at 25½ million yen in the conference of the business. Preparations for water-works are evidently supposed to involve destruction of the thorough-sions and the Guards, instead of 12 the Army figures at 25½ million yen in this item if the expansion for water-works are evidently supposed to involve destruction of the thorough-sions and the Guards, instead of 12 the Army figures at 25½ million yen in the conference of the business. Preparations for water-works are evidently supposed to involve destruction of the thorough-sions and the Guards, instead of 12 the Army figures at 25½ million yen in the conference of the business. Preparations for water-works are evidently supposed to involve destruction of the thorough-sions and the conference of the business. Preparations for water-works are evidently supposed to involve destruction of the thorough-sions are evidently supposed to involve destruction of the conference of the business.

present Budget, although the establishment must still be far short of the expansion standard, and it is consequently plain that the ultimate estimate of 261 millions for maintenance will be found too small when that standard is reached. can not, therefore, arrive at any hard and fast conclusion.

3. The next question is the floating of the various domestic loans contemplated in the post-bellum programme. The sums that have still to be raised, in the form of the Public Undertakings and Railway Loans, are:-

These are sums no part of which has yet been raised. The amount originally set down to be floated during the current year was larger than the figure shown above, but the Government has been able to buy some million yen worth of the bonds with surplus revenue, instead of placing them on the open market. This method of financing can not be carried on, however, and as there would be no hope of obtaining subscribers to such securities in Japan at present, the Government will have to think whether a foreign loan should not be sought at once.

4. There is also the problem of the great scarcity of capital from which the country is suffering at present. As to that, no inkling of the Cabinet's intention seems to have yet been gathered by

the vernacular press.

#### JINRIKISHA ACCIDENTS.

Mr. Tsutsumi, Vice-Minister of the Imperial Household Department, who was recently thrown from his jinrikisha, sustaining severe injuries, is progressing favourably towards recovery. His arm was fractured so badly that amputation seemed, at first, inevitable, but the sureons of the Red Cross Hospital, whither Mr. Tsutsumi was at once taken, have succeeded in setting the bone, and as fever has not supervened, it is expected that there will not be any troublesome complications. Jinrikisha accidents are frequent in Tokyo at present, and indeed we do not wonder at it. The engineers in charge of the Water-works can not be complimented. It really seems as though their object was to test the extreme limits of the citizens' patience. The fraud in connexion with the pipes must have caused great delay, and we do not doubt that many difficulties have to be grappled with; but whatever allowances be made on that score, and however leniently the affair be regarded, it must be frankly confessed that a record has been achieved in the matter of slowness, and that the condition of the streets, already bad enough, has become absolutely disgraceful. But apparently the citizens of the capital have no disposition to com-plain. We have not yet found a protest in the columns of a single vernacular journal. The truth is that the people have no standard by which to measure the competence of the experts who are in charge of the business. Preparations for water-works are evidently supposed

#### POLICY OF THE NEW CABINET.

A representative of the Tokyo Asahs reports an interview that he had with Mr. Sone, the Minister of Justice, on the 17th instant. The subject of discussion was has not yet evolved any definite financial the policy of the new Cabinet. His Expolicy, and will not attempt to do so until cellency did not speak very explicitly. he has become perfectly familiar with He explained that there had been only every phase of the question. That aptwo Cabinet meetings as yet; that no business had been transacted at the first, and that the second had not arrived at any decision with regard to general policy. The impending general election stood foremost among topics to be considered, and Mr. Some ventured to say that the Government would maintain an attitude of absolute neutrality. Second on the list of subjects was the Civil Code, which awaited the Diet's consent. The Minister did not by any means claim that it is a perfect body of laws, but he considered it an immense improvement on the Code which had been put back for revision in 1891. If any defects were found in practice, they could easily be removed, but, recent issue, the Cabinet is not likely to in the meanwhile it would be contrary to commit itself to any final policy without the nation's best interests that the promulgation should be delayed much doubt, at all events, that the extraordinary The Government, of course, might put the Code into operation by means of an Urgency Ordinance, but such a step was not likely to be taken except in a case of extreme necessity. With regard to preparations for the operation of the Revised Treaties, Mr. Sone thought that they had already been completed in great part, but doubtless many arrangements had still to be made for an event so unprecedented in the case of an Eastern State. His Excellency refrained from any definite statement on the subject of increased taxation or reduction of the programme of Army Expansion, but he hinted, with regard to the latter, that even supposing Count Inouye to be generally in favour of a smaller military establishment than the programme contemplated, the special circumstances of the time were not favourable to such a change.

The Mainichi Shimban, on the other hand, alleges that Count Inouve is in favour of a form of procedure which will amount, practically, to a reduction of the Army scheme, though it does not take the actual shape of an imme-diate reduction. The projected number of Divisions - namely, twelve-would remain unaltered, and the organization of the whole would proceed up to a certain point. Three, or perhaps four, would then be left with their cadres alone completed, and the remainder would be pushed to their full establishment. Then, in the course of time and in accordance with the state of the Treasury, the incomplete Divisions could be raised to the same dimensions as the rest. Viscount Katsura and Marquis Yamagata are said to be in favour of that plan, and Marquis Ito does not oppose it. The Mainichi Shimbun having long been conspicuous as an advocate of reducing the expansion programme, we should not be safe, perhaps, in implicitly accepting its version of Count Inouve's views.

Vernacular newspapers contain several paragraphs with reference to financial affairs, and the problem of armaments expansion, but it is easy to see that the

Digitized by Google

diligence, day after day, to master the details of the national accounts, to which, naturally, he has not paid any special attention for several years. It we may credit what the Tokyo journals say, the Count policy, and will not attempt to do so until pears very probable, though, on the other hand, we may fairly assume that when Count Incuye agreed to accept the portfolio of finance, he had already mapped out the broad outlines of his future plan. As for the question of military expansion, journals hitherto conspicuous for their advocacy of the original programme are now disposed to represent the War Department as resolutely hostile to any retrenchment, and as thus absolutely so claiming that to reduce the dimensions of his jus in rem. of the project at the present juncture would impair the prestige of the State. However, the whole question is evidently still in the air, and, as we mentioned in a commit itself to any final policy without quired the rights of a superficiary, nothing very careful consideration. There is no is less likely than that he would take the rise in the prices of commodities during the past two years must have falsified the estimate formed in 1895 as to the cost of maintaining the Army on its contemplated establishment.

#### SECURITY OF POSSESSION UNDER THE NEW CODE.

We observe that, in commenting upon the new Civil Code of Japan, a local contemporary asks how a superficiary will be secured against such a contingency as the sale of the land during the period of his superficies: in other words, supposing that a superficiary has erected building on land held under a superficies, what is to prevent the owner of the land from selling it, together with everything above it, to some one quite independent of the superficiary. It is a strange question. The writer propounding it seems to ignore the fundamental principle underlying all civil law, namely, that no one can transfer larger rights than he himself actually possesses. The buildings erected, or the trees planted, on a plot of land by a superficiary do not belong to the owner of the land; they belong to the superficiary, and the landlord has no more right to sell them in the manner suggested than he has to sell the watch which the superficiary carries in his pocket. We do not understand It will be observed that the above parahow, even in the absence of express provisions, there can be any doubt about this matter. But, in point of fact, there is no lack of provisions, as will be seen from the following :--

Act. 207.—The right of ownership of land ex-tends within the limits prescribed by law to what is above and below it.

Act. 265—A superficiary is one who has the right to use the land of another person for the purpose of owning thereon buildings, or bambors and trees.

Art. 176 - The creation and transfer of rights in ram derive their validity solely from the expression of intention of the parties.

From the portions italicized by us it will be

registration is considered-and it will be seen from Art. 177 that registration is necessary in order to protect rights in rem where an immovable is concerned. In the register, ownership of land and superficies are entered in different columns and under different numbers. Thus, for example, A, the laudlord, is registered as the possessor of right No. 17, and B, the superficiary, is registered as the possessor of right No. 18 (the ownership of houses, trees, &c.); and A can not transfer right No. 18 to a third party without B's "ex-pression of intention," neither can B transfer right No. 17 without A's expression of intention. All other rights are similarly entered in the register-as, for example, mortgages on the land, or on the buildings, &c .- , and every one is thus absolutely secured in the possession

The above remarks dispose of all doubt so far as superficies is concerned, and superficies is, in truth, the only kind of tenure that need be seriously considered by foreigners, for unless a man has acrisk of erecting costly buildings and planting trees on land owned by another. But the journal to which we have alluded extends its question to the case of a hirer. We are wrong, indeed, to say "extends, for the fact is that, even with the Code before it and in spite of all that has been written on the subject, our contemporary seems to be still unable to distinguish between a "superficiary" and a "hirer." Here is what it writes:-

With regard to the rights acquired by the hire, should the land he sold during his tenancy, as it may be, we are not clear how his interest is protected, and this is a matter of considerable imas it may be, we are not clear how his interest is protected, and this is a matter of considerable importance to persons electings buildings or making improvements. Acticle 58t in another section, states that "the right of a hieer which has been registered may be set up against the seller [of the land] during one year only of the anexpised term of, the contract of hiring and letting to line." But how is this to be interpreted? Can the lessee be regarded as having but one year's protection for his interest, and if the be ousted by the purchaser, what arrangement exists by which he will be secured Conposation for the value of his unexhausted improvements? We should like to hear from Dr. Lönholm, the champion of the Code, how the matter really stands. A somewhat cursing planes through it has given us no information with regard to what should be the proper unswer to these queries, the importance of which must be manulest, for if reasonable doubt can be entertained as to the measure of the protection of a ternant's interest, foreign superficiaries, at all events, would be not a negative to a furnisher of the protection of a ternant's interest, foreign superficiaries, at all events, would be not a negative to all invaries, but he measure of the protection of a ternant's interest, foreign superficiaries, at all events, would interest, foreign superficiaries, at all events, would be very properly shy of investing his money in the erection of huddings or making improvements on

graph sets out by talking of a "hirer; then goes on to speak of a hirer "erecting buildings; " then quotes an Article that refers explicitly to a "hirer;" then asks how a "lessee's" interests are safe guarded; then refers to the "protection of a tenant's interest," and winds up by saying that, in view of this doubtful state of affairs, "foreign superficiaries, at all events, would very properly be shy of investing his (sic) money in the erection of buildings on leased property." It seems hopeless to attempt to straighten out such confusion. Our contemporary jumbles up hirers, lessees, tenants, and superficiaries in the plainly seen that the ownership of land most blissful bewilderment, apparently does not extend to buildings erected on regarding their rights as identical, and it by a superficiary, and that the transfer evidently ignorant of the whole gist of writers have no definite information on of the land to a third party does not exthe question, namely that a superficiary tend to the buildings without the consent possesses one kind of right—a right Minister of State for Finance, is represented as working with extraordinary comes perfectly simple when the form of Original from

two rights are independently treated in different chapters of the Code. So far as concerns the right of a "hirer" against an owner's right of sale, it appears from Art. 581 that the former right, having been duly registered, is valid for one year only. The maximum limit of a contract of hiring is 20 years (Art. 604), but if within that period the owner of the hired property desires to sell it, the hirer may be required to give up his tenure within one year. All that has nothing whatever to do with a superficies. The superficiary is the actual and legally recognised owner of buildings erected, or trees and bamboos planted, by him, and his right of ownership is of equal validity with the landowner's right in the land during the period of the superficies. question is becoming weritable curiosity. The displays of mental obluscation that it has evoked are monumental. Critics who can not distinguish between A and B would really be wise did they abandon the attempt to read.

#### ENGLAND AS SHE IS DEPICTED.

The pictures of England painted by correspondents of American journals have long been a subject of amusement, and some chagrin, it must be confessed, to Englishman in this part of the world. One would suppose from the caricatures of these limners that the old country was in the last stage of decrepitude and that nothing remained for rival nations except to sing its dirge. But every ordinarily intelligent reader knows very well that the greater part of the foreign correspondence published in the columns of the United States newspapers is merely sensational romance. No people are more keenly sensible of the fact than the better classes of Americans themselves. They have ceased to take any stock in their journals, and the latter, awaking at last to their unconsidered position, are now discussing plaintively the causes of the disgrace. On the whole, it appears to us as outsiders that they have discovered the true cause, namely, their utter in-difference to truth. The discovery has not been made in connexion with their foreign correspondence but in connection with the neglect shown by the public towards their views on domestic affairs. For example, nearly the whole newspaper press of New York was vociferously opposed to Tammany during the last municipal campaign, but l'ammany won the fight by immense odds. In fact, nobody seems to have paid any heed to the utterances of the newspapers. As representatives or moulders of public opinion, they had to take a seat "away back." One of the critics who have applied themselves to analyse the causes of this humiliation, says frankly that the papers have lost their influence because "they lie too much," and the voters have learned not to believe what they say. Another says practically the same thing though in different lauguage "Fifteen years ago," he writes, "it was discovered by some clever speceverything that people would be likely to she is fated to block the path as effectualread, without regard to private feelings, or ly as though her nationals had the lion's discrimination and intelligence to their accuracy, or importance, and which above share of the trade. Digitized by Google

-a right of tenancy-, and that the all things, startled people, no matter how, by invention, by head-lines, or pictures. But perhaps the most interesting and artistically sarcastic comment of all is that of The Sun, which claims that the power of newspapers in influencing public opinion was never so strikingly demonstrated as in this very election, for they succeeded in "drumming up" the Low vote solely by means of a pure fiction, the "Plattism bogy," which was a veritable humbug, having no existence outside their own imagination. In short, by an astute exercise of their metier of falsehood, they accomplished a momentary resurrection of the power of the Fourth Estate, driv-ing, at the same time, another nail deep into its coffin. Perhaps it is unfair to cite the World as a sample of American journalism, for though its circulation is immense and its pecuniary success proportionate, its stands about as low down in the moral scale as a newspaper can get. However, it is in connexion with the World's London correspondence that we make these remarks. The correspondent, who understands perfectly that his first business is to be sensational, begins by declaring that "the long threatened European conflagration can not be much further delayed." Then he talks of "the plans for partitioning China being calmly discussed by Europe without even consult-ing Great Britain," and then, having discanted in hysterical terms on England's industrial troubles and the weakness of her Army, he quietly declares that "a British force larger than Wellington commanded at Waterloo is retreating before a horde of undisciplined hillmen in India," and that the disaster is entirely due to nepotism and corruption. To refute such folly in detail would be only a degree less foolish. So far as American journalists are concerned, it seems to us that their labours on behalf of the Press serve chiefly to push it down hill.

#### THE NEW TARIFF.

The confusion into which Austro-Hungarian affairs have temporarily fallen constitutes another obstacle in the path of the new Japanese Tariff's operation. Our readers are already aware, however, that the revised Treaty with Austria-Hungary provides for an interval of only one month between the exchange of ratifications and the operation of the Tariff. The French treaty provides six months, and as the French Treaty has only just received the ratification of the President, it can not reach Japan before the end of February. We may assume, then, that the ratifica-tions will be exchanged in Tokyo about the beginning of March, and that so far as France is concerned, the Tariff can become operative from, say, September 15th, or, more probably, October 1st. But the ratifications of the Austro-Hungarian treaty must be exchanged a month before the latter date; in other words, must be exchanged on September 1st, for, of course, the Tariff must be applicable to the trade of all the Treaty Powers simultaneously; no one of them can be left out. It would be rash to predict anyulators that there was great deal of thing about Austria-Hungary's doings in examine the Code, devoted itself simply this matter. The delays for which she is to revision. But, in point of fact, it has newspapers of the type introduced by the already responsible are almost comical almost re-written the Code, taking Gerland Repeats which made late James Gordon Bennett, which made considering the petty dimensions of her no pretence of earnestness, which printed commerce with Japan, but apparently

#### DR. LÖNHOLM'S CIVIL CODE.

Dr. Lönholm's translation of the first two books of the Civil Code has reached its second edition. These two books comprise 393 out of the 724 Articles already promulgated and translated by Mr. J. H. Gubbins in the volume to which we re-cently referred. The first edition of Dr. Lönholm's translation appeared in April, 1896—nearly two years ago. It represented a remarkable leat of scholarship. For the Code was not promulgated until February of that year, and since the printing and publishing of Dr. Lönholm's book must have taken fully a month, it follows that he accomplished his work of translation in twenty-five or thirty days. He must, therefore, have translated and written out an average of sixteen Articles daily-a veritable achievement, especially when we consider that the learned Jurist was, at the same time, discharging his functions as Professor of Law in the Imperial University. This calculation suggests another point, also. It would seem that the result of Dr. Löuholm's labours must have been accessible to the German Government before the conclusion of the Revised Treaty with Japan, or at any rate, before the conclusion of the negotiations relating to revision. If so, the work can not fail to have proved immensely valuable, and we shall probably be right if we assume that the explicitness with which the German negotiators ness with which the German negotiators were able to define the privileges they secured for their nationals—and therefore for the subjects and citizens of all the other Treaty Powers, also—was largely due to Dr. Lönholm's most timely translation. We presume that the Government in Berlin has not failed to recognize the translator's work. failed to recognise the translator's work. At any rate his own nationals have to thank him for his strenuous industry, and so have all the foreign residents, for truly without his expositions published in the correspondence columns of the Japan Mail, it is difficult to see how the persistent misapprehensions circulated by some of the local newspapers in Yokohama and Kobe with reference to the tenure of land, could have been dispelled authoritatively.

We observe that Mr. Gubbins in the preface of his book, makes brief reference to Dr. Lönholm's work. He says :--" I have consulted with advantage Dr. L. Lönholm's translation of the Code." We infer, from the cursory character of this indication, that the English sinologue did not make large use of the German's work, and, indeed, the fact is demonstrated by certain differences of terminology. On the whole it seems regrettable that some method of cooperation was not devised, for the question of terminology is of great importance, and a German jurist is naturally the best authority on such a subject. The Civil Code may be said to be altogether German. Nothing, or al-most nothing, remains of the original Code promulgated in 1890 and derived chiefly from French sources. The public has been under the impression that the Committee appointed by the Government in 1891, at the instance of the Diet, to man, instead of French, law as a basis. The result is excellent. The revisers, full sense of the conditions to which the laws have to be adapted, and at the same time, they have paid such careful attention to general principles that jurists will probably pronounce this Code one of the best, if not the very best, in existence. We trust that Dr. Lönholm will complete his translation. He must be perfectly familiar with the original laws and is therefore in a position to furnish authoritative renderings of the Japanese text.

#### SECRET INSTRUCTIONS.

The Kobe Chronicle re-iterates its fears as to the good faith of the Japanese Authorities in administering the laws of the realm when foreigners are concerned. It

Even if foreigners technically have the right to make a "superficies lease" for fifty, a hundred, or a thousand years, there is no guarantee, in face of the absence of specific provisions in the Trea-ties, restricting the Government from passing a ties, restricting the Government from passing a law to limit such terms, or discriminating against foreigners in future as in the past by the issue of secret instructions to the registration authorities, These points we shall continue to keep before the public until some arrangement has been arrived at between the Foreign Representatives and the Japanese Government.

Thus the position taken by the Kobe Chronicle is that the Japanese Government can not be trusted to discharge its treaty obligations; that, having pledged to extend national treatment to British subjects with regard to a certain privilege defined by law, it will discriminate against them by means of secret instructions to the judicial authorities administering the laws. There is here a a double-barrelled charge—a charge of deliberate mala fides on the part of the Japanese Government, and a charge against the judiciary of violating the laws at the beck of the Executive. Our contemporary intends to keep these chimeras before the public until some provision has been made against them by arrangement between the Foreign Representatives and the Japanese Government. We fear that the Kobe Chronicle has set itself a hopeless task. If any foreign Representative were to invite a civilized Government to give an engagement of such a nature, his passports would be handed to him within 24 hours.

The Kobe Chronicle is further apprehensive that though the Code, as it now stands, grants the right of superficies, there is nothing to prevent an alteration of the law, by and by, and it desires to have that contingency also provided against by a special diplomatic arrange-ment. We fear that no arrangement of the kind is within the range of practical politics. The most that foreign States can ask from Japan is national treatment for their subjects and citizens. It would, in fact, be quite futile to approach any constitutional Government in the manner suggested by our Kobe contemporary. In Japan the Diet has power to make or change the laws, subject, of course, to the Sovereign's approval. The Sovereign can not guarantee permanency for any law; neither can the Diet. Japanese subjects are liable to have the laws altered by the legislature. Foreigners residing in Japan must submit to the same liability. The Foreign Representatives and the Japanese Government would be willing, doubtless, to listen to and entertain any reasonable suggestion, but these proposals of the Kobe journal are quite beyond the range of reason or practical possibility. Digitized by GOOS

#### THE BANKS AND INTEREST.

We presume that the step taken by several Japanese banks—the Mitsubishi, the Third, the Fifteenth, and the Hundredth-in raising their rates of interest, has been officially recommended as a device for replenishing the store of floating capital; or rather, recalling it into channels where it will be available for the purposes of productive enter-prise. At all events, the Imperial Commercial and Industrial Bank has followed suit, and, since the 15th instant, has been offering 61 per cent. on deposits for six months and upwards, and 1.5 sen daily on current accounts. The Post Office Saving Banks, also, are said to have decided upon paying 42, or even 5, per cent., and it is rumoured that if they adopt the latter figure, private banks will compete with them by offering as much as 8 per cent. We regard the latter project, however, as very unlikely. Seven per cent. on fixed deposits is alreadyan extraordinary figure, and if it does not tempt depositors, neither will eight per cent., we imagine. Of course, the idea is that hoarding money has taken place on a considerable scale since the war. It always does take place when any feeling of financial insecurity is abroad. Apart from that, however, people who ought to be well informed allege that a part of the large amounts expended during the war went into the hands of folks who, being quite unaccustomed to possess any such sums, have not thought of anything better than to hide them away. The raising of the bank rate to seven per cent, is expected to attract so much attention that a bright idea will occur to these hoarders. At all events there is one thing pretty sure, namely, that if investors can get 7 per cent. from perfectly safe banks like the Mitsubishi, the Fifteenth, and so on, they will be reluctant to put their money into any enterprise that is not of the most satisfactory nature. Thus the banks' action should produce a salutary effect. Presumably, their lending rate will be 12, or even 13, per cent., so that another obstacle is placed in the path of bubble enterprises.

#### THE CROWN PRINCE'S MAJORITY.

The Prince Imperial, as already noted in these columns, attained the age of eighteen, in other words his majority, on the 30th of last August. Owing to the Court mourning, however, no steps were taken to celebrate the event publicly. It is now stated that the cerentony will take place at some time during March. The details are not yet published, of course, but there will presumably be some religious observances in the Imperial Sanctuary, followed by a levee and, perhaps, a State ball. Concerning the last part of the programme, the Nichi Nichi Shimbun observes that as electric lighting was abolished in the Palace in 1891, there would be great inconvenience in having ing the tenure of shares-as of banks and an evening entertainment there. Probably one of the detached palaces, Akasaka-Goten or Hama-Rikiu, would be they fully realize the value of their own used. The ladies of Tokyo will welcome the prospect of anything in the shape of a ball. From their point of view, the dullness of Tokyo during the past twelvemonth must have been deadly.

#### KOBE DIRECTORY.

Kobe has at length a directory of its own. It is somewhat surprising that a Settlement of such importance, a Settlement which is running Yokohama close for pride of place, has hitherto remained without a volume so essential. Of course, each of the directories published in Yokohama has invariable devoted space to Kobe, but that is a very different matter from having a special, unadulterated directory, if we may use the expression. The Kobe Publishing Company-which seems to be synonymous with the Kobe Herald-has now stepped into the breach, and produced a book of handy size, clearly printed, neatly bound, and doubtless accurate, though on the last point we are not qualified to pronounce an opinion.
The publishers have been fortunate enough to obtain 40 pages of advertisements, a fact which speaks highly for the business enterprise of Kobe. They have supple-mented the directory proper by a mass of information on all kinds of subjects, including a list of the local sporting events from 1871 to 1897; which list, curiously enough, is placed immediately after the enumeration of the various missionary bodies without so much as a dividing leaf. In fact, valuable as are the contents of the volume-tariff lists, tables of weights and measures, names of well known places, postage rates, jinrikisha and sampan charges, a calendar, Japanese eras, notes on tides, &c.,—we shall be surprised if the confused method of arrangement does not call down many anathemas on the heads of the compilers during the next twelve-month. In the first place, the directory itself and the alphabetical list of names are sandwiched between a quantity of foreign matter, and none of the usual marginal devices has been employed to enable readers to make direct reference to these essential parts. In the second place, 18 pages without numerals or lettering of any kind to distinguish them, are inserted after the front advertisements and before the calendar, which in turn, together with the notes on tides and the list of Japanese eras, makes another section of 36 pages, distinguished by Roman numerals, the whole prefatory to the directory. And in the third place, there is no index. How on earth people are expected to use the volume, we do not perceive. The familiarity resulting from long practice can alone obviate the inconvenience of such a want of system. However, these defects can easily be remedied in next year's edition, and in the mean time the Kohe folks will have to be content with the volume as it stands.

#### FOREIGN CAPITAL.

The question of the introduction of foreign capital continues to be discussed earnestly by the vernacular press. The advocates of effecting that end by legalizcompanies—by foreigners seem to be in-creasing, but it is difficult to think that arguments. The plain, incontrovertible fact is that no foreigner will put his money into Japanese enterprises unless he can have a genuine voice in their management and control. There are plenty of Japanese companies which declare fat dividends, and have declared fat dividends ever since they com-

menced operations. We have not the slightest doubt that many of them are perfeetly sound. But which? It is in the nature of things that they can not all be trustworthy. How is the foreigner to make a selection? An Euglishman, when looking for an investment, is guided in great part by the names of the promoters and directors. If he himself has a seat on the board of directors, the case is different; but if he is an ordinary person, merely seeking some profitable and safe way of getting a return from his capital, he attaches very great, even paramount, importance to the auspices under which an investment is commended to the public. That kind of safeguard is scarcely possible There are, indeed, a few names in Japan. of leading Japanese merchants and bankers whose association with any undertaking itself. would have much weight with foreigners; but, on the whole, it would be idle to ask Europeans or Americans to place their money beyond the reach of their own supervision. Of course a company guaranteed by the Government would be a different affair, and that is what the advocates of inviting foreign shareholders recommend. But how could the Government guarantee any particular companies? How could it, why should it, discriminate? And if a Government guarantee is the desideratum, why do not foreigners invest in five-per-cent. Government bonds? They would eagerly purchase five-per-cents issued by the Govern-ment of the United States, or of Gerfive-per-cent. Government many or of France, but they seem to have no liking for Japanese securities. If they will not buy public loan bonds, neither will they buy the shares of Companies. That is certain. In our opinion two things are necessary in order to find a market abroad for Japan's national securities. One is that they should be guaranteed against taxation; the other that they should not be redeemable unless the holder wishes to sell-that, in short, the Government's operations of amortization should be limited to bonds offered for sale, as is the case in England. If those two measures were taken, Japanese public securities would certainly find foreign buyers, but as to obtaining any large sum of foreign capital quickly and cheaply, a national loan will probably be found to be the only feasible method.

#### THEATRICALS IN TORYO.

The Tokyo Musical and Dramatic Society gives its first performance for the season on the 26th instant. Society has not lost much time in get-It was obliged to reting to work. main idle throughout the whole period of mourning for the late Empress Dowager, not, of course, because theatrical performances were interdicted, but because the relations which the Society has, through its patrons, placed it virtually under the necessity of observing the mourning rites until the end. The IIth instant was the last day of the period, and from the 12th the hall at the Shoreikai became accessible. It will be seen, therefore, that very little time has been lost in preparing an entertainment. We trust that the Society may have a successful season, and that it will organise as many performances as possible to make up for the long interval of idleness.

#### COUNT INOUYE ON FINANCE.

The fiji Shimpo thus epitomises a statement made by Count Inouye to its representative on the subject of finance:—

You want to know ony views about the financial problem, do you? You imagine, then, that I have views cut and dried? I held office in the finance. Department in 1873, and now, after twenty-six years, I find myself there again. The finances of the nation have changed greatly since that time. Even to read the Budget of 1897-8 ance through, is no small task, and every one of its details must be mastered before an opinion can be formed. So, your see, I have no views as yet. A friend called on me yesterday evening and said:—"I understand that you are in favour of introducing foreign capital." I replied:—"Do you suppose that such a question as the introduction of foreign capital can be decided off-hand? Throk a little. The first thing to be determined in whether a necessity to introduce foreign capital presents itself. Then, if there does appear to be a necessity, we have to consider the amount, and thereafter the method. The necessity admitted, the amount fixed and the method settled, it b-comes essential to consider what effect the introduction of foreign capital would produce on economical society, and whether that effect might not be in the name of an aggravation rather than an anchoration of the present state of affairs. All these points demand the most careful analysis. Were these question of the finances of a single humshold, I might be able to indicate a present product of procedure as a temporary measure, but when the finances of the nation are to be deat with, to temporizing course is permissible; or, at any rate, if a temporary expedient be resorted to, we must have a clear idea of what we are going to do afterwards." In that strain I answered my visitor. The fact is that such an empirical step as the introduction of foreign capital can not be tusted to restore prosperity under financial complications like those now existing. I do not may, of course, that it is not desirable to introduce foreign capital. I merely say that I do not yet see my way.

This has a decided ring of Count Inouye, and it tallies, moreover, with the general trend of the paragraphs published by Tokyo newspapers on the same subject during the past few days.

#### YOKOHAMA'S FIRST CRICKET MATCH.

We take the following from the London and China Express:—The annual concert of the Imps Cricket Club, which is composed of members of the staff of the Imperial Institute, was held in South Kensington on the roth Dec. The chair was occupied by Captain Sir Alfred Jephson, R.N., who said that one of the most exciting matches he ever experienced was when he took part in the first match ever played by Englishmen in Japan. It was in 1857. They had gone out on H.M.S. Sanspared with a large contingent of Royal Marines for the Indian Mutiny, and, after landing them safely, proceeded to China. On their way they stopped at Yokohama, where, by the permission of the swamp butside the town, but only on one condition, that all should go armed, so the country at that period was in a very disturbed state. The match came off, and it was lucky that they had all taken revolvers with them, for they subsequently learned that not more than three-quarters of a mile away a French officer had been cut up.

An Old Resident points out that Sir Alfred jephson, R.N., is a little out in his dates when the tent, therefore, that very en lost in preparing an Ve trust that the Society sful season, and that it many performances as up for the long interval many performances as up for the long interval that Yokohama in 1857, for at the earlier date it was in all verity a fisherman's hamlet set upon a swamp.

An Old Resident points out that Sir Alfred Jephson, R.N., is a little out in his dates when in active in his dates when in active in a little out in his dates when in active in the first cricket match in Yokohama: that is if it took place on the day when the French officer was cut down at Ota. This melancholy event occurred in October, 1863, the unfortunate officer being murdered as he was quietly riding into Yokohama first saw the "willow" handled in 1863 than in 1857, for at the earlier date it was in all verity a fisherman's hamlet set upon a swamp.

SIR NICHOLAS HANNEN.

Yokohama appreciated and liked Sir Nicholas Hannen so thoroughly that we are tempted to reproduce the speech made by Mr. Robert Little when proposing his health at a Club dinner recently given in Shanghai:—

Mr. Chairman and Gentlemen. I assume the Chairman's consent that I should occupy your attention for a minute or two, though I have no real claim to do so, as I am not even a bicyclist. But I am sure you will forgive me enthusiastically, when I mention that I am about to ask you to drick the health of our Chairman. Sir Nicholas Hannen.—(Cheers.) There are many lights in which we can look on Sir Nicholas, and no one can appreciate him better than I, who have had the honour and pleasure of knowing him intimately since he first came to Shaghai some thirty years ago. In that period he has endeared himself to us all by his kindness and geniality and earned our respect by Bia ability and straightforward character: I need not say much to you on the subject of his social side. We all recognise that he has shown himself a thorough Shanghai mao, and nothing that interests Shanghais in different to him. He interess himself in all our sports, as well as in graver mattera.—(Cheers.) When the amalgamation of the Chief Justiceship with the Consul-Generalship was decided on, it was remarked that objectionable as the new departure was, it was alleviated to us by the appointment as the first occupants of the dual post of the two best meet that could have been selected, Sir Nicholas Hannen and Mr. George Jamieson.—(Cheers.) Experience has amply proved the justice of the remark, it would not become me to say much of Sir Nicholas Hannen as Chief Justice; but I may say that it would be impossible met that squeet endoubled force to the wave of indignation that spread over Shanghai when the recent gross attack was made upon him in that superlatively mixed Court.—(Renewed cheers.) But I wish specially to say a few words on the work that Sir Nicholas has done as Consul-General. Rudyard Kipling has made it a great point in the character of Lord Roberts—and it has become a proverb—that "he doesn't advertise," and I may say the same thing of Sir Nicholas. He doesn't go about with a placard on his back. "I'm the British Consul-General, and d

This speech is interesting, not merely for its own sake—and assuredly it is a capital oratorical effort—, nor yet for the deserved enlogium it bestows upon Sir Nicholas Hannen, but for the apeaker's splendid indifference to the reserve usually observed in alluding, at a Club dinner and in the presence of a number of nationalities, to the acts of a British official in his official capacity. It is easy to see that Shanghai has the advantage, or disadvantage, of lying far heyond the range of diplomatic influences. Sir Nicholas Hannen's answer is summarized in the most general terms, and we do not doubt that it was very "general."

Dr. Schmidt-Leda, German Consul-General for Japan, who is at present staying in Berlin ou leave, has been attached to Baron von Richtofen, in order to assist him in conducting the affairs of the Colonial Department.

URBANA-CHAMPAIGN

#### ENGLAND IN CHINA.

NCREDIBLE as the intelligence sounded at first that the British Government was disposed to guarantee a Chinese loan, the course of subsequent events and the persistence of the rumour forbid us to dismiss it as a pure canard. An air of probability was imparted to it at the outset by the rate at which the loan was alleged to have been fixed, namely, 110, the interest being 3 per cent. Bonds bearing three per cent. interest and secured by the guarantee of HER MAJES-TV'S Government, would find eager purchasers in London at a premium of ten per cent., but of course such figures would be out of the question did not the transaction stand on an official basis. Since that first rumour reached us, there has been no contradiction. On the contrary, every fresh item of news has been confirmatory, especially the telegrams sent from Peking to the Jiji Shimpo, under date of the 14th, 15th and 16th instant. These telegrams indicate that certain conditions have been submitted to China by Great Britain, and of course nothing of that kind would be probable if the question of a Government loan were not on the tapis. Nevertheless many people will find very great difficulty in believing that Lord Salisbury and his colleagues have taken such . step. Parliament is not sitting at present -will not be sitting until Februaryand though Lord BEACONSFIELD negotiated the purchase of the Suez Canal shares in November 1875 without consulting the Legislature, the transaction differed radically in character from a loan to China, and was, moreover, of smaller dimensions, four millions sterling being the amount involved in the Canal affair and sixteen millions the sum in China's case. It has to be remembered, however, that the Russian Government already figures as China's creditor; that Russia and France are responsible for the invention and employment of this new diplomatic device, which, according to their method of employing it, serves primarily to threaten British interests, and that the been made by Her Majesty's Government. security offered by the Chinese Customs, although a great part of them is already mortgaged, amply suffices for an additional indebtedness requiring only some five amortization. Lord SALISBURY was a acquired, and he must have a very lively welcome such coups. There is a passionate love of enterprise and push the guardian of the world's trade. The world's trade. The world's trade in the sionate love of enterprise and push the guardian of the world's trade. The world's trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade. The world is trade in the sionate love of enterprise and push the guardian of the world's trade.

most methodical Englishman, and he is ready at all times to throw his hat into the air and shout himself hoarse over every evidence of "the tight little island's" goaheadness. There is no room to doubt that the SALISBURY Cabinet will find them-{ries can be fitted to it, of course, but selves the objects of a popular poean if they take the step attributed to them by rumour. In truth, to every Englishman who takes the trouble to think, it must seem somewhat farcical that finance should be employed by an European Power as = weapon for forcing England out of the field. If Russia and France waited to challenge her to a trial of strength in the Far East, they might have chosen some arm which she is less competent to wield. We may say here, however, that, so far as we can ascertain-and we have made inquiries in responsible quarters-there is as yet no official knowledge in Tokyo of the measure proclaimed by the telegraph, and we must therefore dismiss as apocryphal the statement that Japan is supporting Great Britain. We entertain very little doubt that Japan would be quite ready to support Great Britain in all the steps thus far attributed to the latter, but steps thus far attributed to the latter, but in the political sphere, and of what our illustrious England scarcely needs any help in such father won by his sword on the battlefield; they a matter: she can score off her own bat.

This brings us at once to the question of the conditions said to have been laid down by HER MAJESTY'S Government, the opening of three ports, one in Hunan, one in Kwangsi and one in the Liantung Peninsula, and the construction of railways in the valley of the Yangtsze and in Yunnan. As to these railways, the same comment applies as that previously made by us in the case of Germany's alleged demand for the building of lines in Shantung. China is precluded by her treaties from granting any such privilege exclusively to the nationals of one State. She may adopt any course she pleases so far as individual Englishmen, or individual Frenchmen are concerned, but she may not pledge herself to British subjects, as such, or to French citizens, as such, to the exclusion of the citizens and subjects of other Treaty Powers. It is not imaginable that any proposal of the kind has The railway condition, if formulated, doubtless aims at nothing more than securing China's acquiescence in the general proposition that Yunnan and the Valley million taels annually for interest and of the Yangtsze shall be supplied with railway communications. As for the opening member of Mr. DISRAELI'S Cabinet in of three new ports it is a proposal worthy of 1875 when the KHEDIVE'S shares were special notice for it clearly establishes the distinction between the policy of Great recollection of the chorus of applause Britain and the policy of other European which the act evoked from the country Powers in the Far East. England simply and of the praises with which the air seeks to bring the whole of the Chinese rang for the courage and spirit shown by empire within the direct sphere of foreign the Conservative Ministry. The truth is commerce. She does not want any that the British nation is always ready to territory for herself or any new naval stations. She stands forward solely as in order once for all to give his protection to all who

Kingdom's resources is her programme, and she invites every country to share in the enterprise. The attitude of opposition attributed to Russia and France seems scarcely credible. Plausible theoit is not the business of a newspaper to discuss such a subject until the facts are fully ascertained.

#### THE KAISER AND PRINCE HENRY.

We have now before us the text of the remarkable speeches made by the German Emperor and Prince Henry at the banquet in Kiel Castle on the 15th December.

The Emperor said :-

My dear Henry,—As I arrived at Kiel to-day I was thinking how often I had entered this town with feelings of pleasure, whether I came for purposes of sport or, at your side and on my ships, to take part in some military undertaking. When I set foot in the town to-day it was under the influence of solemn feelings, for I amfully conscious of the task I have imposed upon you, and of the responsibility which falls upon me. But, at the same time, I am conscious that it is my duty to extend and enlarge what my predecessors have trqueathed to me. The junctey which you will indectake and the task which you have to fuffit imply in themselves nothing new; they are the legical consequences of what my grandfather, of blessed memory, and his great Chancellor founded we naught but the first manifestation of the newlyunited and newly-arisen German Empire in its transmarine mission. In the stupendous development of its commercial interests, the Empire has gained for itself such a wide sphere that it is my duty to follow the new German Hansestic League and to bestow upon it the protection it can claim from the Empire and the Emperor.

" Our German brethren in the service of the Church, who went forth to prosecute their tranquit chinten, who went into the state to stake their lives in order to give our religion a home on a foreign soil among a foreign people, placed themselves under my protection. What has now to be selves under my protection. What has now to be done is to create for these brethren, who have repeatedly been undested and often persecuted, a stay and a defence for ever. For this reason the enterprise which I have intrusted to you and which you will have to accomplish, along with the con-rades and ships which are aiready on the spot, is

ships of war our commerce, the German merchant, and German vessels must now obtain those rights which we may justly claim—the same eights which the foreigner concedes to all other nations. Our commerce is, indeed, no new creation. Hanseatic League in olden times was one of the mightiest enterprises that the world ever saw, The German towns were once able to fit out fleets such as the broad back of the sea had But the League probably never borne before. But the League decayed and inevitably declined because one of the two conditions of its maintenance was lacking—the Imperial protection. The times have ing—the Imperial protection. The times have changed. The first preliminary condition, the German Empire, has been created. The second condition is also present. German commerce flourishes and develops, and it can only develop in prosperity and safety when it feels safe under the Imperial power. Imperial power means naval. power, and naval power and Imperial power are implicitly dependent on each other, in such wise that the one cannol exist without the other.

"As a symbol of Imperial and naval power the squadion which your division goes to reinforce will now have to act. Let it maintain sincere relations and good friendship with all comrades be-langing to loneign fleets in those distant waters, and let it be a strong defence for the interests of our country against every one who would meddle with the Germans. Such is your mission and your task. May every European in those distant regions, may every German merchant, and, above all, may the foreigner on whose soil we are, or with whom we shall have to deal, be aware that the German Michael has firmly planted his shield

the protection of the German Empire implied by the German ships of war will be steadily vouch safed them. But should any one essay to detract from our just rights or to injure us, then up and at him with your mailed fist (fahre darrin mil so him with your mailed fist (fahre darrin mil gepanzerter Faust), and if it he God's will, weave for your youthful brow a wreath of laurel which no one in all the German Empire will guidge you.

one in all the German Empire will genoge you.

"In the firm conviction that, imitating excellent models—of models of conduct, God be thanked, our House can show plenty—you will fulfilling ideas and wishes, I raise my glass and empty it to mishing you a good voyage, a good your health, wishing you a good voyage, a good performance of your task, and a joylub return. Long tive his Royal Highness Prince Henry! Hurrah! Hurrah!

Prince Henry's reply was :-

Most angust Emperor, most mighty King and Lord, Blustrious brother,—We grew up together as children. Later on it was our privilege, as men, to look into each other's eyes and faithfully to stand by each other. The Imperial crown budded for your Majesty with thorus. I have tried in my nature solder and with my feelib goover. as ded for your Majesty with thorus. I have tried in my narrow sphere and with my feeble powers, as a soldier, and as a citizen of the State, to help your Majesty. A greater spoch came, an epoch of import for the nation, an epoch of import for your Majesty's navy. Your Majesty has most graciously made the sacrifice (die Enstangung gehabt) of intrusting me with this command. I thank your Majesty with a most (aithful, a brotherly, and a most limble heart. bomble beart.

most humble heart.

"I very well know the thoughts of your Majesty. I know what a great sacrifice is involved when your Majesty intrusts me with such a splendid command. And it is this that moves me most profoundly; it is for this that I thank your Majesty most sincerely. In the second place, I am profoundly obliged to your Majesty for the confidence which your Majesty reposes in my humble person. Of one thing I may assure your Majesty—neither Of one thing I may assure your Majesty-neither fame nor landels have charms for me. One thing is the aim that draws me on-it is to declare in foreign lands the gospet of your Majesty's hallowed person (dus Evangelium Eurer Maiestät geheiligter Person lans Evangetium Eurer Majestat geheiligter Person im Austande au künden), to preach it to every one who will hear it, and also to those who will not hear it. This gospet I will have inscribed on my banner, and I will inscribe it withersoever I go. The same sentiments which inspire me us I set forth are cherished in my commades.

I saise my class, and as for those whose heavy

I raise my glass, and as for those whose happy fate it is to be permitted to face forth with me call upon them to impress the image of our Kaiser their minds and to let the cry resound far over the world-Most august, most mighty, beloved Emperor, King and Lord, for ever and ever. Hurrab! Hurrab!

The Berlin correspondent of The Times, referring to these speeches; of which the above are his translations, says :-

The tone and phraseology of the Imperial and Royal speeches, which I have endeavoured faithfully to convey, are unusual, even if allowance be made for the difference between German and English idiom, a difference nearly as great on such occasions as that between English and Chi-In several senses the significance of the speeches is, however, only the more marked,

The Times, while making full allowance for the fact that every nation has its own conceptions of eloquence and good taste, and that the two speeches are not us be judged strictly by English standards, thinks, nevertheless, that "if a broad smile does not play over the Teutonic countenance as these august utterances are disseminated through the Fatherland, the wicked Frenchman's question whether humour formed part of the equipment of the German intellect, will be decided irrevocably in the negative." Noting that the voyage about to be undertaken by Prince Henry is "what most Englishmen and all English naval officers would think a very pleasant trip," it contrasts with this common place purpose "phraseology only worthy of the heroes of melodrama," and then goes on to say :-

It is the sort of jub which quite unconsidered Bitish commanders have done over and over again to the entire satisfaction of their countrymen and to their own without effort and without fuss. Indeed, the chances seem to be that Price Henry will have no fighting at all if abject submission on the Imperial perfection on the Imperial perfection words of his Imperial brother and his own words.

een high-flown to modern ears if they had been uttered by a Philip II, as he despatched the "In-vincible Armada," or by a Christopher Columbia about to carry the dominion of Spain over oceans which to keel had ever ploughed before. The Emperor evokes the memories of Metz and of Emperor evokes the memories of Metz and of Sedan to encourage Prince Henry to keep up a stout heart as he faces the perils of the Suez Canal and the terrors of the China Sea. He says it is his duty "to extend and entarge what his predecessors have bequeathed to him," and apparently he hopes to act as "Mehrer des Reichs" to the extent of a coaling station. He very tuity observes that the voyage and the task of Prince Henry are "nothing new." But he affects to see in this little numitive excedition, the commencement of a are "nothing new." But he affects to see in this little punitive expedition the commencement of a new era. They are, we are told, "the first manifestation" of the new German Empire in "its transmaring mission." The Prince's squadron will now "have to act." as "a symbol of Imperial and naval power" and about this part of the speech there occur a few words which perhaps speech there occur a lew words which perhaps reveal the true meaning of this astonishing display. "Imperial power," says the Emperor, "means naval power, and naval power and Imperial power are implicitly dependent on each other in such wise that the one cannot exist without the other." So far as Imperial power beyond the seas is concerned we cordially agree, but before Germany makes up her mind to under take the burden of such an empire she will probably sit down and count the charges which it entails. The Emperor insists that the aims who which he is despatching his fleet are purely defensive. But he wants everybody to know that "the German Michael has firmly planted his shield with the device of the German eagle upon the soil "—apparently upon the Emperor of China's soil—"in order once for all to give his protection to all who may ask for it." What would the German Emperor and the German Press have to say of any person unrighte-ous enough to formulate such doctrine as this, say, in South Africa? And he makes this, say, in South Africa? And he makes no secret of the means by which the German Michael with his German eagle are to fulfil their beneficent mission. Should any ill-advised person beneroon masain. Sooth any measures person be so rash as to injure that individual or detract from his just rights, the Emperor exhauts his brother to smite the offender " with his mailed fist, and if it be God's will "—piery was ever a grace of the Hobenzollerns—"to weave for his youthful brow a wreath, of laurel."

The feelings of Prince Henry, who has been hitherto regarded as a sober and quiet personage, when he was called upon to reply to this effusion are not to be envied. Doubless be felt that he are not to be envied. Doubtless be felt that he had little choice as to the character of his remarks and determined to "play up to" his senior. He seems to have fallen into the error so common with the imitators of great artists and to have exaggerated all the exaggerations of the master. After saluting his bruther in langu-age of salutation eminently suggestive of recent Oriental studies, he, too, reverted to the recullec-tions of childhood. He stated that he and his tions of childhood. He stated that he and his brother had grown up together—an incident not uncommon with children of the same parents of similar years. As he grew older, he said, he had enjoyed the privilege of looking into that brother's eyes. Perhaps it is this experience which enables him to assure us that "he very well knows the thoughts of His Majesty"—a knowledge which we had imagined past the power of mortal wit. He thanked His Majesty for the self-sacrifice the latter had shown in despatching him to China, and then he went on to set for this way in which he conceive he went on to set for tithe way in which he conceived his mission. Not fame nor lantels have charms for him. He has but a single aim, and it is an aim which we feel quite incapable of adequately expressing in any words of ours. He goes forth, he assures his brother, "to declare abroad the control of your Mainth's amplified persons he was "Mainth's "Mainth's "Mainth's "Mainth's "Mainth's "Mainth's "Mainth's "Mainth's "Mainth's "Maint gospel of your Majesty's anointed person; to preach it to every one who will hear in, and also to those who will not hear it. This gospel," he protests, "I will have inscribed on my banner, and I will inscribe it whithersoever I go." An exhortation to his shipmates and comrades to "impress the image of their Kaises on their to "impress the image of their Kaises on their minds and to let the cry resound far over the world, Most August, Most Mighty, Beloved Emperor, King and Lord for ever and ever," closed this specimen of almost Byzantine self-abasement, unique in the annals of modern Europe. Yesterday Prince Henry got through the Baltic Canal without further accident. Europe. Yesterda The Emperor, who accompanied him part of the way, took his departure not unfittingly amidst the blaze of Bengal lights and hurried off to Friedrichstuh to pay a visit to Prince Bismarck. The private reflections of the old Iron Chancellor on the Imperial performace will be decidedly interesting. Unhappily we are hardly likely to get

That is all very true, no doubt, but The Times itself, in its mood of merriment, appears to forget the collateral issues involved in the Kiaochou proceeding. So far as the China of the moment is concerned, the Emperor of Germany must be thoroughly cognizant of the fact that he is sending ironclads to bomdard parapets of cheese. He knew, when he was speaking at Kiel, that China had already folded her hands in meek submission, and that anything like formidable resistance on her part, or even resistance of the feeblest kind, was out of the question. There were other issues to be considered, however, issues of the gravest character. Germany, by her Kiao-chou coup, has deliberately entered an arena where she can not possibly sustain herself by her own unaided strength, She is not equipped with means to play the part of an aggressor in the Far East. Her fleet does not begin to be sufficient for that purpose. She can not spare troops for a campaign at such a distance from home. She has no coaling stations, and, in the event of war, she would find herself, unless she had an ally, without dockyards, without a good basis of operations, and without sources of supply. The step that she has taken is thus seen to be one of the most daring in history. Whether it is the daring of genius or the rashness of unwisdom, we besitate te pronounce an opinion, but all thoughtful men must see that the safety of the position now assumed by Germany in the Far East, depends primarily on the good will of France and Russia. Suppose Germany confronted by the contingency to provide against which all her efforts have been directed during recent years, the contingency of an attack by Russia and France in combination, would not disaster be certain for her in the Far East? With the help of her partners in the Triple Alliance-Italy and Austria-Hungary-she could doubtless hold her own in Europe, but neither Italy nor Austria-Hungary would be of any use to her in the China Seas. She would be there at the mercy of her enemies, for let her ships be the best in the world and her sailors the stoutest, the odds against her would be simply overwhelming. Thus she has created a vulnerable point in her armour. China is nothing to her, but Russia and France are a great deal. It is not conceivable that the Emperor failed to appreciate any of these issues when he ordered the seizure of Kiao-chou and the despatch thither of a squadron which can not be spared from home waters without causing serious weakness there. Such considerations do not suffice to account altogether for the tone of the speeches delivered by his Majesty and Prince Henry, but they impart to the Kino-chou incident a complexion very different from that of a mere punitive expedition against an unresisting State. Germany has launched out in a direction where her weakness is conspicuous. and has undertaken responsibilities which the can not hope to discharge without immense danger. By Englishmen the fact onght to be welcomed, we think, for it points to an entente . with Germany. There have been causes of friction during the past two years, but the instincts and sime of the two nations draw them together. and it is very easy to conceive a cordial understanding between them in the Far East. After all Germany at Kiso-chou is posted between England and Russia in the Chinese empire. She may join hands with the Great Northern Power, but such a union must hold in Europe as well and Asia IT I Mat probable?

#### MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

In our last Summary we epitomised an article published in the Shukyo on the Reorganisa-tion of the Christian Church," in which the writer dwelt on what he conceived to be the evils attendant on the present system of propa-gandism. In the next number of the Shāiyō the discussion is continued, the following being the conclusion to which the essayist arrives.
(1) The theological seminaries now in existence need to be reformed. They deal too much with dry doctrines and theories and too little with practical Christian life. The students spend too much time in learning what theologians have said about Christianity and too little in direct and tangible proofs of the truth and power of the Christian religion. The scope of the teaching in achools of Divinity is far too narrow. The education given should embrace instruction on all general subjects, while impressing on the students the importance of religion. A study of the theology of the Christian Church in its entirety is quite unnecessary. Clurch in its entirety is quite unnecessary. One thing certainly should be impressed on the minds of theological students, namely, the importance of their becoming independent in This independence can be best attained by the young men receiving a training that shall qualify them to become teachers in schools and the like. (2) The second great change it is desirable to effect concerns each separate church. Instead of being as they now are, bodies of the nature of worshippers at temples with a priest at their head, I would leign have them constituted like a club, where the responsibility of keeping up the tone of the body rests with each individual member. The principal object of the existence of a Christian Church is not the observance of certain traditional ceremonies nor the defence of Christianity against hostile attack, but the manifestation to the world at large of the spirit of Christ. This object precisely corresponds with the motives that have actuated most of the founders and promoters of Clubs, A prosperous Club has a character, a principle and a tone of its own, and hence makes its influence felt in the world. The reforms I have proposed may appear in some too sweeping and to others quite unpractical, but to me they seem to be neither extreme nor fanciful. Given a number of Japanese Christians whose one object it is to present Christianity to the world in the most attractive form conceivable, the adoption of the course I have recommended is a step they would take without the least hesitation.

In an atticle entitled "Our attitude to Orthodox Christianity," the Shûkyo enunciates its principles in the following terms:—One of the causes of the stagnancy in the Christian Church, so widely complained of, is to be attributed to the spirit of compromise which has crept in among us. What we have always recommended is assimilation of religious thought derived from other sects, without yielding up a single iou of what we conceive to be true. Where agreement is possible the secis should unite, but to sink fundamental differences would involve emasculation. It may be well to enumerate the principal points on which as champions of the cause of liberal Christianity we differ from the orthodox. Briefly stated, these have reference to (1) the character of the Bible; (2) the nature of Christ, and (3) the subject of original sin. We do not think that the Bible is by any means perfect. We do not believe in the Divinity of Christ, and we do not regard the human race as suffering from the effects of the sin of Adam and Eve. us the final Court of Appeal for the settlement of all religious disputes is neither the Bible, the Church, nor tradition, but the reason of each individual Christian. Hence it follows that no Christian is under any obligation to observe ceremonies or conform to practices which to

the words and the character of Christ. We are earnest advocates of his doctrine of universal love, and we believe that it is quite possible for men and women to be so transformed as to become God-like. Hence we consider that we have every title to be ranked among Christ's disciples. . .

The Shukyo reports an interesting conver sation between Mr. Kuroda Sempo and Dr. Motora on the "Nippon Shugi" movement, which we give in the form of question and an-

Kuroda-It would seem that individual ism and nationalism are incompatible with each other. They can't both attain their objects.

What is your opinion?

Motora—Whenever no opposition to the State is involved, liberty should be given to in-dividuals to act as they please. If the State needs the house that I occupy it is my duty to give it up. This principle has been denied in America, however, from mistaken notions as to the limit of State power.

Kuroda—Does not what is known as the Nippon Shugi" emphasize nationalism rather S mailaubividualiam?

Motora-No. It emphasies Japan and things Japanese.

Kuroda-But does the Japanese exist who does not think highly of Japan? Is there any necessity for laying such stress on the subject at the present time?

Motora-Undoubtedly there is. Loyalty and filial piety have been practized in Japan from time immernorial, but there is still need of dwelling on the importance of these virtues. It the same with "Nipponism."

Kuroda-Does not "Nipponism" imply that the State is Supreme (至上)?

Motora-No. This is by no means the main purpose of "Nipponism." Kuroda-Is not the "Nippon Shugi" move

Motors—With the progress of the movement Motors—With the progress of the movement religion will disappear. What need is there to religion will disappear. What need is devise special means for its abolition?

Kuroda-If what you say is correct, most people entertain very mistaken notions of the true nature of the "Nippon Shugi.

Motora-That is most certainly the case,

According to the Shukyo, Christian propagandism in the Hokkaido meets with far more obstacles than are encountered in the South. In place of the indifferentism which characterises ordinary Japanese in the South there is manifested in Yezo a great aversion to Christanity. At Hakodate and Nemuro only is there a sign of life. In confirmation of this view the Shukyo furmshes the following table of Statistics :-- No. of Evange- Foreign Japanese No. Mission. Pastors, of

Mr. Kawasaki Minotatô has published a work called Jikkenjō no Shūkyō (Experimental Reli-giou) which is very highly spoken of by re-ligious magazines. Messrs. Uchimura, Kosaki, Uemura, Takenokoshi and others have furnish-

\*It has been representedly asserted by other 

ed prefaces. The book sells at 35 sen per copy at the Keiseisha, Izumo-chö, Kyobashi, Tokyo. The argument of the work is that experience is the only true test of the efficacy of a religion. The author quotes the experience of a number of persons of all ages, ranks and professions.

The Shukyo discusses the connection of literature and religion historically so far as Japan is concerned. The most productive periods in the history of Japanese literature were the ninth century (the Heian era) and the hundred years that followed the Genroku era, say from A.D. 1688-1788. The impetus to literature in each case came from a degeneration in morals consequent on the continuance of peace. One of the alter-results of war is a lapse into looseness of morals and luxurious living. This effect of the Japan-China war we are now feeling, and it is not unreasonable to expect a revival of letters at the present time. The writer of the article, Mr. Yamamoto Ryökichi, next proceeds to remark that the essence of literature consists of the existence in the mind of certain earnest convictions; which convictions, in that they concarn the invisible, the infinite, the spiritual part of this our human life, are essentially religious. All kinds of deep and earnest thought, in which the mind reverences certain great truths, is to Mr. Yamamoto a species of religion. The existence of literature and religion are alike dependent on the glimpses of the infinite which men see beneath the finite-on sympathy with the spirit of the Universe, whether it be called God or described in some other way.

-

In No. 59 of his Hundred Short Essays, published in the Talyo, Dr. Kato draws attention to the undesirable consequences likely to result from the method of teaching Chinese sanctioned and encouraged by the Mombusho. Many of the text books used, as well as the men who are paid to explain them, says Dr. Kato, are out of keeping with the spirit of the age in which we live. Moreover, it constantly happens that there are in the same school Chinese teachers of the old type, who still believe in many of the superstitions alluded to in text books, and men trained in the Meijl ers, whose knowledge of science is sufficient to make them hold in contempt the so-called supernatural allusions of the books they are called on to explain. Thus it sometimes happens that in different rooms of the same school the most contradictory explanations of the same event or process are being given. To quote one instance, says Dr. Katō, one teacher tells his pupils how rate is made, giving its ingredients and describing the chemical process resorted to in its manufacture. His fellow-teacher next door informs his pupils that sake is only water transformed by the command of a certain god. The students must accept one of the two theories, and sneer at the other. The mind of youth ought not to be left to choose between the teaching of one instructor and that of another. If the learned world is agreed that certain explanations of events given by Chinese books are not trustworthy, school teachers should no longer he allowed to treat these passages as on a level with authoritative scientific statements that are capable of proof. A certain amount of liberty must be given to instructors, but surely it is the duty of the head of a school in see that theories that have been discarded entirely by all enlightened men should not be explained or alluded to by teachers in terms of approbation. And yet this is what is taking place all over the country at the present time. It would be quite possible to prepare Chinese text books that should contain no objectionable passages; but as yet this has not been done. Such as are now in use are behind the age. Of course, concludes Dr. Kato, if teachers confine their explanations to the meaning of words only, the out-of-date teachers could do no great harm. But this is not done; hence the abuses alluded

dividuality in the pupils and turn them out like no many factory atticles—all of one shape and type. The chief function of education is to develop judividual powers. But there is so much emphasis laid on serving the State and of making every mental power subservient to State interests that in many cases all natural development is rendered impossible. The source of all national progress is individual energy, purpose and general ability. To neglect to cultivate individual powers out of regard for the supposed immediate interests of the State, is the surest way of inflicting permanent injury on that State by depriving it of the guidance and enlightenment of those high class men whose individuality has been thoroughly developed. Hence it seems to me, says Mr. Kuzumi Sokuchu, the writer of the article, that modern educators are altogether on the wrong tack-that all the talk abut nationalism, Nipponism, and Imperialism spells retrogression, that the modern school teacher is a manufacturer rather than s true educator.

The Toyotetsugaku has some sensible remarks on the abstinence from meat and marriage, professed, if not practised, by Buddhists priests. All customs of this kind, says the organ we are quoting, have their origin in some decided opinion. In the present instance men were convinced in former times that the flesh ought to be mortified, that passions and desires need to be curbed, and that a vegetable diet and an unmarried life are conducive to this end. But it has been found in practice that the object of the res trictions on the liberty of priests has not been attained and, more, that the attempt to reach an impossible ideal has led to serious abuses Hence the continuance of the interdict is most undesirable.

The Tetsugaku Zasshi discusses at considerable length the attempt of the "Nippon Singi" party to make the State the ultimate basis of ethics, which it condemns in toto According to this theory, says the Tetrugaku-Zasshi, each individual is reduced to a mere State element and has no life and no interests of its own. The consciousness of every thinking man testifies to the existence of numerous interests that are in no way directly connected with the State, which are linked with his individuality. These interests nothing will pershade him to forego. The State has no claim to interfere with them.

In that portion of the Taiyo devoted to sociological topics there is an interesting account of Japanese mendicant friars, called in Japanese Kojiki dosha [[本]]. In ancient times men of real piety wandered all over the country content with a stone as a pillow and the branches of a tree for shelter, reading the scriptures and praying wherever they went, but at the present time this class of beggars usually settles in a special district and does not go beyond it. Their duties consist of pilgrimages to the different shrines of note, praying for the sick and reading the scriptures. The best known of these friars are those bearing the following titles. (1) The Saikoku-junrei (Pilgrims of the Western Provinces). (2) The Shikoku-hendo (Mendicants of Four Provinces); and (3) The Senga-ji mairi (Pilgrims to a Thousand Tem-The first class is mostly connected with the Zen sect, but the Jodo and Tendai sects are also represented among them. The Shikoku-hendo friars belong to the Shingon Sect and worship at shrines erected in honour of Köbödaishi. The Senga-ji-mairi belong to the Hokke Sect.

The first class of friars may be known by the boxes they carry on their backs, by their bags and their little bells. They visit some 33 places, beginning with Nachi-san and ending with Tanikumi in Mino. The second class worships at 88 different places, carrying fau-shaped drums (uchiwa dalko). They confine their union between Church and State liere as exists visits to the houses of adherents of the sect. in Russia. His doctrine of the necessary inter-The peregrinations of the third class often ex-

tend over three years. They visit a thousand shrines and bring away from each a charm, which is highly treasured in after-life. There is no doubt that many of the mendicant friars regard their pilgrimages as a means of making a living, but there are others who are quite sincere in all they do. In addition to these regular pilgrims, there is a large number of dis-eased persons, lepers and others, whose chief object in visiting sucred spots is to obtain a cure for complaints that have baffled the skill of physicians.

The Seikyö Shimpo (Greek Church) has an article entitled Shimbun to Shakai no Ryoshin (Newspapers and the Public Conscience) from the pen of Mr. Ishikawa Kisaburo, in which it is argued that the Yorosu Choho stands by itself in the way that it fearlessly exposes evil of every sort, and that though this exposure is only the first step towards reform, it is a very necessary step, for taking which the Yorosu Choho deserves credit. From the point of view of the religious reader, observes Mr. Ishikawa, none of the leading papers of Japan are altogether satisfactory, in that one and all devote more attention to politics, literature and such subjects than to discussing how best society may be purified. The Porosu Choho may be regarded, says Mr. Ishikawa, as the mouthpiece of the conscience of the public, which, though sometimes dormant, always exists. Hitherto little importance has been attached to religious and moral questions by the principal newspapers, but there are signs that the con science of the public is beginning to awake and realise the vital interest of these topics to every nation.

In 408 of the Magazine we have quoted above Mr. Ishikawa publishes an article entitled "The Silly Notions of officials in reference to Greek Church Propagandism," in which it is stated that so great were the suspicious of the Japanese Government as to the teaching of the Greek Church that a short time ago a apy was sent to Surugadai to dog the footsteps of a cer-tain Japanese priest. That ignorance of the attitude of Christians to the State should exist among uneducated people throughout Japan is unavoidable, but that in official ranks there should be men who are silly enough to be-lieve that Greek Church propagandism is a device for betraying Japan into the hands of Russia is certainly very surprising. But there seems to be a great want of clear-ness in the minds of outsiders as to the real relation of Church and State according to the teaching and practice of the Greek Church, I will discuss the question at length, says Mr. Ishikawa. The following is the gist of what he has to say :- In supposing that there is between the Christian Church and every State where that Church in established a close relationship which no government can afford to overlook, Japanese officials are right. Where they are wrong is in imagining that such a relationship is liable to make a man a traitor to his own country. In the case of a religion like Christianity, that is founded on Divine revelation, its authority is supreme in all matters. It occupies the position of a renovator of society and of a teacher of States. In defining the relation of Church and State it is necessary to observe that the three great branches of Christendom, the Roman Catholics, the Frotestants and the Greek Church atholics, the Protestants and the Greek Church differ considerably in both theory and practice as to what that relationship should be. The Roman Catholic holds that the Church should swallow up the State, that is, that the latter should form a part of the former. The Protestant aims at becoming a part of the State, The Greek Church Christian maintains that Church and State, while each retain its identity, are bound together is an indissoluble union, whose chief object is the regeneration of society. Neither can do without the other. Now there is no denying that in teaching Christianity in Japan the Missionary is desirous of effecting the same union between Church and State here as exists

to any one country. Hence he lanks forward to the time when Japan shall be sufficiently enlightened to do as Russia has done, ait at the feet of Christ, and be taught of him. But surely this is a different thing from siming at rendering Japan dependent on Russia. The connection of Japan with Christianity and her connection with the nation which has sent Christian missionaries to her shores is widely different. Failure to see this accounts for the wild statements which have been appearing in Buddhist magazines on the subject. If there were cases of disloyalty to Japan, our accusers would have something to go on, but not one instance of this have they produced, and yet they persist in repeating the silly slander, and, now we have educated officials coming forward and making it appear that they attach credit to the rumour. In the face of all this one sees how very limited is the extent to which real enlightenment has reached.

Under the add title of "Our Evangelists are Dacks" the Saikyō Shimpō takes to task certain Christian workers connected with the Greek Church. The point of the simile lies in the habitual neglect of their offspring said to be the characteristic of many of the paid evangelists of the mission. Like ducks which lay eggs hither and thither without concerning themselves as to what becomes of them, these evangelists treat the Christians who have joined the church with indifference: No attempt is made to develop their powers. There is more renown to be got by adding to the roll of members than by atrengthening the faith of old converts. This practice the Seikje Shampo condemns, maintaining that in Christianity as in other things quality rather than quantity should be the motto of all workers.

The Nihon Shukyo and the Shakai Zasski have been amalgamated under the editorship of Mr. Nunokawa, the latter title having been retained. In No. 7 of the new series of the Shakai Zasshi, the subject of government patrouage of religion is discussed. On all sides, says this organ, there is a clamour for government aid and protection on the part of the representatives of Shinto and Buddhism. Various are the arguments deduced in favour of government interference with religious liberty, some urging that religious teaching is a part of education, others that it is the best means of preserving moral rectitude, and others again that the prosperity of religions and the pros-perity of the State are inseparable from each other. From these views the Shakai Zasshi dissents. Its opinion on the matter, it goes on to add, was well expressed by Count Kabayama when he filled the post of Home Minister, who is reported to have said, "My policy in reference to religion is to give it all the protection we (the Government) can. But by this I do not intend that we should take an active part in religious affairs, but simply afford protection to all who are desirous of teaching religion."

It is important to observe that even among Buddhist organs there are not a few which contend that Buddhism needs no government aid, that she is fully qualified to stand on her own merits. Such are the E has sho horin. the Hansei sasshi, the Denio, the Mujinto. In other quarters, however, within Buddhist ranks the need of special preparation for the near future is urged. A Mr. Ishikawa of the Higashi Honganji proposes that a large sum of money be raised by the sale of forests belonging to the sect in Hokkaido. The Jiji Shimpo when commenting on the proposed 社会法 Shajihō, a law for the control of temples and shrines, argues that the Govern-ment will be wise if it lets the whole subject alone. To say nothing of the violation of the religious liberty which the passing of such a law would involve, it would be most undignified for the Government to figure = the administrator of physic to an extremely sick man. The restrictions that now interfere with free action in as of the third class often ex- defendence of the two institutions is not confined abolifying people to change their creeds, should all be Digitized by

ahould be allowed to go on till survival shows what form of faith is antitled to be called the "fittest."

The Shaka: Zasshi institutes a comparison between Japanese Buddhist Priests and Christian Ministers, of which the following is the gist:—

- (1) Views on beauty.—The Christian minister is taught to think lightly of external form of every kind and to set a high value on moral virtue. The connection between religion and art is closer in the East than in the West. The Christian Minister denies himself many of the pleasures enjoyed by Buddhist priests, in accordance with accordance principles.
- (2) Liveliness, cheerfulness, and activity.—
  In these characteristics the Japanese priest falls far short of the Christian minister. His nervous organization is not so highly strong and he is entirely oblivious to many of the influences that excite the Christian missionary. The latter is full of energy in his work or it could not succeed as it does. He neither spends his time in meditations among the tombs nor in seclusion among the mountains. His piety is objective rather than subjective, In contrast to this many of an country priests are the most melancholy types of humanity it would be possible to find.
- (3) Social intercourse.—In this respect there is the greatest dissimilarity. The teaching of Buddhism is that the priest should live apair from the world, that of Christianity is that the minister should mix with it in order to leaven it with his doctrines. The Christian minister is always regarded and regards himself as a member of society, who has social obligations like laymen, but the Buddhist priest is expected to seclude himself. The closeness of the intercourse between the minister of Christ and the outside world enables him to advocate and promote a number of reforms, political, social and moral with which in this country Buddhist priests seldom concern themselves.
- (4) Devotion, or feeling of gratitude for Divina favours received.—Both classes profess to be endowed with this feeling. The only way of gauging its depth in either case is to examine closely its methods of manifestation. If this be done it will be seen that the Christian minister hears the palm. His works of benevolence are more abundant, his whole life is laid out for the good of others. Unlike many Buddhist priests, his salary is not dependent on the number of ceremonies be performs. In receipt of a regular income, whatever he does is the result of devotion to his cause.
- (5) The gratification of desires.—In this particular Christian in ministers, being allowed to live like ordinary members of Society and having at their disposal the means to gratify a great variety of desires, undoubtedly lead as a rule more pleasant lives than Buddhist priests. But when we come to modern practices we find that in respect of the enjoyment of the pleasures of life the Buddhist priest is by no means surpassed by the Christian minister.

The writer promises to furnish his readers on a future occasion with an account of characteristics in which Buddhist priests specially excel.

A useful little work entitled "The World's Ten Great Religions" has been compiled by Mr. Kuxumi Sokuchü and is for a-le at the Fukyüsha, I Goluku-chō. Nihonbashi, Tökyō. After defining what religion consists in, the author proceeds to give a short account of the creeds of the ancient Egyptains, Greeks. Romans and Scandinavians. He then furnishes a short history of the founding and early propagation of Judaism, Mohaummedaniam, Christianity, Zoroastrianism, Brahmanism and Buddhism. Religion is defined as "faith in a supernatural power connected with the origin of the universe and with the destiny of mankind." Confincianism is excluded from the category of religions and Shintō is declared to be a very inferior type of creed, consisting of ancestal

worship and consequently too conservative to be of use to a nation bent on progress.

The Kyōrin, in reviewing the events of the year 1897 in their religious aspects comes to the couclusion that the influence of Christianity is declising, while that of Buddhism is on the increase. Shimlö it considers to be stagnant. One of the proofs of the decline of Christianity given is the secularisation of the Dōshishs, under the presidency of Mr. Yokoi. Evidences of Buddhist activity cited are the disturbances in the Sōō sect, the proselyising carried on by the Jōdo sect in Korea, the despatch of priests to Formosa by the Hongauji and the Sōō shū, the establishment of schools and the starting of new magazines.

Shinio only possesses one or two magazines. There is no activity within her pale and no opposition from without. She is indifferent to the world and the world is indifferent to her. Even the stir caused by the "Nippon Shugi" affords no satisfaction to her, for the movement can in no sense be called a Shinio movement. Her inactivity has reached its utmost limit.

#### DEATH OF GENERAL JONES.

The news of the death of General A. E. Jones, the United States Consul at Chinkiang, was received in Shanghai on January 13th. says the N.C. Daily News, with very general regret, the lowering of the consular flag to half-mast being the first intimation. General Jones. who was a native of Virginia, was about 65 years of age. During the Civil War he was an officer in the Southern army, and followed Lee in his campaign. After the war he went to Mexico and served the ill-fated Emperor Maxmilian, following which he was in the French army in Algeria. When the amnesty was proclaimed he returned to America and took up his home in Minnesota. In 1880 he was appointed Consul at Nagasaki, and six years later was transferred to Chinkiang. He was always prompt and efficient in the performance of his duties. Being retained in office by successive administrations it remained for the present to remove him at a time when long and faithful service could well have been rewarded by his retention, and when impaired health and age would naturally have been more appreciative of the recognition due to loyalty. The General was a most genial companion and his occasional visits to Shanghai were always a source of pleasure to his friends here. About two months ago he was in Shaug-bai. He was then looking feeble, but his unfailing vivacity left his friends unprepared for the sad news which arrived yesterday. A warmhearted, generous man is dead, and he has left only friends behind; friends who deeply sympathise with his widow.

#### RUSSIA AND GERMANY.

We noted in a recent issue that no detailed confirmation had yet been received of Renter's telegram, forwarded from London early in December, to the effect that the Russian press opposed Germany's occupation of Kiao-chou. In The Times of December 4th, however, we find the following telegram from St. Petersburg:—

the following telegram from St. Petersburg:

Most of the newspapers continue to protest against the occupation of Kiao-chou by Germany as calculated seriously to compromise the interests of Russian subjects in the Far Bast. Russia, they declare, should demand the execuation of Kiao-chou by the Germans, or at least obtain an equivalent compensation. Great teticence is observed in Russian official circles, but the opinion seems to prevail that Germany will not make the occupation per maneut.

On the other hand, a semi-official statement was published almost simultaneously in Beilin in the sense that the Kiao-chou incident had not furnished any occasion for a change in the good relations between Germany and Russia.

## JAPANESE FACTS AND COMMENTS.

The Cabinet organised by Marquis Ito, the Poresu considers, contains an element of failure at the very outset. The Marquis seems to have considered at first that it would be impossible for him to form a stable Cabinet without the support of political parties, in the present state of affairs. With this in view he took the trouble of consulting with party leaders in every direction, but failed to secure co-operation in the way he had expected. He was then compelled to form a Ministry having little or no relation with any political party, abandoning the scheme which he had originally conceived. The Matsukata Cabinet started with public support, but was unable to maintain it to the end. The prospects therefore of a Cabinet which is known from the outset to contain sources of failure, may easily be imagined. No great foresight is needed to predict the future of the new Ministry. (This paragraph is worthy of the Yorosu Choke, now a notoriously untrustworthy ioumal.)

The Banking Department of the Mitsu-bishi Company has resolved, assetts the *Porosu*, to faise its rates of interest from the r6th instant as follows:—

The Nippon Ginko's weekly report, as published in the Shogge, shows the amount of loans made and bills discounted during the pre-week to have decreased in follows:—

Jan. 8th, 1898. Der. 31st, 1897.

Ven. Yen.

Loans issued ... 47,683,409 55.593,160

Bills Discounted 42,935,095 45 601,278

Total ....... 10,548,504 19,494,438

According to the Jiji, coal imported into Kobe during December last smounted to 29,297,796 catties, and the gross aggregate from 29,297,796 catties, and the gross aggregate from 50 catties. These figures show a decrease of 15.037,954 catties as compared with the year before last. Stock on hand is not large, and the market presents the same aspect as in the previous month. At present Karatsu coal is quoted at from 48 yen to 58 yen per 100 picul; Chikuzen from 43 to 48 yen; Buzen from 41 to 51 yen; Wensan from 37 to 41.5 yen. No stock remains of Milke coal. The price of coal began to rise in January last year, culminating in October. The consumption of coal in Higgo Prefecture during 1896 did not fall short of 292.375.083 catties, of which 774.760 catties were for use of vessels, 39.701.750 catties for railways, 121.059, 720 catties for workshops, and 477.250 catties for manufactories. Information trom India and nonnees that Measrs. Murgen & Co. of Madras being desirous of importing Japanese coal there, recently applied to a certain coal metchant at Kobe through Consul Yamada at Bombay Original from

for a continual supply. The dealers, it is said, held a conference on the subject on the 9th instant, and decided to convoke a special gene-ral meeting of the Chamber of Commerce to discuss the question.

Coins struck at the Osaka Mint during the month of December last and the gross aggregate from the opening of the Mint were, according to the Jiji, as follow:—Old gold coins—20 yen pieces, total from the outset, 945,400 yen; 10 yen pieces, 18,710,130 yen; 5 yen pieces, 47,208,100 yen; 2 yen pieces, 1,767,498 yen; 1 yen pieces, 70,668,193 yen; total 70,668,193 yen, equivalent to 141,336,386 yen in new gold coins. The figures for new coins

The following notification was issued on the 12th inst. with regard to the engagement of medical advisers in the public schools :-

#### IMPERIAL ORDINANCE No. 2.

Art. I .- Medical advisers shall be appointed to schools under the management of the Hokkaids Office or any City, Prefecture, District, Town, or Village.

The local Governor may, under special circumstances, withhold the engagement of medical practitioners in a village school or in a school organised at the expense of a town containing a population of less than 5,000-

Art. III .- Medical advisers shall be appointed by the local Governor.

Art. III .- Medical advisers are entitled to express their opinions or present a memorial when enquiries are made of them by the local Governor ar by the Headman of a District, Town, or 

Art. IV.—Appropriate fees shall be paid to medical advisers out of the funds provided for lite maintenance of the school,

Act. V.—The rules for the engagement of a medical adviser, and for the specification of his duties shall be determined by the Minister of Education.

The Kokumin says that the sums received on account of the Indemnity during last year amounted to £26,074,026,of which £22,024,693 amounted to £20,074,020,07 which £22,024,093 were appropriated for payments in London, the London payments were:—Purchase of gold bullion. £7,733.516; silver hullion. £3 010-504; bills of exchange, £6,225.978; other payments, £4,974,693. Converted into Japanese currency, these terms represent 74,441.157 yen, 28,070,922 yen, 56,848,733 yen, and 48,-538,087 yen respectively, making a total of 207,899,801 yen. Of the balance of the indemnity remaining, £4,049.333, a sum of 2 million pounds appears in the ledgers of the Bank of Japan in the form of fixed deposits; £1,130,468 is appropriated for the purchase of appreciable bonds and other purposes; and £918,864 is deposited with the Bank of England.

The Nichi Nichi deplores the yearly falling off in arrivals of marine products in Yokohama, although prices realized by their sale are on the increase. The quotation for dried awabi was formerly eight or nine ven, but it has risen to

1894, 9,429 piecen; 1895, 9,422 pieces; 1896, 8,307 pieces; 1897, 8,223 pieces.

A report compiled at the sub-office in Yokohama of the Tea Dealers' Central Council, and published in the Kokumin, shows that the tea trade during December was very quiet. The gross stock on the market amounted to 200,000 cattles, but the quality was poor, very little of it being fit for export. Arrivals from producing districts appear to have ceased, and dealers are deterred from entering into large contracts owing to insufficiency of leaf. The amount of tea exported from Yokohama to America and other countries during last month, is reported to have been as follows:—To San Francisco, 115,686 catties; New York, 96,393 catties; Canada, 394,311 catties; Chicago, 145,382 cattles; the Pacific coast, 9,799 cattles. To show the amount of teas received in and exported from Yokohama during the past two years, the following table is given :--

1807 1806. Average value per 28.24 11 21.75 p picul .....

Owing to transport being intersupted, Chikuho coal is said in liave accumulated in the mining district to the amount of 400 million

A report compiled by Mr. Hara Terutane, a now well-known philanthropist in Tokyo, and published in the Yokyo Asaki, shows that of the number of released prisoners-296-placed under his protection, 116 were enabled to obtain a living by their own exertions, 6 died, and 5 ran away, while 8 again resorted to a criminal life. The number of prisoners released whose whereabouts are unknown after their return to their native provinces, totalled 17, and those who are receiving protection in the capital, apart from the premises specially provided for their accommodation, exceed 34.

Mr. Takano, ex-Chief Judge of the Formosan High Court, who has suspended his movement in view of the dissolution of the Matsukata Cabinet and the formation of the new Ministry, is reported by the Yorosu to have determined to present to the new Government a protest urging that the proceedings of the former Cabinet with regard to his removal were unconstitutional. The ex-Judge seems to have resolved to continue his agitation until he succeeds in convincing the Ministry of the unconstitutionality of the measure lately taken against him. No official rank or title, or indeed anything can now induce him to swerve from the cause he has embraced.

The Communications Department has been engaged since last year in revising the regulations for Postal Savings Banks. A draft of the amended regulations recently completed has been presented to the Cabinet for approval, According to the amended rules, the rate of interest is to be raised to 4.6 per cent., an increase of 0.4 per cent over the present rate. The amount of deposits in the Postal Banks during the past three years was-in 1894, 13.590,760 yen, in 1895, 16,228,911 yen, and in 1896, 16,928.833 yen. There may be various in 1896, 16,928.833 yen. causes for this augmentation but on the whole it is attributable to the general development of the spirit of thrift on the part of the people.

Among the various functions of Government the most important is the adjustment of finances. It is by the financial administration alone that appropriate funds are provided for the conduct of affairs of State. Increased taxation leads inevitably to the embarrassment of the people to whom it is always a source of misery. country tends to decline under it. Excessive taxation has been an universal abuse both in aucient and modern times, and ought to be viewed

tendered his resignation. Whether the Count still recollects them is doubtful, but they may be taken, adds our contemporary, as a sign of the policy in which he may be disposed to resort in the financial administration of the country.

Rumonra have long been current with regard to the miserable treatment accorded to female operatives at various manufactories throughout the empire. On the afternoon of the 10th instant, a party of young girls, the Tokyo Shimbun reports, were seen wandering about Fukial village, in the suburbs of Kobe. On requiry they were found to be employes of the Naniwa Spinning Company of Osaka. The girls had been so rudely, and, in many cases, so barbarously, treated that they resolved to escape from their sufferings by running away. They were promised pay at the rate of ten sen a day, out of which six sen were to be deducted for board. On starting on their contract, however, they found that they were provided with only two meals per day, and that the food consisted of Chinese rice and salted vegetables only. Most of them were taken with dysentery and other ailments of the stomach. The unfortunate girls while wandering along the road, attracted the notice of a constable on duty and were taken to the Police Station, to be later on returned to their respective native places.

At an ordinary meeting of the Japan Trading Association held at Hiyoshicho, Kyobashi-ku, Tokyo, on the afternoon of the 17th instant. Count Okuma, in the course of a speech, is said to have remarked :-- Prior to the Restoration this country was characterized by a sturdy pertinacity united with shallow judgment, such characteristics, in fact, as are now noticeable among the Koreans, who recently attempted to promulgate a law preventing the exportation of cereals. A variety of abuses existed and contributed to impede the export and import trade. The export of rice was considered likely to cause a dearth in the next year's supply, while the import of foreign goods was thought to be an unmistakable means of impoverishing the country. Moreover, antipathy to foreigners debarred the people from reaping the benefits of foreign intercourse. These queer ideas, however, have gradually passed away, for since the Restoration, the Government has always been disposed to pursue a policy of reform. The institutions of enlightened countries were copied, and the tide of foreign commerce was forced into progressive channels. Dividing the thirty years of Meiji into three periods of ten years each, it is seen that exports and imports for the first term awelled from twenty-five million yen in the 1st year to fifty millions at the end of the tenth, and that for the 2nd period they increased from 50 millions to 100 millions; while by the 3rd period the trade had risen from 100 millions to 320 millions. This expansion was conspicuous not only for the goods hemselves but also in regard to the appreciation of the coins in circulation. During the first period this appreciation was some to 50 per cent; during the second, 32 per cent., and during the third, double their original value. In predicting the foreign trade of Japan for the ten years to come, it may be confidently expected that the figures will be no less than 1,000 ed that the agraces will be no less than 1,000 millions should the nation continue to enjoy ever growing prosperity. With regard to the introduction of foreign capital, serious anxiety is entertained, and stormy arguments are advanced on the merits of the question. Foreign capital, however, has already been actually introduced. The introduction of foreign capital into Japan has already been effected, both physically, morally, and mentally, to a considerable extent, and the advantages derived from the use of such capital are already conspicuous. It should not for a moment be supposed that the introduction of loreign capital means only the circulation in the domestic market of metallic currency. Apart from these considerations there is one point to which the utmost attention over twenty pen. Other products likewise show a great rise. It is worth while to give the comparative stock of awabi during the past five years; it was as follows:—1893, 10,253 pieces; in May of the 6th year of Meiji (1873), when he of a complicated nature, and requires tact and judgment for its proper direction. Persons years; it was as follows:—1893, 10,253 pieces; in May of the 6th year of Meiji (1873), when he original from

learning, in as much = without such knowledge of various industries during the past few years, auccesa is impossible.

Since the first issue of foreign loans, hearing 9 per cent, interest, in the 3rd year of Azers (1870), up till the present day, twenty-two varieties of national bonds have been floated in Japan. They amount to 673,215,500 year, of per cent, interest, in the 3rd year of Meiji which 404,172,582 yen still remain for redemp-tion. Loans to be raised in future aggregate 195,025,444 yest. The redemption of these bonds is to be consummated by the 68th year of Meijl (1935). The Jiji publishes an interesting table, classifying the various loans issued during the past twenty-seven years and those to be raised hereafter :-

The Mainichi states that vegetable wax is most abundantly produced in Hiogo, Waka-yama, Yamaguchi, Yehime, Fukuoka, Saga, Oita, Nagasaki, Kumamoto, and Kagoshima, the annual output of these ten prefectures ex-ceeding three million yen in value. The export of wax is reported to have amounted to from 200,000 yen to 500,000 yen per annum, but the trade promises to increase. The principal foreign markets for this commodity are China, Hongkong, England, France, Germany, the United States, India, Australia, and the Philippine Archipelago, where it is chiefly used for the manufacture of candles, medicines and artificial flowers. It also serves as a preventative of rust. Prussia was formerly noted for us production, but owing to the control of the cont

manufacture of wax ceased to be fitable undertaking, and the amount produced decreased annually. The same industry undertaken on the coast of the Mediterranean suffered the same fate. For these reasons the demand for Japanese wax increases year by year.

#### MISSIONARIES AND THE COST OF LIVING IN JAPAN.

The Spirit of Missions contains the follow-

The Rev. ]. Lindsay Patton writes from Nara, under date of October 2nd last as follows:—"It is a great pleasure to be able to report that matters are progressing well in this part of the field, taking it as a whole. The case of most of our workers is really pitiable. The cost of living is so great, and is increasing with such rapid strides, that the future promises to be even worse for them. Their salaries must be increased, or duty to their families will require their entrance on some other employment. One of my catechists pays out of a monthly salary of eighteen yen over one-sixth for house-rent. Three-yen-and.a-half house-rent for a man with that income is enormous—and when we remember that this yearly rental of forty-two yen represents only about three per cent. of what it would cost now to build the house, we have plain proof that the rents will rise higher still. No new tenement houses are being built in Japan. Man with money find other investments more profitable. There will be no further building until rents pay a good profit on the investments, which is of curree far from being the case now.

"The increase of values and prices has been marked in all directions; but particularly is this the case with rents and with rice." The rice to the Japanese

"The increase of values and prices has been mark-d in all directions; but particularly is this the case rith rents, and with rice. The rice to the Japanese orresponds to bread with us, only than it forms a nuch more important article of his diet. It constitu es considerably more than half of every meal, the ther things that he eats being more in the nature of elishes to help him get down the rice. Rice is more han twice as expensive as it was a few years ago. It is a fine thing for the farners, but hard on the salaried lass.

is a nine thing for the natural, and it is also in price one can take our school ground rent. This rent is paid in a fixed quantity of rice. Last year it cost sevenly year, this year it was yen Ioa. Our catechists' salaries, on the basis of the price of rice alone, have within the ast twelve months decreased in value, according to ocality, anywhere from thirty to fifty per cent. "It is not reasonable to expect human nature to partial, and even for the most expect human nature.

earthis, and even for the most earnest of our workers he unendurable limit must soon be reached. Had his been true in the same proportion with the salaries f your missionaries, there would be considerable talk of going home, if not actual resignation. Can one expect more of our workers? One of these, who has been looked upon for some years as one of our most raluable men, recently resigned his position with us, valuable men, recently resigned his position with us, where he has receiving eighteen yen, and has accepted a position which pays him forty-five yen; and (any time after five years' service) gives him a pension when he shall be disabled or resign. Another, also a valuable man, did the same thing some months ago. I he effect, of course, will be to leave us for our workers only men who would have a difficulty in getting places anywhere else, and what is true in the case of the workers is true also with the schools; the only difference being the greater advance in salaries due to the scarcity of teachers.

#### SHIPPING DISASTER.

We understand that a telegram has been reeived by the Standard Oil Co. at this port, to he effect that the ship Alexander Gibson, which left New York on July 27th last for Yokohama with 75,850 cases kernsene, encountered a violent storm en route, and was blown ashore on a small island near Sydney, receiving considerable damage, but no casualties occurred. The Captain reached Sydney and cabled the head office of the Standard Oil Co. It is said that the repairs of the vessel will take two or three months to complete, and that some of the damaged carge will probably be sold by auction at Sydney.

#### STEAMER BREAK DOWN.

The steamer Norman Isles, which left Yokohama for Kuchinotsu last night, put back this morning owing to a bearing breaking. will cause her a delay of two or three days.

#### TRAVELLING WHEN THE SIBERIAN RAILWAY IS FINISHED.

We take the following from the Literary Digest :-

It is the opinion of the Russian Minister of Com-munication, M. Chilkov, who has just been visiting this country on a tour of observation and study, that when the Trans Siberian Railway has been completed the tour of the world can be made in thirty-three days, considerably less than half the time in which Jules Verne's hero accomplished it. This is the table given by the Zeitung des Vereins Deutscher Eisenbahn. Verwaltungen—

Bremen to St. Petersburg	14	days.
St. Petersburg to Vladivostock	IO	- 4
Vladivostock to San Francisco		
San Francisco to New York		
New York to Bremen	7	*,

In relation to this, a correspondent of the Reone Scientifique, who signs himself "A Sailor," contributes the following table, which he says will represent the truth it a few years, when our facilities for transportation are a little better. He says—

Paris to the Pacific via Asia	8	days.
Coast of Asia to San Francisco		
San Francisco to New York	3	**
New York to Paris	4 ₹	,,
_	- 10	

Total ..... 23 Commenting on these figures, Cosmos (Paris, Nov. 13) says--

13) says—
"These calculations suggest a remark; these tours, especially that indicated by the Russian Minister, are very improperly entitled 'tours of the world.' We should give this name only to a journey following at least approximately the course of a great circle of the terrestrial sphere; this is what was done by the navigators who doubled Cape Horn and the Cape of Good Hope. But in following the four-tieth parallel of latitude, approximately, we make only about three quarters of this distance. When an explorer succeeds in getting to the Pole, he can, according to this manner of reckoning, make the tour of the world as often as he pleases in a few minutes to a 'tour,' by simply walking around in a circle."

#### CHINESE NOTES.

The developments of the Bennertz & Company case seem never-ending. The latest is the sinking of one of the steamers which had been impounded by the Customs under the orders of the Imperial Government. Seventeen months of detention, without overhauling or repairs, proved too much for the mineteen year old ves-sel-the Kiangning-and when she had taken on board twenty thousand cases of kerosene oil, she quietly sank in the Shanghai river. It anpears that Mr. Bennertz had notified the Viceroy of the necessity of docking the steamer before putting her to work again, but no attention was paid to his advice, and being advised that he ought not to keep her unemployed as such a course would needlessly increase his claim for demuirage, he put her to load kerosene for Hankow. The vessel and her cargo were in-Hankow. The vessel and her cargo was aured. Apparently insurance is easy to effect in

The amateur actors in Shanghai have inaugurated the plan of auctioning the seals for their theatrical performances. Very good pecuniary results were obtained on the first occasion of the new departure. The nine front boxes, which had previously been let for \$12 each, fetched from \$19 to \$25; the dress circle seats averaged \$4.60 each, and the stalls, \$3.40.

The Changshuh (in Kiangsu) correspondent of the N.-C. Daily News, writing under date of the 14th instant, says :-

date of the 14th instant, says:

Coming nearer home, we are daily informed by different parties that in a few days we three are to be killed and our house hunned. Vague rumours of this sort have been after here to the part two or three weeks. These reports come from the Kanadawant forg Pang, who are very strong in this section, as we are only tern rules from the UNIVERSITY OF ILLINOIS AT

Vangize. Our cook, while out marketing, was stopped by some of these men who told him he had best leave at once, as they would kill our servants also. At present we do not feel very uneasy but would not be surprised any night to find ourselves hurrying to the yamen. The Governor sent some sixty soldiers up from Southow to protect our city during these perifons times, but as usual they are stationed on the mountain about twenty minutes' walk from our house, too far to be of much use in case of a riot.

It must be comfortable for the three missionaries to be living under such a menance.

In the Red Book for Shanghai, just issued by the N. C. Daily News, the list of ladies covers or pages. That is something to think of. Why, we can remember the time when the names of all the ladies in Shanghai could have been fully set forth in 4 or 5 pages. Of course there was no Red Book in those days.

Here are two interesting paragraphs with reference to Hunan:—

A telegram received recently from Changsha by the local mandarins states that the gentry and merchants of Hunan and Hunah intend to tun a merchants of Hunan and Hupeh intend to our a line of steamers between Hankow, Shasi, Wuchiang, Ichang, and points in Lake Tringting as far as Changsha, the capital of Hunan. The steamers of the new company will be allowed to casty cargo in addition to passengers and tow junks in the waters not yet opened by treaty to foreign vessels. This prohibition to carry cargo for fear of evading likin duty has been the great obstacle to native merchants establishing successful steamship companies in inland waters.

In a confidential telegraphic dispatch from the

ful steamship companies in inland waters.

In a confidential telegraphic dispatch from the Vicerov Chang Chilhetung to Governor Chile. Paochên of Hunan, the former earnestly warms the latter to be prepared for the opening soon of Hunan to foreign international trade, and advises Governor Chile to succurage the Hunanese to be prepared to compete in trade with foreigness by having their own steamers and cargo transporting facilities. In conclusion the Viceroy Chang says in I am never far wrong in my political forecasts and I can assure you that the time has actived when neither your people nor the Central Government will be able to prevent Hunau province from being opened to international commerce."

"A prospectus," says the N. C. Daily News, "is being circulated among Chinese tea-mer-chants in Shanghai of a Chinese Tea Planting and Manufacturing Company, which is to have its seat of operations in the well-known district of Yanglantung, and is to employ foreign machinery in the manufacture of its tea. It under the direct patronage and protection of Viceroy Chang Chih-tung, and its financial affairs are to be under the control of the Commissioner of Customs at Hankow, It bids fair to be a very successful enterprise."

#### NEWS OF THE WEEK.

M. Gerard, lately Minister for France at Peking, has been appointed to Brussels.

The Tamba Marn brought out to Nagasaki five tons of bar silver, to be transhipped thence for Shanghai.

Miss Nellie Wilcox, of Melbourne, has been awarded the annual gold medal of the Cobden Club for an essay on "Political Economy."

India is recovering rapidly from the effects of famine, bumper crops in nearly all the provinces having followed the late but well-distributed

The A.L.S.N. Co.'s steamer Filarcy was wrecked on the 11th ult. near Port Stephens. Passengers and crew were saved with considerable difficulty.

Admiral Baron D, von Sterneck d'Ehrenstein, Commander-in-Chief of the Austro-Hungarian Navy, who commanded the warship Ferdinand Max at the battle of Lissa, died of syncope at Vienna on the 6th nlumo.

Commodore George Dewey, now in command of the United States Asiatic squadron, the Civil War served on the steam frigate Mis.

Assistant Secretary Powell has instructed the sissippi at New Orleans, Por Hudon and Celectors of Customs at San Francisco and Digitized by Communing, two days UNIVERSITY OF HUMOIS AT

Commodore and placed at the head of the Bureau of Equipment and Recruiting.

For the salvage services rendered to the Glen Liner Gengyle off Gibraltar, the owners of the steamers Hermes and Nerva were, in the Admiralty Court, awarded £19,000. The value of the salved property was £76,596.

A subscription dance in aid of the funds of the Yokohama General Hospital is being arranged for the 10th February next at the Public Hall. The ladies who have charge of the arrangements are sufficient guarantee for the complete success of the affair.

The Owari Maru, the Hiogo News understands, has made a claim of over 1,000 yen for salvage services rendered to the Tancred after the stranding off Ishikagijima (Okinawa-ken). This claim, however, is disputed and, under the direction of the Norwegian Consul at Kobe, the matter is now under negotiation.

The appointment of Hiram Shaw Wilkinson, Esq., to be Judge of H.B.M.'s Court for Japan, and of George Jamieson, Esq., to be H.B.M.'s Consul-General at Shanghai, already reported by telegram, were gazetted on the 3rd Docember last, under dates of the 10th and 13th November respectively.

The suit instituted in H.B.M.'s Court for apan by Mr. B. A. Munster against Mr. E. Whittall for a settlement of account for professional services rendered by plaintiff, who is a mechanical engineer, was settled out of Court on Wednesday morning, in a manner, we understand, satisfactory to the plaintiff.

On Thursday morning a lighter engaged in discharging cargo from the steamer Puritan in Kobe harbour, capsized and went to the bottom, carrying with her one of the boatmen, a young man of 31 years of age. The unfortunate man never rose to the surface, but the body was recovered during the afternoon.

The Yokohama Ladies' Lawn Tennis Club have re-elected their old Committee for ensuing year. Mrs. Thomas is President; Mrs J. F. Allen, Hon. Sec.; Mrs. Syme Thomson, Hon. Treas.; and Mrs. Eldridge and Mrs. Hutchison, Committee. The Club has a balance in the Bank of \$105.18.

At the meeting of the Yokohama Literary Society to be held this evening at Van Schaick Hall, Mr. A. M. Gale will read an original paper on "London, its Slums, Beggats and Poor"; the musical programme will include a vocal quartette by Madam Henkler, Mrs. Bagnall, Mr. Darnell and Mr. Gale, and other items

Driven by necessity to earn a livelihood for herself, Miss Edythe W. Skerrett, daughter of the late Rear-Admiral Skerrett of the United States Navy, has entered the theatrical profes-sion. Miss Skerrett is but 18 years of age. The Rear-Admiral left his widow and children ill provided for, and Miss Skerrett's action is taken to decrease the strain on the slender family purse.

Dr. Abercrombie, for the last eight years U.S. Consul at Nagasaki, was relieved on Jan. 12th by Mr. Charles B. Harris, who, with his wife and daughter, arrived by the City of Peking. Dr. Abercrombie left for home the same afternoon by the City of Rio de Fanciro, a large number of friends assembling on board to bid him farewell, and to wish him a prosperous

Lord Charles Beresford was recently the guest of the new Vagabonds' Club in London and naturally had his health proposed. In replying he said that when he joined his first ship, he heard a quartermaster remark, "Bill, 'ere's a poor little beggar who won't last long in the Service," But he had survived this, and had to hear a fellow call out on Jubilee Day, " Charlie, what are 'you' doing on 'our' hoss?'

Donaldsonville. In 1889 he was commissioned | Port Townsend, Wash., to notify all persons in their respective districts contemplating engaging in pelagic sealing, of the passage of a bill prohibiting sealing in the Pacific ocean north of the thirty-fifth degree north latitude, under a penalty of forfeiture and a fine of \$2,000 and imprisonment for not longer than six mouths.

> The King of Siam arrived at Bangkok on the 14th ult, in the Royal yacht Maha Chakri from Singapore. Great preparations were made at Bangkok to receive him. All the steamers in port went down river to meet his Majesty; a special post card was issued by the Postal anthorities; there was a fancy dress dance on the 28th; and to the end of January there will be a constant round of festivities,

> A Chinese barber, residing at Nibancho Hon-den, Osaka, was charged in the Osaka Court with lending a room to two other Chinese for the purpose of smoking oplum, and on the 7th inst, the Court sentenced the prisoner to three years' imprisonment with hard labour, and a Japanese woman servant and the two other Chinese who were caught smoking were each sentenced to 18 months' imprisonment.

Some of Sir John Lubbock's experiments with his ants, as described in his lecture to the Zoological Society, would not please the teeto-tal party, remarks a home paper. In order to tai party, remarks a home paper. In order to test the loyalty of ants to each other, Sir John made fifty of them drunk and incapable, and then drew the attention of twenty-five sober ones to their condition. The twenty-five buckled to it, and carried the fifty home to bed. Sir John, Sir John, fie on thy "intemperants."

An itinerant vendor of buckwheat porridge named Nakamura Tetsugoro, of No. 3 Yoshi-hama-cho Yokohama, while engaged in his avocation close to No. 51 Main Street, on Wednesday, about I p.m., suddenly fell down and expired before any medical assistance could be rendered. The police, who were on the scene at the time of the man's death, removed the body to the Police Station, where it was found that death had resulted from the rupture of a blood vessel.

Prospects of a cold voyage north and lack of suitable clothing induced the Lascar crew of the Japanese ship Tamba Maru to leave off work in Hongkong harbour on Jan, 10th, says the Daily Press. Four of the ring-leaders were given into the custody of the police and they aired their grievances to the Magistrate. The Captain said he was quite willing to give all the men money to buy clothing and accused were thereupon released for an amicable settlement to be arrived at.

Judgment in the case of bribery of officials in the Delivery Department of the Yokohama Railway Station was given at the Yokohama Local Court on the 19th inst. Hoki Eizo and Yoshit Sakae were sentenced to six months' imprisonment with hard labour and a fine of 125 yen; Yasui Tomisaburo to four months' imprison-ment with hard labour and a fine of 25 ven; Kondo Shozo to 25 days imprison-nment and m fine of 5 ven; Nagasawa Chojiro, Kobe Mokichi, Kamiya Toyojiro, Kishimoto Kametaro and Nagao Toranojo to two months' imprisonment and a fine of 10 yes. Each of the prisoners appealed against the docision.

Admiral Makarof, of the Russian navy, has, according to the Marine Record, invented a species of ice plough capable of breaking through ice from twelve to even twenty inches thick. The experiments have proved so satisfactory that the Government has given orders for the immediate construction of two vessels of 10,000 horse power each, armed with these ploughs, by means of which it is expected to keep not only the river Neva, but also the various Muscovite ports open to navigation throughout the winter. The majority of Russia's ports and naval arseice bound during more than four

behind her schedule time; an unusual occurrence for one of these powerful steamers. The vessel left Vancouver in the 4th inst., one day late, but would doubtless have been able to have made up her time on the voyage had she not encountered exceptionally heavy weather-the worst, according to one of her officers, that she has ever experienced on the Pacific. One day only 105 knots were made, such was the violence of the head seas and wind. The Empress has not come scatheless out of the ordeal, the forward part of her upper works, bridge, etc., having been considerably knocked about.

Writing on January 10th, the Hongkong Daily Press said :- " From a reliable source we learn that the outstanding questions between Russia, England, and Jupan in reference to China and Korea have been satisfactorily arranged. The basis of the arrangement is not as yet known, but the British ships that went north have been ordered to return to Hongkong; the Powerful is not to go North and two cruisers, now on their way out from England will receive orders to return at the first port they reach. Consols have rises to 114, and a Chinese 3 per ceni. loan guaranteed by England is to be issued at (10. The last item is confirmed by Renter's telegram.

Only a few weeks ago the London papers chronicled the fact that Mrs. M'Crea, widow of the late Admiral R. C. M'Crea, who fought at Trafalgar as a midshipman on the Swiftsure, sent a wreath for the adornment of the Nelson column on Trafalgar Day. They now regret to have to report the death of this venerable lady, which took place at Guernsey on the 8th Dec., in her 103rd year. Mrs. M'Crea was a niece of another of Nelson's admirals, Sir James Saumarez, afterwards Lord de Saumarez; and her brother, General Dobiee, was engaged in nearly every battle in the Peninsular War under Wellington. One of her sons was killed in the Indian Mutiny, and all but one of the others died on active service; while she lost a grand-son only a month ago, viz., Captain M'Crea de Butts R.A., who was killed at the Sempagha Pass. The late Admiral M'Crea had five brothers killed in action. Truly a remarkable family !

The difficulties with which the Russian engi neers have to contend in the construction of the great Siberian railway would seem to be well-nigh insurmountable. A few weeks since a tremendous thunder storm visited the region east of the Baikal Lake, and did fearful damage, washing away embankments, bridges, and railway works for a distance of over 100 miles. The damage is estimated at £500,000 sterling. The waters of the Shilka, a tributary of the Amur, rose over 30ft., and work on immense sections of the line has had to be stopped. The branch line to Manchuria is being pushed on with great vigour, and the engineers' headquarters have been removed to Zizikar. Travellers who have been along the new line and have visited the workmen's camps speak of the drunkenness and immorality prevalent among the men, and of the heavy mortality in consequence.

What will the woman of the next century be? An eminent Frenchman, replying to this question, writes: -I am ignorant and cannot presume to be an oracle, but I wish solely that she may resemble the French woman of to-day such as she remains and such as I have often encounted among the less fortunate, perhaps, but nevertheless honest working-people. Not wonderfully instructed, but intelligent; not romantic, but good and sensible; knowing that marriage is above all a sacred compact to which she will be faithful, also that it imposes duties that little by little will become joys to her. Such a woman does not find the law badly made, it is a joy to be protected, and she obeys with pleasure, knowing that she holds a proper influence over her husband and has a voice in the family councils. She loves without grand demoustra-tion, but with a sentiment honest, tender, and deep, in the good days as well as the bad. If she is deceived she suffers cruelly, but in silence, and Japan for more than thirty years. He had bravery and self-devotion of Grace Darling may fearing the scaudal; tries to bring back the unhad a somewhat remarkable history. In his early be as properly immortalised on the walls of a Digitized by Google

she is admirable in her happy confidence. In general, she is not a devotee, but has enough religion to give to her children a Christian education, knowing that they will retain suf-ficient to teach them kindness to other and resignation to sustain them in their sorrows.

Dr. Edward Bickersteth, Missionary Bishop of Tokyo, formerly head of the Cambridge University Mission to Delhi, and in 1884-85 rector of Framlingham, Suffolk, who died at Chivelton House, Berks, on August 5th, aged forty-seven, by his will, dated September, 1893, gave such interest as he had in St. Andrew's House and St. Hilda's House in Tokyo to the Mission, and he bequeathed to the Mission library such one hundred volumes of his books as the librarian might choose. The testator left his land, Zaimoku Cho, and the remainder of his books and other effects in Japan, to his wife. residue of his property is to be in trust for Mrs. Bickersteth during her life, and subject to her life interest for his children, or, in the event of failure of this trust, for his brothers and sisters. The late Bishop's personal estate has been valued at £4.762. The executors of his will are his widow and his brother, the Rev. H. V. Bickersteth, of The Palace, Exeter.

In the judgment delivered by the Nagaszki Court in the Epps murder case, appear the following paragraphs, according to the Naga-saki Press translation:—"These facts are glean-ed by the examination—That on the 12th Dec., 30th year of Meiji at about 10 o'clock p.m., the defendants, Yomosaku and Hiakutaro, took in their sampanat Sagarimatsu Hatoba, Frank Epps first class apprentice of the U.S.F.S. Olympia, which was in the harbour at that time, having been asked by him to do so, and rowed to-wards the Olympia. That the evidence is not conclusive to prove that on their way to the Olympia the defendants began a quarrel with Epps and pushed him into the water. That the defendants were well aware that Epps was drowned, but they rowed away without rescuing him and caused his death, notwithstanding there was a full hour to rescue him if they had wished to do so. Nakamura Yomosaku, is fined yen 100 (one hundred yen). Kawada Hiakutaro, fined yen 50 (fifty yen). The boathook seized fined yen 50 (fifty yen). The boathook seized to be returned to Nagasaki Water Police Station."

An appreciative article in Blackwood's on the late Sir Rutherford Alcock, concludes :- It would be idle to speculate on the manner in which Sir Rutherford Alcock might have borne himself during such times as we are now passing through. Accustomed to play the leading part among his peers, the role of second fiddle in jangling orchestra could hardly have been congenial to him, nor its practical result satisfactory. But if the true statesman in the man of his own epoch, never behind nor yet too much in advance of it, then the deceased veteran's claim to that distinction is indubitable. though it may be said his epoch receded from him like a falling tide when the affairs of the empire fell into paralytic hands, he still did his best to maintain the manifer tradition. It does not come within the scope of this article to consider either the first or the last stages of his public life,-his early services in the Peninsula, or his honorary services in sundry social capscity during his twenty-eight years of retirement Suffice it here to say, that a man who for sixtyfive years, under the public eye, bore throughout a name unsulfied by a stain, and who, under the severest stress, ever held high the honour and the interests of his country, leaves an example of which his countrymen may be proud.

An old resident of the Far East, who had attained the advanced age of seventy four years, passed away on Tuesday, says the Kobs Chronicle. Mr. Schofield, who will be remembered as having for some years been connected with the Seamen's Home, had resided in China

faithful, nearly always succeeds, and knows youth he joined the first Buffs and saw con-how to pardon. When she is sure of her husband siderable service in India, including the camsiderable service in India, including the campaign known as the second Sikh War, Returning to England after his period of service service had expired he stayed there a short time and then determined to come out to Shang-hai, with the object of going into business. Shortly after his arrival in Shanghai he became acquainted with some of the leaders in the Taiping rebellion, and was instrumental in supplying the rebels with arms and ammunition during that formidable rising against the corruption and oppression of the ruling classes. After the rebellion was suppressed, Mr. Schofield went to Hankow, where he was engaged for some years in the lorcha business on the Yang-Later he returned to Shanghai, and in 1889 he came to Kobe, where he has since resided. He could tell many an interesting story of his adventures, and had a remarkable memory. Though for years he has looked extremely ill, few would have believed he exceeded seventy years of age,

> On January 15th in Hongkong, a first class boy, named Aloysius Mitchell (17) was iried by court-martial on board H.M.S. Edgar, for assaulting Captain Hall, by striking him on the chest with both fists. The Court was compos-ed of Captain the Hon. Hedworth Lambton, H.M.S. Powerful, President; Commandant Sparkes, H.M.S. Linnet; Commander Kingsmill, H.M.S. Archer; Commander Smith Dorien, H.M.S. Alacrity; and Commander W. H. F. Taylor, H.M.S. Tamar. Mt. V. Lawford was Judge-Advocate. The prisoner committed the offence after being tried on a charge of theft. He was found guilty, and when this decision was communicated to him he leaned over the table and committed the assault. The prisoner pleaded guilty, and handed in a written statement pleading for mitiga-tion of sentence. He had been brought before Captain King Hall, and convicted of theft, of which he was innocent, and the shock of being publicly branded as a thief threw him into sudden fit of passion, and he lost control of himself. He was heartily sorry and ashamed of the serious offence, and he entreated the Court to take into merciful consideration that he had been for over six weeks already prisoner, and his youth and inexperience. The Court sentenced the prisoner to twenty-four strokes with the birch rod, imprisonment for eighteen months with hard labour, and to be dismissed the service. - China Mail.

> Sir W. B. Richmond, R.A., made some novel and striking suggestions at a recent meeting of the Clergy and Artists Association for the Improvement of Art in Churches, over which the Bishop of Rochester presided. It may be gathered from his remarks, says the Globe, that if he had had a free hand in St. Paul's Cathedral the choice of subjects for its decoration would have been more comprehensive than it has been. Sir William sees no reason why paintings or other works of act in churches should be limited to what are technically called religious subjects, though even m to these there m room, as he says, for m great extension of the area of illustration. For example, the Psalms and the Proverbs have rarely tempted the artist, though they suggest subjects which could be treated so as to appeal to the roughest plough-man. Sir W. Richmond's chief point, however, is that art in churches should be an expression of our national as well as our religious life.
> And why not? If monuments to our heroes are not improperly placed in Westminster Abbey and St. Paul's, why may not their deeds be commemorated in them by the genius of the painter? There are numberless events in our Island Story, both in old and in recent times, which will occur to every one as highly suitable for such a purpose. We do not know why the historic hattles which have saved the Empire should be excluded; and it is easy to recall incidents which have burned themselves into the national memory, though their heroes and heroines were persons in humble life. The bravery and self-devotion of Grace Darling may

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

church as the martyrdom of a New Testament or mediæsval saint. Some people will raise objections, no doubt, as they always do when a breach with time-honoured conventions is proposed, but Sir W. B. Richmond has good sense and right feeling on his side; patriotism and religion need not and should not be disjoined.

#### CORRESPONDENCE.

#### THE "YORODZU" NOT TRUTHFUL.

TO THE EDITOR OF THE " JAPAN MAIL."

SIR,-Permit me, as one of your readers for the past fifteen years, to take exception, through your columns—believing this to be the most efficacions means to produce the effect in a quarter where it is desired—to the scurribus attacks made in the English Department of the Porodan against one of the best and most prominent men of Japan. In its last Tuesday's issue, Marquis Ito is depicted in the blackest possible character that one has yet seenthe very statesman in whom the Sovereign puts unlimited confidence—the diplomat who knows the conditions of Europe well and can turn them to conditions of Europe well and can turn them to good account, if he likes—the most liberal type of the Japanese official, who is respected all the world over. Now, he, from his very exalted position, cannot reply to every and all criticisms appearing in the columns of the fifthwate newspapers given to blackmailing. This fact is shamefully but recklessly availed of hy the newspapers given to mackinating. This fact is shamefully but recklessly availed of by the Marquis' slanderers. Of all the "penny dreadfuls" which are now fast disappearing, the Yorodau keeps all the essential characters to itself and fattens by pandering to the diegs of the community. It certainly has a larger circulation than any other paper; but when one knows that it is patronized by the barber shops, those popular rendezvous of the lower classes of the Metropolis, the true tôle of the paper can be well imagined. Perhaps, therefore, the amount of mischiel done by it may be much less than is thought. One thing is, however, certain, less than is thought. One thing is, however, certain, that no respeciable man turns to its columns for wise connect, advice, or information. Its influence is practically mil. The Yorodau possesses a distinct character of its own, nevertheless. There is only one word in the whole English language to express it, namely, deceit. For some five months, an American citizen was writing for its English column, which effusions were palmed off as genuine Japanese productions! Even now a certain reverend gentleman is taking an active part in it. His work is, of course, advertized as part in it. His work is, of course, advertized as Jupanese. To prove this, one need but can through the file of the Yorodzu for some months back at random. What a disparity of quality, both grammatical and thetorical, one will find in the various English acticles, notes, etc. Usually, the notes signed K. U. (who is known to be the English editor) and other certain letters of the alphabet are not elegant productions, though fair specimens are not elegant productions, thought air spectimens of Japanese work. On the contrary, one often finds among the notes, comments, or articles not so signed very creditable pieces of writing, which show the unmistakable signs of foreign bands. Neither logic nor fact allows that one and the same person can be the writer of two things diametrically opposed to each other in form, in expression, and force. If necessary, the foreign pression, and force. If necessary, the foreign the Japanese. The Voradau need not beneatorhy tilde upon such high sounding themes as "morality," "humanity," "straightforward honesty," and so on. These are real nonvense so far as the paper is concerned. If the Voradau desires to command the least amount of influence, it must give up the present dishonourable practice. To barrow the words of the Yorodou's elected con-respondent, "there are hypocrites even in news-paper offices." This was, no doubt, meant to be applied to the Yorodsu, the secret being known.

Apologizing to you for trespassing so much upon your valued space,

I remain, etc.,

AN IMPARTIAL JAPANESE. Tokyo, Weilnesday, 12th Jan., 1898.

#### THE LATE MR. PILKINGTON.

TO THE EDITOR OF THE " JAPAN MAIL,"

Sig.—Should the telegram with regard to Uganda to to day's issue prove only too true, there will be added in the came of G. H. Pilkington one more to the long list of Coristian martyrs who have laid down their lives in Africa. Mr. Pilkington was educated at Pembinke College, Cambridge. To 1887 be was placed in the 2nd Division of the 1st Class of the Classical Prizes. This distinction opened thetized by

educational career, but after a brief term of service as assistant master at Harrow School, he offered himself to the Clouch Missionary Society and reached Uganda at the end of 1890. Here his inquisitic gills were of the atmost service in monpleting and revising the translation of the Scriptures into Uganda.

In a graphic and stirring pampillet which be wrote during his furlungh, 2 years ago, he remarks:—A hundred thousand souls brought into close contact with the Grospel-half of them able to read for themselves; two bundled buildings raised by native Christians in which to worship God and read Hs Word; two hundred native evangelists and teachers entirely supported by the native Church; ten thousand copies of the New Testament in circulation; six copies of the New Testament in circulation; six-thousand souly eagerly seeking daily instruction; statistics of Baptism, of Confirmation, of ad-herents, of teachers more than doubling yearly for the last 6 or 7 years, ever since the teture of the Christians from exile; the power of God shown by changed lives; and all this in the centre of the thickest spiritual darkness in the world! Does it not make the heart reel with mitigled emotions of layers of local and appreciation? 

time, of means, of life!" And he has given time, and means, and life. Yours faithfully, C. H. BASIL WOODD.

S. Andrew's House, Shiba, 13th January, 1898,

#### EXPENDITURE ON MISSIONS.

TO THE EDITOR OF THE " JAPAN MAIL."

SIR,—My statement about the amount of money spent in home lands and in foreign countries, included all funds spent at home. I did not make a comparison between Domestic and Foreign Societies. In America, there are often county organizations, having, for instance, twenty Churches. They might spend in the country, and mostly on their own local work, perhaps \$500 each per year, besides they would give say \$20 each to state work, and small contribution to the Home Missionary Society and another to the Roreign Missionary Society. The Society with which I am connected only receives about ten cents each per year from the membership that it hopes may work through it on the foreign field. If this may work through it on the loceign field. If this ten cents be three per cent, of what they spend in America, they would spend there only \$3.33 per member per year. Proportionately very little Christian money leaves the country where it is exised; most of it is spent on the local congregation and is not included in the Home Missionary The Home work grows in proportion to the Foreign work, as a ride. The anti-missionary Baptists are dwindling, with a fair prospect of becoming extinct. The very essence of the teaching of Christ is the love of others. Not to be missionary, is not to be Christian. I have never pretended that we missionaries are beyond criticism, but I think the talk about our staying at home is very illugical. To my mind, the Japanese style of dancing is superior to the foreign walez, yet one of your correspondents comes here to teach dancing. Why did she not take her own advice and "remain at home?" The real upposition is generally, not to missionaries alone, but to Christianity in general, That is the real point at issue. The question is, did Christ rise from the dead? I believe he did.

CHAS. E. GARST. 44, Tsukije January 13th, 1898

#### JAPANESE "SOCIAL MORALITY."

TO THE EDITOR OF THE "JAPAN MAIL." SIR,-Will your kindly give space to your columns for a few remarks on the letter of E.S.P., that appeared to your issue of the 10 h January. This question of "Social Morality" in Japan seems

this question of "S chall Morality" in Japan seems to have wandered far from its original purpose, and letters I ke those of E.S.P., have tried to condone sin, by saying that it is as bad, if not worse, in Christian countries. Now we are told that "comparisons are odious," and certainly in this case they can help no one. A sin is a sin no matter in whom you find it, nor in what country

tempt for him. The wilfully blind man is the Christian, he has received light, but prefers to walk in darkness; the Heathen is still in darkness, and we cannot expect him to walk as though he were in the light. Therefore to the Christian he were in the light. Therefore to the Christian is the greater condemnation, he is a far greater sinner than his Heathen Brother. E.S.P. accuses the Missionary of "intentionally, or unintentionally, misleading the Japanese by concealing from ally, misleading the Japanese by conceasing from them the fact, that the very vices they wish to amend here, exist far more prominently in Chris-tian cities," and further remarks, "I have often been struck by the evident surprise manifested by been stated Japanese when spoken to of the iniquities going on in so-called Christian cities, and they have remarked, why we never heard this from the Missionaries—we thought all Christian people were good !"

New I think everyone knows that the Missionary goes to non-Christian lands to teach the people what Christianity is, and not to tell of the evil lives of so-called Christians, who have "crucified the Lord afresh, and put Him to so open shame." Furthermore there is no need that he should speak, nor yet is it necessary that the Japanese should travel abroad to learn these things, for their eyes are opened only ton soon, and practical lessons are given them by those who, from western lands, come to this country. The Japanese who can still say, "We thought all Christian people were good?" are those who have (shall I say fortunately for themselves), seen but few foreigners. I will quote from the letter of E.S.P. once more. "When the Missionary propagandists can point to a single European city of ordinary dimensions that is perfectly free from the objectionable elements they find in Japan-ther, objectionable elements they find in Japan—ther, and not till then, can they use it as a model for imitation by the Japanese." Now the Missionary as a servant of God, and a visionary, and he knows that were he to remain at home until he could "point" to such a city as E.S.P. speaks of, the world would never hear of a Saviour, so he obeys his Lord's command—to "go forth," and he points to the Mao Christ, and says to his people, "Here is your great example, you need no other. "Here is your great example, you need no other, Follow Hun!"

Yours, &c., January 16th, 1898. M.L.P.

#### ROUND THE WORLD A-WHEEL.

#### THREE LONDON CYCLISTS IN JAPAN.

The other day the three adventurous cyclists who set out from Landon in July of 1896 with the ambition of wheeling round the world, landed at Nagasaki from Stranghai and, after a twenty-four bours halt, started across the island of Kynshir tehours hall, started across the island of Kynstin te-words Shimonoseki, from whence they will ride to Kobe, Kyore, and so on to Vokohama. All English speaking wheelmen the world over, in America, In-dia, Australia, the Cape and elsewhere, have been following the ride of the tria-Mr. John Faster Fraser, Mr. Edward Lunn and Mr. F. H. Lowe. They are not professional cyclists, have never raced in their lives, but they were evidently affici-ed with the "cycle fever" which raged so strong in London eighteen months, are and which rages ed with the "cycle lever" which raged so strong in London eighteen months ago and which rages still. When it became public what they were about to attempt, it was prophesied they would never get beyond. Vienna, if as lar. Mr. Fraser being a well known journalist was extensively interviewed, to all doubts about the success of the adventure the answered, "Well, we will try."

When they set off from London not a soul accuration them.

When they set off from London and a soul ac-companied them, for the hour of their start was kept a secret. They were upon ordinary road-ter machines, with a special carriage behind for lug-gage, of which each rider carried about thirty pounds, inclusive of repairs, photographic ap-pliances, medicines and what not. The first after-mon they ran down to Harwich, took the night boat and landed in Antwerp in the morning and the same day saw them in Brussels. The King of the Belgians invited them to spend Sunday of the Belgians invited them to spend Sunday with him at the Chateau de Lacken. His Majesty took a great interest in the voyage, he himself riding a tricycle, and at the Belgian National têre on the afternoon of 19th July, he shook the three warmly by the hand, wished them God speed, and matter in whom you find it, nor in what country it may flourish; no two wrongs have ever yet here imade to prove a right; an having decorded that a sin is a sin, he it committed in the East or the actual Authorn, Mr. Fraser and his companions set off upon their long overland trip. Coossing a context that the sin is a sin, he it committed in the East or the west, let us leave that question alone, and turn marry who shall find vast shades of difference. If a blind Mr. Pilking-ling, Committention to the smoot, for there is where we shall find a pit we will in pity help him out, the side of the legendary Rhine to Coblenz and Mr. Pilking-ling. Cam place him on his feet, and lead him on his way, but if a man wilfully closes his eyes and walks into a pit, although we may help him out (if he will the language), we can not but have a feeling of con- it wo days ride in denthling rain and over

micy roads brought the wheelmen to Buda-Pesth, a ride of over a couple of bundled miles. All through Hungary they were received fraternally. Less than three days carried them across Roubest than three days carried them across too-mania, and on a miserably wretched set day, they bade good-bye to civilisation and crossed the frontier into Southern Russia.

Here trials were writing them. There were no

roads, only rough tracks across the eternal uninteresting steppes. There were no inns and the villages were poor: For more than a week at a villages were poor: For more than a week at a stretch the cyclists slept in their clothes on hare floors and for ten days they subsisted chiefly on eggs. They turned into the Crimea and wheeled over the field of Balaclava. Crossing the Straits of Azof they entered the Kuban province, the land the Crimea in the Crimea and the Crimea an of the Cossacks. It was a region of poverty and desolation. Once a band of maranding Cossacks attucked the adventurers and revolvers were drawn attacked the adventures and revolvers were having and fired in defence. Another time they were carried bodily before the police as spies, and frequently they were stoned. They made straight for Viaditavkas, lying at the foot of the mighty Caucasus mountains. They were the first cyclists who had ever traversed these mountains, and the day they rode into Tiffis, now the capital of Trans-Caucasia, they had been in the saddle for eighteen

hours.
From Tiflis Mr. Fraser and his friends struck into a fierce bandit-infested country, Armenia. They saw a good deal of the wild Knods from whom, however, they received every lindness. At Erivan, the capital of Armenia, had weather delayed them. They cycled past Biblical Mount Aracat, and then cached the classic Araxes river and passed into Persia.

If Russia was a tough country to cross on bicy clearlie Land of the Lion and the Sun was worse Nothing but dishemtening obstacles awaited the trio. There were breakages of the machines, snowy weather, sickness. Food was very scarce; often there was only a much but to rest in. With snowy weather, sickness. Food was very scarce; often these was only a mud but to rest in. With their clothes in tattera, famished and worn, they reached the capital city of Teheran in the middle of December twelve months back. For five weeks they rested at Teheran, where they were entertained by the Shah at his palace and spent a pleasant Christmas as the guests of Sir Mortimer Durand, the British Minister. They then struck right across Persia, through Kum, a fanatical city where they were stoned out of the place; ta 1-patian where the Zildi Sultan received them, and so to Shinaz, famous as the birth-place of the Persian poets Hafix and Sadii. Naturally there was the widest excitement among the Persians.

Snow lay deep on the mountains and once the cyclists hast their way. They were on the Kuh (Shoulder of Death) at an altitude of 9,000 leet and in four feet of snow. Darkeess overtook them. They wandeted laboriously seeking a track, and at last, utterly faint, had to abandon their machines. It was a howing stormy night and they had the atmost difficulty to keep awake. Wulves were prowling round. At daybreak they found a track and so reached the village of Derbid. They had been exposed and without food for twenty hours.

Arriving in India hardships fled. Toue there

ty hours.

Arriving in India hardships fled. was a nasty eight hundred miles to traverse through the sand of Scinde, that the heat was intense, and that Mr. Fraser was laid up for a mouth with small-pox. But from Lahore to Calcuta they travelled over the most magnificent road-1,200 miles—in the world, through the famous cities of Delhi, Agra, Lucknow and Benares. The reception given to the adventurous trio by the city of Calcutts was the most brilliant public event since Lord Dufferin was Viceroy. It is calculated that something like a hundred and fifty thousand people were in the streets. A great public banquet was given in their honour, the Viceroy's box at the was given in their disposal, they were breakfasted, funcheoned and disposal, they were breakfasted, funcheoned and dispetter most thoroughly lionised. It was more than bisted in one of the Calcutta papers that Mr. Flaver recoived two offices of marriage from over-enthusiastic young Anglo Indian ladies. But as Mr. Fraser m yet a bachelor be must have declined the honour.

When good-bye had been bidden to Calculta, when good-bye had been bidden to Calcutte, the adventurers went to Burma, which they traversed by way of Mandalay to Bhamo, the last frontier station in British Upper Burma. They were caught in the rainy season and eight nights they slept in their damp clothes. They crossed over the Chinese frontier at Nampong. There were no coalls to cycle over, only mountain tracks to climb and descend. Day after day they waded waist deep in water, Consequently there was to climb and descend. Day after day only waist deep in water. Consequently there was fever and sickness. But they never turned back. Rhowing no Chinese, travelling without servant or interpreter, laving no bedding or civilised food, being in a part of China where there are no inna, theirs was a dispitting match. To cross from the case enquired into by members of the Committee.

Bhamo to Talifu is one of the most dangerous Digitized by The sincere thanks of the L.B.A. are tendered industry of LLINC UNIVERSITY OF ILLINC URBANA-CHAMPAK

and difficult tasks. Twenty miles at the untside was all they journeyed in one day. They were going through an almost unknown region. As places the Chinese were offensive to the wanderers places the Chinese were offensive to the wanderers and frequently stoned them. Mr. Kraser and his friends struck down to Yunnan-fu and then worked towards the Yang-tze river, which they reached at Sinfu and then pedalled down to Chinig-king-fu. Messis Lunn and Lowe suffered severely from the constant hardships, the exposure and the bad food. By the time the party arrived at Ichang these two had competely broken down in health. All of them were haggard and worn, their clothes were almost in shreds and they were wearing native shoes. Messis Lunn & Lowe took steamer at once to Hankow where they could place themselves under a doctor but Mr. Fraser tode alone across the anti-foreign province of Hupsh. themselves under a doctor but Mr. Fraser rode alone across the anti-foreign province of Hupeh. Most of the time he had wretched weather and could get little besides rice and greens to eat, and he was frequently petted with mud by the natives. Starting mf again, the three kept to the Yang-ize bank as far as Wuhu where they struck across country to Stanghai. This they reached on the bank as far as Wuliu where they struck across country to Shanghai. This they reached on the 23rd Dec. having travelled 14,322 miles and taking just 151 days to traverse China. A magnificent welcome was accorded by the ladies and gentlement of Shanghai who met them some six miles out of the city and escorted them to the settlement. Messis. Fraser, Lunn & Lowe before leaving were entertained at a public dinner at which Sir Nicholas Hannen presided.

Of the travellers the name of Mr. Fraser is well known as a story writer in the leading magazines, though he also writes heavy and serious articles for the Contemporary Review and flippancies for the club gossio in The Idler. For some years he represented The Manchester Guardian in the Journalists' Gallery of the House of Commons, and he is still on the staff of The World. He belongs to he is still on the staff of The World. He belongs to the staid Authors' Club, that dilletante coterie of young artistic and literary Londoners. Mr. Fraser, before starting on the present excursion, travelled extensively in Egypt, Palestine, Syria, Asia Minor and Turkey generally. He has also been to Tunis and explored the site of ancient Carthage. Still under thirty years of age, a fall, broad shouldered Scotsman, he has crushed a good many experiences into his life. Probably a book from his pen will be the upshot of the present tour. sent tour.

Both Mr. Lann and Mr. Lowe are younger than Mr. Fraser. Mr. Lann has travelled widely, espe-cially in Northern Russia, and was one of the few nglishmen who witnessed the coronation of the Czar at Moscow.

Now the three are cycling their way through Japan though when they will arrive in Yokohama is not known. They are taking their time because they are in no hurry to reach America before the snows have melted to allow them to ride across the Rockies from San Francisco to New York. They get back to England about July next having been away from home about two years.

#### COMMITTER.

President.—Mrs. Irwine. Vice President.—Mrs. Ethidge. Hon. Treas.—Mrs. W. B. Walter. Hon. Sec.—Mrs. Thomas. Managers.—Mrs. J. Walter, Mrs. James, Mrs. Whittall, Madame de Micheaux, Mrs. Kleinwort, and Mrs. Isaacs. Hon. Sec.—Tokyo. Madame Bourgarin. Bongouin.

Your Committee have the pleasure to lay before you the 25th Annual Report of the Association, They regret that the Funds of the Society are not in the flourishing condition that they have been in for some years past. The demands for assistance have been much greater this year owing to various causes, the chief of which has been the number of causes, the chief of which has been the number of cases in which assistance has been given in regard to passage money. Your Committee are obliged therefore to make a strong appeal to the kindness and generosity of the members of the Association, hoping that all present members will continue their subscriptions, and increase them where it is possible, and that others may be willing to join in this good cause. The Annual expenses are now greatly to excess of the Annual Income, and the Reserve Fund less hear merry exhausted. Further year Fund has been marily exhausted. Every year there is more povertly as the place increases in size and all needy cases are assisted irrespective of creed and nationality and many such have been called a fundamental transfer or a such as a

to the kind friends who have sent donations either from themselves personally or by giving entertainments for the benefit of the Local Charities, and to Mr. Schurr for educating the orphan son of a Bettish subject, at a reduced (ste; also for the donations of clothing, any father gifts of which will be thankfully received at the Parasonage by the President. The Committee gratefully acknowledge the kind help of the King's Devoktory. Circle tomselve the presidents are some

Daughters' Circle towards the maintenance of a destitute woman at the General Hospital.

The work done by the Association during the past year will be seen by the Hon. Treasurer's

J. P. THOMAS, Hon. Sec. L. B. A.

Yokohama, January 7th, 1898.

LATEST TELEGRAPHIC NEWS.

(FROM 186 "[APAR TIMES.")

#### THE ANGLO-CHINESE LOAN. PROTRACTED NEGOTIATIONS.

London, Jan. 13.

The parleying with China concerning the British loan is likely to be protracted. China is procrastinating and raising various difficulties. Moreover, it is uncertain whether adequate security will be forthcoming.

#### BRITISH INDIAN FINANCE.

The Times is informed that a Bill will be introduced at the Viceregal Council on Friday, empowering it to receive deposits in gold in London, and to issue notes against them in India.

#### THE GERMAN PRESS AND ENGLAND.

The tone of the German Press has latterly been markedly friendlier towards Australians made 550 for nine wickets. Great Britain.

#### GERMANY'S CARRYING TRADE.

Germany has chartered two trading steamers to ply between Kiao-chou and Shanghai.

#### THE TRANSVAAL. A STARTLING STATEMENT.

London, Jan. 14.

The Globe publishes a Boer plan of campaign, the execution whereof, it says, was only prevented by the outbreak of rinderpest. It alleges that it was arranged to declare war suddenly on some pretext. Then within 48 hours to seize Kimberley, Newcastle, and two other strategic points, and hold them until terms were made.

#### THE DREYFUS CASE.

#### PROSECUTION OF EMILE ZOLA.

The French Government has commenced the prosecution of Emile Zola for having published a letter in which he furiously denounced General Billot, Minister of War, and other Generals, and stated that they were combining to perpetuate the conviction of Dreyfus, and to exculpate Esterbazy.

#### THE SOUDAN CAMPAIGN.

The Morning Post states that the Grenadier Guards, in garrison at Gibraltar, have been ordered to be in readiness to sail for Egypt.

#### LORD CHARLES BERESFORD.

Lord Charles Beresford has been elected member of parliament for York by a majority of eleven votes over Sir Christo pher Furness, Radical. Owing to the harrow majority, a recount has been demanded. Mr. Mendl, Radical, has been elected for Plymouth.

#### THE MURDER OF A LONDON ACTOR.

The man who murdered William Terries, the actor, has been tried and declared insane.

#### INDIAN FINANCE.

A Bill has been introduced at the Viceregal Council providing for the issue of Currency Notes in India against gold paid to the Secretary of State.

#### END OF THE ENGINEERS' STRIKE

#### THE MEN YIELD.

London, January 17. The engineers' strike is virtually over, and the men have resolved to withdraw

their demand for a 48 hours' week.

11,046.54

THE COMMAND OF THE FRENCH ARMY.

General Jamont has been appointed generalissimo of the French Army, replacing General Saussier, who has retired.

#### THE SITUATION IN CUBA.

Anti-autonomy riots of a serious nature have occurred at Havana, and the mob has been in possession of the streets for three days.

#### SERIOUS DISTURBANCES ON THE PERSIAN FRONTIER.

. A serious disturbance is reported as having broken out in the province of Mekran. Telegraph survey parties have been attacked, and many wounded. Troops have been dispatched thither from Karachi.

#### CRICKET IN AUSTRALIA.

In a test match played between Stoddart's team and an Adelaide eleven, the

In the third day's play between Stoddart's team and an Australian eleven at Adelaide, the Stoddarts were all out for 278. The Australians following on, made 133 for one wicket.

#### THE ISSUE OF INDIA BILLS.

London, Jan. 18.

The tenders for the £1,000,000 India Bills for exchange have amounted to £9,770,000. Subscribers at £98 17s. 2d. receive a percentage of 75; those who have subscribed above that amount get allotments in full.

#### CRICKET IN AUSTRALIA.

In a second test match played at Adelaide between Stoddart's team and an Australian eleven, the latter were all out for 573, and the Stoddarts made 177 for six wickets.

#### DEATH OF "THE FATHER OF THE HOUSE."

The death is announced of the Right Hon. C. P. Villiers, M.P.

#### THE CRISIS IN THE FAR EAST.

London, Jan. 19.

Sir Michael Hicks-Beach, the Chancellor of the Exchequer, speaking at Swansea, declared that Great Britain had no desire for any territorial acquisition in China, but wished to open the door to the world's commerce. But the Government was absolutely determined, even, if necessary, at the cost of war, not to allow that door to be shut against it.

#### THE ANGLO-CHINESE LOAN.

Sir Claude Macdonald, British Minister, has informed the Tsung-li-yamen, that England is willing to furnish a loan, conditional upon the opening of three treaty ports, to include Talien-wan and Nanning-Pho, the alienation from the Yangtsze valley of any other Power, and the right to extend the Burmah railway through Yunnan. These conditions are approved by China, but opposed by the Russian and French Ministers at Peking.

#### (R-ceived by the Fiji).

BRIT SH DEMANDS IN CONNECTION WITH THE CHINESE LOAN.

Peking, Jan. 14.

It is rumoured here that the conditions proposed by Great Britain in undertaking to supply to China a loan are, among other things, that Talien and Siangtan, in the their demand for a 48 hours' week.

THE RUSSIAN WAR DEPARTMENT. Kwangsi should be opened for commerce, General Krapotkine has been appointed with the construction of railways in cluster of War. UNIVERS Yungar should be conceded. THE NEW GOVERNOR OF SHANTUNG.

Peking, Jan. 15

Chang Yin-wan has been appointed Governor of Shantung.

JAPAN AND ENGLAND.

Peking, Jan. 16.
It is persistently rumoured here that Japan is disposed to back up the present British movement.

#### CHESS.

All Commandentions to be addressed to the Cases Rettor

The Yokohama Chess Club meets at 184, Creekside.

The Tokyo Chess Club holds its meetings at 3, Uchi-Saiwai-cho Itchome (next to the Tokyo Club).

SOLUTION OF PROBLEM No. 353. WHITE.

I—O to R 6

2—Kttakes P (B 3), mate 1-R takes Q 1-K takes Kt 2-Q to Kt 7, mate 1-B takes Kt

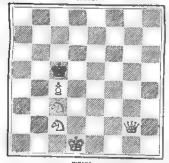

2-Q to H 2, mate I-R to Kt 6; B to H 2-Q to 11 4, mate S; or B to Kt 8 I-P takes P 2-B takes P, mate

2-Kt takes P (B6), mate

1-Kt (B 7) moves 2-Q to Q 3, or B to Q 3, I-Kt (Kt 2), moves -Q to K 6, mate

Correct solutions received from W.H.S. Skak and Voila. P.E F.S .- I B to B 2 ch spails your key move.

> PROBLEM No. 355 By Mes. W. J. BAIRD. First Prize Hackney Mercury,

White to play and mate in three moves.

#### A CURIOSITY.

A CURIOSITY.

In the following position White has too much force; with the move he must loss—he cannot aven diam.

If however, one of his pieces be removed from the board, he can mate in four moves:—

White:—King at KKt 5; Q at KKt 3; Bishopa at KR 2 and 3; Knights at KB 4 and Q 7; Pawns at KB 6, K 7, QB 3, QKt 5.

Black:—King at Q 3; Q at KKt sq; R at KR sq and Q 6; Bishops at K sq and Q sq; Kt at Q Kt 2; Pawns at KR 5, KKt 2, KB 2, K 6, QB 5.

QKt 3; QR 4.

OK: 2; Fawes at KR5, KK: 2, KB2, K6, QB5, QB5, QB5, 3; QR4.

Remove one of White's pieces from the board, then White to play and mate in four moves. This ingenious puzzle is by W. S. Pavit, and was only lished more than thirty years ago in the Chess World.

#### JANOWSKI D. WALBRODT.

JANOWSKI v. WALERODT.

Walbrodt lost time in the fourth game, by adopting a timid variation of the Ray Lopez, and playing 4-P to Q 3, and then later on 7-P to Q 4. Black made good use of his opportunity to develop his game, notably with his seventeenth move of R to Q 3. White underrated the strength of Black's attack on the king's wing. He ought to have exchanged rooks, instead of which he played the tisky move of 20-P to K 3, to which Black very properly replied with R to Kt 3. The sacrifice of the piece on Black's twenty-second move was, we believe, perfectly justified. The latter, however, gave himself entirely away with his twenty-fifth move of Q to R 6. He ought to have played P to K B 4 at once.

#### Notes by Gunsberg,

(a) Superior mortals like Pillsbury and Tchi-(a) Superior mortals like Pillsbury and Tchigorine may be independent of steretoyped forms of openings, but for the ordinary amateur it will liardly do to play Kt to Q. 2 before playing P to QB 44, or making provisions for placing the II on Kt 2.

(b) The poor queen's hishop is hopelessly critherly cabined, and confined; the never sees daylight.

(c) Now Black has gained sufficient time to reduce his opponent's position to the level of that

educe his apponent's position to the level of that

fa second player.

(d) If P to QR 4, P to Kt 5!

(e) The idea of playing P to Q 4 and P to KB is to play Kt to K 3, supported by the other night on KB 3.

(f) This move securely ties up the queen's wing.
(g) Anticipating P to KK1 4.
(h) Black's play from this point is exceedingly well directed.

well directed.

(i) Now the king's side is blocked also, and Black proceeds by hydraulic power to force the only remaining open point on his king's rook's file.

(k) Played for the scientific purpose of depriving White of all power of motion; P to Q 5 was by no means an improbable contingency.

(i) The movements of this knight form not the least instructive feature of a game full of fine strategy.

(m) A nice finish of a cleverty conducted and typical game. If 37-P takes R, R to R 8 ch; 38-K to Kt I, R to Kl 8, mate.

#### GAME No. 355. FROM THE BERLIN TOURNAMENT. BLACKBURNE W. MARCO.

#### Notes by Emil Kemeny.

(a) Q takes P was the purper play. The play adopted is more aggressive, but it does not prove sound:

adopted is more aggressive, but it does not prove sound.

(b) B takes Kt, followed by R to K sq, would bave been better than the play adopted.

(c) Black should have played B to K B 4, which would have regained a Pawn. The play adopted is quite brilliabt, but not sound, and it causes the rather speedy defeat. Back very likely overslooked the Rt to K 5 continuation of White.

(d) White, at this stage of the game, might have played K takes B, giving up the Queen for the Rook and two minor pieces. The continuation adopted by White is superior to Kt takes B

(e) Well played. Black can not captute the Kt in account of Q to II 4 ch.

(f) Brilliant and decisive play. White gives up the Bishop in order to relieve his Queen and Kt. The play is sound and leads to victory.

(g) He could not play K to R sq or K to B sq, for Kt to B 7 ch, followed by Kt takes Q or Q to B 7 mate, would follow. Had Black played R to K 3 a similar continuation would be adopted.

(b) To save the Rook. The game, however, is a lippeless one.

(i) It is save the Rook. The game, however, is a hopeless one.
(i) He could not play B takes K P on account of R to K 3 winning the Bishop. B to B 4 might have prolonged somewhat the battle, but evidently Black's game was a hopeless one. The move selected loses a piece. White answers B takes P, followed by B takes Kt ch and R takes B.

#### GANE No. 356

The following is a remarkably pretty skirmlate which occurred in Adelaide in 1895, the opening being a Charlick-Counter Gambit :--

	r. Apperley.	Black-Mr	· Charlick,
WHITE.	BLACK.	WHITE,	BLACK.
1 P Q4 2 PxP	PK <sub>4</sub>	8 K   Q2	Q K13
3 B B4 P	P Q3 Kt QB3	9 P KR3 10 KK1 B3	Ri KB3 KR Ksq
4 BxP	Q KB <sub>3</sub> KB <sub>x</sub> P	11 O OR4	RR2
5 B B-q?		12 Kt QK13	KUKS.
6 P QB <sub>3</sub> 7 P K <sub>3</sub>	B KB4	13 Kt KR4	Q Kiố!
7 : 153	Castles QR	14 PxQ	

And Black mates in two moves.

#### Notes.

Notes.

Beware, says Mr. Mason, of engaging in open combination before Casting, and especially in case you are second player. "You King may become directly involved, with disastrour consequences, Pitched battles interrupting the course of development are likely to favour the attacking party; that is, the first player. This is because, naturally, his development is superior to that of the defender, He has had more time to make ready." Be careful, also, and in particular when defending He has had more time to make ready." Be careful, also, and in particular when defending, to abstain from the making of unnecessary advances of the Pawns about a Castled King. "Until their movement is forced, leave them severely alone. In nine cases out of every ten your defence will be all the stronger."

Pillsbury is again at his old occupation of player in the automaton at the Eden Musec, New York.

The Hongkong Chess Club's exhibition of similaneous play came off on the 30th December at the Hongkong Hotel, and Mr. Sonza, the ex champion, at the rate of about four moves a minute, disposed of his seven antagonists in an four and a quarter, losing one and drawing one of the games played.

From an Australian Exchange, we take the Iollowing:—The championship of the Orago Chess Club (N. Z.), has been won by Mr. R. A. Cleland, who has now secured that title for three years in succession. Out of the ten games played he won eight; in the remaining two games Mr. Cleland felt a vicinit to Mr. Balk, a former champion of Yokohama.

The Ladies' scored a victory in a match sixteen a side against a minut team of the City of London Chess Club.

Chess Club.

The English Champion Mr. Blackburne's first public appearance in England upon his termination the Berlin tounament took place at the City of London Chess Club on Saturday, when he gave an exhibition of blindfold play, engaging eight opponents simultaneously. In reply to some words of welcome addressed to him by Mr. H. F. Gastinean, Mr. Blackburne said he had not done quite as well as he had expected at Berlin. Ha had suffered from ill health the whole of the time, and found himself quite broken down at the end of each week, so that he always did worst on Saturdays. The blindfold performance resulted in the champion winning five games and drawing the remaining three.—Bradford Observer, Ociober 16th. ber 16th.

KOROSKNE.		

The market is decidedly dult and with a tendency to use owing to intelligence received that the ship Alexander Gibson, due here with 75,000 cases of Chester of hom New York, has met with a casualty at Sydney and part of her cargo is damaged and will be sold at that port. During last mouth the total quantity of kerosene dispatched to the interior from Yokohama amounted to 284,364 cases. It is stated in native papers that Sumatra oil will shortly be imported here in bulk instead of case.

### THE GREATEST WONDERS OF MODERN TIME HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

purity can be maintained by the use of these Pills.

Sin Samuel Baran, in his work entitled "The Nile Tribut taries in Abyselia;" cays—"I ordered the drsgoman Melbonato inform the Fakir that I was a Doctor, and I had the editions at the service of the sick, with advice gratis, in I short time I had many applicants, to whom I served out of quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmittakable purgative proporties, they create an undeniable effect upon the patient, which satisfies them of their value,"

SIMPLE, SAFE, AND CERTAIN.

#### HOLLOWAY'S OINTMENT

to a certain emedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in basiling ulcerations, coving thinds. It acts miraculously in basiling ulcerations, coving thin diseases, and in arresting and subduing all inflammations, Mr., J. T. Course, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milkstowle, butter, and horse feed poured in upon us, until at last a tempoporful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged is lock up the small remaining "stock."

Sold by all Chemista and Medicine Vendors throughout the World.

May 181, 180\*.

Got D coins exchanged from the 1st of October to the 20th of January amounted to pen 17.736,-970—yen 3.443.576 for silver yen, and yen 14.290,394 for convertible notes.

PRINCE ARISUGAWA presided at a meeting of the Japan Fine Arts Association held on the 21st inst., at which the selection of exhibits at the Paris International Exhibition of 1900, was discussed.

Fuji, who has been in bad health since he office of the disadvantage of the sellers. Frought the vessel from England to Velocubes Exchange closes district.

being still unable to resume his duties, has been granted sick leave, and Capt. Shikano, of the Naniwa Kan, has been transferred to the Fuji.

THE days of departure of the P. & O. and M. M. Companies' mail steamers from Yokohama have been changed from Sundays to Tuesdays for the former and Wednesdays for the latter.

THE crews commissioned to bring home the Japanese cruisers Asamo and Tak sage from England, left Yokohama by the N.Y.K. ateamer Inaba Maru on the 22nd tuat. There were over 270 men in all.

THE British Chancellor of the Exchequer has announced that Britain will keep pace with the additions to the fleets of other Powers and that an increase of sailors for the navy will be provided for.

THE Japanese cruiser Kasagi was lausched at Cramps' Iron Works, Philadelphia, on the 20th inst. The vessel is of 3,378 tons displacement, 17,000 indicated horse-power, and has a speed of over an knots.

THE birthday of the German Emperor was celebrated on the 27th inst, by a reception at the Legation in Fokyo, and a dinner at the Club Germania in Yokohama, and was generally observed as a holiday.

THE profits of the Hokksido Coal mining and Railway Company during the second half of last year are reported to amount to 806 000 year. A dividend of 15 per cent, per annum will be declared, and 69,000 yen will be carried forward.

THE COMMANDERS and officers of the Japanese men-of-war Mattushima and Futo are now under examination before a Naval Court Martial in Tokyo, in connection with the collision between the two vessels which resulted in the sinking of the Fuse.

Mr. Hiranuma Senzo and others of Yokohama have presented a petition to the Kanagawa Prefectural Office for a charter for the construction of an Electrical Railway to run from Taka-hima-cho Itchonne, to Yoshida Bridge, Yokohama, via Takashima-cho and Bashamichi-dori.

For several months there has been a complete staguancy in the Import market, so far, par-ticularly. Il cotton goods have been concerned. But at last a move has been made and during the past week there has been quite a rash for grey shirtings, and the yarn market has be n almost equally active, a very fair quantity of business having been transacted at very firm rates. The despondency which appeared to exist in the import mark I generally at the latter part of last year appears to have been counteracted by a far more hopeful view of affairs and trade generally may be expected to look up during the next few mouths. The metal trade and the kerosene business have so far not participated to any appreciable extent in the general improvement, but may be expected to take their share before long. In the former trade, their share before long. In the former trade, already, there has been a big move in galvanized street iron, and other branches will doubtless benefit by the apart in the near future. A fair business has been done in sugar imports, and in some of the items outside the ordinary staples, such as machinery and other manufactured goods, business has been brisk. In Exports, the ailk business shows a steady advance at prices which, though in some cases showing a discussed.

slight reduction, give exceptionally good returns to producers and dealers, while the small Captain Minra, commander of the battle ship stock of tea remaining is gradually being worked

#### THE YOKOHAMA COMMUNITY.

The London and China Express has the following, with reference to a letter which appears in the Morning Post from its special correspondent in Japan.

It is an ill-natured small at the foreigner in the onen ports of Japan in general, and of the Englishmen in Yukuhama in particular. It withally says the foreigner in Tokyo is a different heiog from the foreigner in the Treaty Port. This is most inexact. Tokyo has less of the lower classes and of the beach-comber element certainly, but to givently insurate that foreigners even but to victually insimilate that foreigners, except the Tokyo community, received their education and manners after arrival in Japan is distinctly false, apart from bad tasts. A majority of foreigners, whether they go to Japan in the Diplomatic, Consular, as official world, or in that of Banking or Commerce, are picked men, and to describe them as they are several time with in the letter before us, is untrue in substance and fact. We hesitate to accept the verdict of the London and China Express upon this subject, but as we have not seen the original letter and know nothing of its contents, we are not in a position to form an independent judgment. It seems scarcely worth while to discuss a problem the solution of which depends, in some respects, on individual opinion. not be the least question, we think-and, indeed, the statement has been repeatedly made in these columns-that the foreign communities at the open ports in Japan are far above the average of their nationals. "A majority of them"—to use the words of the London and China Express, which are only an echo of our own often expressed opinion-are picked men; that is to say, men distinguished by qualities of energy and enterprise which have prompted them to seek fortune in distant lands under difficult circumstances. These are the men by whom the British empire has been made. It is not conceivable that a shrewd and observant writer, as the special correspondent of the Morning Post has proved himself to be, could fall into any error on such subject. We observe, indeed, that the editor of the Jopan Gazette refers to the Post's correspondent thus :-

I do not blame the correspondent. These things were told him in Toltyo probably by the Editor of that paper whose hatred of the Yoko hama foreigners is the best compliment he can pay them.

Vulgar and malicious falsehoods of that kind are, indeed, the only things that besmirch Yokohama's reputation, for they are a reflection at once on its intelligence and its impartiality. We are not con-cerned to defend ourselves against slanders obviously dictated by mean motives. What we doubt, however, is that the correspondent of the Morning Post can have made any reflection on the manners of the open-port communities. That would be too silly, unless he referred to the manners of some of the local newspapers, which are certainly miserable enough. He probably spoke of the difference in the occupations and proclivities of the foreigners n Tokyo and those at the ports. Everybody knows that there is a difference. The late Mr. Palgrave was the first to discuss it publicly in 1883, and his comment was that the community of Tokyo comprised a greater number of scientific experts of all kinds than could be found, so far as his experience went, in any other society of equal numerical size. hama, on the other hand, contains chiefly merchants, bankers and men of business generally, whose interest naturally centres

often engage attention in a place like Tokyo. It is a difference of kind, scarcely one of quality, and it does not constitute the smallest reproach to Yokohama or Kobe. One might as well say that because classical subjects occupy a larger share of attention at Oxford than at Westminster, the members of Parliament are intellectually and ethically inferior to the denizens of the University. The truth is that if Yokohama were to be judged by journalistic champions who consult their own sordid interests by pandering to its vanity and passionately resenting the calmest analysis of its condition, Charles Dickens' portrait of Mr. Hannibal Challop might at once be accepted as a photograph of the letter sent by Mr. Norman to the syndicommunity's mood.

Since the above was in type, we have had an opportunity of reading the letter in the Morning Post. We reproduce it elsewhere. The language of the writer does not appear to justify the criticisms of the London and China Express.

The editor of the Japan Mail appears to be regarded as a veritible Bricereus by some of his local confreres. They evidently imagine that he possesses an extraordinary power of throwing his arms about all litterateurs who visit Japan and drawing them within the sphere of his influence. A bad influence these journalists count it. Nearly all the writers who have discussed Japanese affairs, whether in the daily press, or in the magazines, or in the books of England, have found something to criticise and something to applaud. Why not, indeed? Nothing is wholly good or wholly had under the sun. The Yokohama community, we presume, does not claim to be any exception to the general rule. It has its weak points, probably as patent to itself as to others, and it is not without the grace to be able to acknowledge them when they are indicated by impartial observers. But our local confreres seem to be happily convinced that Yokohama is about as nearly perfect as anything human can be, and that the only person sufficiently prejudiced to discover a stain on its escutcheon is the editor of the Japan Mail. Thus when any tourist ventures to criticise Yokohama, he is supposed to have fallen under the moral sway of the editor of the Mail, and similarly when any tourist sees something to praise in Japan, he is suspected of having derived inspiration from the same source, Of course our confrères are unconscious of the compliment that such comments pay to the influence of the editor of the Japan Mail. They would probably be shocked to think that they, his perennial foes, had blown his trumpet so loudly, or made such naive confession of their own im-Well, we should be glad puissance. to accept vertent tribute, and we are wicked enough to admit that we should find a certain satisfaction in acknowledging the justice of their estimate of their own powers. But modesty and candour compel us to forego either pleasure. We are unfortunately without the Bricerean faculty attributed to us by our confreres, and when we observe the industry and perseverance with which they have discharged, through long years, their task of anti-Japanese censors, we cannot think that fate has condemned them to the insignificance under a sense of which they evidently labour vis.à vis the Japan Mail. in their own concrete affairs rather than They may take comfort. Not always have in the more or less abstract topics which the more with the more or less abstract topics which the more of less abstract topics are the more of less abstract topics.

and then an echo becomes audible, especially from what may be called the Inferno of the Fourth Estate, where the penny-aliner and the sensationalist suffer the punishment of contempt. To pass, however, from generalities to particulars. One of the first writers in connection with whose name our influence was supposed to have been exercised was Mr. Henry Norman. We should indeed be proud to claim any noteworthy part in a book which we regard as one of the most carefully compiled of all the works on Japan that have ema-nated from the press. But it was not on account of "The Real Japan" that we were arraigned. It was because of a cate of journals which he represented the first letter of the series. In that letter some barsh criticisms of Yokohama were embodied, and the hand of the editor of the Mail was at once traced. Well, the fact was that when Mr. Norman wrote that particular letter, he had not even made the acquaintance of the editor of the Japan Mail! Another instance worth mentioning, perhaps, is that of Sir Edwin Arnold. He, too, was supposed to have borrowed his particularly rosy spectacles from the editor of the *Mail*. There was, however, one chapter of Sir Edwin's book which met with the outspoken approval of our confrères: the chapter on Treaty Revision. They called it an eminently fair statement of the case. Now that chapter was actually written by the editor of the Japan Mail. In no other part of the book had he hand or part, except in the chapter relating to the Cha-noyw ceremonials. Finally, we have the last letter sent from Tokyo by the special correspondent of the Morning Post. It is not a very terrible letter. It does not contain anything that need shock Yokohama's susceptibilities, and we venture to say that the community of the Settle-ment are vastly tickled at the storm it has excited in the columns of certain local journals. But because it reflects upon the tone of those journals, they have laboured to prove that it emanated from the editor of the Mail, whom one of them, with charming ingenuousness of business enterprise, describes as a "hater of the Yokohama community." Where the Morning Post's correspondent obtained the views expressed in this letter we have not the remotest idea, but certainly he did not obtain them from the editor of the Japan Mail, with whom he never held any communication whatever on such topics. Of course our confrères will not be one whit disconcerted at finding that they have contmitted themselves to these foolishly false and reckless allegations. They will at all events have had the satisfaction of firing another shaft at the editor of the Japan their mead of inad Mail, who seems to be a very serious disturbance to their peace of mind,

#### PASSING EVENTS.

An Imperial Rescript was issued on the 21st instant fixing March 15th as the day for the general elections for the House of Representatives.

According to the Nichi Nichs Shimbun, the President of the Kyoto Chamber of Commerce, Mr. Hamaoka Kotetsu, has addressed to the Minister of State for Foreign Affairs, a letter asking for explicit information about a Note attached to the Revised Treaty with Germany. The Note nave is said to provide that German subjects Now may become partners in Japanese com-UNIVERSITY OF ILLINOIS AT

mercial or industrial companies, even though the latter own real estate. It is not apparent whether Mr. Hamaoka's inquiry is to be followed by a protest, in the event of the Minister's answer being in the affirmative, but we presume not. Public opinion in Japan at present is happily more enlightened than it was four years ago, when the cry about "foreign ownership of land" made itself so loudly heard. The general desire now is to have foreigners purchase shares in Japanese enterprises, and certainly that can not be effected if the shares allotted to foreigners are to be specially distinguished as carrying no title to a company's real estate.

The following officers have been nominated by the Emperor to serve on the High Military Board which has just been organ-ized:—His Imperial Highness Prince Akibito, and their Excellencies Field Marshals Marquises Yamagata, Oyama and Saigo.

The Constitution of Japan guarantees freedom of conscience within the limits permitted by law. Christianity is, of course, included in this liberty. Christian propagandists are allowed to preach and teach without let or hindrance, and congregations of Christians can worship when and where they please. Yet there is no State recognition of Christianity. Officialdom exercises a certain amount of supervision in the case of Buddhism and Shinto, but does not meddle with Christianity at all. Some leaders of thought appear to be directing their attention to this subject with a view to the operation of the Revised Treaties. The questions they propound are, whether Christianity should be placed in the same rank with Buddhism and Shinto vis-a-vis the law; whether religious instruction should be permitted in primary schools, and whether Christians, or foreigners generally, should be allowed to conduct schools. As to the first question, we think the soundest solution would be to withdraw all official supervision from Buddhism and Shinto, and in that way to place Christianity on the same plane with them. All experience shows that nothing discredits a religion so fatally as judicial or administrative control of any kind. With regard, on the other hand, to Christian instruction in schools, and to the control of educational institutions by foreigners, the Constitution The usual policy of civilized Governments now-a-days is to refrain from every kind of interference in these matters except where schools are wholly or partially supported by the State. The simple principle underlying such abstention is that public funds, which represent the proceeds of taxes levied indiscriminately on men of all religious persuasions, can not, with any semblance of justice, be devoted to further the cause of any one particular persuasion. Beyond that there is nothing to be considered, unless, of course, an immoral form of creed is in question. any section of the community professes Christianity, it would be simply an example of mediæval intolerance to deprive tion of Japanese girls has fallen, to a certain extent, into the hands of missionaries, and against that fact some conservatives may possibly gird. But the China, thereby conferring a distinct benething is inevitable under existing conditions.

#### THE FRENCH REVISED TREATY AND THE TARIFF.

The Franco-Japanese Revised Treaty, bearing the ratification of the President appears to have left Marseilles by the mail of the 19th instant, and may consequently be expected to reach Japan at the end of February or the beginning of March. We may assume, therefore, that the exchange of ratifications will be effected in Tokyo before March 15th at latest. An interval of six months must then elapse before the new Tariff is put into operation, but as it may be taken for granted that such a change would not be made in the middle of a month, we arrive finally at the conclusion that October 1st will be the date from which the new rates will be levied. That calculation may, of course, be vitiated by the Austro-Hungarian Treaty's failure to pass the two Diets. We have already explained, however, that, according to the provisions of the Austro-Hun-garian Treaty, the Tariff attached to it becomes applicable one month after the exchange of ratifications, so that if the Treaty receives ratification in Europe and reaches Japan at any time before, say, August 25th, it need not prove an obstacle to the operation of the new Tariff on October 1st. An interval of nearly seven months remains before August 25th, and it will be strange if the Treaty can not find its way through the Reichstag and Reichsrath and get out to Japan in that

#### GERMANY AT KIAO-CHOU.

The news that Germany has opened, or is about to open, Kiao-chou to the world's commerce will not surprise our readers; in view of the comments that appeared in these columns at the time of the occupa-tion of the place. We explained that although Germany might reserve Kiaochou practically for her own use alone if she contemplated making a mere naval station of it, she could not employ it for commercial purposes without rendering it accessible to all nations, since the mostfavoured-nation clause in China's treaties forbids the latter to create any commercial or industrial privilege in the interests' of one of the Treaty Powers to the exclusion of the rest. An absolute cession of territory does not, of course, appears to be sufficiently explicit, especi- fall within the range of the rule, and ally when combined with the Civil Code. we presume that had Germany been so minded, she might have insisted on regarding Kiao-chou as an addition to her colonial possessions, though she holds it under lease only. But she has evidently preferred not to adopt that line, and it must be confessed that her choice goes far to soften the aspect of her procedure towards China. Whatever excuse for violent methods may be furnished by the futility of any other line of action where Peking is the vis d-vis, there is something shocking in the idea of a great European Power's laying armed hands on the territory of a friendly State without warning of any kind in time of peace, and had Germany treated as an addition to her own empire the its members of the privilege of having territory thus seized, she would have private schools of their own. The educa- established a very ugly record. But by converting it into a commercial port for the use of all the world, she virtually establishes another foreign settlement in it has ever been supplemented, and certainly it China, thereby conferring a distinct bene- has not been rescinded. that such a line of argument smacks of

special pleading. Hongkong, it may be urged, is open to the trade of all the world, but is nevertheless British territory, and Kiao-chou will be a German Hongkong. That view does not appear entirely just, however. We presume that Germany intends to treat Kiao-chou just like a foreign settlement; that there will be a branch of the Imperial Customs there to collect duties on the trade; that the Chinese living in or frequenting the place will be under native jurisdiction, and that the foreign residents will have their own Consular Courts. If that be so, the conditions will differ very greatly from those existing in Hongkong, and it is hard to see how any other arrangements could be conveniently made. If will be very interesting to observe what kind of programme Germany adopts, for the conditions are quite novel.

#### SUPERFICIES AGAIN.

A few days ago, a writer signing himself "Scotus" propounded, in the columns of a local contemporary, various questions with regard to the new Japanese Civil Code, and the ights that foreigners will acquire under it after the Revised Treaties go into operation. The questions are addressed to Dr. Lönholm, but as he has not replied—in truth no reply in necessary in view of the very full explanations already published in these columns—, we ven-ture to submit one or two points for the consi-deration of "Scotus." His line of argament is that the rights secured by the British Treaty to Her Majesty's subjects are the owning, hiring, and occupying of houses, manufactories, ware houses, shops and premises, and the leasing of-land for residential and commercial purposes, among which rights he fails to see how "super-ficies" can be included, "superficies" being merely permission to use land for a particular purpose, which permission is not a lease but a licence. This is a question of terminology, a very captions question at that, we venture to think, which would never be allowed to have weight in international deliberations, and which the Japanese Government is not the least likely to raise. The plain, common sense interpretaher Majesty's subjects the right of acquiring tenure of land in any manner provided by Japanese law, ownership and emphyteusis ex-cepted. "Superficies" is one of the modes of land tenure thus provided, and "superficies" is specially designed to meet the case explicitly indicated in the Treaty, namely, the ownership of houses, manufactories &c. standing, or to be erected, on the land which is the object of the "superficies." Thus, even though the British Treaty were the sole exponent of foreigners' privileges in Japan, there would be no practical ambiguity. The British Treaty is not the sole exponent, however. There is also the German Treaty, which, having been negotiated when the revised Code had become accessible, was supplemented by a note declaring, in unequivocal terms, that the right of superficies under the Code is to be enjoyed by German subjects for the purposes mentioned in the body of the Treaty. Nothing could be more completely beyond the range of doubt or query.

"Scotus" further says :- "What law prohibits the ownership of real estate in Japan by foreigners?" So far as we know, there is only one law-Government Notification No. 18 of January, 1873. The eleventh Article of the Notification runs thus :-

No transactions whatever shall take place in the natural of selling land, or even the tide-deeds of land, to foreigners, or of mortgaging or piedging land to them, or of receiving or borrowing money from them in connexion with land.

That is definite enough. We do not know that

#### THE SITUATION IN THE FAR EAST.

T is unfortunate for the interests of peace and international friendship that the business of constructing and despatching telegraphic items of intelligence for public information should be, for the most part, in the hands of men who, not troubling themselves much about the rules of inter-State procedure or the methods of legitimate diplomacy, do not pause to discriminate between possible facts and palpable fictions. We, at this end of the world, are experiencing the effects of that regrettable feature with special acuteness at the present moment, for truly if we believed all the stories sent across the wires by Reuter's folks during the past fortnight, we should be compelled to conclude that a condition of exceedingly strained relations-to use the mildest term-exists between Great Britain and Russia, and that Germany and France are supporting the latter against the former. Speaking broadly, the situation, as presented by the telegrams received in Tokyo on the 21st instant, was that the Chancellor of H.B.M.'s Exchequer had disavowed on behalf of the British Government any desire for territorial acquisitions in China. and had declared that Great Britain's sole object being to keep the tradal routes and markets of the Far East open to the whole world, Her MAJESTY'S Ministers were determined, even at the cost of war, to pursue and consummate that policy. As to the fact that Sir MICHAEL HICKS-BEACH actually used the language thus telegraphically attributed to him, there could be no reasonable doubt. His speech at Swansea having been re-produced verbatim by the leading London Journals, Reuter's agent had only to epitomise its important passages and codify the result. Yet on the very same day the very same agent-or presumably the very same agent-forwarded a second telegram from London, containing intelligence that the British Minister in Peking had informed the Chinese Government of Great Britain's willingness to make a loan to China on condition, first that three new ports, including Talien, should be opened to foreign trade; secondly, that permission should be given to extend the Burmah Railway through Yunnan; and thirdly that "every other Power should be alienated from the Yangtze Valley." Now while the first two of these conditions are perfectly reasonable and consistent with Great Britain's general attitude, the third is obviously irreconcilable with the policy publicly announced by the Chaucellor of the Exchequer speaking at Swansea on the very day before Reuter's agent prepared the above summary of the British proposals to Peking. Any exercise of judgment, however slight, interpretations: first, that HER BRITANNIC should have showed the agent that a MAJESTY'S Government, in deference to Government which had openly disavowed representations from St. Petersburg, issued

limited itself to a policy of equal privileges for all, could not have proposed, with the same breath that a reversionary title to the Valley of the Yangtze should be secured to Great Britain. It is conceivable of course, that Reuter's agent never sent any such message, and that the blunder arose in expanding the telegram at this end. England may have asked, very probably did ask, that China should pledge herself not to transfer to a foreign Power any part of the regions forming the Valley of the Yangtze. The point is not of prime importance, for since the danger of serious misconception is averted by the language of the Chancellor of the Exchequer, we are able to be that, with the exception of the proposal relating to the Burmah Railway, England has not sought any concession the benefits of which would not be accessible to all nations equally. Still the obvious contradiction between the alleged condition and the declared policy of the British Government, might surely have occurred to Reuter's agent. We may note incidentally, with regard to the extension of the Burmah Railway, that it can not properly be called an exclusive privilege, since it merely signifies the opening of a new line of communications between the Chinese empire and southern Asia. now, the next telegram sent by Reuter's agent:--

It is stated that Russia has threatened reprisals if Talien be opened to commerce.

The agent guards himself, in this case, by recourse to the formula "it is stated," but is it possible to conceive greater want of discrimination than the despatch of such intelligence suggests? Russia is represented as threatening reprisals if China, at the request of the British Government, opens a new port to the world's trade! Under the shadow of what pretext could Russia assume such a position? She has no title of any kind to Talien, nor any right, even if she had an inclination, to stand in the way of China's commercial development. The threat attributed to her would amount to an open defiance of England, and to an expose of designs the present concealment of which-supposing that she harbours them-is essential to their achievement. Russia has not formulated any such threat. That may be confidently assumed, and Reuter's Agent showed bimself to be a sensationalist rather than a sober collector of intelligence when he used the wires to transmit a story so incredible. However, his crowning escapade is his last :-

Landon, Jan. 24. It is officially announced from St. Petersbur that the British men of war have received orders to quit Port Arthur immediately. It is understood that this course was taken in consequence of representations on the part of Russia.

This message admits, apparently, of two all exclusive motives and emphatically orders for the withdrawal of British ships. find an almost insuperable difficulty in

of-war from Port Arthur; secondly, that the Chinese Government, at Russia's instigation, called upon HER MAJESTY'S Ministry to issue an order in that sense. The second hypothesis is wholly untenable: it is, in fact, absurd. China is not in a position to prefer such a demand and is precluded by treaty from preferring it. If she places a port at the convenience of Russian ships, it becomes, de facto, accessible to British ships also. As for the first supposition, namely, that certain movements of British ships have been made in deference to Russian representations, it is not, on the face of it, inconceivable, but under the particular circumstances of the case in question, it altogether over-taxes our credulity. No one of the Treaty Powers is entitled to obtain from China an exclusive concession in the shape of the use of a harbour; and if Russia, having sent a squadron of her own to Port Arthur, then called upon Great Britain not to let her flag be seen in the harbour, she would be offering a deliberate affront to England and exposing herself to a painful rebuff. The whole story is obviously a canard, and if Reuter's agent had any judgment whatever he would not help to ventilate such silliness.

Are we to assume, then, that nothing has happened; that all this smoke is entirely without fire? Scarcely. The latest telegram probably contains the key to the

Lundon, Nov. 25.
It is officially explained that the visit to, and departure from, Port Arthur of the British warships, were merely ordinary cruising movements.

This can hardly be made out of whole cloth, seeing that it comes from London, and that Reuter's agent must have had some journalistic declaration, at any rate. before him when he wired. If Parliament were sitting it would be easy to conceive that a question had been put in the House, and that Mr. CURZON had replied in the sense of the telegram. But Parliament is not sitting, and we must fall back on the hypothesis of a paragraph in The Times, avowedly on official authority. Beyond that we can be quite sure that no official announcement of any kind has been made. The question then arises, was the announcement due, in any sense, to consideration for Russian susceptibilities. Did it appear to the Governments in St. Petersburg and London that such an explanation would usefully serve the interests of peace by correcting any Russian misconception about the action of the British ships? It is very difficult indeed to believe anything of the kind. Of course, when we remember that negotiations are going on in Peking, and that Russia and France are combining to thwart England's programme there, we have to be cautious about dismissing suppositions which, under ordinary circumstances, would be untenable. Still, for our own part, we

imagining that any public explanation of the movements of British ships has been given in answer to Russian inquiries, or out of deference to Russian susceptibilities. A very different explanation present itself to us. It is this. The Russian press, on receipt of the news that the British ships had left Port Arthur, published some statements of the nature embodied in Reuter's telegram of January 24th, namely, that the movement had been ordered owing to Russian representations. This fact having been wired to London, Her Majesty's Government addressed a communique to The Times in the sense of Reuter's telegram of the 25th, namely, that the comings and goings of H.M.'s ships had been merely ordinary cruising movements; in other words, had been controlled by the naval the only reasonable view of the case. It is absolutely certain that not a British ship has been moved a cable's length in Power, and it is almost absolutely certain that no explanation of the movements of British ships has been given in deference to the wishes or susceptibilities of a foreign nation. The pity of all this is that it perilous situation, whereas in truth no elements of danger are apparent. The tendency is distinctly in the direction of an amicable settlement.

#### YOKOHAMA LITERARY SOCIETY.

There was a full attendance on Friday evening at the Yokohama Literary Society's meeting at Van Schnick Hall and a very pleasant evening's entertainment was provided for the members and their frieuds. The pièce de resistance of the programme was an interesting paper read by Mr. A. M. Gale on "London ; its Sluma, Beggars and Poor," in which the writer showed himself well acquainted with the lights and shades of life in the great metro-polis. A vocal quartette, "Our Light Afflic-tions," was capitally rendered by Madame Henckler (soprano), Mrs. Baguall (contralto), Mr. Darnell (teaor), and Mr. Gale (bass), with plane and over a company to the Mrs. with piano and organ accompaniments by Mrs. Doering and Mr. C. I. Fraser. Mr. Kohn contributed a very artistically executed piano solo, an Andante by Beethoven, and Madame Henckler sang a charming German song, "Ton der Reiner," (Lowe). A short original poem, "The Song of the Cynic," by Mr. C. H. Denison, who was unable to appear personally, Denison, who was uname to appear personary, was read by Mr. Dearing, and another original poem, "The Night brings out the Stars"—instinct with deep poetic feeling and happy expression—was read by Mrs. Dearing. Mr. Gale sang "David, the Shepherd Boy," in good atyle and the evening's entertainment brought to a close with a piano solo by Mrs. Doering, the "Midnight Barcarrote," by Jerome Hopkins, which, it is needless to say, was most artistically and expressively interpreted by the The President announced talented pianiste. during the proceedings that he hoped to be able at the next meeting of the Society to arrange for a paper to be read by Mr. France, the leader of the round-the world cyclists

## "WHITE ASTER! . Our conception of Japanese poetry, as derived from the translations of Mr. B. H. Chamberlain

and Mr M. E. Aston-truly we can not con-

scientiously include Mr. Dickens in this group

of sinologues, his muse's wings are so clogged

with dry dust-may be summed up in the word "ditty." We use "ditty," in its old sense, that of a fugitive fancy, perhaps a mere conceiof thought, perhaps a passing emotion, caught in a linte net of neat diction, and deriving much of its attractiveness from the delicacy of the verbal meshes that imprison it. One can scarcely imagine the stirring of any profound passion or magnificent impulse by a Japanese verse. It gives us a transient glimpse of the poet's mood, and touches only the harmonics of feeling, without setting up any vibration in the great chords that thrill through the tragedies and triumphs of existence. Something of this meagreness of imagination is due, doubtless, to the language. Japanese poets found themselves, for many generations, in much the same position as an Englishman condemned to com-The difficulty pose verses in Latin or Greek. officer in command on the station and not of manipulating the medium of expression fatalin any respect influenced by inter-State diction came to be even more esteemed than representations. That appears to us to be nobility of idea. Versifying fell to the rank of a polite accomplishment, a test of education rather than of genius, and tricks of form did duly for originality of conception. Japanese poetry, in our opinion, must be classed with obedience to the interference of a foreign Japanese music. Each is an art acquired essentially by mechanical practice and making no appreciable demand upon inspiration. From an Occidental point of view the natural sequence of things is frequently reversed in Japan, and it is not altogether surprising to find that the the pact: we must say of him fil non nascilur, tends to create a false impression; tends During the past twenty years, however, a new to suggest a strained. if not an actually impulse has been felt in the world of Japanese poetry; an impulse evidently derived from studying the works of European and American It has come to be appreciated that poetry should have its origin in the heart, not in the lexicon, and some of Japan's modern literateurs have endeavoured to raise the noble art from its old level of jungle and vapidity. It would be flattery to say that they have succeeded. Poetry, like music and painting, is in great part a product of the time. The feelings that it appeals to must exist, in embryo at all There could not be a Tennyson in events. Japan at present. His genius would be chilled by popular indifference, by popular indifference. That admission, howcourage and enterprise of scholars like Mori, Toyama, Inonye, Ochiai and so forth, who have set themselves to sing in almost waste places. Among their works there is one called "The Lay of the Pious Maiden White Aster," an epic of Chinese origin which has been rendered into Japanese by Inonye Tetsujiro and by Ochi ai Naobumi, and is now before us in an English dress. Dr. Florenz, whose work as a sinologue has as been large in proportion to his oppor-tunities, rendered "White Aster" in German, in German, in the first place, and Dr. Lloyd, who has made an enduring mark by his admirable inter-pretations of Buddhiam, followed with an English translation, the two publications being separated by an interval of two years. We learn from the preface that Dr. Florenz confined himself to the epic of Inouye. He examined that of Ochiai also, but finding Inouye's "richer in delicate shades of thought," based his translation on it solely. We ourselves have not had an opportunity of examining the work of either scholar. Our acquaintance with "White Aster" is derived solely from Dr. Lloyd's English version, which is presumably an accurate rendering of the German. Thirty years ago, a couplet known by the same name had an immense vogue in Japan :-Tsuyu wo dani

Ito Yamato no Ominaveshi Furu America ni

meaning is that the tender blossom of Japan which shinks even from the touch of the dew, will never turn its face to the rain of America. A better illustration of the difference between the new and the old could scarcely be found than by comparing this verselet with the lengthy epic of Inouve Tetaujiro. The five lines we have quoted were evidently suggested by the fact that the first two syllables of "America" make the Japanese word for "rain" (ame). Around that central idea the patriotic poetaster built up his verselet, and I is to the paltry conceit "furu Ame (the falling rain) that the poem owes its chief charm in Japanese Dr. Incuye Tetsujiro's epic is quite cycs. free from such poor puns. It is a frank attempt to tune a sad story to the music of nature's moods. "White Aster's" father is one of the ill-fated Samurai who, esponsing the cause of the rebel Saigo Takamori, lost everything but life. The fair girl lives in great misery with her mother, whose anxiety on account of with nor motion, writes anately in account of the hisband gradually breaks her heart. White Aster is restored to her father only to be separated from him again: He goes hunting in the hills, and remaining about day after day, is sought by his daughter. In her wanderings "White Aster," finds a rustic shrine, tended by a priest who proves to be her brother, a repentant rout. She is subsequently rescued by him from the hands of bandits, and then, again, separated from him, after which she finds refuge with an old farmer, and is sought in marriage by the Governor of the prefecture. But "White Aster" knows that her mother had destined her for her supposed brother, to whom, in truth, she is not related, and seeing no way to observe her mother's beliest without bringing trouble upon the farmer, her benefactor, she at-tempts to commit suicide; is rescued by her brother, who comes upon the acene at exactly the right moment, and the two then set off for their old home where, to their unbounded delight, they find their father waiting, month after month, in the hope of seeing them return, We are not told what becomes of "White Aster." The poem ends with her father's relation of the manner of his rescue from a trackless gorge. He had given himself up for lost when a troop of monkeys taught him how to extricate him-self, and he describes the inference drawn by

Then came the thought that no blind chance had brought
The monkey troop, and that my strange escape,
Was caused by gratitude, for once it fell,
In wintertime, that as I hunted in the hills
Amongst the snow, a female monkey sat
Holding her babe, beneath a tree. I raised
My gun and aimed to shoot at her, but she
Bagan to cry, with such a human voice,
Praying for mercy, that my lifted gun
Sank harmless by my side. I sparest her life;
And she, in turn, secing my sorry plight,
Cried to me from the rocks, and showed the way
To flee from certain death. The silly beast
Knows how to show its gratitude, and shames brought To fice from certain death. The silly beast Knows how to show its gratitude, and shames Many a thankless man. For oh! how few. In these degenerate days, remain to show True Faith and Honour, and unselfishly To cling to duty! I alas! have fought A rebel gainst my rightful lord and king. Unmindful of my troth, and with black hands, Wasted my fatherland. Such men as I, Unfaithful and ungrateful, stand below The lower beasts. Ah! when I recollect All my base acts, my grieving heart is pierced With pangs of penitence. Your soul alone White Aster, still remains untouched and pure Only through you does my race still retain its costly gen of child like faithfulness. Wither the flowers in the garden all, The flower of thy heart shall wither no'er."

him from the incident :-

This extract gives a fair idea of the style and quality of the poem. The incidents are com-mon-place; the ideas never rise to any heights of inspiration; the narrative changes with exasperating fickleness from present to past and back again. Yet there breathes though the whole a spirit of piety and faithful love, and the poet's tender affection for nature enables him to weave her phenomena into the web of his tale with very admirable skill. When that

Ominaveshi
Furu America ni
Sode wo nurasaji.

Pis an almost untranslatable couplet hur its & White Aster?—a Japanese Puem tunuslated from the German of Dr. Florenz, by the Rev. Arithmetical Annual A

is said, however, there remains little to add. "White Aster," were it presented to the world as a German or English epic, would attract no attention. The public would recognise some scholarship in the diction and some tenderuess in the thoughts, but would fail to discover the divine afflatus anywhere. It would scarcely be worth the while of men like Dr. Florenz and Dr. Lloyd to devote their labour to the interpretation of such epics were poetry alone in question. But as guides to a knowledge of Japanese character these translations deserve grateful recognition. We add some verses from Mr. Uyeda's "My Beloved's Grave," the gem of the whole volume, in our opinion :-

f the whole volume, in our opinion
But when I heard
That lone, all alone,
Thou hadst gone home,
Leaving men-then I knew
That in this life
Objects of hope and love
Are not granted to man.
For thy sake,
Seeking far distant lands,
I travelled far and near.
For thy sake,
With tolksome behour sought I to obtain
W.sdom's ich store. See, see, now have I
Come home again.
See, see, now am I
Near to the wished-for goal; But in vain
Was all my fond endeavour.
Knewledge without love
Is but a curse. Crooked and cracked Stands thy poor tomb Stands on y Evil weeks Grow round thy grave!
And the priest himself hath forgot
The dead one's name! Over the dry dreat fields Autuen winds Blow melancholy. Wait for me, love, Under thy mossy stone; Soon shall I follow thee.

#### THE CYCLE RACE IN NEW YORK.

It turns out that the sensational stories circulsted with reference to the recent bicycle race In New York, when the winner, Charles Miller, covered 2.093 miles in six days, were wild exaggerations. Au American journal now says of the affair :-

The six-day bicycle race in Madison Square Garden, New York city, which terminated Saturday night of last week, has called forth considerable comment, and, it is thought may lead, as in Illinois, to a law in this State prohibiting such contests. The daily papers had sensational reports to be conditions of men a number of whom were contests. The daily papers had sensational reports on the conditions of men, a number of whom were said to be at times insane by reason of the prolonged exertion and the loss of sleep. Since the race, the men have expressed their indignation over these reports, which they declare were false, and on the day after the race all the men were up and around and insisting that they were feeling none the worse for their efforts. The pulice department kept a close warch of the race, and the police surgeous subjected the men to several examinations in the closing days, as a result of which four contestants were ordered off the track. The surgeons' official reports, on the others showed a fairly normal condition of temperature, of pulse, and of the heart. The Cycle Racing Association, however, has resolved that in hume contests several hours exched day shall be set apart for rest by all the each day shall be set apart for rest by all the competitors.

#### THE P. & O. JAPAN STEAMERS.

It will be noticed from the advertisement of the P. & O. Company in these columns that their next mail steamer will leave Yokohama on the 8th February, connecting at Hongkong with the accelerated services under the new British Postal Contract with that Company, There will be no mail departure next Sunday. The M.M. be no mail departure next Sunday. The M.M. Company's steamer will sail on Wednesday, the 2nd February and thereafter the P. & O. Company's vessels leave on the Tuesday and the M.M. Company's steamers on the alternate Wednesdays. The Sunday departure will Wednesdays. The Sunday departure will therefore be a thing of the past. This should meet with the approbation of residents, num-bers of whom have for a long time been debarred from their Saturday half-holiday, through the Hot Springs at Arima, where the Colonel, who We have already reported, says the Mainicht, Sunday departures. Digitized by UNIVERSITY OF ILLINOIS AT

#### THE NEW PLAY AT THE KABUKIZA

The Kabukiza theatre at Kobikicho, Tokyo opened on the 15th inst for the first performance of the new drama, "Sutenbune," by Mr. Kuroura. A certain incompleteness in the arrange ments and accessories is almost inseparable from a "first night" performance, otherwise the representation went remarkably well. Messrs. Nakamura Fukusuke, Ichizo and Onoye Kokujiro were the leading actors in the piece, the first named giving a most natural and finished representation of the part of the heroide, Sonoye, afterwards Baroness Tokuoura, while Mr. Ichizo made an excellent Colonel Kobuishi, and Mr. Kokujiro fi led the sôle of the Baron to perfec-The play consists of nine acts. first of these opens in a tavern on the sea front at Kobe, kept by the villain of the piece, Senji. Captain Tatsuta of the Tatsuta Maru enters the tavern to see if a letter has been left there for him by his mate. While in the tavern the Captain hears the mosic of a string instrument and learning that it is played by a mendicant singing girl noted for her beauty, has her sum-moned. The girl Sonoye enters the tavern accompanied by an old man, her tutor. The Captain takes a dollar from his bag to give to the girl, and in so doing discloses to the tavern keeper, Senfi, that he has a large sum in the The Captain, is then induced by Senji and a Taisuta man reputed to be Sonoye's father to stay the night in the tavern. The girl finds out that the two men have evil intentions regarding the Captain and expostulates with her supposed father, but is tied to a post in the room while the Captain is murdered and robbed. old tutor, however, releases the girl and the two together make their escape. The second act together make their escape. shows the girl Sonoys and her old blind tutor on the road in a heavy snow storm, the old man, almost dead from cold and exposure, when Baron Tokuoura comes along and takes the half frozen pair to his villa close by, where, in the third act, Sonoye appears as the Baron's wife and is introduced to his nephew and other friends. This nephew has devised a plot, with the assistance of a friend and confederate named Kawabayashi to obtain possession of his uncle's vast property by killing him. In Acta four and five Sonoye is inveigled from the villa to a cemetery by the villain Kawabayashi, and the Baron, sup-posing that she has fallen in love with Kawa-bayashi, divorces her immediately on her return home. Colonel Kobuishi, an old friend of the Baron', who has obtained some informa-tion of the piot, calls upon him to tell him what he has learned, but being seized with a severe coughing fit before he can speak, takes up a glass of water intended for the Baron drinks it, and is poisoned thereby. Act VI. opens in a tavern in the Kijima temple forest. Kawaoka, a professor of medicine, and one of the consultators against the Baron, enters the tavern disguised as a priest. Senji, the tavern-keeper, informs him that he knows all about the plot, and requires to be bought over to keep silent. The supwritten contract from the Baron's nephew hidden under the floor of the Kijima temple, and Senji goes out with him to get the document. When they get to the place Kawaoka, the priest, attacks Senji with a dagger, but the police atrive and arrest Senfi, letting the former escape, In the seventh and eights acts, Sonoye is found in the house of her old music-teacher, with whom she had taken refuge after her divorce by the Baron, to whom she has in the meantime borne a child. She is arrested on a charge of poisoning the Colonel, the Baron's friend, but is released on bail. Her step, father, whom she had quitted years ago, attempts to steal her child as a means of exterting money from the Baron, but the mother's agonised entreaties melt the stony heart of the ruffian, who for the first time acquaints Sonoye that she is really the daughter of a Marquis, from whom she had been kidnapped when only four years of age. The ninth and last act opens at the

water, is staying to recover his health. The Baron is also there, and is being assiduously courted by a Miss Konami, sister of a retired Major, whose ambition has led her to try to secure marriage with the Baron, and who had previously poisoned the Baron's mind against Sonoye and induced him to divorce her. She and her brother have come to Arima for the sole purpose of inveigling the Baron into marriage; but her charms fail to entice him and she is driven to go to Kawaoka for a love potion. This, however, is no love potton, but poison, though she does not know it. She puts it secretly into a cup of beer which is offered to the Baron, but just as he is raising it to his lips, the Co'onel, who has watched the proceedings, stops the Baron from drinking the beer, with the words, "Hold, the cup contains poison." After that sensational denouement, it is left to the imagination of the audience to straighten out the ravelled threads; to make the here and heroine happy and to punish the conspiratore.

#### FAPANESE FACTS AND COMMENTS.

Thirty-nine new banks were opened in December, with an aggregate capital of 9.518,500 yen. As compared with 1896, last year showed an increase of 263 new banks and 76,458,470 yen in capital.

According to the *Nippon* the stock of rice in the Fukagawa granaries during October was 190,000 bags. The subsequent imports of foreign rice helped to supply the demand in the Capital, and the stock in the granaries has since increased to 264,000 bags. Prices, however, show scarcely any downward tendency.

The Tokye Azahi states that the site for the Japan Observatory to be established in Mizu-sawa, Iwate prefecture, under the auspices of the International Law Surveying Association, has recently been inspected by Doctor Tanaka, who immediately sent a report to the said Association in Berlin, specifying the location and other necessary arrangements for the institution.

According to the Chuo a scheme is in con-emplation to establish a new office in the War Department, to be designated the Military Edu-cation Inspection Department, the Army In-spection D-partment being abolished. The new office is to be placed under the supervision of . General, and Major General Terauchi, Commandant of the 3rd Regiment, is nominatto the post.

Although the date for the general election of the members of the Lower House is fixed for the 15th of March next, no definite decision is yet arrived at m to the date of convening the special session of the Diet and the period of its sitting. It is stated that the term of the sitting being probably short, only urgent measures, such as those connected with the operation of treaty revision and so forth, will be submitted to the session for approval, other subjects being put off until December.

The camphor oil trade of Kobe continues stagnant, no large orders having been received from abroad during the part few months. owing to the scarcity of stocks sellers remain firm, and prices show no tendency to fall. The quotation is at present slightly over 43 yer. The exports last month were 231,843 catties valued at 116,794 yer. Of this 166,277 cattles were shipped to Hongkong. 58,096 to America, and 5.346 to Australia.

In view of the steady increase of agricultural products in Hokkaido, the Government, says the Mainichi, has issued instructions to the Coal Mining and Railway Company to transport such products at half the ordinary rate of freight. The goods transported from January to November last amounted, it is said, to 57,008,387 kin, for which 33,161 yen were received as freight, the average monthly transport being 5,182,581 kin and the freight realized 2.105 yen.

a loan of three million yen to some capitalists to stimulate the export of cotton yarns. Informamation from Osaka announces that the three million yen under notice is only to be secured by free contracts with the Bank under the direction of the Minister of Finance, who seems to have issued a statement to that effect. The Spinning Guild has applied for a loan of 240,000 yen to be paid in Shanghai and of 600,000 yen to be paid in Hongkong.

Investigations were recently made by the Japanese Government with the view of ascertaining the amount of national bonds in the hands of foreigners. It appears that, apart from 43 million yen in War Bonds, a sum of sixteen or seventeen millions in other securities must be in circulation in foreign countries, the aggregate amount of loans abroad reaching sixty millions. The gross total of national indebtedness is at present 390 millions, and it may be supposed, remarks the Shogyo, that fifteen per cent, of this is floated on the foreign market.

The *Kokumin* contains a vigorous article on the Japanese armament expansion. It admiss that in the scheme formulated in the 28th year of Meiji the steady rise in prices and cost of production was not anticipated, and consequently the natural tendency is to curtail the original programme. But such a result, our contemporary thinks, would be most deplorable. If Japan is to retain her positon among the nations of the world an adequate defensive armament is a sheer necessity, and the Kakumin condemns as ignorant demagogues the advocates of economy at the expense of national safety and progress.

The Tokyo Asahi reports that the steamer Arisoura Maru, of Fushiki, owned by Mr. Minamishima, stranded on the evening of the 16th, off the coast of Tadotsu, Sanuki, east of the Habushi lighthouse. She was on her way from Otaca to Kobe with lumber. The damage being taken to get her off. She was built on the Clyde in 1882, and was first named the Rotherdale. The vessel, whose gross tonnage is 1831 and nominal horse-power 182, was

Count Okuma has apparently been very candidly criticising the policy of Marquis Ito.
The Hochi represents him as saying:—"The odious custom of regarding the Diet, the political organ of the nation at large, as something like an instrument for the furtherance of the Government's private interests, should certainly come to an end. The trickery which has been practised is perfectly familiar to the Marquis, and, instead of endeavouring to convert the members of the Diet by an evening entertainment he should assume the policy of consulting openly with Parliament on all important matters."

The Nichi Nichi gives some interesting details of the operation of the new gold coinage system. From October 1st to Jan. 20th silver and notes to the value of 17,736,920 yen were presented for exchange-3.443,576 yes in silver, and 14,233,394 yes in notes. The amount of silver presented for exchange during January was between 260,000 and 270,000 yen, and the notes presented aggregate over 2,900,000 yen. The gold returned after being once exchanged since October 1st reached 1,745,660 yen.

The death is announced of the wife of the Tai Wön-kun, which took place on the 8th instant. She had been ill since last year and was in a state of utter decrepitude, having attained the age of seventy years. Sixty years ago she was betrothed to the Tai Won-kun and bore to the latter four children-two sons and two daughters. The eldest daughter was married to the ex-Minister of War, and the first son was, until recently, Minister of the Royal Household; the second son is the reigning Emperor. The second daughter was given in marriage to a member of the Cho family. The Korean Emperor, on receipt of news of the death of his

mourning be observed in the Court for thirty

The Japanese Consul at Mokpho, Korea, has compiled a concise report on the trade of the poit. Korea's wants are apparently com-paratively simple. She chiefly yearns for shirt-ings, kerosene oil, matches, copper, pewier, nails, hardware, tin lamps, timber, silver, straw ropes, paper, rakt (strong demand!) and fish oil. Of shirtings "howak," "three horses," and " farmer" chops sell particularly well. American kerosene in tin cases has almost a monopoly of the oil market. The chief export, as might be expected, is rice, and others are cotton, cotton fabrics, ox hides, and gall-nuts. The rice crop this year promises well, and an unusual development of trade may be expected, the Mainichi thinks, by March or April.

A report from the Japanese Consul at Lyons, published in the Jokyo Shimbun, shows that the export of silk handkerchiefs from Japan to Europe and America during the 28th and 29th years of Meiji amounted to 5.399.955 yen and 4.617,720 yen in value respectively, while silk piece goods exported during the two years aggregated 5.997.801 yen and 7.394.828 yen respectively, the total for the two commodities reaching 15.207.801 eee in two commodities reaching 15,397,801 yes in 1895 and 12,012,548 yen in 1896. Thus a decrease of 22 per cent, is noticeable on the figures for 1896 as compared with those for 1895. One of the principal causes for the falling off is ascribed to the tradal depression in America, whereas the reduction of 26 per sity in view of the excess in imports. Coins and cent. on piece goods is the result of smaller bullion exported during November and Decemorders from Europe.

The Yorosu calls attention to the fact that freight for coal is from 1.20 to 1.30 yen between Yokohama and Karatsu, and 80 sen only between Moji and Yokohama. The failure of the rice crop in the Interior has necessitated the frequent despatch of vessels to Saigon other the producing territories. The Mitsui Bussan Kwaisha alone is reported to have chartered nine vessels for that purpose, in addition to three others secured by the Company until April or May next. The scatcity of vessels arising from these circumstances has naturally led to a rise in freights generally. The rate between Yokohama and Moji is raised to one yen per 1,000 cattles, and that between Yokohama and Karatsu to 1.50 ren. Coal must therefore be expected to rise in value.

Cattle breeding, according to the Tokyo Shimbun, is an industry well suited to the soil of Hokkaido. Applications for a lease of land for purposes of cattle breeding have increased considerably of late, the total area leased by the Hokkaido Government having reached 3.400, 358 Isubo. Of the land so granted the largest farm is owned by Mr. Yamagata, who has secured 9,070,000 Isubo in Nemuro; next comes Mr. Tamura's pasture, covering 3,520,000 Isubo and known as Aritama Farm. This is followed by the Toyen Pasture with 2,210,000 Isubo, while Mr. Sanoda's farm in Vilna tsubo, while Mr. Sonoda's farm in Kikyo district ranks fourth in magnitude with 1,640,000 tsubo. The provinces where cattle breeding farms are mostly found are Hidaka, Kushiro, Tokatsu, Kitami, and Nemuro. In Ishikari and Shiribeshi, in which the soil isexcellent there is little pasture.

According to the Shogyo the number of joint tock companies (banks and railways excepted) throughout the empire at the end of December totalled 2.180, with an aggregate capital of 314,581,862 yea. These figures show an increase of 34 companies and 2,173,850 yen in capital over the previous month. These comcapital over the previous month. prise :-

COMMBRCIAL CAPITAL. COMPANIES. Yen. 1,346,500 3 ...... 3 ....... Of the industrial companies 16 were new organ-

mother, immediately proceeded to the Un Hyon ization with an aggregate capital of 1,446,850 difficulty, therefore, of issuing Japanese bonds Palace in company with the Crown Prince, yen; nine increased their capital by 170,000 at 3 or 4 per cent, interest may easily be limited.

and having expressed his grief ordered that yen; three were dissolved, and three decreased their capital by 152,500 yen, while only three agricultural corporations were started with an aggregate capital of 203.000 yen.

Since the beginning of the new year the foreign firms in Yokohama have been buying very little tes. On the 19th instant, bowever, Measts. Jardine, Matheson, & Co. buying solely for themselves, took leaf to the amount of 15,600 catties. In spite of the arrivals of better class teas during the past few days, prices remain unaltered. Considerable sales are expected to take place in a few days. Tientsin hitherto has been a poor market for cotton yarns but last week we bear that it took up 3,000 bales of fine 20's and 2,000 bales of 16's Bombays at prices ranging from 63 taels per bale. Chinese yarns, too, owing to their chespness, have lately been in demand at Tientein, and 5,000 bales of 14's and 16's were sold at prices varying from 67 tacls to 74 taels. Sales of Japanese yarns m Tientsin do not come up to expectations on account of their price. The stock in the Tientsin market their price. is 40,000 bales from India, 20,000 bales from Japan, and 4,000 bales of Chinese production, amounting in all to 64,000 bales. It is sup-posed that unless serious fluctuations take place in exchange, prices will remain firm.

With regard to the nutflow of gold and silver the Nippon says that the excess of imports having ceased through the settlement of the Indemnity accounts, the market has been restored to its original condition and the export of metallic currency has become a matter of absolute necessity in view of the excess in imports. Coins and

in December, making a total of 9,340,000 yen. The excess of imports which amounted up till October to 71 million yen was therefore reduced during last year to 62 millions, though in these figures were also included the yen pieces received in exchange for gold.

The Yorodau asserts the Count Inouye has formulated a scheme for obtaining loans in America to the amount of 100 or 150 million yen, through the medium of Mr. Dun, the late American Minister to Japan. The negotiations however do not seem to have progressed so far as to fix the rate of interest or the face value of the bonds. Some time must therefore elapse before the project is presented for discussion by the Cabinet. In the mean time changes may occur in the programme formulated, but it is impossible to make any forecast to such a contingency. Nevertheless we are informed, says our contemporary, that Count Inouye is disposed to sell 3% or 4 per cent interest bonds of 100 yen face value at 93 yen. Leaving aside for a moment the merits of the question of the introduction of foreign capital, it is still very doubtful whether the Count will be able to obtain the loans in he expect. The rate of interest in European markets seems to rise steadily in con-sequence of last year's failure of crops and the depression of trade, the expansion of armaments and the development of industry. The bank rate in European countries does not fall short of 218,000 three per cent., Germany, Russis, and Austro-343,000 Hungary paying from 5 to 9 per cent. 115,000 Two countries,—England and France—alone v organ-maintain their interest at three per cent. The

gined. But America, it is true, floats her capi an interest from 2½ to 3 per cent. per annum, as is actually the case in New York. But it must at the same time be remembered that even America's rate of interest is not to be expected to continue for any length of time at the rate of from 2½ to 3 per cent. The Congress now in session is likely in determine the course to be pursued in regard to the coinage system as well as financial administration, when expansion is undertaken for the various branches of industry From the summer time till October every year the money market in New York tightens as a rule, in consequence of the interval being the rute, in consequence of the interval being the harvest season, for wheat and cotton. The period in which the Count might be enabled to carry out the scheme would be just when such a pressure on money takes place. The Count must therefore expect, alleges the Yerosu, to confront serious difficulties in selling Japanese bonnes of 2014 per cent ties in selling Japanese bonns at 3 or 4 per cent. interest, in spite of the reduction in their face value. We (Fapan Mail) give this for what it is worth—very little we expect

According to investigations completed at the end of last year, the full and provisional charters granted for railways in Kinshiu were as follow:—Full charters—Chikugo Railway, from Kuroki to Okawa in Fukuoka prefecture, a distance of 20 miles 20 chains; Funakoshi Railway, from Funakoshi to Dazaifu in Chikuzen, a distance of 83 miles 60 chains; Naupo Railway, from Oita to Nagnau in Buzen, 70 miles 59 chains; Tohi Railway, from Kumamoto to Osu, 14 miles 40 chains; Chikushi Coal Transport Railway, from Nakanoma in Kurabe dis-trict to Kyase in Fukuoka prefecture, 3 miles trict to Kyase in Fukuoka prefecture, 3 miles and 50 chains; Kiushiu Railway, extention of Chikuho line, Kaneda-Iida section, 1 mile 60 chains, and Shimoyamada Kamiyamada section, 2 miles 18 chains. Provisional Charters:—Kurate Railway, Miyata-Tokagawa Section, 11 miles; Hokuchiku Railway, Dazaifu Yoshii Section, 25 miles 12 chains; South Western Railway, Nobeoka-Kokubu Section, 100 miles; Seisatsu Railway, Kagoshima Mukaida Section, Sessasu Railway, Ragosiima Mukawa Section, 22 miles; Kiushiu Railway, Moji-Tanoura Section, 2 miles 40 chains; Hoshin Railway, Tanoura Sone Section, 11 miles 37 chains. Thus full charters were secured for six lines comprising an aggregate distance of 194 miles 7 chains, and provisional charters acquired for an equal number of lines covering altogether 182 miles 9 chains, the total railway mileage represented by the above chatters being no less than 376 miles 16 chains.

The Jiji comments on the steady increase in the import of foreign rice. The rice crop in Japan having decreased about nine per cent during the year before last, and prices having risen abnormally last year, the import of foreign cereals reached the unprecedented amount of six million piculs, valued at twenty one million yen. Rice now occupies second rank among the staples of import. In the 3rd year of Mei/i the grain was imported to the amount of 5,377,108 piculs, valued at 14,598,115 yes, but in the 23rd year a slight 14.596,115 yes, but in the 23rd year a signi decrease was noticeable, the amount imported being 4.596,594 piculs valued at 12,302.883 yes. A further reduction took place in the 27th year, the figures being 3.304,628 piculs valued at 8,413,148 yes. The 30th year, however, saw the amount swelled to 6.301.394 piculs, of 21,528,428 yes in value. Nothing has yet heen ascertained as to the probable reduction in, last year's crop, but it may be conjectured that the diminution was far above 9 per cent. on that of the year before last, most of the anthoritie placing it at from 10 to 13 per cent. With this in view the native dealers hastened in make contracts with foreign firms in the open ports for the supply of cereals while foreigners were, in some places, also engaged in importing rice to a considerable amount. Under these cir-cumstances the amount of import for this year may be expected to exceed the figure recorded for last year. Not to speak of other staples of import, rice alone is sufficient to influence the foreign trade considerably for this year.

#### THE FRENCH PRESS AND THE DREFFUS AFFAIR.

Referring to the writing in the French press about the Dreyius affair, the Paris correspondent of The Times says:-

about the Dreyfus affair, the Puris correspondent of The Times says:—

This unbidled spirit of invention, indeed, which has never before gone such lengths, is one of the most characteristic symptoms of these controversies. An Alsatian barrister, it will be remembered, related that visiting the Palace at Potadam at the time of Dreyfus's arrest he saw pencilled on a French newspaper in the Emperor's study the words "Dreyfus est pris." Sanseless as this story seemed at the beginning of the campaign, it has now the air of childish simplicity. Anything, indeed, may be said in the French Press without the slightest risk. Individuals are powerless for even a duel may be refused them. The Government is helpless, for if a newspaper is imprudently prosecuted juries shrink from a verdict which would expose them to insult. The Press was certainly not ripe for the licence allowed it by the law of 88°. This is a pity, for such licence must eventually be at the expense of liberty. Nor does the cril end here. Racial animosity is bearing bitter fruit, and France, whose boast it was that she marched at the head of civilization, is daily relapsing towards ignorance and barbarism. There has for some days been shameless talk of a law excluding from all public posts Jews and foreigners not naturalized for two generations and this has raised so outcry. It will be said that such a fill will not be adopted, but that it should be proposed without evoking reproduction is diagraceful, and it is disquicting to see a country apparently inclined to belie its chivalrous traditions. It is not surprising, therefore, that the Government should contemplate legislation against an outbreak threatening public morality, but, whatever the urgency of such a step in view of the impunity enjoyed by journalistic perversity, it is and to see liberty abused in the service of a revived barbarism.

Here is a euphemism which may come in heardy

Here is a suphemism which may come in handy any day. "I don't say be is a liar," remarked the revising barrister in an English borough, "but he has represented a state of things which does not exist.

#### THE GERMAN NAVY.

The German Navy Bill makes demands which are thus summarized by the Berlin correspondent of The Times :-

16 The strength in ships of the German navy, exclusive of torpedo-boats, training ships, special service vessels, and gunboats, is to be fixed as follows:—There should be ready for service 17 line-of-battle ships, eight armoused ironclads for coast defence, nine large and 26 small cruisers. Two hattleships and three large and four small cruisers are to be provided as a reserve force.

cruisers are to be provided as a reserve force."

A fleet of this strength is regarded by the Ger man Government as adequate for the duties which man Government as adequate for the dittes when may devolve upon it, but at the same time the number of ships proposed is considered to be indispensable. At present, if the ships which will be available for service or which will be in course of construction on April 1st, 1898, be included, the German navy consists of 12 battleships, eight indicated for count defaults for count defaults. In the course when a 23

German navy consists of 12 battleships, eight innecteds for coast defence, ten large cruivers, and 23 small cruisers. It follows that, in order to realize the Government plans, seven battleships and two large and seven small cruisers must be built before the close of the financial year 19045.

In preparing the Bill, the Government has been guided by the following considerations. The navel interests of the German Empire require the presence abroad of three large cruisers, two in East Asia, and one for Central and South America; of ten amall cruisers, three in Hast Asia, three for Central and South America, and two for East Africa, and two for East Africa, and two for East Africa, and two for sets of constantinople. But in the present year there were available for But in the present year there were available for the purposes enumerated only two large and eight small cruisers, two gumboars, and one station ship, and in order to provide even this force for foreign service the home fleet had to be deprived of three

of its best conisers.

The total expenditure contemplated for the seven The total expenditure contemplated for the seven years for new constructions, including artillery and topedo armament, is, estimated at 192,000,000 milks. The cost of tenewals for the same period will amount to 211,000,000 marks. The instalments not yet voted for ships now in course of construction amount to 63,500,000 marks. When the cost of three gunboats and seven topedo-boat divisions, together amounting to 46,000,000 marks, as well as the additional expenditure for unsintenance and for increase in the personnel, in taken into account, it is estimated that the average annual increase in the ordinary expenditure will be 4,000,000 marks in the ordinary expenditure will be 4,000,000 marks in the coming seven years, as contrasted with 3,000,000 marks average yearly increase during the last seven years.

It will be observed that the contemplated squad-

It will be observed that the contemplated squadron for the Far East is to consist of two first class and three second-class—or, perhaps, thirdclass-cruisers and two gunboats.

#### HIGH MILITARY COUNCIL.

The following Imperial Rescript was gazetted on the 19th instant with regard to the establishment of a High Military Council:-

Having formulated schemes for the opening of the country in view of the growing prosperity attained since the Restoration, We purpose to consummate since the Restoration, We purpose to consummate the work of Our Ancestous by further promoting the welfare of the people and the development of the State. Accordingly, in order to secure assistance in the conduct of Our military and naval affairs, We hereby order the Gensuifu (High Military Council) to be established with the object of selecting from among the Generals and Admirals those of greatest area increased distinction to set as Our of greatest experience and distinction to act as Our Councillors in matters of warfars. The functions devolving upon these Councillors shall be specially determined by Us.

(Imperial Sign-Manual and Great Seal.) January 19th of the 31st year of Meiji. Marquis Iro Hironomi, Minister President of State, (Counter-signed)

#### IMPERIAL ORDINANCE No. 5.

We hereby sanction the Regulations for the Gensuifs (High Military Council) and order the same to be promulgated, (Imperial Sign-Manuel and Greet Seal.)

January 19th of the 31st year of Meifi.

(Counter-signed) Marquis Ito HIROSUM, Minister President of State.

Marquis Salgo Yorinitsu, Minister of the Navy. Viscount Katsura Taro, Minister of War.

REGULATIONS FOR THE "GENSULYU."

Att. I.—All Generals or Admirals appointed to the Gensuifu shall be specially granted the title of Gensui or High Military Councillor.

Art. II.—The Gensuifu shall be the highest Council in matters of warfare.

Art. III.—The Gensuif, in High Military Councillor.

cillor, may, under Imperial instructions, undertake the inspection of the Army or Navy.

Art. IV.—The Gensuifu shall retain a field or company officer as adjutant.

#### MR. SHIBUSAWA ON COUNT INOUYE.

Mr. Shibusawa has been giving his views on the political situation to a representative of the Bochi. He says the subject of financial adjustment seems to occupy the greatest amount of the present Ministry's attention, and as this administration is entirely different in personnel from the last it may be confidently expected that such "ignominious bungling" as was displayed by the late Cabinet will not be repeated. "Count Inouye," he added, "is decidedly opposed to the financial policy of his predecessors. He is regarded us the chief ms predecessors. He is regarded as the chief mover in the movement for the reduction of armament expenses. In all things, indeed, he advocates the principle of curtailment. He was hostile to the great expansion of business undertakings which took place after the Chiuese wer, and his was the loudest protest against the establishment of the Industrial Bank deviced by Viscount Watershape and Visited Aviendal was a supplied to the control of devised by Viscount Watanabe, ex-Minister of Finance. But though implacably opposed to the armament expansion scheme it is probable that in his present situation he will be unable to materially reduce the programme which has been laid down, and his principal aim will probably be to prolong the period during which that programme is m be carried out. He must of course expect to encounter serious opposition from military men and a certain number of Government officials; but he is not likely to acquiesce in the full and prompt carrying out of the expansion scheme in face of financial disorganisation and the embarrassment of the nation.'

At the auction sale of the Asburaham library in London, a fortnight ago, a new record was made in Caxtons, £2,100 for "The Book of Jason," 1447, which is £150 more than "King Arthur" fetched a few years ago. Twice during the present century this identical copy of "Jason" changed hands for less than £100.

#### LIBEL.

Mr. Maskelyne has been cast in his suit against the Manchester Guardian. It was, indeed, a most ill-advised recourse to litigation. The well known "magician" conceived, last year, the project of erecting a grand stand in St. Paul's churchyard for the accommodation of persons desiring to view the Jubilee Procession. The Manchester Guardian made fun of the enterprise in a mild way, saying, among other things, that "it was unfortunate that the architect should be Mr. Maskelyne, who had so often seriously deceived the public." It must be confessed that such jesting travels very close to the line of slander, and assumes, on the part of its butt, an unusually genial appreciation of hum-our. Of course Mr. Maskelyne has often "deceived the public." It is his metter to do so and nobody else has ever done it quite so well. Mr. Maskelyne, however, thought that a charge of serious deception, preferred in such a context, would be taken literally by the vast majority of readers, and in that supposition we can not but think that he was correct. He had, in fact, a plain right = call for an explanation, and the Manchester Guardian would have been perfectly ready to give one. But Mr. Maskelyne preforred to take the matter into Court, and pressed his suit, in the face of the great provincial journal's explicit assurance that no moral reflection of any kind had been intended. Naturally the jury decided in favour of the defendant, and the Lord Chief Justice made some useful comments on the abuses incidental to the operation of the present law of libel. Lord Russell's remarks are tolerably certain to commend themnelves to the common sense of the public, especially when they are read in connexion with two other suits tried before his lordship immedistely afterwards, in one of which the only ground of complaint was that a barrister had been accused of "shouting" in court. There is no doubt, of course, that the gentlemen of the Bar can generally dissuade their clients from the folly of bringing such suits but it wouth the folly of bringing such suits, but it must be confessed that although the law of libel may be unduly pliant in one respect, it is unjustly rigid in another. How often do we see flagrant abuses of the principle that the utterances of counsel in Court are privileged? A man who has given his testimony honestly and to the best of his ability, finds himself the object of attacks and insinuations against which he has no redress, It is not an attractive feature of our methods of litigation.

#### RAILWAY FARES IN JAPAN.

The Railway Council sat on Monday to consider the proposed increase in railway fares. Lient.-General Viscount Kawakami, President of the Council, was unable to attend on account of indisposition, and Mr. Kenjiro, Vice President, took the chair. The proposal to raise the fares to I sen I rin per mile was discussed at length and it was ultimately decided not to grant the increase for which the Nippon Tetsu-do Kaisha (Japan Railway Company) has applied. It was decided to grant licences for the construction of Buso Chuwo Railway and the extension of the Kansai Railway line,

#### A CORRECTION.

We were mistaken in saying that the first edition of Dr. Lönholm's translations of the Code covered only three sections, comprising three hundred and ninety-five articles. That is true of the revised (second) edition, so far as it has been carried, but the first extended to the whole 724 articles. The fact makes Dr. Lönholm's achievement all the more remarkable. He must have translated 724 articles in about 25 days, being at the rate of nearly 30 articles

Wrottesley Hall, in Shropshire, with its fine

#### INTERPORT RIVALRY.

The writer of "Stray Notes" in the Kobe Chronicle has the following appreciative remarks to make about Yokohama's modistes:

—I hear that the visit of the Yokohama amateura to Kobe has resulted in a great increase of the orders sent up to Yokohama dressmakers. Certainly the costumes worn by the ladies were entrancingly beautiful-dreams of loveliness that have not only haunted the Kobe ladies ever since, but have made a decided impression on even my insusceptible male heart. I don't know what Kobe husbands will say, but there is talk of a remonstrance being addressed to Yokohama on the matter, in which it is to be auggested that while interport contests in general not objected to, the line must be drawn at millinery competitions. But the dresses looked "real lovely" all the same, and there's no denying that the "contumiers" of the pieces deserve very great credit.

#### CHINESE ITEMS.

It is reported in Chinese official circles that H. E. Huang, titular Junior Guardian of the Heir Apparent, and Admiral of the Yangtze, recently offered to command in person the forces to be stationed at Woosung and other points at the mouth of the Yangtze river, and that the Viceroy Liu K'un-yi accepted the offer.

A Wuchang despatch appearing in Chinese papers reports that the Viceroy Chang Chin-tung has been empowered from Peking to raise a force of some 30,000 men, to be drilled by British officers. The personnel of the new corps British officers. The personnel of the new corps will be picked men from Kiangphen (Kiangsu), Ningpo (Chekiang), and Weihni (Honan).

The Chefoo correspondent of the Shanghai Mercury, under date January 7th, wrote:— Things do not seem very quiet here, for some of the disbanded soldiers from Kiao-chon Bay have started plundering in the surrounding country, and reports of their depredations, even within seven miles from here, have reached us. An old Chinese gentleman came into Chefoo a day or two ago. He had been shot in the head by one of a gang of disbanded soldiers, who endeavoured to sack his house,

Sports and Gossip has the following remarks in reference to the recent launch explosion at Soochow:—The explosion on the launch towing the "train" from Southow some few days ago, which killed those on board, is not to be wondered at. To expect that the machinery of a launch owned and run by Chinese should be kept in proper order is about as absurd as expecting the heroine of opera to go for the doctor when her lover is dangerously wounded instead of stopping to soothe his last moments with an elaborate vocal number. In all probability the sum total of the engineer's knowledge of steam had been acquired when he was second cook in a tea shop, in fact I suppose a Chinese-owned launch has to into until she "tnake spilum" in one way or another, and if the boiler "goes up" so do the unfortunate natives on board. Foreigners who take a tow should see that in the string of boats attached to the launch their own is not closer than say third or fourth. Distance lends enchantment when the boiler bursts.

The N.-C. Daily News publishes the following notes:—General Lin Yong-fu, the famous ex-Black-Flag, who it will be remembered was specially sent for by Viceroy 'I'an of the Two Kuang provinces, from the former's home at Ch'ingebou, on the borders of Annam and Kuangtung, will, it is reported command the Imperial troops in Hainan island. Some 3,000 Black-Flags have joined their old chief at Can-ton, where the General is at present occupied with daily secret confabulations with Viceroy year. T'an and Governor Han.

arrived on the frontiers of Kirin from the vicinity of the Russian Eastern outposts. There is much excitement amongst the high authorities of Kirin and Tsitsihar in consequence, and the Tartar General of the latter province has asked the permission of the Throne to raise 20,000 Tariars of Heilungchiang, the arms and amunition to be supplied from the Kirin and Moukden arsenals.

It is reported in native official circles that in view of the present unsettled state of the country in Chihii, Prince Kung has obtained the permission of the Throne to appoint General Tung Fu-neiang, the "Pacificator of Kansu" as he is called, to the chief command of a corps of observation in the vicinity of Tientsin. corps will consist of picked regiments from General Nieh's army m Lutai, H.E. Yuan Shih-k'ai's army at Hainochan, and the five regiments of horse and foot brought over by General Tung from Kansu.

Now that the Joint Anglo-Chinese Commis-sion is about in assemble at Bhamo for the demarcation of the Burma-China border it may be interesting, says the Pieneer, to refer to the Agreement signed at Peking on the 4th of February lest, under which the Convention of March 1894 was modified. The Agreement was duly ratified on the 5th of June, and as the work of demarcation had to be begun within a year from that date it was important that the = open " season of 1897-98 should be utilized in marking out the boundaries. The point on the extreme north from which the line is to be drawn is known to our surveyors m "the high conical peak." It is in latitude 25° 35' N. and longitude 96° 14'., and lies 50 miles E.N.E. from Myitkyina on the Upper Irrawaddy, to which the railway is now being extended from Mo-gaung. The nearest British post to it is Sadon. The general run of the frontier is indicated in the Agreement, but local investigation is required at various points where details have not been marked out in existing maps. Roughly, it may be said, the line follows a zigzag course to the junction of the Taping and Namkhan Rivers, east of Bhamo; then strikes off to the south-east until the Namwan stream is reached, the course of which is followed to its junction with the Shwell. At this point there is a small triangular bit of country which is rented on a perpetual lease from China, the object being to secure the best road from Bhamo to the Northorn Shan States. From the Shwell to the Salween at the Kunlon Ferry the border trends to the south-east. Under the Convention of 1894 the line was drawn much further to the south, and did not cross the Salween at all, but now the trans-Salween State of Kokang has become British territory. From the Kunlon Ferry to the Mekong, 20 miles south of Kenghung, the frontier agreed upon in 1804 remains unchanged, and its demarcation should not be difficult. Consular Agents are now to be posted at Molmein and Szemao, and their presence in those two commercial centres should stimulate trade with Burma. Mr. Hausser and Mr. Tratman, who have been appointed to these posts, are to be on the same footing megard correspondence and intercourse with Chinese officials as British Consuls at the Treaty ports.

Says the N.-C. Daily News :- We may mention that the Germans have decided to make Kiao chou Bay an open port for trade, as the regular treaty ports are.

At a meeting of Directors of the Shanghal Land Investment Co., Ld., it was decided to propose at the annual general meeting a final dividend for 1897 of 61 per cent, making 11 per cent, for the year.

The Peting and Tientsin Times of the 8th inst. says that a report is current that in order to replenish the Imperial Treasury, 30 per cent.

In its notice of the death of Mrs. Startseff. The local mandarius have received intelli- the P. & T. Times reminds us that her sister, library, has been completely burnt down. A gence from Manchuria to the effect that Ruswho had only been married a few days and had

friends, was, with her young husband, one of the victims of the massacre in 1870.

The Diamond Jubilee Fund at Tientsin is to be used in founding a hospital, the building for which is to cost Tis. 9.000. It was stated that Dr. Irwin had promised to present his medical equipment to the new institution; Mr. James Wilson promised to present a complete equip-ment for a ward for residents only; and the Rev. Mr. Norris mentioned that the British Admiralty would probably give some assistance to the project.

The N.- C. Daily News learns from the Echo de Chine that General Jamont, the new French Commander in chief, is well known in Tongkin, where he held the command of the Corps of Occupation in 1885. On his return to France he was appointed Commander of the 1st Corps d'Armée, and subsequently succeeded General Miribel in the command of the 6th Corps. In August, 1896, after 66 years of active service, he was retained on the active list, m having held a command-in-chief in the face of the enemy. General Saussier, having completed 70 years of service in the army, has been obliged to retire; but as General Jamont has served 67 years, he can only hold his present high position for three years. The Echo is responsible for these details.

Much amusement was created among the Rattler's men quartered at Tientsin, says the discovering seats thoughtfully provided by the local carpenter in the new sentry boxes. Chinese ideas evidently could not grasp the awful reality of "sentry go" duty without any sit-down pidgin, and Tom-atkins Jacktar, or whatever the professional cognomen of the marine may be, was immensely tickled on discovering that evidence of Celestial consideration in his new shelter. If the carpenter had only been consulted in the matter of measurements, he would probably have suggested, "Spose makee littee more long can makee lie down. More better."

A correspondent writes from Newchwang to a Manchester paper :- " Yesterday afternoon E. and I, went for a long tramp out on the plain, and most enjoyable it was. Once you get some way out there is a great charm in the immense extent of red-brown earth, with tiny pools, blue as sapphire here and there, and the line of distant hills clear cut in purest violet against the great dome of sky. And then the sweet wild whistle of the plover, such lovely little birds that swoop down to swim on the little blue pools, and the cry of great flocks of wild geese travelling over head in their regular triangular flight, one behind another, in as perfect order as troops marching, each keeping in his own place as they follow their own leader. One gets to love those strong lovely wild birds, each with such a distinct individuality that they seem like friends as they pass. And then, as darkness begins to come down, you suddenly hear a rush over-head, almost like a violent shower of rain, and it is a great flight of teal swishing along, hundreds together, in perfectly regular order, too, but more semicircular than the geese. These wild birds have become so much to me since I have been out here; they are certainly one of the chief charms of the country.

The incredulous Korean Repository says :-A party of Britons from Shanghai visited the northern province on a hunt and report having had a good time. They tried to make us be-lieve they got five tigers, but—we are something on tiger stories ourselves,

M. Grille, an engineer of the great French works, of the Société Eves Lille, is at present in Shanghai, and according to Le Echo de Chine, his firm has secured a concession for a railway between Soul and a place on the Chinese border,

The new N.Y.K. steamer Tamba Maru discharged - Shimonoseki five boilers and about 340 tons of accessories for the Government Iron

The Kyber Pass was reopened for caravan traffic in the last week of December, all the Afridis' positions then being in the hands of the British.

The serious recrudescence of the plague is again paralyzing business at Bombay. Bumbay Races have been cancelled in consequence of the plague. The Poona Race Course is also forsaken.

The charitable bequests in Great Britain for 1897 have topped the record, totalling £2,000,000 (\$10,000,000). Without the Wallace art collection bequeathed to the nation, seven bequests to charity aggregated £1,000,000.

The North-China Daily News is informed that no money has been paid and none is likely to be paid on account of the Belgian loan, and that the Viceroy Chih-tung is against any loan being made with Belgium now, and wishes to effect one with American capitalists.

The conclusion of the French racing season for 1897 finds M. Menier, of chocolate fame, at the top of the list of winners, with £36,000. The next is the Vicomte de Harcourt, with £17,000. Then comes Baron Schickler, with £15,200. Among the owners of French steeplechasers Mile. Marsy, the actress, leads with £14,000.

An echo of the terrible catastrophe which fell upon Paris last spring in the burning of the bazaar of the Rue Jean-Goujon, is heard in the announcement that the succession duties which have just become payable by the heirs of the victims have enriched the French Exchequer by no less a sum than 2,200,000 francs, or about £88,000 sterling.

Mr. W. H. Talbot, formerly a resident of Yo kohams, has been dined and wined at the Shanghai Club as a public farewell before his departure to Hongkong, where he intends opening a branch of the Equitable Life Assurance Society of New York.

Mr. D McNeill, Messrs, Dowdall, Hauson, and McNeill, of Shanghai, is relieving Mr. A. B. Walford. Mr. Walford is engaged upon an important case at Honolulu, says the Mercury, and expects to be absent from Japan for about two months. On his return Mr. McNeill will leave Yokohama for England, and he proposes to be absent from Shanghai in all about 12

The imaginative American special correspondent has been at it again. This time he sends his advices from Seattle, but the English press accepts them quite as guilelessly as it does a San Francisco yarn. He writes,—The news of the wealth of the Yukon Valley has excited interest in Japan similar to that which it has aroused elsewhere. It is asserted that there will be an exedus of fully ten thousand subjects of the Mikado to Alaska and the adjacent gold regions as soon un communication is reopened in spring.

At the British Consular Court on Tuesday morning before James Troup, Esq., Assistant Judge, William Peterson, Simon Yunalla, and Charles Esterman, seamen, of the steamer St. Ronald, were charged with being absent without leave. Capt. W. H. Clements, the Master, said the men went ashore here and got drunk, the same they did at every port. The last that was seen of them was on Sunday, and the chief officer reported this to witness on Monday morning. Esterman and Peterson were steady men; Yunalla had given a great deal of trouble. The prisoners stated that they had been given leave to go ashore; and had exceeded it. They were each fined two days' pay, and a dollar and a half costs.

Pope Leo XIII, has expressed his desire that the whole Roman Catholic world should cele-Foundry. She has 4,000 tons of cement, from brate the close of the nineteenth century with and general cargo for Kobe and Yokohama.

cordance with this idea to inaugurate a great spiritual retreat, a religious awakening or revival, to continue through the entire period of the year 1899.

A London paper comes to the conclusion that it is more dangerous to be innocent in the United States than to be a convicted murderer. There were, argues the paper, forty per cent, fewer legal executions in the United States last year than lynchings. Of the men lynched, a much larger proportion than one in fifty was innocent, while not one convicted murderer in fifty was executed.

The city of Florence contemplates the establishment of a unique library: a collection of all the books prohibited by the Roman Catholic Church. A beginning has already been made, for Count Pietro Guicciardini has gathered most of the works regarding the Reformation that have been placed on the index. There are over nine thousand of them. These books are in the care of the Protestant congregation in Florence, though they have been placed in the National Library.

French shipping is slowly but steadily declining. All the subsidies and premiums paid to shipowners and shipbuilders seem valueless in preventing this decline, which is as difficult to account for un the disappearance of the Dutch flag from the seas during the last century, and the extinction of the famous American sailers. In 1860 there were still 500 candidates for master's mates, in 1890 only 125. Fewer French ships pass through the Suez canal than German, Italian, and even Dutch. The Dutch shipping, in fact, shows renewed activity.

It is interesting to note, in connection with the rooth voyage of the Pacific Mail Co's steamer City of Peking, that her commanders have been City of Ferring, that her commanders have been S. Griffin, H. G. Morse, Z. Tanner, J. Manry, G. G. Borry, J. M. Caverly, W. B. Seabury, D. E. Friele, H. C. Dearborn, R. R. Seatle, William Ward, and for the last eleven voyages Captain J. T. Smith. The chief engineers have been George Douglas, T. Barratt, S. W. Hauxhurst (the present superintendent of the company). J. C. Fraser, Frank Gough, J. Lynch, J. Stevenson, R. Forsyth, and for the last seventy-nine voyages Chief Engineer William McClute.

The land is changing hands rapidly in Russis. Statistics of land sales show, says the Echo, that in a single year 5,646,000 acres were sold, and of this about 2,700,000 acres passed out of the possession of the nobles into that of peasants, either individuals or co-operative associations, and local communes. Some purchasers were of the merchant class. But the important point is that by this continuous process the nobles are becoming landless, and the class of great territorial lords will soon cease to exist. The Russian census of the present year shows that the population has risen to 129,000,000, and it is the millions who are growing yearly in importance, not the few as heretofore.

The American Bible Society last year spent \$192,292.32, and circulated 767,528 volumes, Of these, more than half, 405,000 volumes, were distributed in China; 50,000 in Japan; 57,000 in the Levant; 60,000 in South America; 33,000 in Mexico and Central America; 32,000 in Siam and Laos; 40,000 in Russia; 20,000 in France; 12,000 in Spain and Austria; 10,000 in India, and smaller numbers in Africa, Micronesia, Arabia, and Korea. In accomplishing this work the agents and correspondents of the society employed 382 men, each working on an average more than eight months. The society issued an appeal to pasters and others, that in the special meetings for prayer held early in January, due emphasis should be laid upon the importance of "extending the circulation of the Word of God among all nations during the closing years of the nineteenth century, and especially in those parts of the world where the Bible is an unknown book."

Early marriages are a distinctive feature of thanksgiving and prayer. It is proposed in ac- Hungarian ing naccogning to the last census

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

exactly two-thirds of the people over sixteen years of age were married. Second marriages are also very numerous. The proportion of marriages per 1,000 persons over fifteen years old, from 1888 to 1893, is reckoned at 78, a very high figure indeed; and 40 per cent. of the brides are under twenty years of age. It is noticed that in this agricultural land the number of marriages stands in intimate connection with the abundance or otherwise of the crops. The actual birth-rate is very high as compared with Western Europe, and during a long period there has been an annual average of forty-four children born alive to every 1,000 inhabitants. The greatest number is found among the Ruthenians and Serba, who are poor and live a simple life; and in the country rather than in towns, At every period of life the mortality is greater than in Western Europe, and is especially high in the period of childhood.

A telegram appearing in the Hongkong Dails Press gives a little further information regarding the action taken by the Straits Settlements to establish a gold standard. telegram runs:—At a meeting of the Singa-pore Chamber of Commerce held to-day it was resolved that a two shilling gold dollar was desirable in the Straits. It was further resolved that the Government be requested to take the necessary steps to give effect to the resolution. An amendment asking for further enquiry to be made was defeated by seventeen votes to fourteen.

The appointment of General Kuronatkin to the Russian Ministry of War, in succession to General Vannovski, is very unexpected, says the N.-C. Daily News, as he is one of the youngest Generals eligible for the position. He is, however, a very able soldier, who has seen a great deal of war in all parts of the world. He was Chief of Staff to General Skobeleff in the last Russo-Turkish War, was with General Skobeleff in Central Asia, and in now Governor-General of Central Asia. The appointment will give great satisfaction to the younger generation of military men in Russis.

Mr. T. W. Hellyer, in the course of an essay read before the Kobe Social Circle on Friday evening, called attention to the evils of our present industrial system, and sympathised with the revolt of the people against the despotism of the capitalist. The time was approaching, he said, when most of the people would recognise that their rights and liberties were menaced by the every-growing capitalist monopolies. Mr. Hellyer announced himself, says the Chronicle, to be a Socialist, meaning by Socialism a gradual reconstruction of society with a view to secure a more equitable distribu-tion of property and labour, which he further said was the logical outcome of the teachings of

F.A.G., the cheery, optimistic gossiper of the Kobe Chronicle, in the course of some remarks on the recent highly appreciated visit of the Yokohama Amateurs to Kobe says :-"One from the north "expresses surprise that anybody should have had need to ask who were the gents with clean-shaven faces walking about Kobe last week. "Did they not walk in the middle of the road?" asked the man who knew them, cynically twirling one end of his elegant moustache; and before I could answer he fired another query, "Did you ever know a Yokohama man who walked on the pavement?" Come to think of it, I can't say that I ever did. (The reason is very simple, we have no pave-ments to walk on in Yokohama).

The Kobe Chronicle regrets to record the andden death on Sunday of Mr. W. Döbbeling of the firm of Messrs. Faber & Voight. Mr. Dobbeling was at the German Club on Saturday evening and apparently in the enjoyment of his usual health. He died at 6 o'clock next morning, almost without any premonitory intimations. Mr. He hoped he should not be misunderstood if him of immorality, and urged his subordinates to be put himself down as a scalliwag. As a boy pear, had been suffering for some years from repeated attacks of the smaller but no immorate but no i almost without any premonitory intimations. Mr.

children and a wife, for whom the deepest sympathy will be felt in the terrible blow which has fallen with such shocking auddenness. Mr. Döbbeling first came out to Japan thirteen or fourteen years ago, and joined the office of Messrs. Paul Heineman & Co. (now Messrs. Otto Reimers & Co.). He returned home after a residence in Japan of four or five years, and, after staying awhile in Germany, returned to Japan and joined the firm of Messrs. Faber & Yoigt, where he has since remained. Mr. Döbbeling was of a quiet and retiring disposiion, but he had many friends in Kobe who knew the genuine character underlying the un-assuming exterior, and who will deeply feel the

The question of foreign competition as affecting the United Kingdom was dwelt upon by Sir J. Wolfe Barry, the president of the Institution of Civil Engineers, in distributing the prizes at a London trades training school recently. He said that instead of the rails for many of the Indian railways being supplied from Great Britain, as they had previously been ever since railways were constructed, they were now coming from America. In spite of the enormous distance these rails were carried, they were being delivered in India at lower prices than British manufacturers could touch. Again. he knew perfectly well that in London an enormous amount of machinery was now being brought from America at lower prices than English manufacturers could quote. Locomotives, which also used III be supplied by Great Britain, not only for India but for the colonies and foreign countries, were likewise being sent out from Continental workshops. Touching on the disputes between capital and labor, he argued for a more accurate view of the former. which, he said, was too often regarded as consisting of money alone, whereas it represented the power of direction and the ability to study the markets of the world and to know what could be sold and what could not.

We learn from Shanghai exchanges that an attempt all suicide was made on the afternoon of the 18th instant by Mr. A. T. Woodward of Shanghai, who recently was connected with some legal proceedings in the U.S. Consular Court in Shanghai. Mr. Woodward is reported to have gone home that day as usual about noon and went to his room. Just as the other inmates of the house were sitting down to tiffin they were startled by hearing three shots fired in quick succession in Mr. Woodward's room. A gentleman living in the house at once rushed up to the room and found that Mr. Woodward had shot himself in the left breast, with a small revolver, which was lying on the floor. Medical assistance was summoned at once and it was found that fortunately the man had not succeeded in injuring himself much, as, although two bullets had taken effect in the region of the heart, they had been deflected by the ribs and had passed round outside to the back. The third shot missed its intended mark and passed through the back of the chair in which Mr. Woodward was sitting. He was removed to the General Hospital and was progressing favourably m last advices.

The Saturday Review speaking of an address delivered during the recent York election by Lord Charles Beresford, said that it was a most characteristic and most excellent speech, the like of which could scarcely be heard outside Britain, full as it was of practical wisdom and rollicking good humour. We have all wondered whether a volunteer army ar an army founded on a modified conscilption would give the best results. Lord Charles Beresford declared in favour of the volunteer force, and adduced from personal experience some new arguments in favour of it. He said "the best fighting men in the world were those who went into the army for love of fighting, the scalliwage of society. He hoped he should not be misunderstood if he put himself down as a scalliwag. As a boy

danger was apprehended. He leaves two young the life of the Navy or Army to any occupation at the desk. Those were the people who made good soldiers and sailors." We shrewdly suspect that Lord Charles Beresford is right; and his personal method of enforcing the argument is apt to win all sympathics. thing it is after all to possess a temperament and a personality! We note top that Lord Charles will "strenuously resist additional ex-penditure on the army till the public is sure of getting value for its money.

> The Maoris of New Zealand seem to be doomed to extinction in spite of the fact that all the conditions surrounding them appear to be favourable to their survival. The quarrel between the races is ended, and large tracts of land are reserved for them. Their young men are educated, ninety per cent. of them being able to read and write. Their chiefs in many cases derive large incomes from rents of land and are represented in the Legislature. A great Maori college stands at Te Auti, Hawke's Bay, and not a few of the cleverer Maori youths have passed through the classes of the New Zealand univer-sity. And yet, says the Australusian Review of Reviews, "the Maoris, under that mysterious law which makes a colored race vanish before the breath of the all-conquering white, are passing away." A conference of educated Macris was held a short time ago, and papers were read on the condition and prospects of the race. These are now published in pamphlet form, and make a very melancholy bit of literature. It is declared that ninety per cent, of educated Maoris go back from their schools to there savagery. The race, these representative Maoris declare, is lower both in morals and in vitality than it has ever yet been, and threatens to perish. Yet physically and intellectually the Maori is or was the finest coloured race in the southern hemisphere.

#### NEWS FROM THE SOUTH.

H.M.S. Porpose sailed from Portsmouth for Sydney, to relieve the Pylades, on the 19th Dec.

The Portuguese gunboat Liberal, which is en route to Macao to relieve the Bengo, arrived at Columbo on the 13th January,

Mr. Hamilton King, of the State of Michigan, has been appointed U.S. Minister at Bangkok in succession to Mr. Barrett. Mr. King will arrive at Bangkok about the 1st of March.

The steamer Charterhouse, formerly the Stentor, left Singapore on the 3rd inst. for Kudat direct with a large supply of rifles, ammunition, shells, &c., for the British North Borneo Government.

The latest news from North Borneo, says the Daily Press, is that Mat Salleh has been shot in one of his legs and, like the man who would be king in one of Kipling's stories, has consequently lost faith with the natives. The information that Mat Salleh had been wounded and was looked upon as a mere man and not a God was conveyed in a latest section that was gentleman living in Hang. letter received by a gentleman living in Hong-kong. Inquiries on the steamer Descalion failed to satisfactorily confirm the news, although the people on board had heard the interesting mour. We hope it is true.

It is, the China Mail hopes, another sign of the in the China man hopes, another sign of the improved condition of things in the Colony, that the entries for the next Hongkong Jockey Club Race-Meeting are nearly double in money value what they were last year. The amount is, this year, \$6,275.

It is reported that the Kowloon Land and Build-It is reported that the redwood Land and authoring Co. will pay a dividend of \$r per shade for the past year, as against 80 cents, in the previous year; the Hongkong Land Investment \$2 (the same as in the previous year), and the West Point Company \$14, as against 90 cents in 1896.

A case which has been tried at Sioux City, Idaho, shews that it is not safe for a preacher to point to living and authentic "awful examples." Henry Woolsey quartefled with the local branch of the Salvation Army and removed his name from the rolls. The "Captain" afterwards accused

#### CORRESPONDENCE.

#### FOREIGN INVESTMENTS IN JAPANESE SECURITIES.

TO THE EDITOR OF THE " JAPAN MAIL." SIR,-You have, on several occasions, called attention to the material difference in value between

securities which mature at a fixed date and those which are subject to annual withdrawal at the option of the Government or of the companies which issue them, but it does not appear that the Japanese yet realize the extent of that difference, or give sufficient heed to the reasons therefor. A comparison of the prices of annually redeemable bonds, in Western countries, with those of bonds which expire at a specified period, will show at once how great a disadvantage attaches to the former class. I have before me two mortgage bonds of a prominent railway company in the United States, one of which, maturing at a definite date, was quoted not long ago at 25 per cent, premium; while the other, bearing the same interest, but liable to the chances of sudden redemption, sold at only 5 per cent, premium, although the full term of the latter, if not called in, would be ten years longer than that of the former. The objections of European and American investors to abrupt and unforeseen disturbances of their capital are very strong, even when they have every facility for collecting their money promptly and placing it elsewhere; and it is natural that they should look with still greater disfavour upon bonds which are issued in a remote country like Japan, and are, apparently, so deficient in many important safeguards as those which have lately made their appearance here. Apart from the ques tion of optional redemption, there are several features of the securities now purchasable by aliens which must necessarily be unsatisfactory to Western capitalists, and which seem calculated to impair confidence, -not in the integrity of the parties issuing them, but in the propriety and regularity of their business methods. Inasmuch as it is reported that numbers of Japanese corporations are preparing for the admission of foreign shareholders, it may be well to compare the forms of bonds used here at present with those of other localities, and m indicate in what particulars the Japanese documents are seriously defective,

I take as fair samples of the best American bonds that are subject to annual withdrawal, those of the Cecilia Branch of the Louisville and Nashville Railroad. The conditions of the loan upon which investors especially require information are fully and clearly set forth on the face of each bond, to the following effect:-(1) The value of the bond is stated. (2) The exact date of final payment is given. (3) The rate of interest is named, together with the exact dates on which the interest will be semi-annually paid. (4) The total amount of the loan is amounced, and the mortgage security minutely described. (5) The provisions for amount redemption are explicitly set forth, and sufficient details are given to enable investors to calculate approximately the sum to be called in every year; the precise date of each withdrawal is designated, and it is expressly stipuwithdrawal is designated, and it is expressly stipulated that the railway company shall advertise in newspapers at least once a week, during the three months immediately preceding each withdrawal, the automato be called in, and the numbers of the bonds which have been chosen by lot to be redesired. redeemed.

Appended to the bond are conpons extending the entire term of the loan,

Digitized by Google

being stated only that the loans will be wholly being stated only that the loans will be wholly redeemed within a certain number of years, is mention this because there are discumstances which indicate that the loans may perhaps be edeemed much earlier than the limit thus vaguely suggested. (3) The rate of interest is designated, but the exact dates on which interest will be paid is not fixed. One security says it shall be paid "during," the other "in," the sixth and twelith months of each year, instead of on the first days of those months. I do not pretend to say what the intentions of the authorities may be, but this prevision allows them the privilege of deterring payment twenty-nine or thirty days after it ought to be forthcoming, if such is their desire. (4) The total amount of the loan does not appear in either set of bonds, not is any guarantee of security deset of bonds, not is any guarantee of security de-clared. When bonds are issued by the governclared. When bonds are issued by the govern-ment of a nation, it may be that no quanantee is exacted; but I believe it is commonly set forth in the case of a municipal loan. (5) The arrangements for annual redemption are very imperfectly described, affording no basis for estimating the amount to be periodically retired, and giving no Instead of a pledge that the bonds called in shall Instead of a pledge that the bonds called in shall be paid for on a specified date and that the numbers drawn by lot shall be publicly advertised once a week for a period of three months preceding the liquidation, nothing more definite is announced than that, in the case of the Tukyo City Loan, the principal will be redecuted by means of annual drawings; and in the case of the War Loan, that "drawing shall take place at the Nippon Ginko, orawing shall take place at the Nippon Ginko, and after the drawing, the marks, animbers, denominations and amount of the bonds so drawn shall be advertised in the Official Gazelis or newspapers." No time is assigned in either case, and investors are expected to be satisfied with intelligence so restricted and indefinite as to afford them no means of insuring themselves against possible actions losses. I shall presently show, indeed, that the practice thus far followed has been not only to render these losses possible, but to make them to a considerable extent certain and inevitable.

With regard to the coupons, examination shows that while the full number is appended to the Tokyo City bonds, there is a great deficiency in those of the War Loan. Each of these fatter bonds should carry with it one hundred and ten coupons, begining with December, 1895, and ending with June 1950,—a term of fitty five years. It carries, in 1950,—a term of fity five-years. It carries, in fact, only forty coupons, extending to June, 1915, and leaving thirty-five years unprovided for. Whether this signifies, or not, that the Government contemplates the possibility of cancelling the either loan within twenty years instead of fifty-five, as ostensibly announced, is a question for financiers to consider. It no such idea is entertained, and if any of the bonds continue to be held in distant countries after 1015, the missing conin distant countries after 1915, the missing con-pons can hardly be made good without great in-convenience to all concerned.

So much for the unsatisfactory characteristics of the Japanese bonds, and their failure to meet requirements which foreigners are not accustomed to disregard. I have now to speak of the manner in which the business of redemption is conducted here,—by a process so loose and careless as to make investment actually nosafe, in some respects. The time for calling in War Loan bonds has not yet arrived, and I confine myself to the practice adapted with the Tokyo City Loan.

practice adopted with the Tokyo City Loan.
I have alluded to the absence of all information, in the wording of the bonds, with regard to the precise dates of calling in. The only reference to the subject is in this sentence:—"The principal of the said public loan will be wholly redeemed within thirty-three years from the twenty-ninth year of Heiji, by means of drawings." No intimation as to when or where the drawings will take place on how the bondaliders may learn at take place, or how the bond-holders may learn of them, is anywhere conveyed. Being interested to the extent of simall investment, and observing, to the extent of similar investment, and observing, first, that the twenty-ninth year of Meiji (1896) was mentioned, and, next, that the compous covered a period of thirty-those years from the twenty-ninth, including that year, I concluded that the drawings would begin in 1896, and endeavoured in make sure of the matter by inquiring at the bank which is understood to have these particular over the entire term of the loan.

On the Japanese side, I take the two bonds most familiar to foreigners,—those of the War Loan and the Tokyo City Loan. On the fage of these a brief and extremely meagre explanatory statement appears in Japanese. On the reverse a statement in English is given, which, though considerably fuller than that in the native tongue, affords very little of the information which a purchaser would naturally expect. Comparing the terms with those cited above, I find these results.

(1) The value of the bond—that is to say, the indebtedness which it represents, is declared. (2) The exact date of final payment is not named, its after I had endeavoured to ascertain the facts. As a purchaser would not provide the control of the

consequence, the principal of the seven bonds had lain idle for more than half a year. I do not blame anybody for that lapse. An advertisement may have been published, and might have been found, by diligent search, though I could not hear of R. I relate the circumstance as showing how little pains were taken, in 1896, to enable investors to protect themselves from loss. If the bank clerks most nearly concerned remained in ignorance of what had been done for half a year or more, there was fittle likelihood that the general public could be enlightened.

Determined to exercise greater caution in 1897. I caused frequent inquiries to be made at the bank a caused irrequent inquiries to be made active using in question, without arriving at any result until the month of December was well advanced. By this time, the employes were pretty thoroughly convinced there would be no redemption that year, at the post the property of the producers of the pr time, the employes were pretty thoroughly convinced there would be no redemption that year, at any rate, but with the most cheerful readiness to oblige, they continued the search, and were rewarded, about the 17th of December, by the discovery of an announcement in the Official Gazette, giving a list of bonds just called in. I then found that exactly the same amount of my investment had been withdrawn as in the preceding year. If I had not persevered against what seemed a more trustworthy judgment than my own, I should again have suffered a considerable loss. But that is a point of no public importance. What I do consider important is the extraordinary fact that the official notification was made more than half a month after it should have been, so that the sacrifice of that amount of interest was positively forced upon the holders of the cancelled bonds. Their income ceased with the 1st of December, and they were not allowed to know it until after the 15th. To small investors, such a deprivation might be a severe hardship; yet they would have no redress. It is not probable that large investors would patiently submit to such a proceeding. It would be interesting to watch the consequences, if the potent foreign purchasers of the forty millioum wouth of War Loan bonds should ever find themselves damaged by similar negligence.

There is yet one more feature of the redemp-

chasers of the forty millions worth of war Loan bonds should ever find themselves damaged by similar negligence.

There is yet one more feature of the redemption business that demands notice. That all bonds should be withdrawn by lot, and in no other way, is a proposition so self-evident as to forbid discussion. Only by leaving the selections to chance can anything like justice or fainess be maintained. In the natural order of things, the first purchases of bonds are made in blocks; but the idea of retiring them in blocks is contrary to all established usage. Are the honds of the Tokyo City Loan drawn by lot? My own experience,—and of course I have nothing else to go by—leads me to apprehend the contrary. Of the seven belonging to me which were redeemed in 1896, five bore consecutive numbers. Of those called in last year three bare consecutive numbers. Is such a thing possible, except on the supposition that the selections were arbitrary, and that chance had nothing to do with them? When a person buys redeemable bonds, he accepts the risk of losing a reasonable proportion of them answerter that to be demanded a continuous series. a person only redecting to the proportion of them am-risk of losing a reasonable proportion of them am-mally; but to be deprived of a continuous series, all in a lump, is what no investor bargains for, or considers fan treatment.

It is, I trust, unnecessary to say that this letter is written without the slightest intention of discrediting the soundness of Japanese securities or attriing the solutioness of Japanese sectiones of arth-haring any unworthy motive to those who control them. Nothing could be farther from my thoughts. But it seems probable that in issuing bonds for the first time on a large scale, the necessity of following judicious examples has been overlooked, and ing judicious examples has been oversooked, and the pains have not been taken to observe the precautions which would command confidence and respect. As the Mail has pointed out, foreigners will not, as a tule, take kindly to redeemable bonds; but even it tempted by high interest to invest in such, they certainly will not purchase unless properly advised as to what they are doing, and provided with incontestable guarantees against the seems which are inflicted upon the present helders losses which are inflicted upon the present holders of securities. If the Japanese wish to attract capital by floating boars abroad, they must conform to the practice of western countries, not only making their bonds intelligible and thoroughly explanatory, so that every reader may clearly understand their purpose and value. but in conducting every desired the business with such tigorous exactions. rail of the business with such rigorous exactitude and fidelity that no shadow of distrustful criticism can ever fall upon it.

A LEARNER BY EXPERIENCE. Yokohama, Jan. 19th, 1898.

• I ought, perhaps, to add that the War Loan Bonda mention that "for other particulars the Cosmolidated Public Loan Re-gulations promigated in 7356 may be referred to," This, how-ever, is not what is needed. The bonds should tell their own story, and certify to their t ue character. The Tokyo City bonds contain no suggestion — to other

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

#### THE DEBATE

TO THE EDITOR OF THE " lapan Mail."

Sir,—It was my privilege to hear the dehate between Mr. Takahashi, Editor of the Japan Times, and Mr. Snudgrass, Editor of the Shepherd's Voice, as to whether Christianity is a "glust of superstition." The debate extended through three

superstition." The debate extended through three sessions, the first two ressions occupying the aftermoon and evening of the 17th, and the last the evening of the 19th of January.

It is hardly necessary that a review of the arguments be made here, because they will probably appear in the two papers above mentioned, a fittle later. I limit myself, therefore, to some general impressions concerning the debate.

It certainly is a remarkable thing that a debate any kind should be held in a foreign tongue before a Japanese audience. Unless it be India, I supones there is no other country where such a

suppose there is no other country where such a debate would be understood.

But it was also remarkable that so many, especially of the mimerous student class, should artend this debate in English, and by showing an appreciawere generally understood. At the first ression the large half of the Imperial Educational Society was full, perhaps not less than seven hundred being present.

It was also remarkable that this large audience was a model of attention and good order. The writer has never witnessed a better behaved audience writer has the expected that something of the Yamato damashii would crop out, but there was none of it. Mr. Takahashii was tepenedly applanded, but so was Mr. Sundgrass. It is moverbial that when people argue politics

and religion they are won't to get mad. This de-bate was remarkable that from its beginning to its end the two speakers were entirely counteous and neither of them at any time showed a trace of

But as to the general merits of the debate the writer thinks it remarkable that Mr. Takahashi writer thinks it remains agree that the Lakanasan at no time made any attack on what Christians hold fundamental. The existence of God, the divinity of Christ, the reality of the resurrection, doctrines of the utunost impurtance, were neither directly nor indirectly attacked. This weakness in the affirmative Mr. Sundgrass clearly pointed out. One time Mr. Takahashi seemed to refer to Ree-masonry, mentioning the square and compass es-pecially as objects of reverence, thus confusing Freemasonry with Christianity.

Mr. Takahashi's definition of a Church as an

Mr. Takahashi's definition of a Clurch as an organization whose purpose in to hive an elequent preacher, fine singers and other appurtenances for the purpose of drawing acrowd, the purpose of the crowd being to make gifts to the Clurch, will drubtless cause some to wonder whether Mr. Takahashi modestands the genius of Christianity. The great purpose of the Church as an organization for teaching the truths which Christ taught as a means of producing faith and repentance and forgiveness of sin and a tody life—this ought to have exceived some attention. But really, in the writer's opinion, there is no solid foundation for instidelity to rest mr, and perhaps Mr. Takahashi did as well for that side as it is possible to do. The debate doubtless might have been better on both sides. But as it was, it was nevertheless a great sides. But as it was, it was nevertheless a great

Yours truly, A. D. WOODWORTH. January 25th, 1898.

#### THE GRAND HOTEL, LIMITED.

The 17th semisannual ordinary general meeting of the Yokohama Grand Hotel Company was held on Monday afternoon at the hotel. The Chairman of the Board of Directors (Mr. J. F. Lowder) preor the Board of Directors (Mr. J. F. Lowder) presided, and there were also present Dr. C. H. H. Hall, Mr. R. Hewie, Mr. B. C. Howard, Mr. C. K. M. Martin, Paymaster McDonald, Captain Swain, Mr. James Walter, and Mr. J. Tornee (Secretary).

The report and statement of accounts were as

Vokohama, Occember 31st, 1893.
JAMES WALTER
G. K.-M. MARYER
Directors.

I have examined the foregoing accounts and compared them with the vouchers of the Company and certify them to be correct. O. Kms. Auditor. Yokohama, Jasuary zeth, 1898.

In commenting on the report the Chairman said the Company had now entered on the ninth year of its existence, and the return of Mr. McDanald, whom they were all glad to welcome back to Yokohama, reminded him (the Chairman) of the Yokahama, reminded him (the Chairman) of the first conception of the Company. Three gentlemen—Mr. J. R. Morse, Mr. McDonald, and himself—nearly nine years ago had the temerity to express a very confident opinion that the Grand Hotel as it then stood was worth an investment of a quarter of a million dollars, and that the whole of that money could be raised in Yokohama. The suggestion was met with derivino; and mi ignominour failure was predicted for any scheme which aimed at placing the holel on its present hasis. Well, despite all this it did not fail—(Hear, hem.). Within twenty-four hours the whole of the capital was subscribed; the shares went up to a premium, and they had remained at a premium ever since. Every one who ventured too dollars received more than 120 in dividends, and his 100 dollars share was now worth 200 to 250 too dollars received more than 120 in dividends, and his 100 dollars share was now worth 200 to 250 dollar. He thought that was a fair record for less than nine years of life. And he thought, also, that the figures before them told another tale. He thought they showed that the company was still successfully satisfying the requirements of its guests. The hotel was too well known all yen 23,353.29 its guests.

over the world to need adverrisement. Like good over the world in need advertisement. Like good wine it needed no bush. But he might recommend, perhaps with a little verbal alteration, for any establishment that did require a sign, an inscription of which a lady told him the other day and which was, he believed, displayed over an hotel at Tokyo. It read: "We wash our customers in the latest and most approved style. Ladies three dullars soo; gentlemen 2\frac{3}{2} dollars."—(Laughter). Mr. Howis formally moved the adoption of the report and balance-sheet.

Mr. McDonald seconded, and the proposition

was carried.
The meeting then terminated, the directors alterwards holding a private sitting.

#### FOOTBALL.

#### YOKOHAMA V. "OLYMPIA,"

A match was played on Wednesday afternoon between Yokohama and a team representing the U.S. Flagship Olympia. A strong wind was blowing from the north end, and Yokohama, losing the ing from the north end, and Yokohama, losing the toes, had to play the first half in the teeth of the breeze. Consequently most of the time they were compelled to act on the defensive, though half way through Edwards made a capital shot for goal, and the point was only saved by O'Malley's smart play. Just before the close the Bluejackets forward got possession, and Hellings scared. On the restroption Kilby, senior, who had been in goal, was transferred to the forward line, and there he did some very useful work. The home team with the wind in their favour were not long in equalising. Edwards doing the needful. Soon after Drummond again scored, and Edwards just afterwards sent the ball through from a near pass by A. M. Wart, The visitus were near scoring, but Kilby just ago at goal struck the cross bar, and rehounded to Edwards, who sent is through. The whistle blew with the score: with the score :-

Yokohama... 4 goals [ " Olympia " ... I goal

Teans: —Yokohama; Kilby jon, god; Forcest and Pearson, half-backs; Hayward, Scott and Clarke, half-backs; Watt, Dommond, Edwards, Kulm, and Kilby seo. forwards.

"Olympia": O'Malley goal; Reynolds and Martin backs; O'Neil, Sweeney, and Forcew, half backs; Domn, Blanchard, Hellings, Hunter, and Mitchell forwards.

#### GERMAN NOTES.

"The beggars of Beilin," says the Post, "threaten to strike, unless they get better pay hereafter."-Now is this a joke?

The decisive action of the German Government in Hayti and China, has met with general approval throughout the German nation,

The Catholic, or Central party, seem rather per plexed as to what course to take with regard to the proposed increase of the German navy. Herethe proposed increase of the German navy. Heretofore they strenuously upposed, in the Reichstag,
the Government's proposition, and plainly intimated, that they could never agree to a material increase of the German navy. The powerful
protection, however, which the Government has
accorded their mission in China, has created a
strong reactionary sentiment, particularly among
German Catholics, and their party in the Reich
stag can scarcely do otherwise now than vote for
the proposed increase. the proposed increase.

Herr Emanuel Lasker, the noted Chess player, eccutly matriculated at the Berlin University. It in said that he entered with the object of passing a thorough course in mathematics, and attaining a doctor's degree. Herr Lasker was a student at the University some years ago.

The Berlin Echo says :-- The Germans in Manila are not only auxiously awaiting the arrival of their new Consul, Dr. Krüger, but also desire to see a German man-of-war for the protection of their interests in view of the distrobed condition of things.

Considerable interest is manifested in Germany with regard to the present conflict between Germans and Czechs in Austria. It goes without saying, that the sympathies of the Germans is with their German brethren in the neighbouring empire. On the whole they have remained calm enough, so far, but recent events in Austria tend to make them Pan-Germanistic and the movement can scarcely be streeted. It must be acknowledged, however, that the German Government does not encourage the sympathies of its recoile for the Austra-Garman. people for the Austro-Germans.

The Hamburger Korrespondent, in an article on

the Dreyfus case, takes occasion to point to the marked difference in the attitude of the great majority of the French toward Dreyins, on the one hand, and that of the Alsatians on the other. True, Dreyins hails from Alsace, but as he is of Jewish extraction the Alsatians have no personal interest in the man, and yet they clamour for a new trial, while the French, as a whole, stoutly oppose it. The French are first of all concerned about the it. The French are first of all concerned about the glory of the nation and the army; nothing must be done which might in any way reflect on either. The Alsatians on the other hand, insist that justice should be done to every man, and that no innocent being should suffer. This incharacteristic of the two peoples. "A few days ago," says the Korrespondent, "the whole Parisian press was up in a rms because the ex Italian Premier said, "The inhabitants of Alsace are Germans." Who in the world dare say such a thing? Have not the Alsatians in a thousand ways demonstrated that they are French? To-day the same press is singing a very different song. The Dreylus affain has caused a marveilous change of sentiment. It has caused a marvellous change of sentiment. It is clear that the French and the Abatians are neither of one heart nor one mind. It has always been so, notwithstanding pretensions to the con-trary. For a time, the people of Alsace sympabeen so, notwinstanding preferences to the con-trary. For a time, the people of Alsace sympa-thised with France, politically, but in Germany it is well known that the whole middle class, the wealthy included, were learning toward Germany. The mass of the people evince no particular inter-est in France. The pur-French Alsatians of 1871 sold their property and immigrated. The ties of relationship among this class were not very strong and thus intercourse between them and those left behind was of comparatively short duration. Meanwhile the people of Alsace have awakened to the fact that they are part and parcel of the good old German stock, and again begin to feel themselves one with the German sation. In places like Thann, Metzeral, Colmar, Münster, and other towns, formerly supposed to be the hot-beds of so-called "protesters," there are now thriving German societies, military unions, &c., to which many native soms of Alsace belong and in which they take an active part. As for those that have many native sons of Alsace belong and in which they take an active part. As for those that have gone over to France, it matters little how much they pretend to be French, unmerous incidents, and the Dieglus affair in particular, have demonstrated that they are not French at heart. Only the glory wound around the lost provinces, twenty-six years ago, had for a time screened the indelible race differences of the two peoples."

#### JAPAN SINCE THE WAR.

#### THE TREATY-PORT RESIDENT.

In writing for readers in Britain, it is difficult to In writing for readers in Britain, it is difficult to convey a just impression of a Treaty-port community in Japan. The subject has been deal with often before: sometimes the mode of life has been idealised, and semetimes roundly abused. It is all very well to say that the foreign community in Japan, for instance, consists of some many Britain, so many Britain, so many Germany, &c. That is true enough, but it fails to convey the right impression of the community in life and the property of the semental property of the semental property of the semental property of the convey a just impression of a Treaty-port com-

tween Japan and other countries. The great dif-ference between the British in the Treaty-port and the British at home is that the mind of the former is to a great extent narrowed by continually living among a small knot of people knowing all about each other's affairs, and especially all about each other's failings. Speaking generally, the Treaty-port resident is a man who has passed most of his life in Japan at all events, without a real struggle, for one can live well on a small sum, and one can be quite poor in comparative comfort. The great defect in Treaty-port society, from the point of view of the stranger, is the want of men of the world. There are plenty of good men, kind men, educated men, intelligent men, but there are few who have open minds.

who have open minds.

The foreigner living in Japan proper is an entirely different stamp of person from his compatibit in the Treaty-poit. He is broader in his views, and in himself, though not in his surround. views, and in linesel, though the first war country. I have often wondered how, if an earthquake or tidal wave were to swallow up Yokohama, and the Japanese Government were to send a request to British to replace the British residents destroyed in the catastrophe by a selection of new people destined after a time to develop into a community destined after a time to develop into a community as nearly as possible like the previous one, such a list should be made up. A man who has had a great opportunity of judging gave me the following pro formal specification of requirements:—Menof a certain social and financial standing, 3 per cent.; younger sous of rather good people, 5 per cent.; middle-class men. 25 per cent.; lower middle-class men. 55 per cent.; hangers-on and discontinuous men. 25 per cent.; and faller in punchases men. dle-class men, 55 per cent.; hangers-on and disceptiable men, 12 per cent.; and ladies in proportion 10, and to accord with, the above classes. The relative social standing of the people when they leave this country for Japan, however, is an uncertain criterion as to their eventual positions in Treaty-port circles. For, as in British Colonies, you often run across men who are or have been gentlemen occupying humble situations, and wealthy squarters and politicians who can barely nut pen to paper; so you find that many of the most influential and rich of the Treaty-port residents are quite uneducated or self-educated men, dems are quite uneducated or self-educated men and vice versa.

but that is practically exhausted now. I have also but that is practically exhausted now. I have also seen fishing-tods in some people's houses. He can debate, and recite, and lecture, and sing, according to his fancy; and he can keep a servant, a deg, a bicycle, and a piano. He can join a few friends in a charmingly-situated house, and live extremely well. And should be by any chance interlard a little serious business with all this, and if he knows his work and does not drink to excess, there is no reason why he should not eventually make a remunerative position for himself. tually make a remunerative position for himself.

tually make a remunerative position for himself.

Of course, there is nothing of Japan in this description, but there is practically nothing of Japan to be found in the Treaty-ports or in Treaty-port life. The foreigner has done away with it, and in effecting this I do not suggest that he has made a bad place of it—from his point of view. But it is not Japan, for even those of the Japanese who live in the Treaty-ports have so changed their methods that they no longer represent even a fairly good burlesque of the real Japanese. They, at all events, have deteriorated, both morally and otherwise, except perhaps financially. In their contact with the foreigner they have adopted many of his bad and lew of his good qualities. With regard to the general tone of these places, I trust I am not burting the feelings of many good people when I say that it is not high. It is impossible in a community so mixed that it could be otherwise. Bearing in mind, however, the ingredients which go to make up mind, however, the ingredients which go to make up the Treaty-port population, the general tone of the place is perhaps rather creditable than otherwise. Recrything must in cliques, and in very accentual-ed vilgues, and that which strikes the outsider more ed cliques, and that which strikes the outsider more forcibly than anything else about the Treaty-port point of view, apart from the general abuse of Japan, is the backbiting which is displayed. Local journalism is generally supposed to expound or effect the feeling of the people, but it is to be hoped that such is not the case as far as Yokobama newspapers are concerned—I mean those papers which are written as well as edited and published in Yokobama. It is true that the Yokobama resident is wont to houst of his entire ignorance of Japan and the Japanese, but most of his organs, without profeesing this ignorance, write precisely as if they had no knowledge of the subject. One of the London journals recently dealt with the subject of Treaty-port journalism, and was severely criticised for comparing it to the French journalism in Egypt. and vice versa.

The Treaty-port resident is essentially a man who is sorry for himself, and an outsider may be excused for falling to understand why. He tells you that he is unhoppy, because Japan is a horrible country to live in. But to all intents and purposes he does not live in Japan. He lives in a narrow chicle of his own creation, beyond which he refuses to move. He tells you that he refuses to move. He tells you that he would not nike the people of the country. But he does not nix with them, so this should not incomvenience him. He says that there is no money to be made in the country, but he lives in a fine house, and gives you a good dinner. He says that the Japanese coolies are rough and rude and dangerous to people going about among them, however, sent a guard to protect the foreign foreigner were to issue such a paper in England in war time he would most assuedly become a victim of the mob. The Japanese Government, however, sent a guard to protect the foreign people consected with these papers during the war. The better class Treaty-port residents recognise the folly and possible danger in issuing such publications, for this sort of thing can tend metely to lower the prestige of the foreigner, and diminish his chances of living amicably with the Japanese after the revised Treaties come into force. There is plenty of scope for censure in the Japanese methods without resorting to the tactics of wholesale abuse. I am afraid, however, that with one or two exceptions, the men who con-

yet he is not happy. Well, it is said to be the Englishman's privilege to gramble, and the Treaty-port resident amply avails himself of this privilege. A man who has a real grievance can worry over it and yet bear my, but, unfortunately, the man who has first to imagine or invent a grievance, and then to worry over it, finds the double strain too much and breaks down under it. And this is what kills the Yokohama-man. The foreignthis is what kills the Yokohama-man. The foreigners who live in Tokyo, who mix with the Japanese, and who have not, for a given amount of money, half the comforts of life, nor a tithe of the amosement, from a European point of view, do not complain of the country. And yet the foreign residents in Tokyo to day were probably used to more having a thome than were most of the Treaty-port residents before they left their native land.

A real guievance of the Yokohama people, which cannot be remedied, is that the Foreign Legations are all situated in Tokyo. No doubt Tokyo is the proper and only place for diplomatic people, but it is none the less a fact that when the Legations are in one place and the bulk

when the Legations are in one place and the bulk of the people who are under their protection are of the people who are under their protection are in another, they are to some extent out of louch with each other. For whatever the officials might wish to do they cannot always be away from their centre, nor can the people always be going to them. If the Legations were in Yokohama, the leading Treaty port, assuredly it would tend to take the tone of the place, and to check to some extent the reckless abuse of Japan which is now so prominent, and is as injurious to our interests as it is childish. In any care it might do comething to break through that barrier of resentment which for some reason seems to exist between the foreign of the people break through that barrier of resentment which for some reason seems to exist between the foreign residents of Tokyo and those of the Treaty-ports. The strikingly good feature about this British Treaty-port resident is his ardent patriolism. It is time that it sometimes takes the aggressive form of Down with everybody else," but it is none the less genuine for that. The patriolism of the Treaty-port Englishman often takes a boisterous turn, so that one hardly knows whether the patriotism is a feature in his conviviality or the conviviality a feature in his patriotism. However, it is there, and, to quote a somewhat worn-our popular ditty, "In spite of all temptatations"—he will tell you that these temptations are not numerous—"to belong to other nations, he remains an Englishman." Perhaps sometimes a somewhat extraordinary sort of Englishman—but still an Englishman.—Morning Post.

#### NEWS FROM KIAOCHOU.

(Translated from Der Ostasiatische Lloyd by the N.-C. Daily News.)

Our first Christmas here was celebrated by officers and men in true German fashion. Christofficers and men in true German Institut. Circistmas trees shone everywhere, which arrived from Japan just in time for the festivities, and the surnounding mountains contributed their green boughs to the adornment of the men's rooms. On boughs to the adoinment of the men's rooms. On board the vessels in the harbour the electric light glows upon the branches, and in the camps on shore groups of coloured candles shed their mellow light. Back friend contributed to the other's enjoyment by giving appropriate presents, and the food and drink soon put everyone in a joyful humour, when the thoughts which on this evening naturally turn to home and the longing for home which filled each head were stilled in the universal enjoyment, and all contributed to the common

which filled each heart were stilled in the universal enjoyment, and all contributed to the common fund of the evening's pleasure.

Acknowledgment is due to the Commandar of the squadron for his foresight in that the stamer with the mails from home and Shanghai arrived in harbour on the afternoon of the 24th. Congratulations from home and Shanghai did their part in stimulating the general enjoyment, and to drive away all feelings of sadness the letters were distributed before the Christmas festivities commenced, and they were the greatest pleasure that could be given. Great was the juy as it became known that the German ladies of East Asia, China, and Jean had not amitted to contribute in the and Japan had not unitted to contribute to the enjoyment of the festival, the first Christmas spent at Kiaochau Bay since the hoisting of the German flag on that spot. Large cases with various useful and acceptable gifts had been sent for the crews from Vokoliama, Kobe, and Stranghai (from this latter place no less than 53 cases), all of which latter place no less than 53 cases), all of which were received which the greatest gratitude. They showed that their countrymen and brave sailors if this solitary currer of the earth had not been forgotten, and that they desired to spend the day with them in spirit. Though as yet we have not enjoyed the advantage of the entertainment of the German hausfrast in these parts we did not forget to blass her. After his parts we did not forget to bless her. After his Majesty's health had been drund, glasses were And, fearless and without trembling, Digitized by

emptied to the health of the German women, and those who thus surprised us by their kind gifts and congratulations may rest assured that their kind-ness to some of our countrymen produced a deep response to our hearts, and will ever render memo-vable the Christmas spent in Kiao-chon Bay. To accordance with old sailor custom the decks of the shipping and the rooms in the camps were adorned with evergreens and floral emblems.

Natwithstanding the ceaseless work of the service which has been going on for the last few weeks the men had executed artificial decorations which must have demanded weeks of toil to bring to perfection. These constructions, illuminated with the electric light, produced a surprising effect. On one vessel we were struck with admiration by a stately lighthouse, under which were the words :-

> "O, wie herrlich strahlt dein Licht; Stäten wir dich eist in sicht? Wilhelmshaven,"

Alongside stood two figures, made of tin (the Alongside stood two figures, made of his (the material being taken from old preserve tins), engaged in sawing a block of wood in two, though their progress in their work was not apparent to the eye. A windmilt with mighty sails was turning a set of chimes. Naturally, Kiaochon Bay movided matter for many of the representations. One idea was that of the place a hundred years. One idea was that of the place a hundred years better, which the technical men and mechinists had most artistically worked out in groups. In the foreground of the Bay lay one of our cruisers; behind, wooded mountains, as it is to be hoped they will appear a hundred years from now. Sanatoria, botels, and similiar grand erections crowned the mountaintops, up to which led well-made roads and transways. In beautiful gardens with lakes and fountains playing were crowds of people. Another group in the engine-room of the ship showed the harbour works completed. A beautifully made harbour works completed. A beautifully made lighthouse illuminated the road for the ships cunuing in and out of the harbour. Numerous war and merchant ships lay alongside the high quay, and the movement in the docks bore witness to the and the movement in the docks here witness to the importance of the place. Work and activity were going on everywhere on land. The strokes of the hammer on the anvil rang out in a smithy. Heavily laden trains carried on the traffic. Porters works ed at the loading and unloading of the steamers. In the wheel-house was the picture of the new flourishing town of Kiacction Bay, a rival of Hongkong and Shanghai. Railway trains were running into the depôt. On the loot-bills were rows of villas, hotels, Governor's palace, seamen's home, refuge for nuns, cathedials as atonement for murdered missionaris, with parks and gardens untimited. Will it really be a hundred years before all these fine pictures become facts?

limited. Will it really be a bundered years before all these fine pictures become facts? Each party at the mess table had sought to rival the other in the beauty of their decorations, and paper chains, lanters, and transparencies combined to form a splendid ensemble. Many transparencies were so good that it was to be regretted that they were only made to last so short a time. The portraits of the Emperor and the Empress were often repeated, and one particularly fine idea were aften repeated, and one particularly fine idea sprang from the genius of a man of one of the ships. Patriolic and humorous proverts were also introduced into the transparencies. Among

them we read :-

" We German sailors in joy or need, Are devoted to the Emperor, true to the death." In the East Camp the following inscription was

"We are serving true on China's strand, For the honour of our Fatherland."

No. 8 room in the same Camp provided a Christmas poem, which, though it wanted poetical form, I cannot refrain from giving my readers, on account of its fine idea:--

"The Emperor calls Up, save Germany's honous!! over the seas A proud man-ol-war sailed, the Illis. But a year and five months ago, It is but one day too many, There in the heavy storm Almost every man found death. They have proved to us How Germans know to die. But they have left us Pinck, courage, and fidelity to strive for. Then true to the last breath They stood cound their Captalu,
The Commander spoke out; \*Comrades,
We must now end out lives,
Therefore, with your last breath
Shout to the honour of the Emperor.\*
We hould in Shouteness.

We marched though China's fields. So stand we now on this spot
To celebrate the festival in German fashion. To celebrate the lestival in German fashi We have left all our loved ones at home; Like the crew of the Ilita Will we throughout life Give honour to the Emperor."

No a room in another camp, on the other hand, ives a sad picture of our present condition :-

" All business is at an end, We could buy no pap, All things are at cross purposes, Boxes and baskets are empty. Do not be sad or angry, Next year we shall be better off." Tsingtao, 27th December, 1897.

As we took our seat at the table and the feeling

As we took our seat at the table and the feeling became jovial, a new surprise was afforded us, wis., the evening edition of the Kraochou Gasette, which was distributed for the first time.

You may be surprised, Mr. Editor, that anybody besides yourself is able to edit a German newapaper in China. You need not be afraid of competition with your esteemed paper, for this publication only appears annually, and, as is advertised, every subscriber has paid for it. Increase the circulation of your paper as much as you can with paying advertisements. Demand your mouthly dollar, and give the best you can for it. You may set assured that the official organ of Kiaochou and its environs will never call litself your competitor or draw away your readers, or influence politics in apposition to your paper, which is to us the source of our information and education. Let me tell you what a certain gentleman, who hides me tell you what a certain gentleman, who hides his identity under the pseudonym of Dr. N. Oer-gler ("Grumbler") dares to tell his readers in the leading article :

gler ("Grumbler") dares to tell his readers in the leading article:

"The Taking of Kiao-chou.

"Kiao-chou, 14th November, 1897.

"The many sad instances of stupidity and narowness of which Germany has been the theatre of late years have now reached their apogee in the unlawful and foolish seizure of Kiao-chou. How often have we commented in our columns on this hurtful ambition, which, not satisfied with what the Fatherland offers, wastes its best powers abroad? That colonial policy whose unworthy aims are indicated in the names of Peters, Wehland, and Leist is now again the order of the day. Shall we blindly shirt our eyes and not profit by the sad experiences of other people? Just look at England. Nothing but quarrels and riots, and for this it is obliged to keep up a giant fleet which just represents so much unproductive outlay. Or take Spain, the noble, unselfish country which is visibly being ruined by its colonial possessions. Or Russia, that hy means of the knowt has transformed the wild inhabitants of the Asiatic steppes into fawning deceitful diagon'steeth. We have now stepped into the ring with these tivials by slly taking possession of land from a people conspicuous for its good conduct and simplicity, as though it were pap. And on what ground? Surely you cannot take it ill of them that they slay a few missionaries. Why did not the gentlemen step at home where there is plenty for them to do? Why? we ask again. What, for instance, should we say if a Chinese were nurdered in Bavaria, and suddenly the Chinese fleet appeared to lay stege to Muttich or Wilhelmshaven? Such an excuse is a totally Chinese were mindered in Bavaira, and suddenly the Chinese fleet appeared to lay siege to Muffell or Wilhelmshaven? Such an excise is a totally false one, which only wants to be looked at for its hollowness to be exhibited. The true reason, as we have already said, is greed. Now let us see how far this greed is being satisfied. In the first place it is perfectly clear that neither England, Russia, nor France would have tolerally and recondings for a pint to late that neither In the first place it is perfectly clear that seither England, Russia, nor France would have tolerated our proceedings for a minute had they not been convinced that the land we have taken is a miserable corner, with no possibility of development, and which strategically is but a rat-trap in which, on the outhreak of war, to hold our ships prisoneers. We seem to have done no good in so often pointing out this development of militarism in purely political affairs. Now, again, numberless errors come to light, Just think how our home ports are divested of their ships, and the more ships that are sent out the more do our enemies rub their hands in ill-concealed joy at our misfortness, like augurs before the offering. And should Russia say, "Get out of this," it would be seen how quickly we should leave the place. It is true that for the moment they shily leave us to settle our affairs direct with the Son of Heaven, but it may be easily predicted that so open a breach of international peace will not be long permitted by the worthy Chineae. The news has sheady been brought us that a mighty army, inspired by glowing patrotism, is streaming together from all conners of the immensurable, empire to crush the tobber hordes. If measurable empire to crush the tobber hordes. If the liberal land served any better late according

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

to our ideas, well, we have humanity enough to sound the war note in advance. Go back while it is yet time, and you can get away with a whole skin. Videant general-consules, neglid Rubicon jacit capitat! jacit capitat !

But we will extinguish this lucubration of Dr But we will extinguish this manuscript.

N. Oeigler by another Latin quotation: "Sapienti sat." And a paper like this calls itself the official organ of Kiaochou and environs! Look at the tone displayed in its local news. We learn the same of the and of December: from Tsingtoukon, on the 23rd of December :-

"The safety of our town is more than ever imperilled since the occupation. We receive daily worse news from Kian-chou. The night before last the pigs are up a live hare, notwithstanding the strict guard of the senties. Yesterday in broad daylight a duck was drowned. Ought not diplomacy to intervene?"

You see the spirit of the management, which is starmed by the drowning of m duck. In another place the editor comes back to this calamity, naturally with the intention of again troubling the authorities. He writes:—

authorities. He writes:—

"On the morning of the 20th, on board one of the vessels lying in port, whilst the ducks were being washed on deck, a duck was washed overboard. It drove astern and collided infortunately with the many empty hick bottles with which the fourth division of the ship, and one of the bunkers were filled. The valve of the pipe had been carelessly left open, as is often the case with ducks, and my got full of water. The animal got a list to port of 30 degrees, so that the starboard screw was out of the water, and, notwithstanding the attempts made to save life, it capsized in five minutes. It appears that the fire-stations were not drilled as they should have been, and as the safety of the duck required. This accident leads as the beauxious about the stability of the duck. We look anxiously for an explanation on the part of the Admiralty."

seen by the pancity of its market report. Just compare with the magnificent reports which fill your columns, the following short notice from the Official Gasette of Kinochou and environs:—

"Eggs flat, cheese lively. On the 31st of December great market in Tsintonka,"

That is all; nothing but bad eggs. And let us turn to the last telegrams, You bring us Renter's announcements, but bere there is nothing but bare telegrams from Peking. On the 23-d of December it was announced:—

December it was announced:—

"The wire informs Peking that since yesterday all communication has been stopped by the interruption caused by the war."

It is quite true that a stoppage of telegraphic communication set in, but we know that without the aid of a newspaper. It appears to us the rditor of this paper is entirely without journalistic training. For instance, look at this advertisement:—
"Lost in the evening, on the way from Shangshai to Kiao chois, a telegraph pole. To be given up at station No 12."

Above this we find an adventigement station.

Above this we find an advertisement which appears to the same incident :-

" Found, a telegraph pole, in Formosa Suaits Can be taken away on payment of the advertising charges and mess expenses of the expedition of the Rigochou Gazette."

Pwill on trouble you with more notices of this paper. Your readers will be easily consinced therefrom that they had much better subscribe to the Ostaziatische Lloyd than support this opposition paper.

The weather continues splendid. Fine summy days were nor mood fortune for the Chrismas feast, and were appreciated by every one.

Tsingtan, 27th December,

### LATEST TELEGRAPHIC NEWS.

(FROM THE "JAPAN TIMES,")

#### SIR MICHAEL HICKS BEACH'S SPEECH.

PRESS OPINION.

London, January 20. The press universally applauds the out-spoken statements of Sir Michael Hicks-Beach, the Chancellor of the Exchequer, in his speech at Swansea.

#### CRICKET IN AUSTRALIA.

In the match between Stoddart's team and an Australian eleven at Adelaide, the Australians have won by an innings and BRITISH NAVY WILL KEEP PACE. ENGLAND STANDS BY HER TREATY RIGHTS.

London, Jan. 22.

Sir Michael Hicks-Beach, Chancellor of the Exchequer, speaking at Bristol, announced that the Navy Estimates would provide for more sailors, and Britain would more than keep pace with the addi-tions to the fleets of other Powers. In the event of the Chinese loan not being accomplished, England would take her stand by her Treaty rights.

COLONIAL SECRETARY ON CRETE. THE IMPOTENCE OF THE EUROPEAN

CONCERT.

Mr. Chamberlain, addressing a meeting at Liverpool, regretted the discreditable impotence of the concert of the Powers in regard to Crete. He expressed the hope that Great Britain would not be compelled to take isolated action.

BRITISH INDIAN FINANCE.

CURRENCY BILL PASSED.

London, Jan. 23. Sir James Westland's Indian Currency Bill has passed with the condition that the Secretary of State be given the option of paying gold into the Treasury, provided that India pays an equal sum into currency here. The Secretary of State is prepared to sell transfers at a price not exceeding 165 d. per rupee.

THE DREYFUS CASE. EMILE ZOLA TO BE TRIED.

The trial of Emile Zola on the charge of defaming General Billot, Minister of War, and other generals, in connection with the Dreyfus affair, has been fixed for February 7th at the Seine Assizes.

GERMAN OFFICIAL DISCLAIMER.

London, Jan. 26. After the various interpellations in the Dreyfus case, the French Chamber adopted a vote of confidence in the Government by a majority of 243. Herr von Buelow, German Foreign Minister, has stated in the Reichstag that Dreyfus never had the remotest connection with German agents. This confirms the belief that Russia is the Power implicated in the Dreyfus affair.

#### THE ANGLO-CHINESE LOAN CONDITIONS.

ALLEGED THREAT BY RUSSIA. It is stated that Russia has threatened reprisals if Talienwan be opened to commerce.

RUSSIA AT PORT-ARTHUR. BRITISH WARSHIPS ORDERED TO QUIT.

London, Jan. 24. It is officially announced from St. Petersburg that the British men-of-war have received orders to quit Port Arthur immediately. It is understood that this course was taken in consequence of representations on the part of Russia.

ANTI-SEMITIC DISTURBANCES IN FRANCE.

FIGHTING IN THE CHAMBER.

Anti Semitic disturbances of a serious nature have broken out in France. The scenes in the French Chamber were indescribable. Blows were freely exchanged and troops had to be summoned to clear the lobbies.

#### FRENCH WARSHIPS ORDERED TO CHINA.

The French warships Vauban and Bruix have been ordered in China.

THE GERMANS AT KIAO-CHOU. PORT TO BE OPENED TO COMMERCE.

London, Jan. 25. The Times states that Germany opens In Digitized by Google

Kiao-chou to the world's commerce, like Hongkong.

#### THE BRITISH WARSHIPS AT PORT ARTHUR.

#### AN EXPLANATION.

It is officially explained that the visit to and departure from Port Arthur of the British warships, were merely ordinary cruising movements.

WRECK OF A STEAMER.

The steamer Cromarty, bound from Shanghai for New York, was totally wrecked off St. Michaels on Sunday. All on board were saved.

#### BOMBAY PLAGUE INCREASE.

The Plague epidemic at Bombay is greatly on the increase.

#### THE FAR EASTERN QUESTION. RE-ASSURING STATEMENTS.

London, Jan. 26.

Re-assuring statements are published regarding the situation in the Far East. No Power, it is said, contemplates the seizure of territory, and talk about war is altogether inappropriate to the situation. THE OCCUPATION OF KIAO-CHOU.

#### "LIVE AND LET LIVE."

Herr von Buelow, German Foreign Minister, stated in the Reichstag that the economic policy in connection with the occupation of Kiao-chou was based on the principle of "Live and let live."

#### ITALIAN WARSHIP ORDERED TO CHINA.

The Italian cruiser Marco Polo has been ordered to China.

[The Marco Polo is an armed cruiser of 4,583 tons displacement. Her length is 327 feet, beam 483 feet, Max. draught 19.6 h.p. 10,000 and she was built at Castellaurare in 2890 at a cost of was built at Castellamane in 1890 at a cost of £341 400. Her speed is 19.0 and complement 315.

#### THE GERMAN CHINA SQUADRON. COALING IN A BRITISH PORT.

The cruiser Gefion, accompanying Prince Henry of Prussia's China Squadron, has returned to Perim to coal.

RIFLE BRIGADE ORDERED TO MALTA.

The Rifle Brigade from Hongkong has been ordered to land at Malta.

SMUGGLING ARMS INTO MUSCAT. SEIZURE BY A BRITISH GUNBOAT.

The British gunboat Lapwing has seized the steamer Beluchistan off Muscat, for attempting to land arms and munitions of Her cargo was confiscated by the war. Consul.

#### Answers to Correspondents.

E.R.S. (Hongkong).—Tuanks, will publish, Salution of Problem No. 354 is with-held until next Saturday.

> PROBLEM No. 356. By P. F. BLAKE.

First Prize Leeds Mercury Tournament.

This problem was awarded too points by the judges.

WHITE,

White to play and mate in two moves.

Y. C. C .- SECRETARY'S HANDICAP TOURNEY. As a side attraction at the Y. C. C. a novel Handicap Tourney has been arranged by the match committee to commence forthwith, the details of which are as follow:—All members likely to take part in the Tourney are divided into iy to take part in the Louiney are divided into five classes and the player who at the end of the season with the odds accorded to him, has won the largest number of games from the Secretary, will be the winner of a Trophy offered by Mr. Riedlander. Friedlander.

Class I. in this Tourney (Messra. Griffin and Tennant) are to play sceatch, Class II. to receive the odds of Pawn and move, Class III., Knight,

Like the "Cleland Ladder" this Tourney free from the chance of a failure through members not turning up at the proper time, as has happened not turning up at the proper time, as has trappeoed to a certain time or to a fixed number of games. If A wins five games out of fifty and B wins five games out of fifty and B wins five games out of six, their some will be exactly even, the number of games won from the Secretary by end of April being the only consideration to this Toutney. Those members who attend the arrestings regularly will, of course, have the best of the arrangement as they will play a greater number of games and consequently score more wins. And

arrangement as they will play a greater number of games and consequently score more wins. And that is just the object of this tourney, to add one more to the many inducements afforded to members of the V. C. to frequently visit the club. The Challenge Tourney ("The Ludder") is also in progress and affords members an opportunity for improving their positions. Only three games have been played so far in the first cound of the Championship Tourney which is to conclude at the end of February. We would urge players to begin their work in earnest before the best part of their time has elapsed. For no good chess can be expected in games hurried through in the last week allowed for play. week allowed for play.

#### CHESS-PLAYERS OF THE WORLD.

Reichelm, in The Times, Philadelphia, estimates the number of Chess-players belonging to Chess Clubs, in Europe and America, at 481,200, or, in round numbers, 500,000. He divides them into five classes, putting in Class A all those who are too strong to receive odds of Pawn and move from Lasker, as follows:—

Class A-200 players.
Class B-Pawn and move, 1,000 players.
Class C-Pawn and two moves, 5,000 players.
Class D-Olds of Knight, 25,000 players. Class E-Rook, or weaker, 450,000 players.

It is evident that he puts Lasker in a class by

The Straits Budget started a Chess column on December 28th. It contained a two-movers, local games, and Chess News.

Among the principal events in the Metropolis. during December last was a fine battle between those two old and biendly opponents, the City of London and North London, with thirty players a side, which was won by the City by 21½ to 8½. We append one of the games which is particularly

#### SUNDAY CHUSS.

Effic: "Please, Uncle Arthur, do come and play class with me?" Uncle Arthur: "Oh, Effic! Don't you remember? It's Sunday." "Well, we can let the Bishop win?"

#### DANGERS OF CHESS.

A Spanish nobleman at the Court of Philip II, came home one day to his children dissolved in tears;—" My dears, all is over with us; let us pack up and be gone. I ought to have resisted the temptation for your sakes, but it was beyond my power. I've beaten his Majesty at chess five games running. His openings were so bad I couldn't let him win." He was, of course, sent into evil. into exile.

## LATEST COMMERCIAL.

IMPORTS.

At last a move has been made in the general At last a move has been made in the general mount market and now that it has come, it has come with a cush. A number of large transactions have taken place in grey shirtings, while great activity has been exhibited in yarns, at well maintained and in some cases increased prices. For fancy cottons and woollers there are enquiries, but so far little business has been done. There has been a good demand for raw cotton at slightly reduced rates, the fall resulting from the fact that there is a considerable stock of Bombay cotton affoat, for larger. COTTOR PRICE 60008.

#### SUMMARY OF NEWS.

THE plague is increasing at Bombay.

HER Majesty the Empress is suffering from a cold.

THE Russian Press is resuming its attacks on England.

THE Naniwa Spinning Co. lost 24,000 yen during the second half of last year's working.

It is reported that a Russian force of 5,700 men, with field guns, has arrived at Kirin.

VICE-ADMIRAL Buron Tamboi, Commander of Yokosuka Port Admiralty, died on the 30th ult.

THE Japanese steamer Muko Maru (183 tons) was sunk in collision off Kuchinoten on the 30th ult.

CAPTAIN TIPPER, formerly in the service of the N,Y,K., in reported to have discovered a rich claim at Yukon.

The Foreign Department has issued-a proclamation to the effect that wader the evised years

with Holland Japanese subjects from the rat instant will enjoy patent and trade mark rights in that country.

A GERMAN expert has been engaged by the Imperial Railway Bureau in succession to Mr. C. A. W. Pownall.

AT a Prefectural election at Yokosuka on the 1st inst, one of the electors was shot dead by a political opponent,

THE interport football match between Kobe and Yokohama takes place at the first-named port on February 19th.

THE Kyoto Imperial University will this year add to its curriculum sections devoted to Literature, Science, and Law.

THE Eastern Extension Telegraph Company raised its rates for telegrams to all parts of the world on the rat of January last.

THE Sapporo Agricultural College, Hokkaido, has secured a large piece of land, containing 10,100,000 trube, for experiments in scientific

THE half-yearly meetings of Langfeldt & Co. Ld., and the Yokohama Engine & Iron Works were held on the 31st uit. and passed off most satisfactorily.

IT is reported that Vice-Admiral Samejima. Principal of the Naval University, will succeed Baron Tsuboi as Commander of the Yokosuka Port Admiralty.

Miss Broxham and her pupils, assisted by several local amateur musicians, gave a most successful and enjoyable concert on Tuesday evening at the Public Hall.

In is declared in St. Petersburg that if the candidacy of Prince George of Greece for the Governorship of Crete fails, Russia will concern herself no further about the island.

A CLERK in the Yokohama Post Office has been arrested on a charge of having opened letters passing through the office and stolen therefrom various cheques and drafts, which he cashed.

It is reported by telegraph that the Czar has stated that events in the East had weighed heavily on his mind, especially the difficulties with Japan, but he thanked God all was clear

In view of the prevalence of plague at Bombay and Roku, Formora, the Home Department will in a few days open quarantine stations at Nagasaki, Ujina, Kobe, Yokohama, and other principal ports.

TRE International Industrial Conference convened in Vienna last November, closed on the 14th December. Messrs, Isobe and Motono, the Japanese delegate, will return about the middle of March.

THE departure of the Standing Squadron from Yokosuka for a cruise to the West has been postponed for the present, as the Emperor pro-poses to inspect the new battle ships Fuji and Vashima at an early date.

A German marine has been killed by Chinese at Thi moh, near Kino-chou, and Baron von Heyking, the German Minister to China, has demanded from the Tsung li Yamen further concessions by China as reparation for the murder.

To meet the demands of all the Departments for a sky for a Preasury finds it necessary to ask for a benefit OF ILLINOIS AT

vote of yen 23.000,000 as a supplementary budget for this year. Out of this aum about yes 8,000,000 are to be spent upon new undertakings.

A PEKING telegram has it that China will, if possible, divide the proposed loan to be obtained by her, between Great Britain and Russia.

A Naval Court Martial has been opened in Tokyo to try Captains Uryu and Hirao, comcommanders of the war-ships Fuso and Mateushima, the former of which vessels was sunk by collision with the latter three months ago.

THE annual meeting of the Yokohama Amateur Rowing Club was held on the 31st ult. Mr. Litchfield was re-elected President, Mr. F. J. Hall, Captain, and Messrs. Schellenberg and G. C. Allcock Secretary and Treasurer respectively.

Ir is reported, but not yet confirmed, that the Chinese Government has so far departed from conservative customs, as to order certain subjects of Western learning to be included in the examination of candidates for official positions.

FIRE occurred on board the N.Y.K. steamer Hiroshima Maru at Kobe on the night of the 31st ult. The flames were extinguished by half sinking the versel, after a large portion of the cargo had been destroyed or damaged. The hull of the vessel received little injury

THE Japan Fine Arts Association will open its usual Spring exhibition in Uyeno Park on the 1st April. The exhibition will remain open up ist april. The exhibition will remain open up to the zoth May. Carving, porcelain, lacquer ware, metal work, woven stuff, and embroidery will form the bulk of the exhibits.

According to latest telegrams the re-inforcements sent from England to Egypt will be wanted. The Dervishes are reported to be provided with Krupp gu s and to have blocked the Nile channels with chains. Gunboats despatched up the river were compelled to return, after reaching the sixth cataract, owing to the heavy artillery fire opened on them by the Dervishes.

THE Import market has received a considerable impulse during the past week, owing to a strong demand for grey shirtings, which has been fully supplied from existing stocks. Yarns have showed some activity, but the business done last week has declined to a considerable extend. Buyers are making enquiries with regard to fancy cottons and woollens, but the business done in these lines has been very limited. The question of funds to be obtained from the banks -at a very much increased rate of interest-still militates against any speculative trausactions. Metals are dead, and in the kerozene market buyers are waiting for a fall, as arrivals have been large, taking all the open ports in Japan, and more than one schome is on foot to supply cheaper oil to the various ports. The arrivals of augar keep pace with the demand, though for the time the stock of Manila is exhausted. In Exports raw and waste silk still take the first position. In raw, comparatively little business has been done during the past week for export, but Japanese manufacturers of piece goods and handkerchiefs have been buying freely. In waste silk there has been a large business done and stocks are considerably reduced. In tea, little has been done and the season may be considered over, the remaining stock only amounting to some 1,300 piculs, mostly of low grades. prospects generally appear to be reviving, and fro Mrichin aheronport market will principally

#### SPIRIT OF THE VERNACULAR PRESS.

The Fifi Shimpo devotes no less than ten consecutive articles to the subject of naval increment. They are written in the clear, incisive style of the well-known journal, and will probably produce a considerable effect on public opinion. Briefly stated, the main point of contention is that the navy at present contemplated for Japan, namely, a navy of two hundred and fifty thousand tons displacement, is not nearly sufficient. The figure should be something like four hundred thousand. Recent events, notably the seizure of Kiso-chou by Germany, have completely demonstrated the fact that principles of morality are now atterly disregarded in the intercourse of States. There is but one effective rule, might is right. Any nation whose arm is not strong enough to strike down an aggressor, must count on being the inevitable victim of aggression. It is wholly futile to rely on the forbearance of others, or m look for assistance from outside. In the hour of danger a nation must be able to take care of itself; to fight its own battles independently. Side by side with that lesson another startling fact has to be placed: Russia, France and Germany are evidently allied for purposes of domination in the Orient. One need not pause to inquire whether an offensive and defensive alliance has actually been formed between the three Powers, or to discuss its terms. Events plainly point to such an alliance for practical purposes, and the Japanese would be blind indeed if they failed to reckon with it as an imminent contingency. The three European Powers combined to deprived Japan of the fruits of her victory in Liaotung, their pretext for interference being that the preservation of the Chinese empire's integrity was essential to the peace of the Orient. But they are now demonstrating that the integrity of that empire is of no account whatever in their eyes. Japan must read the manifest teachings of such experiences. It is a most unwelcome task to catalogue III possible enemies three Powers with whom the nation is now on terms of close friendship, but, after all, the best way to maintain friendship is to avert enmity, and that can only be achieved by developing such strength of resistance as shall dely attack. If Japan had possessed a strong navy, it is very doubtful whether the war with China would ever have taken place. Certainly if her naval forces had been indisputably superior to those of her opponent, the latter would have hesitated long before drawing the aword. China believed herself more than a match for Japan at sea, and so she entered the lists. be weak is to invite assault; to be atrong is to prevent it. However unpleasant the prospect may be, Japan must prepare herself to meet a combination of Russia, Germany and France. She must be ready to face the united squadrons of those three Powers. It will not do that she should win one victory. Three great European States will not acknowledge themselves worsted because their first naval line is defeated. They will send a second fleet to the attack. And even if Japan conquers a second time, there may remain England to deal with, England could scarcely afford to see Japan climb animpeded to such a pinnacle of power in the East as victory over Russia, Germany and France in combination would raise her to. England has her own interests to consider, and Japan might have to reckon with her. All these eventualities have to be taken into account. They point in the absolute necessity of raising the fleet to a strength of four hundred thousand tons. There would be nothing aggressive in such an increment. It would be merely a guarantee of peace. Half-and-half preparations are the most dangerous of all : they neither intimidate an enemy nor insure success when the struggle commences. The finer and more trenchant the weapon a man possesses, the more reluctant are others to insult him and the less disposed is he to have light recourse to a trial of strength. England possesses incomparably the most powerful navy in the world, yet no State is less prone to engage in a maritime

Digitized by Google

for her strength is beyond dispute. is the standard at which Japan ought to aim. As to the contention that the country's reis to the contention that the country's resources are inadequate for such an effort, who is to gauge the country's resources? Six years ago, when the Cabinet asked the Diet to vote funds for the construction of two line of battle ships, and when m plan was propounded to raise the navy to a displacement of a hundred and twenty thousand tons, there was a loud outcry against the extravagance of the programme, and a wide spread declaration that the country's resources could not endure such a burden. Have those resources undergone any metamorphosis in the interval? not, how does it happen that, the nation unless-tatingly pledged itself to a scheme of naval expansion precisely the double of the scheme which had been declared unendurably costly in 1892 ? People who talk of the country's resources forget to look back to pre-Restoration days. In those times, the nation numbered 30 millions. Twenty-eight millions were producing classes, farmers and manufacturers, and two millions were the idle military class who had to be supported by the rest. There were some 270 Daimyo, la ge and small, who lived in the utmost luxury. Talk of a suburban residence built by some wealthy merchant or speculator now a days! Why, it is a mere but compared with the manaions of the former Daimyo-the three mansions that each of them had in Tokyo, to say nothing of the castles and palaces in their own fiefs. Think of the crowds of armed men that they supported, their immense retinues, their lavish expenditures. When the Daimyo of Kishlu wanted to purchase a foreign man-of-war (Komyo maru), he abtained famils for the purpose simply by selling the accumulation of silk garments and lacquer-ed utensils that lay in his store-houses, their use being interdicted because those to whom they had belonged were dead. In those days the rule of taxation was goko gomin, five parts to the lord and five to the people. Out of the thirty million koku of tice produced, fifteen millions went to support the shisoku. If the same rule held now, the farmers would be contributing land tux to the annual amount of 240 million yen. where they actually contribute less than 40 mil lions. And who can deny that the country is immensely more wealthy now than it was then? Yet, in those time, complaints of excessive taxation were heard only when dishonest of-ficials practised extortion in their private interests. The people's burden now is incomparably lighter than it was then. The farmer's manner of life has radically changed. He is now pro sperous and comfortable, wearing silk where formerly be could scarcely afford cotton, and eating rice almost daily whereas formerly he scarcely knew its taste. Still it is not upon the farmer that an increased weight of taxation should be imposed. His prosperity should be for ered, for the consuming of the agricultural class reacts upon the industrial, and thus contributes to the general benefit. The just and proper source of revenue is sake. It is almost a disgrace to Japan that alcoholic beverages should be so cheep here. In the West, economists recognise and act upon the plain principle that wine is an article of luxury, and that its consumers ought to be the chief contributors to the public revenue. But in Japan the sake tax is ludicrously low-only 7 ven per koku (less than 20 sen a gallon). It should be raised at once to 20 yen. There are four hundred thousand koku of pure sake (seishu) brewed yearly, so that a tax of 20 yen per koku would give a revenue of 80 million yen against 28 million, now collected. There is not the remotest doubt that the tax would be cheerfully paid. Drinkers of pure sale, that it to say, the upper middle and higher classes, would make nothing of paying such an amount (about one shilling per gallon). Some conservatives talk of old custom. Well, according to old custom, sake was not taxed at all, and it seemed a terrible violation of tradition when an imports of two ren was placed on it, tentatively and timidly, after the Restoration.

That they formulate the smallest complaint now that it has been raised to seven ren. there is the objection that the poor farmer wants his bottle of hot sate after a hard day's work, But the poor farmer does not drink clear sake (seishu); he drinks muddy sake (datushu), and that can be left comparatively untaxed. If m additional revenue of 52 million yes were thus raised 20 millions might be devoted to reducing penty local taxes which now bear hardly on the poorer classes, and the remaining 32 millions might be appropriated to the main-tenance of the navy. Of course, the building of the fleet would have to be effected by means of a foreign loan—say 200 million yew. There is just at present a good deal of talk about swelling the bulk of currency and inflating prices, but a foreign loan for the purpose of building a navy would not produce any injurious effect in that direction since the greater part of it would be spent abroad. As for the personnel of the increased navy, there would be time to train it while the ships were building. The acheme may look large, but how insignificant it becomes when we place it side by side with the integrity of the empire! Nothing less can insure that integrity.

> There have been of late some of the usual murmurs about the reticence of the Cabinet, Whenever a change of Ministry takes place, some publicists stand forward, and call upon the new occupants of office to declare their administrative policy in explicit terms. The Nichi Nichi Shimbun points out the nureason of such a demand. A Cabinet is under no general obligation to declare its policy. the contrary, high considerations of State are opposed to such a proceeding. When occasion arises or necessity presents itself, the acts of a Ministry furnish the best index of its policy, but nothing is less expedient or unwise than the compilation and publication of an elaborate statement which, unless couched in terms so vague as to convey little real informa-tion, can scarcely fail m became a source of subsequent inconvenience. To the Diet m the representative of the nation and as a part of the governing machine, the Cabinet may feel under an obligation to declare its views. It may also see the advisability of taking into its confidence the chiefs of the staff of the various Departments and the local governors, so that the administraand the local governors, so that the administra-tion may be conducted in accordance with a general line of motives. But beyond that it is neither prudent nor practical to go. The Matsukata Cabinet set the example of making a public exposition of policy, and it can not be said that the results were of such a nature as to commend that course for imitation by another Cabinet. In truth, the object of the Matsukata Cabinet was to attract the support of a political party. But the Ito Cabinet need not be swayed by any such consideration. The Liberals have already declared that they endorse the views of the Ito Cabinet, and the Progressionists have given the best possible proof of their consensus by offering to join the Cabinet. They actually proposed that one half of the portfolios should be given to their own party leaders. Hence they must be assumed to be well acquainted with the Ministry's views and to endorse thers. At present the main business of the Cabinet is to correct its predecessor's mistakes. In that field there is quite enough to occupy its attention for the time,

They point in the absolute necessity of raising thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the fleet to a strength of four hundred thousand koku of pure sake (seishu) brewed the sake used that a so of 20 pen per koku would be cheerfully expansion programme. It says that Count into fleet fl

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN the Army, the extraordinary outlays on account of new barracks and so forth can not now be retrenched. The only resource is to raduce the proposed establishment. To thatend the Mainichi propounds a scheme with the details of which we need not weary our readers. The general result is all that need concern us, namely, that instead of having an Army of \$20,000 on a war footing, the strength would be \$50,000. Concerning the economy that would result, the Mainichi does not speak. We are unable to say whether, in this matter, the Mainichi represents the view of the Progressionists in general, or merely the view of the section headed by Mr. Shimaba Saburo, who is the editor of the journal.

The Yomiuri Shimbun writes enthusiastically about England's policy in the Far East, evinced in the demands recently preferred by her to China. She has asked for the opening of three new ports—among them Talien—; the neutralization of the Valley of the Yangtsze, and the prolongation of the Burmah Railway through Yunnan. No contrast could be stronger than the contrast between such demands and the proceedings of Russia and Germany. England aims simply at commercial expansion, and the preservation of the peace of the Orient well as of the integrity of the Chinese empire.

Russia, Germany and France aim at territorial expansion of themselves at the expense of China's integrity. It is indeed a fortunate thing for the Far East that the Lion has at length opened its eyes. It was said to be sleeping. Russia's aggressions, Germany's haughtiness, did not seem to rouse it. But anddenly it has awaked, and to signal purpose. Its ships have fisshed bither and thither, carrying a new atmosphere wherever they went, and it has atood forward as the defiant champion of a policy profound, far-seeing and eminently civilized. The Pomiuri dwells at considerable length on the significance of England's demand for the opening of Talien, and declares that such a project would practically secure the neutralization of the Lianuary Peninsuls, just as the foreign trade of Shanghai secured the neutralization of the Yangtize Valley during the recent war. We need not follow our contemporary's remarks in detail. They show a thorough appreciation of the liberal motives underlying England's acts. and indicate clear political insight on the part of the Progressionist organ.

The Kokumin Shimbun writes in the same strain, but confines itself chiefly to the question of the opening of Talien to foreign trade. It expresses astonishment at Russia's threat of reprisals in the event of China's agreeing to open the port, and asks what title Russia can possibly claim to impede a step plainly conducive to general tradal development and the peace of the Orient, unless she be influenced solely by projects of selfish aggression. The Kokumin has large ideas of the commercial future lying before Talien. It thinks that the place will prove to be the emporium of all the trade of Manchuria, a trade in which Japan is destined to have a material share, as witness the volume of the commerce already existing between her and Newchwang. At all events, the very best guarantee that could possibly be futnished for the preservation of the peace of the Orient in the opening of Talien. England shows consummate wisdom in advocating such a step, and the Kokumin hopes that the Japanese Government will throw its whole weight into the balance on England's side.

Charles Gates, a Klondyke millionaire who recently arrived at Victoria, British Columbia, is thus described:—The style he affects is, in say the least of it, peculiar. It is principally buckskin and diamonds. A buckskin suit he always wears. Stuck in his shirt is a huge diamond, an big am a man's thumbnail, and his fingers are ornamented with diamond rings of great value. He matried one of the La Monde Sisters, song and dance "artistes," two weeks after she got to Dawson City.

#### JAPANESE RAILWAYS.

"Railways are exceedingly convenient ma-chines," says the Shogro Shimpo, " but if one mistake be made in connexion with them, they are terribly dangerous. The upsetting of carriages, collisions, fires—if these things be enumerated in detail their number would be very large. Hence when railways are built, the greatest circumspection must be exercised with regard to the gradient and curvature of the rails, the solidity of the construction of the carriages, and the expertness of the officials, so as to avoid all risk of accidents. Railways have progressed so much in Japan that they are not now like the railways of other days. Still, since last year railway accidents have suddenly increased, and we feel obliged to invite the attention of the public to the fact. People are doubtless aware that many accidents occurred last year, but even in this year there have already been three accidents. One happened on the 7th of last month on the line at Kamimaki mura in the Soma District of Fukushima Prefecture, when a train of the Japan Railway Company collided with a truck, and one person was killed on the spot, and two were severely and one alightly injured. Another happened on the 19th of last month on the Chikuho line. A train of more than thirty empty coal wagons, which had steamed out of Wakamatsn station, was just about to cross the iron bridge over the Egawa, when a luggage train suddenly came up from behind and ran into it. Fortunately no one was injured, but 13 wagons were upset, and two of them fell into the river. Another accident was the second case of derailment on the Iyo line. What is the reason of these numerous railway accidents? Is it that the rails are badly laid, or that the construction of the carriages is bad, or that the engineers are unskilled? Whatever be the cause, there devolves upon the railway com-panies the responsibility of thoroughly investigating the reasons so as to restore public confidence. Above all, Government officials have the great responsbility of exercising rigorous inspection and control by way of precaution against catastrophes. We learn that the officials have been conducting strict inquiries, but we have not heard that any practical measures have been adopted and the fact causes us regret at this era of railway progress."

#### SEX IN FLOWERS.

Professor Kenjiro Fujii, of the Imperial Uni-versity of Tokyo, has recently published, says the New York Independent, a paper in the Proceedings of that Institution, explaining the law that determines the male or the female sex in flowers. His observations and experiments have been made on the prevailing pine-tree of Japan (Pinus densi fora). He gives, in full detail, the results of many observations, and comes to the following conclusions :- That the sex of the flowers is undetermined until a certain stage of their development, and that a flower that would otherwise develop into a male has a tendency to become a female when local increase of nourishment takes place at a certain stage, or during certain stages of its development. It is very interesting to note that this discovery as to the law regulating the production of the separate sexes in flowers was first made and reported some quarter of a century ago by Professor Thomas Mechan; and the paper read by him before the American Association for the Advancement of Science appears in the printed proceedings of the Salem meeting. The doctrine met with some opposition at that time, Professor Agassiz especially making a powerful protest against the sentiments of the paper. But it has since been adopted as a demonstration and is the accepted theory of sex in the article on this subject in the ninth edition of the "Encyclopædia Britannica." The American view differs slightly from that of the Japanese scientist in this, that while the latter seems to regard the male characteristics as the normal condition, the accident of abundant nutrition only causing been beaten.

an advance to female characteristics, the former regards the female as the normal condition, and the cutting of the full supply brings about the male flowers. Again, the American exponent not only requires an abundant supply of nutrition to insure female flowers, but a high vital power in the nucleus to avail itself of the nutrition. Professor Fujii shows by his paper that he is in ignorance of the occupancy of the field before him by the American philosopher; and the fact gives additional interest to the paper in this respect that so nearly the same results should follow observations made in such widely separated quarters of the globe.

#### COLOUR PHOTOGRAPHY.

At a recent meeting of the Royal Photographic Society, held in the rooms of the Society of Arts, Professor Gabriel Lippmann described his system of colour photography, whereby a photograph showing the colours of nature is obtained by a direct process and with one exposure of the plate. The film, which might be of any sensitive subtance, he explained, was exposed, developed, and fixed in the usual way. Two conditions, however, must the usual way. Two conditions, however, must be observed. The film must, in the first place, be transparent and grainless, and, in the second, it must be in contact with a metallic mirror during exposure. The effect of the mirror, which was formed by running a layer of mercury in behind the plate, was to reflect back the incident coloured rays and thus make the incident light waves stationary. The stationary vibrations, falling in the interior of the sensitive film, impressed their own structure upon it, and by virtue of the structure thus imparted to it, the brown deposit of silver, when viewed by reflected white light, appeared clothed with the same colours as were possessed by the image in the camera. The colours were produced by "interference" in the same way as those of the soap bubble or mother of pearl. That this was their cause M. Lippmann said was proved by the fact that the tints of a negative changed if it were damped in consequence of the gelatine swelling slightly and thus aftering the struc-ture of the silver deposit. The colours produced by this process were true and bright, provided that exposure and development had been properly conducted; they were, moreover, completely fixed and resisted the action of light and time. He had not yet succeeded in taking prints from his negatives, but was convinced that to do so would be found possible. In the course of the lecture a number of the results achieved by M. Lippmann were exhibited in the fantern, including coloured photographs of the spectrum, stained-glass, landscape, fruit and flowers, and the portrait of a little girl. A reproduction of the spectrum of argon showed the characteristic lines of that gas in the most beautiful and distinct manuer,

#### NEW TYPE OF WARSHIP.

France has ordered a new armour-clad cruiser to be called the Montcalm, whereof the principal dimensions are as follow:—Length between perpendiculars, 452\frac{1}{2}

The Empress of India made her last run from Woosung to Hougkong in 40½ hours, and the N.-C. Daily News doubts if this has ever been beaten.

#### TOKYO AND THE IRKATY PORTS.

The special correspondent of the journal on the subject of the "Treaty Port Resident in Japan," speaks of "the barrier of resentment which, for some reason, seems to exist between the foreign residents of Tokyo and those of the Treaty Ports." Where, we wonder, are the evidences of this resentment to be found. There is a very great deal of truth and shrewd insight in the remarks of the special correspondent, but in this respect he seems to have "got off the track." Some years ago it used to be the habit of one of the Yokohama journals to speak of the "foreign employés" of the Japanese Government in terms of open contempt, as though to have accepted service in this country was, in some respects, a disgrace. It is possible, nay probable, that a certain measure of umbrage resulted in Tokyo from these remarks, and that the Yokobama community in general was held more or less responsifor them. But the one journal that distinguished itself by that kind of writing soon abandoned it, and the error of regarding it as an expression of local public opinion became quickly apparent. the exception of that short-lived ripple, nothing, so far as we know, has ever disturbed the serenity of Tokyo's mind to-wards Yokohama. Instead of applying the term "resentment" to the mutual mood of the two communities, we should be disposed to speak of them as cordially friendly. The residents of either place are always glad to see those of the other, and if Yokohama never shows any lack of hospitality towards Tokyo, Tokyo's disposition towards Yokohama is equally good though its opportunities are, perhaps, less frequent. Assuredly it seems that the special correspondent of the Morning Post has been misled in this particular respect.

Of course there is the missionary ques-The missionaries constitute the great bulk of the foreign population of Tokyo. In fact, the foreign settlement at Tsukiji may be said to be all missionary. Now every body knows that the Yoko-bama journal alluded to above—the journal which used at one time to sneer at the "foreign employé"-has never in all these years lost an opportunity of attacking the missionary in the harshest, most with Japan almost defies belief. Difficul-uncompromising termes. Wherever mis-ties with Japan certainly exist, in a certain sionary affairs are concerned, the tone of admirable reticence on the subject. The be actively opposing the proposals submit-quiet dignity of their silence is beyond all ted by the British Representative to the strongly against such displays of prejudice, but they answer nothing, which is the very best of all answers. They trust their work to speak for them. It can not be said, therefore, that the missionaries betray any resentment. Where is this "resentment," any how? It would need a long search to find it, we imagine.

Sexceedingly obscure, and although the For example, Japan might want to retain Wei-hai-wei and to hold some other points to place full confidence in it. It is possible, of vantage. Thus the proposal for an alliance will not easily be put forward. On the other hand, unless suitable arrangements can now be effected for an offenlocation with reference to the British proposals, but that would not explain the Czar's references to difficulties with Japan.

#### POKOHAMA UNITED CLUB.

We observe that a project is on foot to Morning Post, in a recent letter to that furnish for the use of the Yokohama United Club a larger and more commodious building than the present edifice. The plan seems excellent in every respect, and the estimates are remarkably reasonable in view of the contemplated accommodation, Yokohama undoubtedly can afford to treat itself to a better building. An interesting feature of the programme is the erection of an electric-light plant to supply The Electric the Club independently. Light Company has raised its charge to 221 sen per ampere unit, which means that the annual bill for lighting will henceforth be some six thousand yen, whereas the estimated cost of running an engine on the Club's account is 160 yen per month, or about 2,400 yen a year, allowing for rewhich will be of much better quality than those now available. We venture to hope that whatever may be the decision about the question of re-building, the installa-tion of electric-light plant will be vigorously pushed, for truly the electric light companies deserve to suffer for their want of enterprise, for their indifference to the comfort of the public and for their monstrous charges.

#### EMPEROR OF RUSSIA'S EXPRES-SION OF RELIEF.

Baron Reuter sends us a very remarkable message, this morning. It represents the Emperor of Russia declaring, in effect, that the difficult problems of Far Eastern policy which had been causing him profound anxiety, have all been satisfactorily disposed of, and that such is the case especially with regard to Japan. Reuter's recent performances on the wires have not inspired such confidence that we can accept this latest telegram without distrust. Its character is very peculiar. That the Czar should have made any declaration of the kind is sufficiently incredible, but that he should have alluded specially to difficulties with Japan almost defies belief. Difficulsense, but as they are not difficulties that that journal is bitterly rancorous. In this can be said to have actually entered the case, the evil-tongued newspaper certainly field of practical politics, we fail to underdoes not echo its own views alone. It stand why the Emperor of Russia should has a sympathetic audience, whether large have referred to them publicly; still less or small, in Yokohama. The missionaries why he should have spoken of them as of Tokyo, then, not having divested them- disposed of when they have not even selves entirely of their human feelings, been definitely discussed. If Reuter's premay be suspected of harbouring some vious message be correct, the complications resentment against Yokohama. Perhaps are between England and Russia rather they do; but this we must say, that they than between Japan and Russia, since the invariably preserve the most absolute and St. Petersburg Government is supposed to praise. Nobody could blame them, or Tsung-li Yamen. Altogether the message would be surprised, if they remonstrated is exceedingly obscure, and although the

#### THE GREAT POWERS IN THE FAR EAST.

The Mainichi Shimbun appears to be quite satisfied that it can read without error the sentiments by which the policies of the Great European Powers are directed in the Far East. There is no question, it says, that the purpose of Russia, England, Germany and France is to divide the control of the Far East before Japan has carried her post bellum measures to completion. Russia's aim is to obtain possession of the Liaotung Peninsula, thus securing command of the entrance to the Gulf of Petchili. After that she hopes to drive the Chinese Government from Peking to Nauking, and make herself mistress of the whole of Manchuria, as well as of the Korean Peninsula. Germany, aided by Russia, seeks to acquire the Shantung pairs. To this important mancial penear may be added the great convenience of ance with Russia in the Far gast. Ling having lights which can be turned on so land, aware of the plans entertained by soon as dusk approaches, which will be Russia and Germany, aims at placing obstacles in their path before their naval proportions, and, at the same time, seeks to secure for herself a share of power not inferior to that held by them in combination, so as to advance her own position in the Far East. As for France, without allowing herself to be drawn into the vortex of the struggle between Germany, Russia and England, she wants to stand in the position of an independent outsider, so as to secure, at the cost of compara-tively little toil, the most important points in southern China and a lion's share of

> Our contemporary then passes to the question of an Anglo-Japanese alliance. The views entertained by the various Powers, it says, being as above set forth, it is evident that the Far-Eastern Question cannot be easily settled. Since England's ultimate aim is to obtain a division of power, she may at any moment take steps to attain that end. But although she adopts a strong policy towards Germany and Russia, she has no desire to fight, but hopes rather to come to an amicable understanding with the two Powers for the purposes of a division. On the other hand, her traditional relations with Russia present an obstacle to the achievement of such a design, and she consequently entertains an idea of effecting a secret alliance with Japan. She has not, however, yet made up her mind to come forward and seek such an alliance.

> The next point discussed by the Mainichi is the time of the Anglo-Japanese alliance. It is not altogether unreasonable that England does not yet come forward to seek an alliance with Japan. If the proposal emanates from England, her responsibility will be correspondingly large, and Japan will ask for adequate compensation-will ask, for example, to occupy the equal position belonging to an ally. That might involve some not very welcome contingencies. For example, Japan might want to retain

their grasp upon what may be called the financial society of Japan:--"Having strongholds of the Far East, and the task ventured to assume the duties of the imof ousting them hereafter will be extremely difficult. Hence it appears that the present is the time for concluding the alliance. Such an alliance is by no means a matter of idle talk. The simple fact is that an occasion precisely favourable for cementing the alliance has not yet presented itself. When the details of the agreement between Germany and China have been published, and when Russia's procedure in the spring becomes clear, the affairs of the Far East may enter a new phase.

It is noteworthy that the Mainicht Shimbun says nothing whatever about Japan's policy, nor makes any attempt to demonstrate that an alliance with England would be for the benefit of this Empire. Perhaps our contemporary thinks that no demonstration is necessary. Well, we are inclined to think so too. But still, seeing that no résumé of the situation is complete unless it includes an account of Japan's point of view, something might have been added on that subject with advantage. We would further suggest to the Mainichi Shimbun that its analysis of England's world appear simultaneously diseased, policy in scarcely just. The British Government has made a perfectly frank declaration on the subject, and, though circumstances sometimes over-rule intentions, it is at least certain that when British statesmen say a thing, they honestly mean what they say. Great Britain's unique object in the Far East is to open China's markets to the trade of the world, and promote the peaceful development of goes without saying that if there be any China's material resources without any method nationally advantageous, I should alienation of Chinese territory. It is essentially a policy of trade and tranquillity. By treaty-to say nothing of long and costly efforts in which no other Power except France has taken part-Great with the leaders of non-official economical Britain has acquired a right of free access society, which purpose, it is to be hoped equal participation in all commercial or industrial benefits accruing from intercourse with that country. She means to stand by her rights. That is the measure of her selfseeking. The practical effect of her policy is to secure every other Treaty Power against injurious discrimination. If Japan, with her Liaotung experience to guide her, thinks that she can trust Russia, Germany and France to place her on the same footing as themselves in any partition of privileges and benefits, there is no special reason why she should not throw in her lot with them. Again, if Japan thinks that she is strong enough to stand alone, and, single-handed, to enforce her claims in the eventualities now looming on the horizon, well, let her stand alone-or rather try to stand alone, for neither she nor any other State can defy circumstances, and circumstances will assuredly put much stress on ber, by and by.

#### COUNT INOUYE ON FINANCE.

On the evening of the 1st instant Count Inouye entertained at dinner Baron Iwasaki, President of the Bank of Japan, Mr. Kawashima, President of the Industrial Bank, Mr. Soma, Head of the Specie, Bank Mr. Toyokawa, Director of the Mitsui Bank, Mr. Tsuruhara, Chief of the Business Bureau in the Bank of Japan, Mr. Naka-migawa, Manager of the Mitsui Bank, and the high-class officials of the Finance Department. Count Inouye made the following speech from his place on the subject of Digitized by

portant office of Minister of Finance, I State and the finances of the nation at large, and my chief care is to contrive that matters shall be well arranged for each of the two. Now I have been much disturbed of late by the fact that officials and people, being divided so as to stand at opposite extremes, are lacking in the fair habit of working in union and concert, the consequence being not only that their sentiments are unknown to each other, but also that in matters of trade with foreign countries great injury has been done. It results that when anything hap-pens in society, the air is filled with speculations and conjectures, disturbances most regrettable effects are produced upon the national progress and prosperity. Especially in economical circles has the want of accord been marked during recent years, so that both sections of the financial and it is time that those within and those without the Government gave deep attention to the matter. Happily the gentlemen assembled here this evening may be called medical experts in that line, and each, I am persuaded, has some idea about a remedy suitable to the disease. beg that, in the interests of the country, I may be informed of your ideas, for it method nationally advantageous, I should like to apply it to the purposes of reform."

We interpret this speech to mean that Count Inouye is anxious to elaborate the financial policy of the State in conjunction society, which purpose, it is to be hoped to the markets; of China, and a right of that, in the interests of the nation, his Excellency may be able to achieve.

#### A JAPANESE CONCEPTION OF GERMANY'S ACTION.

It is suggested by the Mainichi Shimbun that although China has agreed to lease Kiao-chou to Germany, the transaction can not by any means be considered as accomplished until the ratifications of the treaty relating to it have been actually exchanged. For, in the meanwhile, there is no knowing what objection may be raised by other Powers. In fact, the Mainichi alleges very plainly that Germany's declaration of a resolve to make Kiao-chou an open port was dictated by apprehensions of difficulties formulated by other States. But the Mainicki advances another theory also : it is that Germany has not definitely made up her mind about opening Kiao chou to the world's trade, and that her supposed intention of doing so has been prematurely inferred from England's known wish in that sense. We suspect that these comments of our contemporary's are the result of conjecture rather than of accurate information, Of course, it was from the first understood that unless Germany obtained a definite cession of Kiao-chou, she would experience difficulty in dealing to set in the other direction. Japan not unit it so as to avoid interfering with the leaving as yet any investments abroad.

#### INSURANCE IN YOROHAMA.

It is not palpably characteristic of busihave been engaged, night and day, inves-tigating the subject of the management less formidable competition engendered of the finance. There is a very close by a recent appreciation of local insurance of the finance. There is a very close by a recent appreciation of local insurance connexion between the finances of the rates in this Settlement, no authoritative explanation of the appreciation has yet been furnished to the public. The Agents of the great insurance compaines see themselves confronted by an influential attempt to alienate a large part of their business and place it on an independent footing; but they make no effort to check the movement. Such a semblance of apathy seems reconcilable with business principles on one of two suppositions only: either that the Agents feel no special anxiety to defend the threatened field of operations; or that they regard as foredoomed to failure any amateur in-cursions into their domain. Practically spring up like waves on a calm sea, and the two hypotheses are identical, for each rests on the same basis, namely, that no profit is to be realized from insurance transactions at rates lower than those charged by the established companies. Is that the case, we wonder. It can not be doubted, of course, that the Insurance Offices have an excellent reason for raising their old rates, and the only reason to which the epithet "excellent" can properly apply is that they have found those rates insufficient. They have been coming out on the wrong side of the account, and must either give up the work or alter the scale of remuneration. Such being the case, the question suggests itself-is there room for competition on lower terms? If the old established insurance offices have made a loss by taking risks at the former rates, how can a new office hope for profit from the same rates? A long lapse of years is needed to determine the average life of buildings under special conditions. What is the average life of a building on the Yokohama Bluff? Has it been ascertained with anything like certainty? The insurance agents alone are in a position to answer this query satis-factorily, and they refrain from answering it directly, though their action in raising their rates of premia affords an indirect indication that the estimate hitherto relied on by them has proved in practice too fayourable to the insurer.

#### EXODUS OF SPRCIE.

We read in the columns of the vernacular press that there has been a considerable demand for gold in exchange for notes since the beginning of the year, the quantity of paper offered at the banks for that purpose being from three hundred thousand to eleven hundred thousand yen daily. At that rate, the stock of gold held by the Bank of Japan will soon show a reduction of some thirty million yen. The thing is, of course, attributed to activity in the import market, large quantities with it so as to avoid interfering with the having as yet any investments abroad, treaty rights of other Powers.

having as yet any investments abroad, nor any large payments to make in foreign countries in consequence of a foreign debt or of foreign investments in Japan, her affaits are regulated by the eleniquingly from of supply and demand.

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

#### DEFENSIVE ARMOUR FOR JAPAN. ESE SHIPS BUILT IN KNGLAND.

The results now obtained with defensive armour in England are very remarkable. We have before us some photographs and tables showing the effects produced upon two of Cammell's armour plates by artillery practice on board H.M.S. Nettle, at Portsmouth, last October. The subject sounds technical but the facts are intelligible to every reader. The first of the plates experimented with was of Cammell-Harveyed nickel steel, its dimensions were 8 ft. long, 6 ft. wide and six inches thick, and it had a timber backing 4 ft. to in thick at the top and bottom and 5 ft. to in, thick in the centre. At this target five rounds were fired from a 6-in. breach-loading gun; the projectile, which weighed 100lbs, being of Holtzer armour-piercing steel; the charge of powder, 48lbs.; the velocity, 1960 feet per second; the energy, 2,663 foot-tons and the range 30 feet. It seems almost incredible that a plate only six inches thick could stand five such stupendous blows, but, as a matter of fact, the greatest penetra-tion achieved was only 2% inches, or less than one half of the thickness of the plate, and the plate, so far from being destroyed, showed only slight surface cracks, and had no bulge higher than 12 inches on the back. The behaviour of the other plate was even more remarkable. Its material was Cammell's tempered nickel steel, and its dimensions were 4 ft. long, 4 ft. wide and four inches thick. The manner of setting it was remarkable, for though supported at the top and bottom by 6 inches of oak, a g-inch space separated the rest of the plate from the backing. In fact, the plate had no sup-port at the parts where it would have to bear the impact of the shot. gun used in this case was a 5-in. B.L., firing a 50lbs. Palliser chilled cast iron shot, and three rounds were fired, the charges being tolbs, 15½ and 15½lbs respectively; the velocities, 1406 f.s., 1750 f.s. and 1750 f.s., and the energies 558 f.t., and 1061 f.t. Here are the effects produced on the plate :-

Effect on front. Effect on back.
Round 1.—Yplash on face of plate. Nil.
Round 2.—Plate indented \$." Bulged slightly, do, do, Effect on back. Bffect on projectile.

We have never read of finer power of resistance than the above. The new Japanese battle-ships, now under construction in England, are to have the class of armour represented by this 4-inch plate.

#### THE " YOROZU CHOHO."

The English column of the Yorosu Choho is one of the curiosities of the capital of Japan. One does not know whether a nation can be taken seriously when even one of its units is found to pen such extreme silliness as that wonderful column contains from time to time. However, the explanation doubtless is that children who have learned a little of some foreign language are apt to lose their bearings in Japan, and to be appointed to tasks where they are entirely out of their times supplying material for columns like an undisciplined mob, whose powder was those of the Yoronu Choho. In either case the result is very lunny, but does not contribute much to the reputation of the Japanese as a grown-up nation.

#### ASSASSINATION OF A MARINE AT KIAO-CHOU.

In view of the explicit character of the telegram relating to the assassination of a German marine at Tsi-mo, it is scarcely possible to hope that the rumour will prove to be false on this occasion as was the case recently with a similar report. Without desiring in any way to minimize the heinousness of such occurrences, however, we may observe that the death of a marine belonging to what must virtually be regarded as a foreign army of occupa-tion, can not be placed in the same category with the murder of a missionary or a peaceful trader. The feelings aroused among the Chinese by the presence of German troops on the soil of their country are probably of such a nature that the Chinese Government can not reasonably be expected to control them, or justly held altogether accountable for their violent display. Of course, until we know the exact circumstances under which the alleged assassination took place, we can not form any definite opinion about its character, but, speaking generally, the German marines at Kiao chou represent an armed force hostile to China, and the responsibility of providing for their safety de-volves chiefly on themselves. That, of course, is the view that Germany will take of the matter. The Chinese Government is bound by treaty to protect the lives and properties of German subjects visiting China for purposes of commerce or religious propagandism, but is scarcely bound to protect the lives of German soldiers forming part of an aggressive expedition against Chinese territory. On the other hand, there is always the feeling that any display of leniency in dealing with such matters may lead to disastrous con-sequences in China, so that Baron von Heyking will probably adopt a stronger line than the mere facts of the case seem to warrant. It is very much in the interests of the Chinese empire that the people should treat the Germans with all civility and deference, but the people probably do not appreciate the fact.

#### JAPAN AND WESTERN POWERS.

The editor of the Jiji Shimpo will not be surprised to find that the series of articles recently written by him and epito-mized in our Weekly Summary on the 31st ult. have attracted some attention. Neither will he be surprised to find that their spirit has been misinterpreted. is almost inevitable that writers in the foreign local press should fall into errors when attempting to criticise the contents of vernacular journals which they can not read in the original. Elsewhere the habit of serious critics is to inform themselves accurately about the matter they are about to discuss, but foreign critics in the Settle-ments of Japan are seldom concerned about such troublesome preliminaries. They just go ahead, and if they can whip up their superficialities into a little froth of seeming smartness they are quite happy. For example, an English local

Japan to contend with Europe in arms. If the statesmen's thoughts run in this vein, then the madness which is the precursor of destruction has seized the nation and God help Japan." That, of course, is very smart, and we can imagine that its composer, when he saw the glowing words in type, experienced the pleasant sense of warmth down the small of his back which Captain Cuttle's "way of putting it" excited in Mr. Toots' vertibree. But he might just as well have been discussing a new method of scavengering for all the rele-vancy his remarks possess. The Jiji Shimpo's articles were the very reverse of bellicose. At almost wearisome length the writer insisted that the prime object of providing a strong fleet for Japan should be to avert the danger of war. To be well armed, he explained again and again, was the best possible guarantee against attack, and he instanced the case of England, who, with the most powerful fleet in the world, not only secures for herself immunity from molestation, but is also notably slow to put forth her great strength. He further expressed the profound reluctance that every Japanese must feel to contemplate such a contingency as a disturbance of the friendly relations existing between this empire and European Powers, but unfortunately such possibilities, he said, had to be taken into account by every thoughtful student of the times. In short, it would scarcely have been possible to advo-cate an expansion of armaments in a less truculent tone than that adopted by the Fiji Shimpo, so that when the Yokohama critic talks of the dementia which presages destruction, he simply shows that he has not read the articles which he undertakes to discuss. Nothing is easier, of course, than to preach platitudes from the editorial stool; to tell Japan that her true policy is to develop her material resources, and to admonish her to leave the business of war to those that are foolish enough to concern themselves about it. That sort of vapid talk is nothing better than venerable twaddle. The modern intercourse of nations teaches one unmistakable lesson, namely, that the measure of a country's safety is its ability to defend itself against aggression. It is a mere banalité to tell Japan that she alone among the States of the world may rely on the forbearance of her rivals. She has before her eyes plain evidence of the consequences of such fatuity. Had China possessed a squadron or an army of ordinary efficiency, would she now be undergoing vivisection at the hands of every Powerthat has an appetite for her territory? It is of no use preaching to the Japanesea line of conduct diametrically opposed to the practice of European States. We all talk of the gospel of peace and the brotherhood of nations, but we make ready unceasingly to cut one another's throats and to save our own jugulars against the murderous hands of our neighbours. The unhappy necessity confronts Japan also. That she could stand up alone against Europe sounds an extravagant proposition, but there can be no doubt that the duty of her statesmen is to make her so formidable that no European Power, or combination of European Powers, will readily molest

#### FOREIGNERS AND SHARES IN TAPANESE COMPANIES.

The well-known barrister, Mr. Masujima, contributes an essay to the latest number of the Far East, the gist of which is that the acquisition of shares by foreigners in Japanese joint-stock companies of limited liability is not forbidden by the Treaties. Briefly speaking, Mr. Masujima's contention is that the only veto imposed on the proceedings of foreigners outside the Settlements is that they must not engage in trade; that to purchase the shares of a commercial or industrial company is not engaging in trade, and that, consequently, such purchases are lawful. We should be glad to endorse Mr. Masujima's view, but his arguments fail to convince us. Take, for example, a cotton-spinning company with its mills at Moji. Such an association is unquestionably carrying on an important tradal operation outside the Settlements. Can it be honestly pretended that every one of the shareholders is not assisting to carry on the trade? If the acquisition of the Company's shares be lawful for foreigners there can evidently be no quantitative limit; if all the shares came into the market, all would be purchasable by foreigners. But we should then have a party of aliens running a cotton mill outside the Settlements. Does Mr. Masujima intend to affirm the legality of such # proceeding? Apparently his position is that shares are personal property, and that a foreigner can hold them "without becoming part and parcel of the corpora-tion"; "without his personality being merged in it": that, in short, the legal existence of the corporation is quite distinct from the legal existence of the shareholders. Well, that is a very nice point of law. Who are the owners of the corporation's property? Does it not belong to all the shareholders pro rata? If the corporation decided to wind up its affairs and sell its buildings and their site, would not the proceeds be divided among the shareholders? Again, would not the foreign shareholders be entitled to attend the meetings of the Company and vote for or against any proposition relat-ing to the conduct of the business or the sale or purchase of real property by the Company? Mr. Masujima's line is so fine as to be impalpable to us. He says, for example, that "the purchase of curios anywhere in Japan has never been con-sidered contrary to law," and that there is no difference between curios and shares. But we should like to know on what authority he pronounces for the legality of the purchase of curios in the interior. We are confident that no Japanese or foreign Court would recognise the lawfulness of such a transaction under the present treaties. If the purchase were not for purposes of trade, the case would be different of course, but if an export attaining. A funrikisha-man at Shimbashi enamels, and such things for the uses of his business, then assuredly his fellow-merchant is equally at liberty to go and buy tea at Uji or silk in Mayebashi. At any rate, the question discussed by Mr. Masu-jima has little practical interest, for the reason assigned by him in support of the the reason that would deter foreigners mischief, there is mischief in the air, and interference of such a nature must from engaging in them. If the property of counsel to our readers, ultimaginal phrome fatal to the service. If UNIVERSITY OF ILLINOIS AT

invests money in a commercial or manufacturing company, he does not want to have a "legal existence" separate from it. He wants to be able to aid in controlling its affairs; organizing its business; superintending and assisting in its management and auditing its accounts. It appears to us that Japanese publicists do not appreciate the views of the foreigner in these matters. An Englishman, for example, who thinks of putting money into an enterprise, looks, in the first place, at the names of the men that figure as promoters or on the committee. that they are persons of established credit, he is already far on the way to being satisfied. Then he institutes inquiries, and after he has invested, he watches the affair closely, assures himself that the accounts are fairly rendered, or, at any rate, audited by credible experts, and takes care to be kept informed by his broker of everything affecting the value of the shares. How much of all that is possible to an Englishman where shares in a Japanese company are concerned? How many Japanese names does he identify as belonging to capitalists inspiring full confidence in the stability of any enterprise with which they are associated? How can be hope to obtain really trustworthy evidence about the state of a company's accounts or the conduct of its business? It is not for a moment our intention to deny that many Japanese merchants and capitalists are fully merchants and tapinanded deserving of every confidence. We could what we mean is that the average foreigner is quite outside the financial, industrial and commercial world of Japan, and that the time has not yet come when he is prepared to into it without trepidation. Certainly he is not likely, to purchase shares on the strength of a title so indistinct as that outlined by Mr. Masujima. Indeed, we do not believe that any Japanese Company would be willing at present to sell its shares to a foreiguer in his own name. We are acquainted with some rare cases of share owning by foreigners in Japanese companies, but the transactions all stand on that vicarious basis with which foreign holders of real property in Japan are familiar. Capital is a coy customer. The soil must be better prepared for it in Japan before it will trust itself here.

#### TYRE PUNCTURERS.

Cyclists in Tokyo, and Yokohama also for the matter of that, will do well to be on their guard when leaving their machines in a street. We have heard of three in a street. machines which were deliberately mutilated by wanton folk during the past few days. It is supposed that the mischief is done by jinrikisha-coolies who find that their chances of employment are injured by the vogue which the cycle is rapidly merchant may lawfully go to Nagoya, for sees a passenger arrive by train, take his example, and lay in a stock of porcelain, wheel out of the van, strap a parcel to the bar, and shoot off independently of all assistance. Thus the cycle comes to be regarded as an enemy of the jinrikisha, and the coolie is glad to have a slash at the tyre when an opportunity offers, of the Foreign Corps Diplomatique should This is a matter of hypothesis. #### THE IMPERIAL CHINESE MARI-TIME CUSTOMS.

It is alleged that one of the conditions -the chief condition, indeed-attaching to the offer of preliminary assistance now made by Russia to China, is that the control of the Imperial Maritime Customs should be placed in Russian hands. Such a condition would be perfectly natural. If the revenues of the Customs are to be hypothecated to Russia for a loan of 200 million taels, we cannot wonder that she should desire to have the management of the security in her own hands. The general supposition among Englishmen is that the change would be fatal to the splendid service which has been organized and gradually carried to its present state of high efficiency, chiefly by British sub-jects. The apprehension may be well or ill founded. We do not venture to pronounce any opinion. But one source of uneasiness presents itself to us very plainly: it is the tendency on the part of foreign officialdom to interfere in the affairs of the Customs. We observe with great surprise that the N.-C. Daily News not only fails to detect this danger, but even helps to aggravate it. Our contemporary lends its columns to the circulation of a statement, "on high authority," that successive British Ministers in Peking have been instructed to take no action without previously consulting the Inspector-General of Customs, and insists, very justly, that an instruction of the kind is imprudent and ill-judged, seeing that the Inspector-General is bound to work in Chinese interests before all things. But have such instructions really been issued? To us the thing seems quite incredible. Very possibly, indeed, Her Majesty's Representatives in Peking have been instructed to keep themselves in cordial rapport with the Inspector General as an enlightened and far-seeing exponent of Chinese views, but that they should regulate their acts by his advice is an altogether different affair. Such an injunction would be distinctly injurious to the Inspector-General's credit with the Chinese, for it would present him to them in an equivocal light. We are astonished that a statement of the kind should be lightly made in a public print. In the same columns we read the following :-

We write advisedly when we say that the mem-We write advisedly when we say that the mem-bers of the Deploratic Body at Peking do not quarted with the English lines of the organisa-tion; but they do desire some sufficient represen-tation on the Staff at Peking, and a less limited recognition than is now believed to exist there of claims to advancement apart from those of family, subserviency, or private friendship. It is indeed, admitted that on the whole the Impectorate-Geneadmitted that on the whole the Inspectorate-General has exercised his partonage with remarkable ability and impartiality; but the members of the D-plomatic Body have now come to consider that it is desirable that one or two more Commissioners should be added to the Inspector G-need, to form an advisory board primarily for all matters connected with financial management and promotion; they believe that this would be helpful to the service, and is a just concession in view of the increasing extension of the service, the many interests represented, and the inevitable change within the next few years in the personality of the within the next few years in the personality of the Inspectorate-General.

It really seems as though our Shanghai contemporary endorsed the idea embodied in this paragraph; the idea that the views

the Chinese find that by leaving the management of the Customs in the hands of December 23rd, says that Japan appears their foreign employés, a door in opened to be the favourite source of exciting agement of the Customs in the hands of for meddling by the Representatives of Western Powers, they will simply take the management into their own hands. That is as certain as anything human can be certain. The N.-C. Daily News does not appear to consider that phase of

that it has seemed that there must have been a mistaken notion at Peking that their influence was growing too strong, or involved some prejudice to the head of the service, or to younger men whom he wanted to promote. The British Legation at Peking might sometimes have taken more interest in these movements than it has done. While other governments have at times interested themselves on behalf of their nationals, we are unaware of a British Minister having orged the claims of any one of his countrymen.

The suggestion here made is still more startling-that the British Minister should interest himself directly in the promotions, appointments, and distributions of the Customs officers, as "other Governments have done." So far from approving such a recommendation, Englishmen who take the trouble to think will condemn it round-It is eminently to the credit of the British Minister's sagacity that he has re-frained from all such action. If other Ministers have been less discreet, their sphere of interference has happily been small, and Sir Robert Hart has known how to maintain his absolute independence without offending those that threatened it.

#### TAPAN AND THE FAR EAST.

Renter's Agent in Yokohama is responsible for the telegram sent to London on December 21st, to the effect that . large Japanese naval squadron had left Nagasaki. It was a pure "bunder," but naturally people in Europe regarded it as a simple statement of fact, and never doubted it for a moment. Truly the public has reason to complain of the extraordinary canards foisted upon it by Reuter's agents. Japan has been sitting perfectly quiet throughout the whole perfectly quiet throughout the whole course of the recent complications. She have not moved a ship or made a protest, yet the telegrams despatched to Europe has created such a false idea of her attitude that the proprietor of the New York Herald actually wired instructions from Paris to have a war correspondent sent out. The correspondent is now in Japan, very much surprised, doubtless, to find that not the slightest indications of war are apparent. Reuter's agents are not alone to blame, however. A correspondent of The Times in Kobe forwarded the following telegram on the 22nd of December :-

The news of the occupation of Port Arthur has disturbed the Monistry. Long Cabinet Councils have been held, at which unlitary officials have been present. The newspapers are nouplussed at the situation in the For East.

Where did this Kobe correspondent discover that " the news of the occupation of Port Arthur had disturbed the Japanese Ministry," that "long Cabinet Councils had been held" and that "military officials had been present at them"? We in Tokyo neither saw nor heard anything of these occurrences, Digitized by Google

The North German Gazette, writing on rumours, and continues thus-as quoted by the Berlin correspondent of The Times :-

"It is a matter of course that in the pushing island kingdom of the Far East the Government and people cannot be indifferent to recent events on the Chinese coasts. On the other hand, there would appear to be no adequate foundation for the little and a supplier which the course a bid. does not appear to consider that phase of the question. A little further on it writes:

Promotions and appointments have been undenthedly made in recent years that have been wised that the rolls of an autocrat is to act and creatically, and that have been, to say the least, surprising to the general foreign public in China; while able men have been shifted here and there, and induced to retire, or basished to outpott, so that it has seemed that their must have been smistaken notion at Peking that their influence was growing too strong, or involved some prejudice to

Referring to the above The Times' correspondent says :-

The organ of the German Government does not enlighten "the Press of Europe" as to whether Japanese policy would be altering its character if it were to take a leaf out of the German book and insist upon "permanent guarantees" for the security of its interests in the Shan-tung Promontory. Japanese interests in China are considerably greater than those of Germany, and the "mailed firt" of Japan, an represented by its powerful navy, is materially heavier than that of its newest rival.

We may append here the following telegram sent from New York to The Times on December 23rd :--

Times on December 23rd:—

Mr. Denby, American Minister to China for the last ten years, publishes a remarkable letter in the Herald on the present situation. Rew men have a better knowledge of China. He thinks that the action of Germany has produced a crisis earlier than was expected, and that Germany will remain at Kizo-chon, Russia at Port Arthur, and Japan at Wei-hai-wei, while England will probably seize Chusan and control Shanghai. It was known in Peking in 1895, says Mr. Denby, that Russia had promised to maintain the reigning family on the throne and preserve the Empire. This promises he now hreaks. He believes that Germany acts with the consent of Russia and Krance, that these three Powers will carry out their programme, and thus England will not interfere but recede, as formerly, before French and Russian aggression. China's autonomy he thinks gravely menaced, if not lot for ever. Mr. Denby arges the American Guvernment to protect American trade interests and insist on equal tariffs where now entitled to them. He draws a gloomy metare of China's future—the country divided, the dynaxty falling, "ber ports turned into nontrally bustle for resses, her provinces the camping ground of after soldiery"—but the Givernment is still expected to remain inactive.

#### INSTITUTE OF YOURNALISTS AND THE ENGLISH PRESS IN JAPAN.

The Institute of British Journalists has adopted, on the motion of Mr. Frederick Dolman, a resolution in favour of approaching the Foreign Office for the protection of British journalists in Japan, seeing that, when the Revised Treaties go into force, foreigners will come within the purview of the law which forbids the publishing, owning, or editing of a newspaper by any but a Japanese subject. Mr. Dolman, when introducing the resolution, quoted a letter which he had received from Mr. H. Tennant, editor of the Japan Gazette. The next thing we shall hear, of course, is that the Foreign Office, replying to the Institute, has stated that the matter is already under due consideration. There is no special reason why the Institute of Jour-nalists should not interest itself in this matter, for it doubtless believes that the business of its confrères in Japan is in there is no occasion whatever for any which was belief at the time of his decease,

action of the kind. The Japanese Government may be trusted to deal liberally with this problem of foreign journalism, as well as with various other problems of a far more complex character which are now awaiting solution preparatory to the operation of the Revised Treaties. Mr. Tennant, when he originally took up the subject, fell into the singular error of asserting that the clause in the Press Law limiting the profession of journalism to Japanese subjects, had been inserted by the Diet in its 1896-7 session with a view to the operation of the Revised Treaties. Had that been true, it would of course have turnished just cause for uneasiness as indicating an illiberal spirit on the part of the Japanese Legislature. But it was not true. The clause had stood in the Law for many years, and had been inserted without any reference whatever to Treaty Revision. We do not know whether the Institute of Journalists was misled in that respect, but the point is of little consequence, for the action of the Institute is quite belated and superfluous.

#### " HALF-CIVILIZED BARBARIANS,"

Captaid Mahan foresees a time when China, India and Japan will overflow, eastward or westward, and become a serious trouble to the white race. Mr. Pearson had already ventilated a similar view, and Mr. H. W. Wilson, reviewing Captain Mahan's work in the *Pall Mall*, says that the general soundness of Mr. Pearson's views is proved "by the meteoric appearance of Japan among the world-Powers." "We still wait, however," Mr. Wilson adds, "to see how the half-civilized barbarian will fight against the best European material."
"The half-civilized barbarian" is very good. It takes a Mr. Wilson to speak of the Japanese in such terms. However, that might be passed over as mere ignorance did it not assume extreme comicality in the mouth of a man undertaking to draw a horoscope of the Orient's future. The presumption of such men is magnificent. The danger of being misled by them is (the chief peril that the white race has to apprehend. Meanwhile, we wonder why it has not occurred to Captain Mahan, or Mr. Pearson, or Mr. Wilson that there are four cardinal points of the compass, not two only. Why should compass, not two only. Japan's overflow be limited to east or West? Why should it not take place in northerly or a southerly direction? Nations do not expand towards the north, it is true, though Japan was on the point of doing so two years ago if Russia, France and Germany had not stepped in. But the south is a natural direction for Perhaps the political proexpansion. phets might find that speculation worthy of consideration.

#### DEATH OF ADMIRAL TSUBOL

We regret to have to announce the death of Vice-Admiral Beron Tauboi, Commander of Yokosuka Admiralty. Deceased had been in a precarious condition since last Summer and is reported to have expired at his residence at Shirokane-dai-machi, Shiba, Tokyo, on the atternoon of the 30th ult. Vice Admiral Tsuboi took a prominent part in the late China War, especially at the naval engagement in the Yellow Sea, when he was in command of the first flying squadron, his flagship being the cruiser Yorking. After the war he took command of the Japanese some kind of jeopardy, and that to render Standing Squadron and was then transferred to assistance is a duty. But the truth is that the command of the Yokosuka Port Admiralty,

# EDUCATION & RELIGION IN JAPAN.

OME views recently expressed by Marquis ITO on the subject of religion and national education were translated into the columns of the Japan Zimes, and being there read by foreign missionaries, seem to have inspired a feeling of uneasiness. Marquis ITO insisted on the necessity of excluding religion from the sphere of national education, but the dictum appears to have been interpreted in the sense that his Excellency is altogether opposed to any connexion between religion and education, whether the latter be national or private. We can well appreciate and sympathise with the disquiet that any such declaration emanating from the Prime Minister must cause in the minds of missionaries, but, on the other hand, we can not refrain from regretting who read into official utterances a significance which their language does not warrant. National education is one thing; private education, another, and a radically different, thing. Everybody, we presume, is agreed now-a-days that it is a moral outrage to employ public funds in promoting any particular form of creed. No tdistinction is made between tax-payers: all have to contribute equally whatever be their religious belief, and it follows that money thus contributed must not be applied for the purpose of inculcating a religion which some of the tax-payers certainly do not profess. Private education stands in another category. If the law grants liberty of conscience, it necessarily grants also the privilege of organizing schools where parents can have their childso minded. We can be perfectly sure that Marquis ITO recognises that principle. In fact, private education in Japan is entirely beyond the range of official scrutiny, and we fail to see why any doubts should have been suggested by the Marquis' statement.

There is, however, one point to which the missionaries might advantageously direct public attention. It is that private schools in Japan receive no official recognition. There are several admirable schools organized and conducted by Christians, where the students get far betthat whatever advantages the place offers had cared to ask for it, we are obliged to ter education than that obtainable at the subject to German jurisdiction within the taking the character of the object lesson tions are wholly ignored by officialdom. Iimits of Kiao-chou. They will retain that has been given to Peking, or the To have passed through one of the public their extraterritorial privilege just as they great increase of security that has been schools confers certain valuable rights

and immunities, but to have passed of a Western language has to derive his millions for maintaining the Navy at the through a Christian school counts for nothat of the Morning Star, for example. It has a staff of some fourteen foreign professors, all men of the very highest attainments, who would hold leading rank in the best educational circles in any European nation. It turns out every year a number of graduates admirably instructed; history and so forth; lads, in short, who as official recognition is concerned, the graduates of the School of the Morning Star might as well have received no educacations which are not admitted at all in public schools is authoritatively fixed, and the standard attained by a graduate being consequently known, there can be no doubt about the value of his certificate; whereas the curriculum of a private school is arbitrarily determined by the faculty, and the State having no voice in the matter, not unnaturally hesitates to acknowledge the result. But that is plainly a difficulty of a very partial character. The private schools would be perfectly willing to receive official inspection, and to submit their curricula for official approval, guaranteeing to maintain them at a standard at least as high as the curricula of the public schools. The effect of the present system is to impose a terribly severe handicap on private educational enterprise. As a general rule, Japanese youths can not afford to go to a private school since to have graduated there confers no title to the appointments which are in most cases the aim of education. Japan does herself great injury by this want of liberality. Education is of prime importance to her in her new career, but her resources are so slender that, in the great majority of cases, she can not afford to employ foreign teachers of foreign languages, and her youths have to be content to learn English, French, German and other Western languages from Japanese teachers. There are many Japanese who can claim to be well versed in a foreign tongue, but if all that are competent to teach it were collected, we doubt whether the whole empire could muster a score, and of these not one is engaged at the schools, for the emoluments otherwise procurable by men of good linguistic accomplishments are many times larger than the bonoraria of teachers. It results that in of every thousand, the Japanese student this had to be added a sum of about 133 proving as productive as was anticipated.

whole instruction from a man whose new standard. Thus the scheme of armathing. Yet, so far We do not intend to cast any manner of reproach in the teeth of the floated, and since an addition of 125 Japanese when we note these facts. The million yen had been made to the national inference we seek to emphasize is simply The graduation certificate of a that every possible encouragement ought public school confers on its holder qualifi- to be given to foreigners who come to 340 million yen, involving yearly payments Japan for educational purposes, after the the case of the graduate of a private manner of the missionaries; foreigners alone. Hence the various increases of school. There is, of course, a reason for who, partly because of their own devotion national outlays according to the postthis discrimination. The curriculum of the to a cause which renders them indifferent to gain, and partly because of the aid given by fellow-enthusiasts in Europe and America, are able to devote their services to education without making any demands of more than a merely nominal character on Japanese purses. Nothing should be spared to encourage these men. They are simply invaluable in Japan, and when, instead of hastening to recognise their labours, the Japanese Authorities ignore them completely, and treat the splendid schools organised and conducted by them as institutions unworthy of even official classification, they display a want of discernment which seems to us very inconsistent with their usual character. We do | yen, and if we compare that figure with the not know whether the missionaries have 641 millions shown in the above table, we ever taken up this subject earnestly and find a deficit of 38 millions on the revenue industriously. If they have, the public has side. But there are some facts to be never heard of the effort. We should at least have expected a monster petition ment's estimate did not include any apsigned by every missionary in Japan.

# TAX-PAYING CAPACITY OF THE JAPANESE.

N the opening essay of the last number political and financial situation of Japan with much thoughtfulness and sobriety, millions are deducted on these accounts, The absorbingly interesting fact is that there is still seen to be a deficit of 144 the nation now finds itself at the parting million yen. Besides, such deductions of the ways. It has to choose one of two can not be properly made if we desire to routes. Either it must abandon the pro- arrive at a just conception of the actual gramme of expansion elaborated by its state of affairs. We can not omit either statesmen and endorsed by its people after the expenditure for keeping the Navy up the war with China, or it must consent to to its new standard, or the grants in aid make larger pecuniary sacrifices. Speak- of navigation and ship-building, or the ing in round numbers, the regular expendi- assistance required for developing Fortures on account of the Army and Navy mosa, and we find ourselves confronted by on their increased footing were estimated a deficit of 38 million yen on the revenue at 42 million yen annually, against 161 side. Moreover, the four new sources of nine hundred and ninety-nine cases out millions, the ante-bellum figure; and to revenue devised by the Government are not

call for an addition of 39 million yen to estimated under that heading. Finally, aggregating 213 million yen had to be debt on account of the war, the total increase of the State's indebtedness would be of 17 million yen on account of interest bellum programme, would be :-

Additional cost of maintaining Army Navigation
Additional appropriations for service of National Debr(taking into account the gradual amortization) ...... 121 Geants to Formosa ......

Total ..... 641

To meet these additional outlays the Government proposed four fiscal measures, namely, two new taxes-a Registration Tax and Trades Tax-and two increases of taxes in the cases of tobacco and sake. The net estimated increase of revenue from these four sources was 264 million noted here. The first is that the Governpropriation for keeping the Navy up to its new standard, whereas we have allowed 131 million yen annually on that account. The second is that the Government's forecast of aids to navigation, &c., was only 3 millions; the third, that no allowance on of the Far East, the editor reviews the account of Formosa was set down in the Government's plan. But even when 231

Changes made by the Diet in the Registration system reduced the income from that source by 11 million yen; the Trades Tax seems likely to yield a million less than the estimate; the tobacco monopoly will, it is said, fall short of the forecast by fully 2 millions. Here then is a total difference of 44 million yen, and if we add it to our previous deficit (38 millions) we have an aggregate excess of expenditure amounting to 424 millions. Are there no new sources of revenue to be set against that deficit? Certainly there are. There is first a sum of from 6 to 8 millions from the new Tariff. There is secondly an addition of fully II millions in the income from State Undertakings-i.e. five per cent, on a sum of 126 millions which is to be spent on the development of railways and telephones under the new programme. And there is thirdly the natural development of the Ordinary Revenue. Omitting the last item, however, since it will probably be absorbed by the natural growth of the Ordinary Expenditures, we may summarize our results thus :---

Total additional annual outlays under all the headings of the pert bellum programme (including Formosa) ... Total addition to revenue from four sources devised by the Ito Cabinet in 1895, applying the reducition 641 applying the reductions made by the Diet and the Millions deficits indicated by ex-Additions on account of Tarill and Revenue from State Undertakings Aggregate additions of Revenue ...

Deficit on side of Revenue ....... We do not see how these figures can be traversed, or how the fact is to be escaped that an additional revenue of, say, 25 million yen has to be finally provided. The Budget compiled by the MATSUKATA Cabinet for 1898-9 shows a deficit of income amounting to 174 million yen, without taking Formosa into account, and 23 millions if Formosa be included. It may therefore appear to our readers that our millions is too small, but the fact must be noted that our figures include 18 million yen of revenue from the Tariff and from State Undertakings, neither of which assets are immediately available. By the fiscal year 1903-4, the deficiency of revenue would certainly not be in excess of our figure, unless the ordinary expenditures of the State in the meanwhile show increments not now anticipated. Still there is no gainsaying the fact that additional revenue must be provided or the post-bellum programme will have to be abandoned. Now is there any difficulty in obtaining additional revenue? That is the question which one hears perpetually propounded and from the nature of the answers would suppose that the taxpaying capacities of the people had gin that can be still drawn upon. We about 13s, sterling, the equivalent of 71 Japan wants to play the rôle of an import-

may consider this problem in various yen to-day. Hence the money value of ways. We may first compare the actual the land tax in 1863 was 165 million yen. sums contributed by the Japanese tax- The money value, however, is a fallacious payer and the sums contributed by the criterion. We must consider quantities tax-payers of other nations. The results rather. We must say that out of an of the comparison are startling, for we aggregate crop of 30 million koku of rice, find that while Japanese subjects pay only the farmer paid 22 millions by way of taxes. 2.30 yen per head in the form of direct taxes, British subjects pay 20 yen, French 221 yen, German 71, and Belgian 91. Such State. His barley, beans, tubers and figures are unsatisfactory, however, since other agricultural produce escaped scaththey take no account of the important factor, national wealth. An Englishman may have less difficulty in paying 20 yen than a Japanese has in paying 2.30 yen. Another way of considering the matter is to set down, side by side, the development of the nation's wealth during recent years and the rate of increase in the taxes. The Far East adopts that method, and furnishes the following interesting table:-

	1892.		
Railways	[,000,	1892	8,053
Steamers (tons)	1,000	1895	5.064
Capital of Banks	1,000	1896	3 364
Capital of Companies	1,000	1896	5 343
Exports	1,000	1896	3,123
Imports	F,000	1896	4.310
Correccy	1,000	898	1.573
Rice	1,000	1800	1,179
Silk	I,000	1896	2,458
Tea	1,000	1896	1.577

Cetton	1,000	1896	15.920
(68 million yen)	1,000 (90 milli	011 <i>9#11</i>	1,324
Dat there Covers			

But these figures, too, are unsatisfactory since they furnish no information as to the incidence of the increased taxes. Thus when we say that the yield from taxes has grown by 33 per cent. during 15 years in a country where tradal and industrial enterprises of all kinds are developing by leaps and bounds, we assert a proposition so natural as to be scarcely worth consideration. But when we further note that the greater part of the increased yield has been due to the imposition of a tax on alcoholic liquors, which still escape with the absurdly small impost of 5 pence a gallon, we see at once that the people's tax-paying capacities have developed out of all proportion to the strain put upon them. estimate of an ultimate deficit of 241 to 25 All this is somewhat vague, however. The question we desire to answer is what: amount can the Japanese people contribute ing a tax of a shilling a gallon on refined to the State Exchequer without serious inconvenience? It appears to us that one of the simplest and safest ways of answering it now receives, and, as the Jiji Shimpo is to consider what they actually contri- points out, since the lower orders do not buted in pre-Restoration days. There is drink refined sake, they would not feel no difficulty in determining the main the impost. With regard to tobacco, we figure, at all events. In 1863, a table was entertain no doubt that the present system compiled showing the revenues collected of a monopoly will by-and-by be abandonfrom their fiels by 264 feudal nobles, ed in favour of the English plan of passgreat and small, exclusive of the Shogun. ing the leaf through Government storeamounted to over 4 million koku. Let us annually, instead of the 6 millions net obclasses paid annually for the support of nation are ample, and that the revenue of been stretched to their limit, whereas the feudal nobility 22 million koku of rice. the State might be raised to 200 million in truth there is an immense mar- The koku in 1863 was worth it bu, or yen without the least inconvenience. If

In other words, eleven fifteenths of his rice crop went into the exchequer of the less, but of his rice more than two-thirds were taken from him. The vield of rice to-day is about 39 million koku. Twothirds of that amount would be 26 million koku, representing over 280 million yen, whereas the land tax actually paid is only 38 million yen. The significance of such figures can not be minimized. It may be urged that out of taxes aggregating 91 million yen, the farmer now pays 38 millions, but if that proportion looks large, the fact remains that he paid more than seven times as much in feudal times. Nor does it appear that his lot was then particularly hard. On the contrary, the officials, recognising in him the chief source of the State's revenue, treated him with great consideration. II special levies had to be made for war purposes, the merchant, not the farmer, was required to pay, and, as a rule, there does not seem to have been any discontent among the agricultural class unless they were subjected to special exactions by dishonest officials. We see, thus, what the farmers actually paid before the Restoration, and we can have no difficulty in estimating their capacity to-day. The Land Tax might easily be doubled without causing any distress. Then there is the Saké Tax, concerning which the Fiji Shimpo writes so persistently. England raises a revenue of 250 million yen annually from taxes on beer and spirits and 100 millions from tobacco. The corresponding figures in Japan's case are 29 millions and 7 millions respectively. There can not be the slightest doubt that these sources of income will one day be exploited with more courage. By impossaké, the State could obtain an income of 80 million yen instead of 29 millions which The total was 18,580,593 koku of rice. houses and levying a tax on it in transit. According to the most accurate calcula- Twenty sen-or 5 pence-per lb. would tions, the revenues of the Shogunate yield a revenue of some 18 million yen put them as 31 millions, however. Thus tained by the monopoly. It is abundantly our final result is that the agricultural clear that the tax-paying capacities of the ant Power, she must put her hand in her pocket. Judging by the noise that is made about adding a couple of millions sterling to the revenue, one would imagine that her resources were already strained to the utmost and that she found herself in embarrassed circumstances, whereas among all the States claiming a place in the comity of civilized nations, her national burdens are conspicuously the smallest. In truth, comparison is almost impossible so great is the difference. Germany, for example, which is probably the most economical Power in Europe, takes 71 yen per head from her subjects in direct taxes whereas Japan takes only 2.30 yem; Germany's public income represents 134 yen per head of her people, Japan's 2.95 yen; the service of Germany's national debt costs each of her subjects 4.90 yen, whereas the figure in Japan's case is 71 sen; Germany spends 4.85 yen of each of her nationals' income on her army and navy, while Japan spends only 93 sen.

# FOREIGN CAPITAL.

IN a recent issue we translated from a vernacular contemporary the opinions said to be entertained by the foreign merchants of Kobe with reference to the introduction of foreign capital. We now find in the Kobe Chronicle a summary of the remarks made by Mr. WEALE, Vice-Chairman of the Chamber of Commerce, at a meeting of the Committees of the Foreign and Japanese Chambers, held on January aust :-

Without going into the details of the causes that had given tise to the monetary stringency now prevailing, Mr. Weste thought it was obvious that the crisis had now attained a stage where palliative measures of some kind were a necessity. It would be of considerable interest to the Foreign Chamber of Commerce to learn by what means and from what direction relief was viewed as eventually probable by the Japanese Chamber. Amongst other suggested measures they had of course heard of a proposed contraction in the armament extension proposed contraction in the attendent extension scheme, but so far as could be foreseen very little hope was to be entertained in that quarter. Not only would such a departure prove embarrassing from a political point of view, but it was doubtful whether the programme was not already too far advanced to permit of any modification of practical value.
The phase of the problem in which those present

were more directly concerned was trade, and it was naturally to a tendedy from that quarter that the commercial interests of the country would devote their chief attention. That this had to some extent been recognised, was proved by the recent agitation in both the Tokyo and Osaka native agriation in the granting of permission to foreigners to own shares in Japanese enterprises, and by the advocacy by one journal (namely, the Fifl Shimpo) that foreigners should have the right to own land under the same conditions as the Japanese them-

In connection with these two last-named pro-

was apt to be markedly exaggerated. The right to held shares or not was of far less importance to the average foreigner than was commonly sup-posed. He would go so far as to say that without absolute confidence in the securing of equal rights and an equal vuice in the controlling influence of any enterprise, it was in the highest degree im-probable that any foreigner would care to become extensively interested in Japanese ventures. The facility, therefore, was not one upon which it would be wise to base expectations of any important

influx of foreign capital.

To be perfectly sincere, the one and only condition, continued Mr. Wealer upon which such investment could be counted on was the granting to foreigners identically the same rights and pri-vileges regarding the tenure of land as were enjoyed by the natives of this Empire themselves. Even then he would deprecate the notion of there being any likelihood of a "rush" to secure being any likelihood of a "rush" to secure property on the consummation of Treaty Revision. There seemed to be in many quarters a wide-spread belief or fear that in the event of such a concession, an attempt would at once be made by concession, an attempt would at once be made by foreigners to acquire everything most promising in Japan—property, industries, &c., &c., ad infantum! He need scarcely point out to an enlightened body such as he had the honour of addressing, that this was a fallacy unworthy a moment's consideration. No better example of this point could be taken than Great Britain, where it was open to everylody or anybody having the desire and necessary capital to acquire as much property as they pleased. Indeed, the fact was that the benefit derived by the individual lone many, while Japan spends only 93 sen.

The fact is that the Japanese are a little childish in their ideas about finance. They will have to develop a modicum of courage and work on slightly more liberal lines if they really intend to come out of their shell.

They cannot, however, be taken away, and must always remain the asset of the soil in which they have been implanted. That the possession of an interest is any country constitutes as the demanding event effort lowed in the result. a stake demanding every effort towards its pre-servation from outside aggression or interference was purliage an argument that at first sight might appear far felched, but its value had been demon-strated many times ere this, and doubtless would be again before the history of the world came to a

There remained the further alternative of additional frevenment Loans, which, lowever, for various reasons did not appear to call for urgent consideration. The removal of Treaty restric-tions offered an opening for capital so much more natural and interesting that it practically ook precedence of all others

It could not but be admitted on both sides that recurring assistance of some kind was greatly to be desired at the present stage of the country's development. The question was whether it would not be wise to attract it while money in Europe was cheap and plentiful, seeing that capital might at any moment find an outlet for itself in other directions (as, for example, large toans to China) from which it would be difficult to re-divert it.

Owing, perhaps, to the loss of explicitness that all matter suffers in the process of WEALE'S leave something to be desired in points of clearness. They read as as a privilege which, if once granted, would go far to attract an inflow of foreign capital, independently of enterprises already started and organized by Japanese.

would be spent on the acquisition of sites, the erection of buildings, the payment of operatives and so forth. But only a fraction of the funds thus expended would be added to the stock of floating capital; by far the greater part would pass into the hands of the labouring classes, and while materially assisting to promote general prosperity, would not sensibly assist the Japanese themselves to develop the resources of their country. In short, the starting of new enterprises with foreign capital and under foreign auspices, however desirable in the interests of Japan's material progress, would not lessen the embarrassment now felt by Japanese capitalists, who find themselves loaded with shares and bonds which, though possessing a nominal market price and a real value, can not be converted into money because no money is available for their conversion. Hence the Japanese instinctively turn to foreign capitalists, and cast about for means to induce the latter to invest in shares and bonds which, so far as the returns they give are concerned, undoubtedly represent good investments. How do such transactions present themselves to foreigners, however? In the first place, there is the fundamental difficulty relating to the ownership of real property. The shareholders in an industrial, commercial, banking or transport association are pro rata owners of the real property held by the association for the purposes of its business. Foreign shareholders would be excluded from any such ownership. They would stand on a lower plane than the Japanese share-holders. That is a vital objection. In the second place, the foreign shareholder could not take an active part in the management of the enterprise so long as he was exempted from Japanese jurisdiction. He could not assume the responsibilities of control without being amenable to all the laws summarization, these remarks of Mr. that relate to its exercise. There is even a strong doubt whether he is at present entitled to legal recognition as a sharethough he referred to ownership of land holder. It is useless, under such circumstances, to talk to foreigners about buying shares in Japanese companies. Two preliminaries are essential: the first, that foreigners and Japanese should be equal That is not exactly Mr. WEALE'S mean- before the law; should have equal rights ing, we imagine. There are two avenues and be amenable to the same restraints; by which foreign capital can be introduced the second, that the foreigner's title in into Japan; they may be called the arti-the property of the association should be ficial avenue and the natural avenue. The just as valid as the title of the Japanese. artificial avenue is a public loan. With It is understood that a note appended to that we need not concern ourselves for the Revised Treaty between Germany the moment. The natural avenue is the and Japan secures to foreigners the right purchase of shares by foreigners in Japan of becoming partners with Japanese even In connection with these two last-named proposals, Mr. Weals said he should take the opportunity to make one or two hief remarks, more especially as the interest they possess undoubtedly applied more to Osaka and Kobe as forming—to to speak—the industrial backbone of Japan, than to speak—the industrial backbone of Japan, than to speak—the industrial backbone of Japan, than to say other section of the Empire. A very mistaken view was held as regards both these proposals by a large number of Japanese. In the first case, the value of the concessions advocated ese commercial, manufacturing, banking in an enterprise the prosecution of which

foreigners, they will never seriously think of purchasing the shares of Japanese companies. That objection does not apply with equal force to the inauguration of enterprises by foreigners themselves; in fact, it can scarcely be said to apply at all, for the foreigner will be able, as a superficiary, to obtain all the facilities of land tenure that are necessary for industrial or commercial purposes. What the Japanese earnestly desire, however, is, not that foreigners should start tradal and manufacturing enterprises on their own account, but that they should put money into enterprises already started by Japanese, and until the difficulty about real estate is removed, that desideratum will never be accomplished. There would still be something to overcome-the foreigner's distrust of Japanese business methods and Japanese commercial morality. Time alone can remove that obstacle, however, whereas the elimination of the real-estate difficulty is a mere matter of legislation.

# A GERMAN ENGINEER FOR THE IMPERIAL RAILWAY BUREAU.

We gather from vernacular newspapers that a German expert has been engaged by the Imperial Railway Bureau in succession to Mr. C. A. W. Pownall. The name is not given, but the qualifications of the new employé are said to be very high. This will be the first instance of a German engineer's engagement on the Japanese railways, we think. Hitherto, with one or two American exceptions, all the experts employed have been British subjects. It is not to be inferred, however, that any dissatisfaction is felt with Englishmen, or that an engineer of non-British extraction was originally desired. The fact is, we believe, that search was made in England, in the first place, but that, in view of the very high qualifications prescribed, no one of the necessary standing was found willing to accept the salary offered-£1,200 per annum. An Englishman of the desired type could scarcely be induced to give his services for less than £3,000. The Gerthat money being much more valuable their good men are willing to serve for comparatively small emoluments. It is just possible, of course, that the Japanese Authorities may have been to some extent influenced by considerations of military strategy. The German railway system is excellently organized for strategical purposes, and there may be a desire to contrive some similar organization in Japan. does not seem altogether probable, however, for the strategical conditions in Japan are essentially different from those in Germany. In the latter country the basis of all railway organization for military purposes is frontier defence, a problem which need scarcely enter into Japan's conquestions, however, there is certainly plenty of work to be done on the Japanfallen into a condition almost resembling it would be in every way for the country. disorganization, and complaints of traffic congestion are heard on all sides. The enlightened views as his deserve to be considered in the former nominer, goes to advertised in letters of gold.

A compromise has been enected in the sense has been enect trouble will not prove am nable to Ger Digitized by

man management, however. No foreigner, whatever his nationality or capacities, is entrusted with any administrative authority in Japan, and so long as that is the case, no foreigner can be really efficient. The Japanese employers are the sufferers.

# STATE PURCHASE OF RAILWAYS.

The talk about a State purchase of the principal private railways appears to be again reviving. It was heard pretty loudly a few months ago, but evidently had no solid foundation. We do not know that it possesses any greater claims to public attention now than it did then, but, at any rate, it is worth noting as one of the ways proposed for introducing foreign capital. The project is that the Government should raise a loan abroad at 31 per cent., and should devote the proceeds to buying up the chief private railways, as the Nippon, the Sanyo, the Kiushiu, the Kwansei and so forth, taking over their stock on the basis of 41 per cent, net pro-Thus a 50-yen share of a railway paying a dividend of 10 per cent, would be bought by the Government at 125 yen, and there would be a clear gain to the State of 1 per cent., which would serve for purposes of amortization. The main, indeed the only, argument of those advocating the measure is that, under existing circumstances, no money is procurable in Japan to build lines which are urgently needed, whereas if such a purchase were effected, the proceeds would certainly be devoted, in great part, to the construction of new lines. The Military Authorities are said to endorse the scheme, as the only available means of giving an impetus to railway development at present. even supposing that the Government were willing to adopt the proposal, it is by no means certain that the railway companies would consent.

# A NEW PROJECT ABOUT FOREIGN CAPITAL.

The new Minister of Justice, Mr. Sone Arasuke, is supposed to be one of the advocates of introducing foreign capital into the country. The Jiji Shimpo publishes a statement of the ideas said to be entertained by him on the subject. His plan is to increase the capital of the Bank of mans have a great advantage in the fact Japan from 90 million yen to 250 millions, and to allow foreigners to become shareamong them than it is in Great Britain, holders. As to the method of obtaining money direct by means of a loan, Mr. Sone is understood to have no objection were it possible to avoid putting a large profit into the pockets of the foreign lenders or agents. He does not think that possible, however, whereas he does think that if the shares of the Bank of Japan were brought within reach of foreign capitalists, they would find ready pur-chasers. Timid conservatives may object that, were such a plan adopted, the foreign shareholders would ultimately get the control of the Bank of Japan completely into their hands, but Mr. Sone does not regard that objection as worthy of being seriously discussed. His own view is that sideration at all. Apart from strategical the larger the interest obtained by foreign investors in the Bank-which is only another way of saying, the larger their

# THE "SATURDAY REVIEW" AND THE KAISER

The bitterness of the Saturday Review against the Emperor of Germany is vitrolic. Nothing can be worse than the tone of its writings. They do not show the very first symptom of the courtesy which is undoubtedly due from any foreign journalist towards the great nation of which the Kaiser is the head. Probably a good many Germans are considerably distressed and perplexed about their Sovereign's doings, not being quite sure whether his impulsiveness may not plunge the Fatherland at any moment into serious trouble. But no German could fail to be intensely angered and offended by language such as the Saturday Review employs about his monarch. It can scarcely be said, now-adays, that newspapers contribute much towards bringing about the reign of peace and goodwill upon earth. One comment made by the London journal, however, seems well worth quoting:—"Every one agrees now with Ranke that the reason why we beat France in our hundred and fifty years' duel with her was that France tried to do too much; she tried to keep the hegemony of the Continent while attempting to beat Britain at sea, and this double task was beyond her strength. In spite of this historical lesson the German Emperor has just committed the same blunder. Compelled to hold the hegemony of the Continent as a condition of national existence, Germany under his leadership is now striving to found colonies and construct a navy which shall dispute with ours the supremacy of the sea."

# THE KOBE-POKOHAMA CATTLE TRAFFIC.

The N.Y.K. steamer Nagoya Maru, which arrived here on Friday night from Kobe, exarrived here on friday night from Kobe, experienced very heavy weather when in the neighbourhood of Oshima, early on Friday morning—the same storm that visited Yokohama at about 3 a m. that day. We learn that the Nagoya shipped forty-two head of cattle at Kobe for Yokohama, but only aix were landed gives and these months in a mortile. landed alive, and these mostly in a terrible condition. It is full time some steps were taken by the authorities to enforce regulations for the proper saleguard of cattle shipped on cossting steamers, not only in the interes shippers, but out of simple humanity. The system adopted on the N.Y.K. steamers in shipping cattle is simply to tie them up by the horns, on deck, to the rails or bulwarks of the ship, with no rear or side support whatevernot even skids or fillets on the deck to give the poor beasts foothold. As a consequence, in heavy weather, or whenever the ship rolls to any serious extent, the whole of the weight of the cattle is thrown upon their horns, which in cases of very heavy weather, as on the recent trip of the Nagoya Maru, are simply torn from their heads, indicting excruciating torture on the animals and generally ending in their death in ghastly agony. A strong rail should be fixed at the rear of the cattle to afford support in the rolling of the ship, and fillets of wood nailed to the deck to give them some foothold, we is done on all cattle s'eamers between Ireland and England. It is strange that shippers of cattle in Japan have so far been content to pay for the transport of cattle by steamship companies which take no ordinary precautions for the safety of the live cargo shipped,

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

# SUMMARY OF CURRENT JAPANESE LITERATURE.

Japanese scholarship has sustained a great loss in the death of Dr. Mitsukuri Rinsho, so well known as a writer, at the comparatively early age of 52. Born in Yedo, early in life he devoted himself to the study of English and French. On his return from Europe at the beginning of the Meiji era he entered Government service, but at the same time opened a school of his own and engaged in translation. As a teacher he was very popular, and numerous are the public men of to-day and numerous are the public men of to-day who studied under Dr. Mitsukuri when boys. Among the books that he published, the best known are the 微量 , Kansen Kumnō, a treatise on morals; the Bankoku Mhinshi, a New History of the World; the Gatkō sūlron, a generalwork on the Management of Schools; and the Tōkeigaku, Siatistics. He nanslated the whole of the French Code and was one of the principal compilers of the original Japanese Code. In compilers of the original Japanese Code, 1896 he was made President of the Administrative Court (Gyosel Saibansho). He was crested a baron shortly before his death as a reward for his many services. There particulars are taken from the Kohumin-no tomo. Dr. Toyama furnishes to the Taiyo a fuller notice of the life and labours of this pioneer of western learning and civilisation, from which we call the following details:-Most people will remember Mr. Mitaukuri as the translator of the Code de Napoleon and the author of the first draft of the Ispanese Code, few know how proficient he was in English and how great was the impetus given to English studies by his labours. He was the first to compile an English Dictionary, which, after being revised and enlarged by one of his pupils, Mr. Horikoshi Aikoku, was given to the world, and for a long time proved most useful. Among his pupile were Mr. Kıkuchi Dairoku, Mr. Mi-taukuri Kakichi and myself. Dr. Mitsukuri, as teacher of English, was connected with three distinct institutions, namely the 開成所 Kaiseijo, (the former University), the Numazu Military School and the Shizuoka School (under the control of the Tokugawa Shogunate). Dr. Mitsukuri's influence on many well-known men of 10-day was very great. Among these may be mentioned Messis. Nakai Tokusuke, Oi Kentarō. Kishimoto Tatauo, Maejima Mitsu, Shimada Saburō, and Taguchi Ukichi.

Comments on the character of the exhibits at the Third Exhibition of Pictures held a short time ago appear in the Taiyo (No. 24) under the title of "The View of an Outsider." The exhibits amounted to 1,200, a larger number than has been received at any previous exhibias worthy of being forwarded to the Paris Ex-hibition of 1900. The following gentlemen were lavited to act as judges: Messrs Okabe Cho-shoku, Kaneko Kentato, Matsui Naokichi, Tsubouchi Shoyo, Isono Tokusabuoo. Mr. Kaneko is reported to have made the following observations—we do not profess to give the exact words, but their gist:—We are agreed in thinking that artists should be encouraged in producing pictures that show a blending of the three styles (Chinese,Occidental, and Japanese) in an original manner. To expect that the Meiji era should possess a style of its own is quite natural. But there is one point that does not seem to receive sufficient attention from modern artists. best painted scrolls that have been handed down to us the objects are so sketched that they can be seen distinctly from a distance. How clear are the dragon and the tiger in Yeitoku's famous sketch preserved in the palace of Momoyama, None of the objects portrayed in our modern pictures can be seen distinctly six feet away, Sufficient pains are not taken with colouring, nor is there any attempt to make the outline of objects clear.

Mr. Tokutomi said that the progress which had been made was most gratifying, but still despotson, arbitrariness, cruelty, and eventual there was a great want of harmony in the work of the artists. Many of the pictures relatively pears that will illustrate the manner origin of the subject of Foot-binding in China. The back fifty years that will illustrate the manner origin of the subject of Foot-binding in China. The Digitized by UNIVERSITY OF ILLINOIS AT

minded him of the awkward mixture of foreign and Japanese customs incidental to the revolution through which they had passed. The harmonising of styles must, he thought, be de-ferred to a later age. In portrait painting there was a distinct advance. Hitherto Japanese wasa distinct advance. Hitherto Japanese artists have too frequently made no distinction between the faces of men of character and ability like Yoritomo and Hideyoshi, and mere coolies, and not infrequently it has been hard to determine whether the artist intended to represent a man or a woman. In this year's exhibits there is marked improvement in this Many of the allegorical, and what may be called ideal, paintings are very well done.

Mr. Tsubouchi compared the tentative efforts of modern artists to the writers of the "New Style Verses" in literature, and criti-cised certain exhibits in detail. Mr. Okabe said that he was in favour of the greatest liberty being allowed as to style. The exhibits showed a great variety. He did not advocate limiting them. In 50 years' time it would be early enough to decide what paintings were worthy of being permanently retained. He was not in favour of artists explaining their designs to others. It is preferable to allow the public to find out for themselves. The more subtle the ideas embodied the more pleasure will the pictures give to the lover of art.

Messrs Hashimoto and Kawabata were of opinion that in some instances it was dangerous to urge on young artists the necessity of inventing a style of their own, that it was preferable for them to try and imitate some of the great masters in their early days, and not attempt anything new until they were thoroughly versed in the laws of art.

In the Kyōikujiron is published a statement of Mr. Fenollosa's views on the education of the lature, with special reference to the consequences of mixed residence in Japan, of which

the following is an epitome,

There is no denying that the prevailing ideas of Orientals and Occidentals are widely different and in some cases almost irreconcilable, If Japan had only to do as India and Egypt are doing, adopt Western civilisation en masse, her task would be comparatively easy. But abe has not sufficient faith in the perfection and universal superiority of our system of civilisation to follow this course. She has come to the conclusion that a judicious choice of elements is the only safe method to adopt. Now since Western civilization is the result of the keenest competition among different countries, it is undoubtedly very strong. we ask what its strength consists in, the reply is wealth. Our intelligence has all been centred on the one question of how to acquire wealth. Our laws, our governments, our armies, our science, our treaties with each other are all means employed to make ourselves rich. Our ethics are controlled by considerations of profit and loss. I have not included Christianity among the instruments utilised for enriching ourselves, m it is undoubtedly true that Christianity is the chief of all antagonistic influences to the dominant spirit of the agein illustrated by the class of persons who constirate its chief devotees. While welcomed by women and children, it is for the most part treated with cold indifference by the pushing business man of the world. If it could be asserted with truth that Western civilisation is in every respect superior to Eastern civilisation, then the sooner the former were transplanted to Japan the better. But the butth is that a close analysis of our Western system of civilisation reveals the fact that it contains some very weak elements. tendency of our modern civilisation is to place the control of the world in the hands of two or three nations. If nothing interferes with the progress of events, the outcome will be that America will be supreme in the West and Russia in the East. The monopoly of power means

in which the central principle of our civilisation is ant to work itself out. In checking the accumulation of wealth and its consequent power by a select few, even the much-despised socialists

are doing good service.

Our Western civilisation is essentially an external affair. The men who figure most on account of their wealth are not civilised in the true sense of the word. Turning to the East we find that with the absence of the power and influence which characterises Occidental nations, there is culture of the highest kind. The great teachers of antiquity, Christ, Confucina, Chwang-tez, and others all made a deep intpression on the Oriental mind. Christianity has effected nothing in the West compared to what it has done in the East. The same holds good of art and philosophy. In the West art is valued for the sake of the emotional pleasure it affords. In the East it is valued for the ideas it emhodies. If asked to state in one word the difference between the two systems, I whould say that Western civiligation is like an adult that is blind and Eastern like a child that can see. The two can help each other, but their relation to each other cannot be that of persons where one does all the leading and the other all the following. The experience of the adult and the clear vision of the child may be utilised in finding out what is the best path to follow. The experiment that Japan is engaged on is keenly watched by expectant eyes both in the East and the West. To this nation is granted the opportunity of harmonising in a new form all that is best in the two systems of civilsation we have discussed.

In an article on the Japanese fiction of the present day the Waseda Bungaku observes that the most prominent of all the characteristics of Nineteenth Century European literature is the faithfulness with which it portrays real life, This tendency has rendered the realistic novel the most popular of books. Among Japanese imitators of this class of writing Ozaki is perhaps the most successful. Rohan's covels are purely idealistic, and he does not aim at rendering any of his descriptions in a manner that represents real life. He gives the seins to his fancy, not only in the choice of ideas on which to write, but in the invention of methods of expression, which are far removed from all descriptions of actual life. The Waseda Bungaku is of opinion that every novel should have an ideal object, but that its narrative should be faithful to the occurrences of every-day life. The objectless realistic novel, according to the magazine we are quoting, no longer finds favour in Japan.

The Teikoku-Bungaku farnishes an "account of the principles and objects of the two Fine Art Societies known as the Bijulsu-Kyōkai and the Kwaigwa-Kyōshin-kai." The former is conservative, the latter progressive. The establishment of the Kwaigwa Kyoshinkai dates ten years later than that of the Bijutsu Kyokai. The chief object of the creation of the new society was reform. No outsider can regard with complacency the attitude of these two bodies to each other. Instead of recognising each other's merits, they indulge in mutual recrimination. Neither school can be said to have succeeded. the pro-foreign school has neglected to cultivate methods in which Japanese painters excel, and the conservative school has ignored all modern improvement on ancient art. result of all this is that Japan is at present without any real standard of art. Styles are so mixed as to be almost incapable of intelligent classification. The judgment passed on Japanese pictures in Europe many years ago led to a departure from old methods and a serious attempt to vie with Occidentals on their own lines. How far this attempt has succeeded will be made clear by the opinion pronounced on Japanese exhibits at the Paris Exhibition in .0001

At the November meeting of the Shigaku-kai

somewhat obscure. There are not wanting evidences that at times the Chinese themselves considered the practice injurious. For instance, it was forbidden about the beginning of the 🎁 Taing era (the end of the XVI. Century). The first record of the prevalence of the custom is said to date from about A.D. 618.

At the same meeting Mr. Minra Chikaynki read an essay on "The Rights of Parents under Military Rule," which treated of (1) The position of parents under the ancient civil rulers of Japan; (2) the introduction of foreign Chinese laws respecting the rights of Parents; (3) the military system under the Kamakura Shozuus and the way it affected family life ; (4) the systems of domestic government in vogue under powerful barons in Hideyoshi's time; (5) the various changes in respect of the rights granted to parents during the Tokugawa era. The most valuable part of the essay is that which discusses the ancient military system of Japan in its influence on the position of parents in

According to the Zeikoku Bungaku the attempt to improve the Japanese stage, of which we heard so much a few years ago, has practically failed. Even the influence of Mr. Fukuchi has not availed against the conservatism of the chief actors. The writers of dramas and the actors have little sympathy with each other. Hence the alow progress. It is now proposed to found a society to be called the Stage reform Society, whose members shall consist of actors, stage-managers, and play-writers. It is hoped that this combination will insure the carrying out of the improvement that the times demand.

The death of Mr. Morita Shiken, the wellknown writer and translator, is commented on in all the chief magazines. A native of Bitchu, as a boy Morita was a diligent student of Chinese. He subsequently entered the Keiögijnku and afterwards joined the staff of the Hochi Shimoun. Aftertouring in America and Europe. he returned to Japan and devoted himself to a literary life. He was a great admirer of Victor Hugo, many of whose works he translated. He was the master of a rate style. His method of translation was first to master the thought of the original and then to render it in as polished and accurate a manner in possible. Perliaps no one has succeeded so well in showing the capabilities of classical Chinese as a medium for conveying high class Western thought. Cut off at the early age of 37, his death has caused a blank in the literary world which will not be easily filled.

From the Shigaku Zasshi we learn that the Gunjoruiju (群書類從) has proved a great success and is now going through its second edition. In commenting on this work the Shigaku Zarshi saya that proof-reading in Japan is done very carelessly and that even in standard works like the one now under consideration there are a very large number of errata. same magazine notices favourably Mr. Aston's English translation of the Rojiki, recently published in Loudon under the auspices of the Japan Society. The Shigaku observes that though Professor Florenz and others have translated certain portions of the Kojiki, Mr. Asion has the honour of being the first to furnish a translation of the entire work. . \* .

magazine quoted above gives an account of an interesting discovery made at Dokan Yama, a place situated near Tabata Station, between Ueno and Oji, which, it is said, throws additional light on the much disputed question, the origin of the Japanese. A peculiarly shaped cave, called in Japanese tate ana, containing a number of utensils, has been unearthed at the above mentioned place, which found are both well known as belonging to the cave and the ntensils ancestors of the Malay race. The theory established by this discovery, a cordina 16-11-16. shows conclusively that secretain class of the ancient inhabitants of there islands were

Shigaku-zasshi, in that the people known as the Koro-pok-guru or Pit-dwellers of Yezo and the Kurile islands, also lived in various parts of the Southern islands of Japan, and that they were of Malay origin, probably reaching Japan through Formosa, where similar relics to those found at Dōkan Yama are most common.\*

The Shigaku Zasshi relates at some length the difficulties the Russians had in shipbuilding at Toda, in Izu, where they were wrecked in 1854, at the time of the great earthquake. By the aid of Japanese carpenters they succeeded in building a schooner in which they eventually set sail. The kindaess they received on that occasion shows that the anti-foreign spirit, which was so strong in the Shōgun's capital at the time, was by no means shared by the inbabitants of the provinces. The writer of the account has lately returned from a visit to Toda, where he collected a good deal of information bearing on Japan's first attempt at foreign shipbuilding. The carpenters who were employed in constructing the Russian schooner acquired knowledge that served them in good stead in after years. They subsequently scattered themselves throughout the surrounding provinces and became the pioneers of naval architecture in Japan.

The Shakai Zasshi gives an epitome of recently expressed opinions on the prevailing practice of certain newspapers as regards the publication of tales containing immoral details. The Shakai Zasshi suggests that newspapers and magazines should devote a certain portion of their space to the publication of the lives of men of merit and virtue or other matters calculated to prove morally beneficial to their readers. The Mainichi Shimbun has already commenced to adopt this course, and two or three other wellknown organs have decided to follow suit. The Fiyā tō tōhō asks the daily newspapers to devote a column of each issue to news of a moral type. Rare indeed are the occasions, sava this paper, when any prominence is given to virtuous actions. The deeds of the wicked are described in detail, but the good works of the virtuous men and women in our midst are seldom noticed save in a cursory man-On this subject the Waseda Bungaku observes that in its epinion the popularity of the literature which is considered so objectionable is not by any means to be considered as a proof of the depravity of readers. Tales of vice are more interesting than tales of virtue, because the former deal withrare incidents. Peoplegrowtired of reading of actions that are commonplace. It is the rare that captivates, whether it relate to virtue or to vice. Even in music, with the Japanese, it is not the gleeful but the plaintive that charms. If this quality of rareness can be maintained in tales of virtue as it is in tales of vice, the former would undoubtedly take with the public, but much of the so-called moral writing of the times deals too much with virtue in the abstract to form interesting reading to the majority of people,

The Waseda Bungaku has an article on Daily Newspapers, from which we take the following particulars :- The Kokumin Shimbun underwent enlargement and considerable improvement in October last. In the new series one side of a sheet is devoted to the discussion of literary and social topics. Current literature receives a large amount of attention, even the leading columns of the paper often containing notices of recently published works. In the importance attached to literature the Nikon follows close on the heels of the Kokumin. The Porosu Chôhô and the Mainichi Shimbun both make a poorshow when writing on literary subjects. The Yomiuri and Jiji Shimpo are not distinguished by any special attention paid to literature, though the former is often spoken of as a literary as well as a political organ. As regards the other papers literature occupies with them a very third-rate

is the decrease of daily newspapers in the metropolis. A few years ago they numbered over a score. They have now been reduced to 14 + It would seem an though the public refuses to support more. It is becoming the custom for some papers to publish the lectures of Koshakushi, even the Yomiuri having adopted this practice. The success of some of the novels that appear in the dailies is very astonishing. The Hinode Shima by Gensai (Murai), appearing in the Hochi Shimban, has already stretched over 400 issues of the paper, and is still unfinished, and the interest of the public, it is said, has never flagged throughout. The most remarkable of all the characteristics of the Japanese newspapers of the present day is the use made of their advertising columns. In this the Jiji leads. It is said that the Jill makes 10,000 ren per month by its advertise-ments alone. When it is remembered that 20 years ago advertising was always associated in the Japanese mind with charlatanism and regarded as an indication of the unsoundness of an enterprise, on the principle that "good wine needs no bush," we see how radical is the change that has come over the leading business men of . . . the empire.

In the Kyōiku-Kōhō, which is the organ of the Japanese Education Society in a new form, appears the report of an address delivered by Baron Suyematsu on "The Sublime and the Beautiful," of which the following is an abstract:—The Japanese term bifutsu is a literal translation of the English "Fine Art," but an examination of the various uses of the word the fulse shows that it does not precisely correspond in extent to the English word art. The Japanese term is used as the equivalent of art in the industrial sense, as denoting a class of skill in any kind of workmanship, and also in the sense of fine art, that is a knowledge of the accomplishments that are applied to the produc-tion of what is beautiful. The sense conveyed to the Japanese mind by bijutsu is not the same as is convered to an Englishman by the term Fine Arts, or to the Frenchman by Les Beaux arts. The term 🌞 bi, the equivalent of beautiful, does not include the idea of sublimity with which the European mind is so familiar. There is beauty that has no sublimity in it, and with that beauty the Japanese mind, according to Baron Suyematsu, is best acquainted. There is a great difference, says Baron Suyematsu, between 壯麗 Sorei, the sublime, and 盖麗 birei, the beautiful∶ There are those who say that even in Japanese scenery, with the exception of Fujiyama, there is little that is entitled to be described as sublime, though there is much that is beautiful. This is certainly the case with her literature and her art, her customs and even her language, concludes Baron Suyematsu.

The latest number of the Nikonjin has an article on education, religion, literature, arts and accomplishments, the tone of which is most despondent. The present educational system is denounced in unmeasured terms. As regards religion, among both Christians and Buddhluts sincerity and earnestness are the exception, hypocrisy and coldness the rule. There can be no real faith, says the Nihongin, where a Japanese Christian is content to be wholly supported by foreign money. In respect to literature Japan is still in its infancy. Among the crowds of volumes that are issued monthly there are few works of any real merit. In foreign countries we read of editions of 10,000 copies being sold where the price of one copy is 100 prs. The lately issued Standard Dictionary sells at 40 prs.; The booksallers have been trying to get the price reduced to 20 year by promising to take 15,000 copies. To sall 15,000 copies in Japan would be the very utmost that could be accomplished. This shows what the purchasing capability of the Japanese reading public actually amounts to. newspapers-50.000 copies per day is the highest

† This is incorrect, as was shown is these columns a few pit-tidwellers

† This is incorrect, as was shown is these columns a few woods ago. Writer of the Summary

It is to be that for all years bound in half merocco-

figure reached, while there are papers that do not issue more than 2,000 copies. In Western countries there are papers that circulate million copies per day. (?) The world of art is no less unpromising. Though there are two Exhiless unpromising. Though there are two Exhi-bitions of pictures held every year, nothing worthy of comparison with the choice productions of Western lands in exhibited. It is much to be feared that even our very best pictures will ex-cite ridicule at the coming Paris Exhibition. In foreign countries we hear of paintings fetching over 10,000 yes, but there is nothing to be found in Japan that would realise such a price. Music fates no better than art. There is no real progress in this accomplishment, because there is no real taste for it. Various have been the efforts to stir up enthusiasm on the subject of music, but the results have been most disaccomplishments there is the same stag-nation. There are artisans of skill and nation. There are artisans of skin and industry in abundance, but the demand for high class work is so small that they despair even making a living, to say nothing of establishing a reputation.

The Rikugo Zasshi has an interesting article advocating that Japan should in future make Switzerland and not England her model. The special points of excellence in the Swiss, according to the Rikugo, are the attention they considerate pay to education, their love of freedom, their follow:

respect for popular rights, the equal distributions. tion of property that is encouraged—out of 485,000 families it is said that no less than 465,000 are landowners-their freedom from all the taxation and distress attending the maintenance of a large standing army. The physical peculiarities of the two countries, as well - the character of the inhabitants, have much in common, says the Rikugo. Japan's attempt to make England her model is bound to end in failure, and to it the Rikugo applies the Japanese proverb, Kawazu ga ushi no mane wo seba hara ga sakeru.

Dr. Motora Yujiso contributes to the Nihon Shugi an article on suicide in Japan, of which the following is the gist. Cases of suicide are of two kinds. There are those who destroy themselves without any derangement of mind whatever. The act is a deliberate one, committed as a result of reasoning—of a considera-tion of the circumstances in which they find themselves. These cases may be subdivided ac cording to the prevailing cause of the act of destruction. (a) The mane lovers who prefer to die together if mable to live together in this world. (b) There were in olden times layal subjects and retainers who thought it their duty to accompany their masters to the land of shades, (c) There are those who put an end to themselves because in their estimation death is more honograble than life. They sacrifice themselves on the altar of fame. (d) There are those who die rather than be a burden, a hindrance, or a disgrace to others. (e) There are a few who die for the sake of the rewards that religion offers in the next world. In all these instances the sense of duty plays an important part. There is another large class of cases in which adverse circumstances, or crimes, are the real causes of self-destruction. These causes may be particularised as poverty, incurable disease, disappointment at the failure of some great scheme, consciousness of guilt and fear of discovery and punishment, and inability to bear disgrace. There are also suicides who are lunatics. The insanity may be permanent or temporary. These case-arenotequaliunumber to those enu merated above.

In very ancient times the usual modes of committing solicide were strangulation, poisoning or burning. From the days of the Taira, harakiri, and thrusting a sword into the mouth on horseback for samurai and drowning and hanging for women were the fishionable modes of self-destruction. The elaborate cere monies connected with the sacred rite of sep-puku, for so it may be called, were not Tokugawa era. Digitized by Google

As regards the practice in ancient times, there is much to be said for and against it, concludes Dr. Motora, but the world is now agreed in con-demning suicide. The conditions of life have altered. Man's ideas of his responsibilities and his duties have also undergone thorough transformation. Much of the pessimism which prepared men's minds for desperate deeds has given place to a more healthy state of feeling.

# TWO YEARS OF JAPANESE TRADE.

The Nichi Nichi gives details of the imports and exports during the past two years. The exports for 1897 compared with those for 1896 show a considerable increase in taw and waste silk and noshi, habular, cutton yams and fabrics, matches, straw matting, wheat straw braid, tea, dried cuttle fish, sea weed, fish and vegetable oils, camphor, crude and wrought copper, coal, &c., whereas in imports an increase is noticeable in iron nails, oil cake, rice, angar, peas and beans, kerosens oil, raw cotton, wool, machines, locomotives and cars, bar and rod icon, iron and steel rails, railway and shipping stores, and implements which are likely to contribute to the development of the country's industry in future. The import of articles of luxury has, the Nichi Nichi in glad to notice, considerably decreased. The figures are m

# FIRE ON THE " HIROSHI VA MARU:

The Nippou Yusen Kaisha have received a telegram from their Kobe branch saying that a serious fire broke out on Monday night at 8,30 on board their Bombay steamer Hiroshima Maru, whilst at anchor at that post, and was not extinguished until 2 o'clock a.m. A quantity of cotton and rice is reported damaged. This confirms the telegram from our own correspondent published on Tuesday morning in the Japan Mail.

A telegram published in Jipanese papers on Wednesday adds that out of 500 bales of the cotton, 80 were destroyed. The total loss is Hahorated as known to the 47 Roule till the estimated at over yen 20,000. No injury was suptained by the hull of the vessel.

# MONTHLY CUSTOMS RETURNS.

The following is a summary of the Customs Returns for December last, showing the foreign trade of the Empire for the month:-

# TAPANESE FACTS AND COMMENTS.

The Nippon states that the policies issued by the Imperial Life Insurance Company in the capital have reached an enormous number, the amount insured being no less than 19,256,-700 yes, while the number of persons insured totals 63.372. The reserves of the Company aggregate 1,309,074 yen

About three years ago, the Foreign Department ment out a number of young men m student attaches to the Consulates of Peking, Soul, Vladivostock, and Mexico, their studies being partly commercial and partly diplomatic. The Department has now determined to extend the movement, and will send ten more students to China, Russia, Switzerland, &c.

UNIVERSITY OF ILLINOIS AT **URBANA-CHAMPAIGN** 

issued by the seven influential banks in the capital, the Bank of Japan excepted. The 1st Bank is represented as having received 4,389,308 yen in deposits; the 3rd Bank 3.557.535 yen; and the 15th Bank 3.822, 556 yen; and the 15th Bank 3.822, 556 yen; and the 16th Bank 3.875.595 yen. The amount held by Mitsui is the largest, being 8,222,182 yen; the Mitsubiahi accupies a prominent position in the list with 5,270,956 yen; while Yasuda is scarcely less conspicuous, its vaults containing a sum of 3,795,998 yen.

The Nippon announces that over 2,000 Formosan insurgents were discovered to be hiding in the neighbourhood of Tapentsong and Honkiangtan. Rumour was soon current that they were about to allack the gendarmerie in the latter district. The frightened inhabitants resolved to fly to Kimpaoli with their money and valuables. One of the ringleaders, arrested at Kimpsoli, is said to have confessed that, having established their head quarters in Pasentsong, they indulged in plunder, and on the 4th December extorted a sum of 500 yes. They made an assault upon the gendames in Hen-kiang, but were repulsed by a volley, losing eight in killed and over twenty wounded.

The profit realized by the various banks in the capital during the latter half of last year was really considerable, the Shogro asserts. Had dividends been declared in proportion to the profits acquired, the rate would have been the highest yet paid. But the greater the profit the more quickly have the houds in possession of the Banks fallen in value. At the settlement of accounts at the end of the year before last, the bonds were calculated at the rate of 98 ren per 100 yen face value, but last year it was considered necessary that the appraisement of public securities should be made between 94 yes and 96 yes. Thus the profits, though considerable in smount, were mostly absorbed in discounting the bonds in question.

The following comparative table is published in the Tokyo Asahl showing the difference in the prices of commodities in Tokyo and Osaka for the 30th year of Meiji, the value on the 10th January, 1887, being taken at 100:-

18 <i>07</i> .	Average price	lo Oreika	Average	in Tokyo
January	************	163	******	146
February.		175		147
March		175	*******	152
Aprilaces		182		ıór
	***********

October	************	184		173
Novembe	Г	101		174
December		101	******	172

From the above it will be perceived that though the enhancement of prices in Tokyo did not exceed 72 per cent, since January, 1887, it reached 94 per cent, in Osaka. During last year the appreciation of commodities in Tokyo was scarcely above 26 per cent, but Osaka ex-perienced an increase of 3t per cent, above the

According to investigations completed by the Finance Department and published in the Shagyo, the amount of national loans affoat at the end of December last, compared with the figures recorded for June, was as follows :-

Bonds.	June, 1897.	Dec., 1897.
	Yen.	Yen.
Consofs	174,564,250	174 564,250
War	121,724,000	123,324,000
Pension	29 509,370	29.509 370
Paper Redemption	22,000 000	22,000,000
Railway	3,000 600 1	41,000,000
Naval minimum	9,288,600	9.288,600
Oid	5,486 362	5 266 908

tion except in regard to old bonds payable in yearly instalments. Nor were purchases made for that purpose, while two varieties of bonds— War and Public Undertakings—were issued to the amount of 29,600 000 yen.

Rumour is current that Mr. Kaneko, ex-Vice-Minister of Finance, has formulated a scheme for organising a bank with both foreign and home capital. His project, says the Shogro, seems to have been based on the investigations which he carried out for three years while in office. He specially despatched two envoys to Europe and America for the purpose of ascer-taining the actual condition of the financial market. One of them lately returned to Japan with elaborate reports on the subject, and Mr. Kaneko himself will probably sail for America about May next. His programme in regard to the introduction of foreign capital does not involve the usual employment of commissioners or the deposit of shares in the hands of foreigners. The object is, in fact, to obtain funds in the form of loans, so that the same may be distributed among minor capitalists in the interior. To carry it out, thowever, a certain revision of the laws is necessary. Whether the foreign funds so introduced should be employed in industrial or mining enterprises, or for the organization of a bank, is a question which remains to be solved by direct negotiation with the American capitalists. The question was brought upon the tapis at the Cabinet meeting of the 25th instant.

The Chuo calls attention to the fact that apanese tea has found great favour in America. The amount exported to trans-Pacific ports from Japan and Formosa exceeds 45 million and 15 million pounds respectively; two-thirds of the total consumption in America. The dealers in Indian and Ceylon teas have vigorously attempted to compete against the Japanese leaf templet to compete against the Japanese leaf-by dint of advertising, the expenses of which are reported to have reached 200,000 dollars a year. "They have even" the Chuo adda, published such artful expressions as to entice "the public to infer that the Japanese tea is spurious and atterly unfit for a beverage. The reputation of the Japanese leaf was serionaly impaired through these mean devices." Having acquainted the Government with these facts, the ten dealers of Japan succeeded in obtaining a aubsidy of 70,000 pen to be appropriated in repudiating the allegations and in counter-advertisements in American journals. But the amount proved insufficient, and the dealers have therefore again combined to petition the Government for a fresh subsidy of 150,000.

In spite of the fact that a considerable amount of Government paper has been burnt from time to time and so withdrawn from circulation, a sum of four million yen still remains floating on the market. A bill for prohibiting the circula-tion of Government paper was to have been presented during the 11th session of the Diet, but, the Diet having been dissolved, nothing was done. The amount destroyed is to be amplied by 50 sen silver pieces, in producing which the Osaka Mint is now busily engaged. of the Government is not only to have its own paper redeemed, but also to have one ven convertible notes withdrawn from circulation, five yen notes convertible into gold being floated on the market. Notes below five yen denomination will, it is said, be withdrawn in favour of ailver; but the substitution of silver for notes is a question, remarks the Foniuri, which must be solved with reference to the degree of people's desire for subsidiary coins. So long as the public is disposed to regard the white metal as inconvenient for purposes of circulation in comparison with notes, the Government's exertions, however earnest, will certainly end in failure.

ren. This was to be supplied by old shates on which 1,800,000 yen were paid up, and new shares on which 3,280,000 yen were paid at the rate of ten yen per share. In addition, the shareholders are to be required to pay 1.28 yen for each new certificate, contributing in all 420,000 yen. The number of new shares, 328,000, is now again to be reduced to 140,000, a special general meeting for that purpose being held in a few days.

The Maintshi reports that the revenue of Korea for the second year of Kwang-mu amount. ed to 4,527,476 yen, while the expenditure totalled 4,525,530 yen. Of the revenue 2,227,508 yen are derived from land tax, 150,000 yen from poll tax, 40,000 yen from gold mining dues, 750 000 ren from customs duties, and 229,558 yen from house tax, the remainder arising from mis-cellaneous duties.

Three influential Powers of Europe-Russia, France, and Germany—have lately striven, re-marks the Chuo, to increase their squadrons in Far Eastern Seas. More than ten vessela are reported to have left the countries men-tioned for the Orient. Surely there must be a motive in all this. Immediately prior to the conclusion of the late war with China, each influential Power in Europe despatched its vessels to places where their presence had hardly been previously considered indispens-All of audden, the mysterious array was understood to be the result of a triple alliance against Japan's occupation of the Liaotung peninsula. Are not the squadrons being mustered at present destined ma prelude to some future emergency of a similar import?

In the 26th or 27th year of Meiji (1893 4) an excess of exports caused specie to flow in, augmenting the bank of Japan's reserve to 80 million yen, whereas in the 22nd or 33rd year of Meiji (1889 1890) the metallic currency went abroad, and the Bank found its reserves reduced to 30 millions. From these facts it may be inferred that it specie is left to its natural abb and flow, the amount of sixty million yen being the mean between the two extremes, will suffice to be held as a reserve. To maintain the system of convertible notes without risks it is necessary to hold one-third of the total issue in specie as a reserve. That being so, a reserve of sixty millions justifies the issue of notes to the amount of 180 millions only. The convertible notes circulating at present exceed 210 millions, in addition to those above the legal limit, which now amount to 35 million yen. Such being the case, when the reserves held by the Bank of Japan falls below 83 millions, it will be short of the prescribed onethird. On the other hand, it must be noticed that as the demand for funds generally decreases considerably by March every year, while de-pression of trade now characterizes the market, there is scareely any room for doubt as to the possibility of the Bank's over issue being reduced to some ten million per between March and May. A slight diminution in the amount of the reserve is not, therefore, to be taken as a serious cause for anxiety. Even supposing that the reserves have fallen far below the prescribed hmit, steps may be taken to raise the rate of interest or to sell bonds abroad, so that the outflow of gold may be effectually prevented. In short, there are various means for supplying the deficiency in the specie reserve.

The views of Mr. Taurahara, Superintendent of the Trade Bureau, touching the outflow of gold, are represented in the Jiji as follows:—Anxiety, it seems, is now universally entertained that since the excess of imports necessitates an outflow of gold and at the same time tends to decrease the specie reserve of the Bank of 

stability of the coinage system does not depend upon arguments or dissertations of such a na-ture, and the results apprehended by the critics can scarcely be expected to occur.

The rise in the price of silk has naturally led to the appreciation of cocoons throughout the empire, alleges the Mainichi. Purchases were recently made in Yamanashi prefecture at the rate of 71.5 momme per yen. Silk manufactured out of such cocoons will not fall short of 950 or 960 yen in value per picul. Unless the quotation rises to 1,000 yen the product will involve a loss of twenty or thirty yen per picul. The warp for the Kai silk consists of a peculiar thread, and is quoted at present III one yes per 15 momme. 100 cattles being valued at no less than 1,066 yes. But as the stuff finds good sale abroad the manufacture is carried on with success.

Some persons are disposed to imagine that a collision will take place between the Govern-ment and the Bank of Japan in regard to its financial policy. Such considerations, however, are entirely fallacious. The Government may hope to retain a reserve of 100 millions for military purposes, and in case the hard metal flows out, may resort to the process of exchange or other preventive measures. The central banks of various nations of Europe are always possessed of immense reserves, but they are impelled to hold them, in most cases, by political necessity. Maintaining a system of convertible notes by means of accumulated reserves in not within the scope of their financial operations.

The so called Satsuma coalition, according to the Hachi, consists of Messes. Haseba Junko, Nakamura Motoo, Tamura Sei, and Tokutomi lichiro, with Count Kabayama at their head. Secret meetings have been frequently held of late to discuss the best means of attacking the Ito Cabinet. Rumour has it that Mr. Haseba earnesily suggested the advisability of forming a new party under the name of Seigusha (Political Friends' Club), so that men of the same spirit might be combined to oppose the present Ministry. This proposition was unanimously approved, and after several subsequent conferences it was decided that lecturers should be sent to the interior to propagate the principles of the Club.

The scheme to amalgamate the various kero sene oil companies in Yechigo seems to have matured. According to the Shogyo, the annual output in Higashiyama, Koshi district, amounts to 300,000 koku, valued at 750,000 yen, the capital employed on the industry being 1,500,000 ven. Business being thus flourishing, sufficient profits ought to have been realized. Facts show, however, that most of the companies, except three or four, have fallen into a grievous state of embarrassment, some of them being even compelled to dissolve. It is asserted that the decline now noticeable in kerosene enterprises is due to the existence of numerous small companies, and to the unevenness in the quality of the oil produced, as well as the want of means of transport. The advantage of amalgamation was rapidly recognised, and rules for forming the various small associations into one large company were lately drawn up.

The price of cement, which in the 26th or 27th year of Aleift had fallen to three yen per barrel, rose in June last to seven yen, in consequence of the expansion of various public undertakings. It now begins to show a downward tendency, owing, it is said, to the noiversal apathy of the business world and the sudden increase of supply. When the price of cement had reached its climax last year, steps were Nippon, Osaka, and Hokkaido—to make the greatest possible extension in their business, while importers did not hesitate to send large orders to England, Germany, Italy, and Belgium. Arrivals from these countries did not fall short of 250,000 barrels. The ware-

As to quality, none of the brands are first class except the "Algen" brand. Messrs. Morioka & Co. have failed to receive official approval for 5,000 barrels of cement which they had specially imported for delivery to the Railway Bureau The stock of 250,000 barrels is not likely to find customers in a month or two, and a steady fall in price must be expected.

Information from Korea published in the Shogyo announces that in pursuance of the edict issued by the Korean Emperor the year before last, the Department for Agriculture Commerce, and Industry recently forwarded a representation to the Privy Council urging that no stipulation should be made with foreigners for union or co-operation in regard to railway or mining enterprises in the kingdom. This representation met with the Imperial sauction.

We have frequently drawn attention to the probability, says the Shogyo, of considerable tightening in the money market. The issue of convertible notes above the legal limit at the end of last month exceeded 39 million yea, showing an increase of seven millions over the minimum, 32 millions, recorded for the month. At the beginning of last month, the Bank of Japan was in receipt of a considerable amount in repayments, on the one hand, and experienced the withdrawal by Government of notes exchanged for gold on the other. The pressure of loans is felt more keenly than ever, but the amount of over-issue is still comparatively insignificant. The increase of discounted bills. the reduction of specie reserve consequent upon the Government's withdrawal of gold, and the settlement of Indemnity accounts-all these have led to the expansion of the volume of

The complications in the Osaka Rice Exchange appear to have reached their climax. The trouble arose in a competition between sellers and huyers for time bargains, the result being that a difference of two yen per koku became apparent in the Quotations of rice. Minister of Agriculture and Commerce, in his instructions to the Governor of Osaka, attempted to settle the affair by the withdrawal of the decision given by his predecessors, and by the collection of securities from brokers whose deposit fell short of the prescribed amount on account of the cost of rice having risen through competition. But the Minister's order was not duly conformed with, and was followed by another order withdrawing the suspension of the brokers' business and requiring the payment of securities up till the 31st January. The Governor of Osaka, on receipt of this second order, immediately despatched officers to the Rice Exchange to have it enforced. Of the two things required by the order one was readily executed, but the other was held in abeyance on the ground that no compromise has been made between buyers and sellers.

According to the Government Railway Regulations, all the Ministers of State are granted free use of the trains on Government railways Marquis Ito, however, has always preferred to pay the fare. One day be was advised certain station master to look into the regulations.
"I know them very well," replied he calmly; " I suppose my payment of the regular fare will not put you in fault."

The idea at present prevails in some of the tea producing districts that sericulture is a far more profitable industry than the manufacture of tea. Some tea growers have converted their farms into mulberry plantations, though Shizuoka and neighbouring districts on the sex coast do not show much change, as the soil is better suited to tea than mulberries. Yenshiu and Ibaraki, however, have completedly changed their character, and while Izu was until recently noted for its abundant tea plantations, it is now a silk district, the tea industry having nearly beaggregated 242,090 chests, but the amount decreased to 239,971 chests by the 30th year, while a further reduction of five or six thousand chests is expected this year.

The Rice Exchange had evidently violated the instructions of the Minister of Agriculture and Commerce, who, in his second memorandum, clearly pointed out that farther resolute steps should be taken in the case of his order being disobeyed. Article VII. of the Rice Ex-change law provides that whenever the Minister of Agriculture and Commerce deems the proceedings of a Rice Exchange contrary in Laws and Ordinances, or prejudicial to the public interests or the welfare of the people, he may take steps to dissolve the Exchange, suspend its transaction, for dismiss its officers, and suspend the brokers or strike out their names. The Minister has now to carry out one of the measures so specified, and the dissolution of the Rice Exchange would, remarks the Foresu, be the most appropriate punishment. But as such a violent measure might bring serious disadvantages upon the members of the Exchange as well as upon the Minister himself, the officials of the Exchange should be dismissed and fresh ones appointed.

At a recent general meeting of the Omeislia (Politicians' Club), Mr. Kaneko, ex-Vice-Minister of Finance, is said to have apoken as follows:-" The clamour for a constitutional government was first raised in the 11th year of Meift (1878) by three political Clubs—the Omeisha, the Kyoson-doshu-kwai, and the Ködan-kwai. The Ködan-kwai soon became extinct and the present Constitution and Diet are really the offspring of the energy displayed by the two remaining clubs. The Omeiaha has the credit of having produced one of the Ministers of State, an honour never before attained by any other political society. We have long asserted that England alone ought to be followed in parliamentary lines as having the perfect constitution we require. The superiority of the English constitution lies in the fact that any Minister of State is allowed the liberty of expressing his views on political subjects without molesta-tion in public meetings, etc. Nine years have elapsed since the Constitution was established in our country, yet no Minister has ever been known to have resorted to such a liberal course as that just described. With Baron Suyematsu alone lies the credit of having broken the monotony. He writes asking us to express our views on matters falling within the scope of his official duties as Minister of Communications. His act in doing so adds a step to the development of our Constitution. The Baron remarks that although the mismanagement in the com-munications, noticeable in the accumulations of packages, as well as delays in telegrams and mails, may be ascribed to the want of suitable means of supervision, the direct and most palpable cause is surely the deficiency of annual allowances for the Communications Department. Scarcity of funds is indeed the universal grievance throughout the country."

# FATAL AFFRAY BETWEEN COOLIES.

An exciting affair took place on January 22nd (Chinese New Year's Day) at the Choja coal mine, Matsuura O-gun, Saga Prefecture. The chief contractor (Mr. Komine Gensaku) entertained all the Korean employés, and they took the amplest advantage of his hospitality. In fact, they appear to have got madly intoxicated, and immediately after they returned to work they attacked Mr. Komine's house, armed with all kinds of impromptu weapous. Mr. Komine fell a victim to their violence, and was beaten into an almost lifeless condition. A few policemen were quickly summoned, but their presence only further excited the fury of the Koreans. The Japanese mine coolies soon joined in the fray, and at one time as many as 100 men were Belgium. Arrivals from these countries did come extinct. The augmentation of mulberry not fall short of 250,000 barrels. The ware plantations has naturally led to a considerable force of police arrived that order was restored. Houses in Kobe and Yokohama are now, according to the Forosu, filled with casks of cement. In Yokohama during the 29th year of Meiji were wounded on both sides.

# OUR GLOBE TROITER.

[SPECIALLY WRITTEN FOR THE " JAPAN MAIL,"]

We all liked the General-at first. He was a portly, bluff, rough and tough old fellow, with an expansive waistcoat and an equally expansive smile, and altogether, to use his own pet phrase, was an awfully july chap, By Jove, don't you know? But after we had had the General for breakfast, the General for tiffin, the General for tea, the General for dinner, the General for between meals for a whole fortnight, we began to feel that there was rather too much of him.

He was too full of information-that was the fact. He knew rather more about Heaven than an Astronomer Royal; considerably more about earth than Whittaker's Almanack; and vastly more about the other place than Marie Corelli's more about the other place than Marie Corell's refined and melancholy hero. If he had kept it to himself it wouldn't have been so bad. True, he would probably have hurnt like an overcharged balloon, but then if wouldn't have been any of our funeral. We shouldn't have minded in the last. But the mischief was that the General would pour out his knowledge indiscriminately.

I was his first victim. He lassoed me two

minutes after I came aboard.

"Going to Japan, eb?" he said. "Ah, fine country that: I was there in '67—spent two years there. Let's see, though—was it '67? I think it must be, because I remember meeting Smith at Tokyo-Smith of the Engineers-and be died in '68. Did you know Smith? Awfully good fellow, by Jove. Man with one eye-used to quarrel terribly with his wife, and she poked his other eye out with m knitting needle. Of course, though, that's quite entre nous. Don't mention it on any account to Smith's people if you should meet 'em. He used to say he lost it through a mine exploding at Lucknow, and they made him a K.C.B. for it. I dareasy you met Smith in Town."

As I was just twenty-six years old, and had limit in Evelone it.

lived in England all my days, it was scarcely likely that I knew anything of these interesting events, which happened in early times and on the other side of the world. I modestly confessed my ignorance. But the General didn't mind. He ambled screenly on.

But Japan isn't half the place that Khams-ka is. Of course you know Khamskatka? katka is. Of course you know Khan No? Well, you ought to go there. climate, most interesting country. The worst of it is the lauguage. You see there are a lot of words in it you can't pronounce without standing on the top of your head and sneezing. Well, in the higher circles they don't consider it polite to do that at table, and so at dimer there is always a screen handy, and when you want to speak you go behind the screen, and do it there. Jolly funny to see the company run-ning backwards and forwards when the conwersation's lively. And awkward too, by Jove. Why, I remember when I was there Cheddar, of the 3rd Double Gloucester, had a very masty accident. Cheddar had a fine set of false teeth he'd had made at Timbuctoo—and develish dear they were too; they awindle you up hill and down dale at Timbuctoo. Well, as I was saying, he had these teeth, and one day be was dining with the Panjandrum. Did you ever meet the Panjandrum? Very fine fellow, by Jove; spoke splendid English. You see, when he was a young fellow he was caught by Chinese pirates and they sold him to an agent of the Westminster Aquarium. You may re-member him there as the Real Original Wild Man from Borneo. They got him up in a bearskin, and he had to eat raw mutton in public three times a day for twenty five shillings a week. That's how he learned the language ao well. Well, as I was saying. Cheddar was dining with him, and when he was behind the screen trying to get out a very complicated bit of Khamskatkan his teeth give way under the strain, and down they dropped all on the floor like

"Hongkong, eh!" he said. "Ah, nice place Hongkong. Not so good now, though, as when I remember. I was there in McGullish's time. Ever met McGullish? Jolly fellow, by Jove. I knew him when he was plain Mr.—no Governor or K.C.B. shout him then. He's related to me somehow. I believe his nucle's grandmother's cousin married my father's maternal mother's cousin married my father's maternal great-aunt. Any way, we were most intimate. Poor McGullish! He was one of kindest hearted men I ever knew. Great fan we had together, when I was only a young captain, potting at the Chinese coolies in the sampans. We used to try and see how many fingers we could snick off at twenty-five yards. We paid for them after at the rate of twenty-five cents a finger. Unpleasant for the coolies, ch? Oh, I fancy they used to like it. They surned a lot more like that than they'd have got in a year in their own work. In fact, they were m eager as possible after it. I daresay it's all different now; prices have risen wonderfully all over the East. I remember beating McGullish to finger, and he got so cross that he shot wild.

I believe we had to pay five dollars for that coolie, besides the funeral expenses. I don't believe the proper price of a Chinaman is more than two-fifty, but we were new hands at that time, and I daresay they imposed on us.

" Is there much sport there now?" asked the Hongkong passenger, who had an air-gun among his luggage.

" No, I expect that's all over now. civilized now, sir. Give me the good old days. By the way, McGullish was murdered a good many years afterwards by his boy. He's got a beautiful tombstone in Hongkong cemetery-Happy Valley they call it: because you are really happy if you get there—you'll see his stone, with 'Well done, thou good and faithful servant' in big gold letters on the foot."

Then he seized on another man.

"Smellipore? Oh, I know it quite well. I was there in '45, when the old Potwallopernot the present one, but his father-was on the throne. You'll find plenty of fever there, sir, was in Smellipore three months, and I'm dashed if I didn't have fever twice a week regularly. Fellows get used to it. If you asked a man to dine with you he'd take out a pocket calcular, and calculate a bit, and then Wednesday, because that's my fever day. But I'll come on Friday with pleasure." Hot, did you say? I should think it is hot there, by you say? I should think it is hot there, by Jove. Why, when we went out shooting we used to have two coolies to carry each man, another to hold up the rifle so that we could sight it, and another to pull the trigger. No, there are no tigers round Smellipore. There were before I came, but there are none now. But there are snakes. Plenty of 'em. You see the Government tried some time ago to stamp 'em out. So they offered a reward of half a bunkee—there are a hundred bunkees to our penny, but it is a big coin out there-half a bunkee for every snake sent in. Well, what did the natives do? They gave up growing rice, and look to snake farming. They bred em by thousauds, sir. And now if you go down the streets of Smellipore, and see a lot of things like electric light cables lying coiled up on the pavement, don't tread on 'em. They're just

In this way the General prattled on to every miserable sinuer on board. All day long every porpoise, rock, steamer, flying fish, and seabird reminded him of some unpacalleled adventure of his in the Arctic Ocean or the Sahara, and at night we had the horrors of a lecture on as-tronomy. In my heart I believe he knew no more of stars than a Digger Indian, but he talked about Orion as if Orion had been one of his oldest and most intimate friends, and patronised the Pleiades if they had been mere tradespeople.

So we fared as far as Port Suid. Here another passenger came aboard. He was a mild mathles. Cheddar was awfully mad about it."

So I should imagine," I said.

Just then another passenger lounged up. The happy one the General, sighing for new andiences to bore, descended instantu.

In ten minutes he was telling a wonderful lie about Equatorial Airica.

"I remember being up the Damboshwe," we heard him say "about ten years ago. There were three of us in a canoe. The chief of us was Neal— I daresay you've met him—great African explorer—fine fellow—very intimate friend of mine."

"I don't think I have had the pleasure," said the little man with a pleasant smile.

"Well," said the General "we had an awful time up that river. Hot I By George, sir, purgatory would have been chilly after that. Neal tainted right away one day. We tried brandy to bring him back, but it was no good. Then we bathed his head with water, but the water of that river was hot enough to boil a ham, and so that didn't work either, that some powerful stimulant was wanted. An idea struck me, and, dragging him to the side of the boat, I hung his feet over in the water. Why? Why, my dear sir, I saw nothing but a big shock could bring him round, and I couldn't think of any bigger shock than an alligator snapping at his toes. So I hung him over the boat and waited. It wasn't long before a big slimy brute came up. He couldn't make it out quite at first, because I don't suppose he'd ever seen a while man before, and it puzzled him a bit. But presently he made up his mind pretty vigorously. There was an awful rush, a scream from Neal, and I had all my work cut out, to haul him up again. Poor Neal lost all his toes, but before we parted he thanked me with tears in his eyes for what I had done, and said General, you're a true brick; and you saved

my life."

"Oh, a very interesting story," said the stranger, "Will you allow me to take a note of

The stranger took out his pocket book, made a few notes, and then looked up again.

"Thanks very much. By the way, here's my

The General took the pasteboard, and glanced at it-and the most extraordinary combination of colours and expressions ever seen on a human face overspread his features. He dropped the card, and fairly fled for his cabin, I picked it up, Here it is:-

MR. PATRICK NEAL,

ROYAL GROGRAPHICAL SOCIETY,

LONDON.

The General did not nome in to dinner for week, and we never heard any more of his remarkable adventures.

# RELIANCE WHEELMEN'S CONCERT.

The smoking concert given some time ago by the Reliance Wheelmen's Club was an earnest of even better things to come, and it was no matter for wonder that the Public Hall was crowded on Friday evening; for the fame of the smoker had been noised abroad. pectations were realised in nearly every item. As we noted on the last occasion, the glee-singing and the chorus work generally were the best portions of the entertainment demonstrating how careful had been the preparation and the patience of both singers and instructors. The patter of the cornermen was full of local allusions, many of which "caught on" wonderfully well, but some of the more subtler allusions were, we are afraid, lost before they were found,—which saying may anund a paradox, yet really states the case. Several encores were accorded, more particularly in the "nigger" half of the programme, and the singers very kindly acceded to the insistent requests. The pianoforte selection of Mr. M. M. Ellis was a very fine performance, tions of the entertainment demonstrating how

# SILK TRADE OF FAPAN & CHINA.

Last year the silk trade of the East presented out satisfactory results. The export from most satisfactory results. The export from Japan and China, as compared with the past three years, was as follows:—

Exports.	JAPAN. Catties.		CHINA. Bales.
1897	6 919,861 3,918,994	*******	78,330 59.764
1895	5,810,046 5,484 059	********	84,142 71,354
[194			

A considerable increase is noticeable in the export from Japan. The expansion of the silk trade is attributed to the depreciation of silver the failure of the crop in Italy, and the revival of trade in America. Previous to the enforcement of the gold standard in October last year, the free coinage of silver was suspended, and it is supposed that the increase in the export of silk, from Japan was the result, not of the depreciation of silver, but of the stability of the exchange rates secured by the adoption of the gold standard.

Now that Japan has joined the gold standard countries, the decline in the exchangeable value of silver will give to China an advantage in her rivalry with Japan in the export of silk. The Japanese Consul at Shanghai remarks that a fall in the exchange rates induces purchases and creates a tendency to a rise in the value of commodities. Sellers are also enabled to reap the profits of the appreciation in the market value of silk. While this is the case, the gold-using country secures an advantage in commerce by being free from fluctuations in exchange, while in allver countries immense discretion must be exercised in view of the changes in rates for all transactions. Such views, however, are only

applicable when the value of silk rises.

With cheap silver China is able to acquire more profits by the export of silk, and to pro-mote the development of the silk industry in the interior. There can be no room for doubt that she will eventually encroach upon the

foreign markets for Japanese silk. The Japanese Cousul referred to sums up his remarks by saying that silver's depreciation is conducive to the development of sericulture, and that the increase of supply on the part of China and the consequent fall in the price of silk will have no small effect upon the silk trade silk will have no small effect upon the silk trade of Japan. In view of these facts we endeavoured, says the Shogyo, to induce merchants to take every possible precaution with regard to silk and other staple exports competing with China, before the gold system was put into operation. Yet it seems that the public disregarded our advice through their unexpected success in trade, and were even disunexpected success in trade, and were even disposed to attribute their success to the operation of the gold system.

# INSURANCE IN TAPAN.

Of the profits realized by the various instrumes companies in Tokyo and Osaka during the latter half of last year, the maximum rate is stated by the Hochi to be 30 per cent and the minimum 8 per cent. The following are the

details :-	Profit for the	
	latter balf	Divi-
Paid up	offlast	dent
capital.	year.	Per
Japan Marine and yea.	yen.	dent.
Land 750,000	142,146	8
Imperial Life 250,000	426,470	24
Meiji Life 100,000	289,662	24
Domestic Life 125.000	145 000	8
Imperial Marine 750,000	147,670	10
Tokyo Fite 125 000	220,828	10
Osaka Fire 180,000	30,847	10
Patriotic Life 750,000	7.403	
Japan Education 750,000	5.840	5
Imperial Fire 125 000	7,127	10
Osaka Life 725.000	7.127	7
Copper Dealers' Fue. 20,000	4,830	30
Japan Life 120,000	1,306,077	15
National Defence Life 25,000	(mocertain)	)

Insurance, in fact, is regarded as one of the most profitable undertakings in Japan. It was supposed by some that marine maurance enterprises in Japan would be beset with serious difficulties, but the profits realized last year are so considerable as to warrant the stability of this hunimens.

# CHINESE NOTES.

The Nanking correspondent of the A.-C Daily News writes :-

The natives of Nanking are full of gossip over the present situation, and it is interesting to note how complacent they are over the conviction that the Empire will be divided. The general feeling seems to be that the Yangtze River would go to Eugland and that then there would be general prosperity in this section.

While talking to-day with a retired official who was telling me of seinforcements that were being made to the army because of the dangers that made to the army because of the dangers that seem to be threatening, he dropped into a serio-comic mood and remarked: "At Yah! China has great ability! It is something immense! When she wants an army there is no need of drilling or any kind of preparation at all! All she needs to do is to yell to the crowd 'Come! Come!!' And then when she is through with them say! Clear out!!' That is the way China has of making and unmaking armies," Alas! It is only too true, and it now looks as it this ancient Empire could be unmade quite as easily.

Here is an exquisite example of "olo custom " as related by a Shanghai contemporary :-

A large number of Buddhist horzes and Taoist A large number of Budthist borzes and Taoist priests were engaged by Mr. Huang, the Shanghai Magistrate, on Chinese New Year's day to repeat prayers and heat gongs for "the protection of the sun," whose eclipse is popularly said to be caused by a "wild and roaming sun" swallowing our natural one. The prayers and gongs and guns apparently proved too much for the "wild sun" for by 5 n'clock he had to release the "tame sun," unharmed.

Writing from Port Arthur, under date of annary 18th, the correspondent of the N.-C. Daily News says :-

January 8th, the correspondent of the N.-C. Daily News says:—

Port Authur is at present very quiet. The Russians have not taken it, but by all appearance (they have taken charge of the dockyard. Their two steam pineaces are being repaired by the Chinese of the dockyard. They are having built davits for buisting up large boats, not ordinary davits but large dericks. Eight hundred tous of coat, for the Chinese ships, have just been landed and one steamer is at present alnugside, in dock, discharging 1,000 toos of coat for the Russian ships and another one is expected toomorrow, with the same annual from Robe. The name of the one here now is the Chow-chow-fut. The wave-ships at present in the hathom are four Russians, one English, and these Chinese; at Talien Bay one Chinese and two Russians. H.M.S. Immortalité left here on Saturday morning, destination unknown. The Iphigenia still remains outside. There are no signs of soir diers, but the comour is that they are coming. The English gunboat came in with mads. The officers of the Immortalité invited all the Chinese efficers to dine on board, but the weather was so bad, that the boats could not be lowered. We had a severe gale which lasted two days, and debarred the officers from wisting the English ship, which they all wanted to see, but if the Immortalité comes back again they will then have it. No leave is given to men of the Inreign warships, and an order has been issued that all Chinese sallors are to be no board, that is fine provided.

General Song is still getting more solders, and order the officers from the fire large warships, and an order has been issued that all Chinese sallors are to be no board their ships by o'clock.

General Song is still getting more solders,

Chinese sailors are to be on board their ships by 9 o'clock.

General Song is still getting more soldiers, a great many joining, and troops are being sent from Talien Bay. On Thursday last the troops were put through a course of tifle firing, and very bold they were when firing blank cartridge, but when it came to ball they were a bit scared, some of them having never fired a rifle before. The targets they fired at were on the bill, and there was no marking of shi-ts, the only indication being the plonghing up of the sand. They were very proud of themselves and left the ground feeling that they had done splendidly. that they had done splendidly.

The Anti-foot-binding Society seems to be really accomplishing a good deal. Mrs. Archibald Little is indefatigable in her propagandism of its doctrines. She recently addressed a large sudience in Kinkiaug, and at the close of her speech, a branch society was formed for that city. More than one half of the men present at the meeting promised to unbind their daughters' feet.

# NEWS OF THE WEEK.

The death of Doctor Ernest Hart is announced.

The round the world cyclists, Messrs. Fraser, Lunn, and Lowe, have arrived in Kobe. last two were exorted into Kobe from Akashi by ten local wheelmen. Mr. Frazer, being ill, was detained at Himeji until Saturday.

The British trade returns for December show that imports decreased two and-a-half millions and exports one million. For the whole year, the Imports show an increase of nine-and-a half millions and exports a decrease of five andthree-quarter millions.

The Department of Communications has issued the following Notification:—" From the 1st of March next, the four-sen post cards, and eight-sen return post cards of the International Postal Union will be issued. Specimens may be seen at the various post offices."

Mr. Kunota, of Tokyo, and some gentlemen of Yokohama have presented a petition to the Kanagawa Prefectural Office for the construction of an Electric Railway in Yokohama. It is proposed to run one line from Oye Bridge to Isezakicho, and the other from the Oye Bridge to Yoshihama Bridge via Fukutomi-cho.

The decline of population in France, about which so many gloomy prophecies have been uttered, was apparently only temporary. During the year 1896 the births exceeded the deaths by the respectable number of 94,000. This information the Pelit Journal heads "Une Grande Nonvelle.

Bishop Burdon, who resigned the see of Victoria, Hongkong, a few months ago, is (according to The Times) returning to China an ordinary missionary. He is 70 years of age, and has been in the mission field for 44 years, during 22 of which he has acted as years, during 23 of which he has acted as Bishop. He proposes to settle m Pakhoi.

A cablegram has been received at the Yokohama Agency of the C. P. R. that the Congress of the United States have definitely decided that the discriminating duty of 10 per cent, will not be levied on foreign goods entering the United States by way of Canada. This news will be very reassuring to local shippers.

About 8 p.m. on the 28th instant a portion About 8 p.m. on the 28th tostant a portion of the slope at the rear of the house occupied by Mr. Jas. Troup, H.B.M. Consul-General, M 292, Nakamura Bluff, gave way and fell to the extent of about 12 ken, inflicting some damage on two Japanese houses below. The inmates of the houses fortunately escaped without injury.

After two years in gaol, varied by periodical pearances in the Californian Law Courts, appearances Theodore Durraut, the condemned murderer of Blanche Lamont, a young San Francisco girl, was hung in the prison of St. Quentin, on Jan.
7th. He died protesting his innocence. The 7th. He died protesting his innocence. The deed was committed in the vestry of a church, the dead girl's body being found secreted in the belfry.

The Nagasaki paper reports an outbreak of babies" in the neighbourhood of the town. Six cases have been reported already. In-structions were issued by the Governor warning the public to take precautionary measures to prevent the spread of the disease. It this a piece of deliberate, cold-blooded jocularity, or s it another specimen of the fell work of the Japanese compositor?

A clerk formerly employed in the Yokohama Post and Telegraph Office, named Hasegawa Ichiro, aged 24, has been arrested on a charge of having opened letters passing through the post containing money, and stealing their con-tents. In this way he is reported to have possessed himself of a draft on the Missui Bank, sent by Mr. H. A. Clarke of Tokyo to Mr. H. Gun, of Yokohams, a cheque for 31 yen addressed to a resident on the Bluff, and two other cheques for yen 187.87

Digitized by Google

and yes 87 25 respectively, some, if not all of which he appears to have succeeded in cashing. The stolen money was, however, found in his house and returned to the owners.

Our renders will remember, the telegram sent by Reuter in the closing days of December referring to a holocaust that occurred in Bethnal Green, London, wherein a whole family of ten people were burut to death. Their name was Jarvis, and it seems that several of them were engaged in match-making. Mrs. [arvis and her nine children, whose ages ranged from 16 years to 8 mouths, were suffocated in their sleep. The father died from consumption in the hospital on the same day.

The banto of Messrs, Favre-Brandt of Osaka, who has been arrested at San Francisco, is still detained there by request of the Japanese Consul, as the necessary steps have not yet been taken to extradite him. The Osaka Asahi, from which the Chronicle takes this information, adds that it is calculated that the prisoner must have in his possession 15,000 yen, but the amount of money found upon him did not exceed 4,500 He is being examined as to the whereabouts of the balance.

It may interest cyclists to know that Dr. Lucas Championniere, of Paris, does not consider 400 miles in 20 hours, the record of the Paris-Bordeaux content, too much for a healthy, well trained ilder. MM. Riviere and Cordang, who rode the race, did not est nitrogenous food, and the French doctor thinks they were right. They drank enormous quantities of tea, beeftes, and milk to replace the liquid lost by perspiration. It is uncless to eat during violent exercise, and if the body is in good working condition abstinence from food only causes loss of weight.

A Jubilee Commemoration Fund having been raised by the Wealeyan Methodist Church at Hongkong for the erection of Soldiera' and Sailors' Homes, a sum of \$7,000, the China Must says, has been allocated for the purpose of erecting in Hongkong a Home which will be dedicated to the use of the men of the naval and military services, irrespective of religious denomination. The Rev. W. Musson, Wesleyan Chaplain in Hongkong, has perfected the ar-rangements for the erection of the Hongkong Home, and judging from the plane, the proposed building will be very suitable for the purpose. It is estimated to cost \$14,000.

The Ameer of Afghanistan is m great a humorist us Gilbert's Mikado. few specimens of the manner in which he makes the punishment fit he crime :- "One old man got his beard pulled out by the roots in public durbar for some offence against the tenets of the Ameer's autocracy; another, who was a baker, and had sold short weight, was sentenced to be rosated in his own oven; a third, who had mentioned to his friends that the Russians were advancing on Cabul, was placed on the top of a tall pole, upon which had been fastened a small stool, where he was commanded to shout vociferously 'The Russians are coming ! Should be lack in his energies or give way to a doze, there was a sentry below who would remind him of his duty by a prod from his fixed bayonet."

The record of rapid marriages must certainly be awarded to a couple in Hoboken-across the river from New York. The bride and bridegroom met for the first time at a reception at a friend's house. She was a widow of thirty, and as handsome as all widows should be; he was an hotel proprietor. As soon as he saw her he asked to be introduced. Exactly half an hour after he proposed and was accepted. The next minute he informed her he did not believe in long engagements, and saw no reason why they should not be married without delay. The lady acquiesced. The gentleman explained that "no delay" in his case meant immediately. The host and hostess were informed of the matter, and the then prospective beitegroom proposed that the recepting shoul be the instruction

wedding party. They telephoned to a neighbouring Justice of the Peace, and he hurried to the house. Exactly fifty minutes after they had met the Magistrate had concluded the ceremony, and they were joined in haste. The date of the divorce is not yet announced.

There is a Gilbertian ring about this paragraph, which we take from a Hongkong paper:-The Sultan of Sulu having arrived on a visit to Sandakan with 80 armed followers, the British North Borneo officials recognised in his Prime Minister, Lepai, a notorious murderer, who had escaped from prison at Sandakan some years ago, while under sentence of death. The available, who were outnumbered by the Sultan's followers, were supplied with ball cartridge, and surrounded the Sultan's quarters, and Lepai was given up, and put on trial again.

Says the Nagasaki paper :- The European renidents of this port will be pleased to hear that Nagasaki is at last in possession of a hospital The building, which will be known as the St. Bernard Hospital and Sanitarium, is pleasantly situated on the higher level of the Settlement just above the boating club, is well sheltered from the wind, and commands a fine view of the harbour. The services of a trained nurse have also been engaged. The hospital is specially adapted to the use of the naval and commercial marine of the foreign shipping visiting this port, but European residents will also be received at rates in accordance with their means. Full particulars may be had on application to Dr. Bowie, to whose exertions the opening of this institution is in a great measure due.

The Revolving Palace at the Paris Exposition is to consist of a hexagonal shaft 350 ft. in height divided into twenty-five storeys. The entire palace in to be covered with nickel plate, aluminium, ornamental tiling, and glass. Illu-mination will come from 20,000 incandescent and 2,000 are lights. In the loftiest part of the pelace are to be a chime of sixty-four bells and a powerful organ played by compressed air. Above these, and crowning the whole, will be a gigantic rooster fifteen feet high—an appropriate emblem, by the way. The entire arructure is to turn on a pivot and be moved by hydranlic apparatus, always at the same speed, making a complete revolution once an hour. Speciators may thus occupy the same position and see, spread out before them, the entire panorama of the Exposition, with the city of Paris and its environs.

Mr. Holt Schooling in Pearson's has chosen Mr. Flort Schooling in Fratron; has chosen a rather diverting topic. He heads his paper, "To all Named Smith—Greeting," and proceeds to explain that the world denoted "smiter," not only in metals, as blacksmith, silversmith, the like, but workers in wood also, the United Kingdom 1 person in every 79 is a Smith. Scotland, of the three Kingdoms, bas the largest proportion of Smiths, 1 in every 70 England and Wales having only t in every 72 and Ireland tin every 148. In Ireland it stands fourth in frequency, Murphy standing first, Kelly next, then Sullivan and Walsh. There are, in round numbers, half a million Smiths in the United Kingdom, a number equal to twice the personnel of the Army and Navy. Every day 42 Smiths are born, 21 marry, 26 die. Mr. Schooling reckons that at this rate of departure it will take the existing family of Smiths 52 vears to die ont.

The greatest show on earth, the present address of which is Olympia, South Kensington, contains some queer specimens of human-ity. Among the 'freaks" are Mr. Eli Bourne, who was born without legs, and cheerily asks you to "excuse his not rising" me he shakes hands with you. There are young gentlemen who swallow swords as though they enjoyed it, and dance upon flaming coals with apparent delight. Young Hermann bares his manly chest and, pretending to confine it with a situation of conleathern thong, he swells with the pride of conscious strength, and the band snaps like a gold of the feeting to the lecturer, the meeting adof paper. Then there is Jo Jo, who proudly journed to the lecturer, the meeting adof paper. Then there is Jo Jo, who proudly journed to the lecturer, the meeting adof paper.

claims that he is "the marvel of the nineteenth century, the only living dog-faced man!" Jo-Jo has indeed a mane very much like a long-haired dog. Another novel feature is a party of eight howling and four dancing Dervishes, and four Bisharceus, from the neighbourhood of Assouan, 12 Bedouins, and 16 Sondanese. Their horrible yells, with the beating of drums and tambourines, and the shrill whistle of a Pan's pipe, make a terrific din, and they roll their heads about until they reach a state of frenzy.

# GERMAN ASIATIC SOCIETY.

The regular annual masting of the German Asiatic Society was held on February 1st, in the room of the Club Germania, Yokohama. Baron von Treutler, the German Charge d'Affaires, presided, and there was a large attendance.

Messis. F. Poll, E. Stuck, and G. Papert, of Kobe, were elected ordinary members.

On the proposal of the Council a paragraph of the Society's Bye-laws was changed so as to allow members residing abroad to pay their subscrip-tions at the rate of 12sh, or 12 marks or 15 francs

The Chairman then read the report of the Council for 1897. The general membership of the Society has increased to 254, the highest number ever reached. During the past year 43 new members have been elected, while seven resigned and four died. Ten general meetings have been held alternately in Tokyo and Yokohama.

The papers read to the Society during the session of 1897 were:

"Recent Literature on Japan" by Dr. M., Christ-

lieb.
"On Catalepsy, teligious eostasis, and similar phenomena in Japan," by Dr. E. Baelz.
"On apparent sexual metamorphosis of the domestic lowl," by Prot. F. Janson.
"An Ascent of Mount Morison in Formosa," by Dr. S. Honda.
"The Manufacture of Shoyn sauce in Japan," in Dr. O. Low.

by Dr. O. Loew.

by Dr. O. Loew.

"A New Year's excursion to Im no Oshima,"
by Dr. L. Riess.

"Girls' play and pastimes in Japan," by Mr.
R. Lehmann, Honorary Member of the Society.

"Leptusy in Hawaii and the home for Lepers
at Molokai," by Dr. E. Haberer.

"The Banking system of Japan and the advisability of founding a German Transoceanic Banking institution," by Mr. R. F. Stoepel,
"Poisonous soakes in Japan," by Dr. J. Taka-

"On Prof. Lange's Introduction to the Japanese system of writing," by Dr. K. Florenz,
"The truth about an alleged Datch intrigue

gainst the Portuguese in Japan," by Dr.

"On Psalmanazaar's description of the island of Formosa" by Dr. L. Riess.

Three new parts of the Society's Transactions (58, 59, and 60) have been published during the year, and a third instalment of Dr. Florens's translation of Nihongi, and two parts of Mr. Elimano's Japanese Proverbs have been printed as supplements to the Society's publications.

The Treasurer's statement, carrying over a balance of over 1,500 yen to the new account, proves that from a financial point of view the Society is in a flourishing condition,

In the list of exchanges a number of European and American Societies have been cancelled on account of their failing to send publications. On the other hand a few newones have been added, among them the Zoological Society of Japan in Tokye.

In future the Transactions of the Society will be printed in octavo size, the present form being inconveniently bulky.

On the motion of Dr. Backs the report was accepted. The election of officers for the ensuing year resulted as follows :-

Libeacians ......Dr. L. Riess, Mr. H. Kessler,

Dr. BARLE gave a lecture on the physical fea-

# SILK TRADE OF JA

Last year the silk trad NDENCE. most satisfactory resul-Japan and China, as MONEY SPENT ON Japan and Comment WORK AT HOME EXPORTS. AND ABROAD,

1897 To THE EDITOR OF THE "JAPAN MAIL."

SIR,—So far as the Methodist Church is conceined, the figures desired by "One Who Wants to Know" can doubtless be given him by one of the missionaries of that denomination. Our eading his letter, I felt curious to know exactly how the case stood in regard to our church, the Reformed Dutch Church in America. I therefore took up the year-book published in June, 1897, and turned to the Minutes of the General Synod, and this is what I found:—

and this is what I found :-Page 755, Summary of Contributions :--

Other Objects ... ... 100,805
Congregational ... ... ... ... 1,038,321

Total ... ... ... ... ... 1,344.105

Total ... ... ... ... ... 1,344.105
Pethaps a word of explanation is required. Denominational Objects," in this statement, includes Foreign Missions, Domestic Missions, Church Building, Education, Publication, etc., enterprises that are not entrusted to any single congregation but are conducted by agencies established by the denomination at large. The figures quoted by your correspondent evidently refer to objects of this class only. "Other Objects" are such as contributions to the Bible and Tract Societies, and for benevolent objects so far as they pass through the hands of the church officers. "Congregational" expenses include the salasies of pastors, Repairs, Building, etc.

"Foreign Missions" is included in the category

pastors, Repairs, Building, etc.

"Foreign Missions" is included in the category of "Denominational Objects." Turning to the Report of the Board of Foreign Missions, we find (p. 95) that the total amount received during the period under review was \$105,666 (cents are discarded). Division of this figure by the total contributions of the denomination gives as the percentage spent on Foreign Missions, 078+, say 7\$ per cents of the whole.

This is a alightly legger parameters they have

This is a slightly larger percentage than that given by Mr. Garst, although perhaps the difference is immaterial to his argument. But in forming a fair judgment the following circumstances must be remembered.

(1) That in our church, for various reasons, the secentage of Foreign to Home expenditure is larger than in most other denominations.

(2) That the category "Other Objects" contains, as stated above, only such a portion of the general contributions of our people for benevolent purposes as passes through the hands of the congregational treasurers. It necessarily omits, therefore, considerable sums for local charities, hospitals, schools, asylums, etc. etc., that are trained directly by the donors to the recipients.

Exactly how much this sum is, cannot, of course, be known, but it must be large in the aggregate, and would probably nearly, if not quite, justify what Mr. Gaist said. (2) That the category "Other Objects" con-

Yours very truly, ALBERTUS PIETERS. Nagasaki, Jan. 18, 1898.

# YOKOHAMA ENGINE AND IRON WORKS

The half-yearly ordinary meeting of shareholders

The half-yearly ordinary meeting of shareholders of the Yokohama Engine and Iron Works, Ld., was held at Keil's Building on Monday afternoon. There were present Messes. Jas. Walter, Chairman, J. F. Lowder, F. H. Bull, B. H. Pearson, J. J. Johnstone and G. Charlesworth, Secretary. The CRAIRMAN explained that under the articles of association it was only at the annual meeting in June that the accounts had to be presented and passed. But as the Company had been doing very well the Directors had had a balance sheet made out till the 30th November last, for the information of the shareholders, but not to be laid before the meeting for adoption. On sheet made out till the 30th November 1981, for the information of the shareholders, but not to be laid before the meeting for adoption. On the 31st October last an interim dividend of \$1st per share had been pard. The large balance of \$63 598, which had been wrongly stated in the accounts presented at the last annual meeting in the accounts presented at the last annual meeting, and had been carried forward, would be wiped off the current account and placed to capital reduction account before the next annual meeting. He might add that the business of the Company had been very satisfactory even during November and December, which were generally the dullest months of the yeal.—(Hear, hear.)

This concluded the business and after a vote of thanks to the Chairmen that streeting diversed.

# YOKOHAMA ROWING CLUB.

# ANNUAL MERTING.

The annual meeting of the Yokohama Amateun Rowing Club was held last evening at Keil's Build-ing, 61 Main Street. Mr. H. C. Litchfield, Pre-sident, presided over a large attendance.

THE REPORT.
The report was read by the Chairman.
It stated that before the Committee elected at The report was read by the Committee elected at the last annual meeting could get to work, Messis, McLaien and H. S. Goddard resigned, as they found themselves mable to undertake the duties of office, and Mr. Mair also intimated that he would not be able to carry on the duties of Hon. Secretary. Mr. Hayward was invited to join the Committee as Hon. Secretary, and Mr. Campbell to fill the vacancy caused by Mr. McLaien's resignation, Mr. Goddard's place on the Committee being taken by Mr. Mair. Mr. F. J. Hall had been appointed one of the Trustees of the Chub's property in place of Mr. Boag, deceased.

The accounts showed a balance in favour of the Ciub of \$1,760.39, in addition to which uncollected subscriptions and Bar chits amounted to \$158.77. The Bar had produced a profit of \$675.58, a decrease as compared with 1896, which was accounted for by the increased cost of liquors, an increase in wages, and new fittings.

The interest in rowing had been well sustained.

The interest in rowing had been well sustained, The interest in rowing had been well sustained, and the Regattas had been well up to the standard of the past few years. At the Spring Regatta a crew from the First Higher School of Tokyo competed against the Club in the four-oased boats, but suffered defeat at the hand of the "four" selected to represent the Club against Kobe. The visitors were, of course, heavily handicapped by their want of knowledge of sliding seats, but nevertheless they rowed a plucky race. What may now is called the annual laterport Regatta took place at Kobe on 22nd May. The representatives of the V. A. R. C. were successful in winning the two scalling caces (double and single), but were defeated in those for "fours" and "pairs,"

At the Autumn Regatta the chief interest

but were defeated in mose for "outs and "pairs.

At the Autumn Regatts the chief interest centred in the four-oated tace for prizes presented by Mr. Rickett and styled the "Rickett Farewell Cups." The hearty thanks of members were due to their old Captain for so kindly presenting these cups.

After references to the Swimming Races and Aquatic Sports the report proceeded to state that in December it was found that the pontoons were both leaking, one badly and the other slightly. In 1895 the Yokohama Engine and Iron works effect-1895 the Yokonama Engine and ron works effect-ed considerable repairs to the Barge, and guaran teed their work for three years from the date of its conclusion, "damage caused by typhoons, menfi-cient moorings, hauling up, or launching except ed." The Committee had applied to the Yok hama ed." The Committee had applied to the Yok hama-Engine and Iron Works to carry our their guarantee, and had received a reply to the effect that they were prepared to do so, should examination prove their work to be faulty. A rangements were being made for hauling up the Barge, so that she could be thoroughly examined. The Committee had built a second sampan at a cost of \$1.41 and the Chib was now independent of the sampan men at the French Hatuba.

The old blue and red boars had been sold to the

The old blue and red boats had been sold to the Nagasaki Rowing Club in \$90 each ; and the old green boat had been offered to the Imperial University for \$100, but so far no sale had been effect-ed. The remaining four-oxied boars were to serviceable condition, but the incoming Committee serviceatie condition, but the incoming Committee would do well to order three sets of oars for these boats, as the present stock was only sufficient to supply one set to each boat. The pair-corred and double-sculling boats might be replaced by others better suited to the rough water so often experienced here. The Committee would suggest that the Cale attain three pair and heat each experienced here. The Committee would sup that the Club obtain three pair-pared boats two double-sculling boats, and consult with the K. R. & A. C. as to the type of hoats to be procured, with a view to each Club obtaining similar boats, and so improving the interport contests.

The House was in good order. The typhoon of oils Sept. did a good deal of damage to the two slips, necessitating repairs costing \$100. A new Band-stand had been constructed, and a new and

nion of the Committee, to keep this scheme of registration strictly in force.

registration strictly in force.

The principal items on the debit side were as follows:—Wages, 479 14 yen; working account (sampan hire, extra coolies, &c.) 211.45; Honsa account (including 237.50 reaction of band stand and repairs), 753.35; Bithing Barge and Landing Singe account 243 20; Boat Account, 471.90; Regatta and Aquatic sports, 400.42; Interport Regatta, 212.53; Diamond Jubilee, 124.16; Printing and Stationery, 186.00; Brizes, 650.58; Stop watch, telescope, and starting gun 319.38; Rawing costumes 226.92. On the credit side the chief entries were the following:—Balance from 1896, 912.97; subscriptions, 3,415.00; enfrom 1896, 912 97; subsc. iptions, 3,415,00; entrance lees, 540.00; race entrances, 168 50; rest for private boats 25.00; interest 13.04; boats 30d 227 77; bar profits 584.81; other items 250.42. Balance, yen 1,760.39.

250.42. Balance, yen 1,760.39.

A GOOD FINANCIAL RESULT.

The CHAIRMAN said he was glad to say they could show a good financial result for the year 1897, and also, he thought, a fair working year in rowing. They would observe from the report that the Committee had grave trouble in filling up their quata of officers, but when their places were filled up he was glad to say they found the Committee worked together conduitly, and they had been well supported by the members of the Club.—(Hear, hear.) And he hoped this support and this cordinity would be continued to the Committee's successors in office, as the zeal and energy of the officers were of very little use if they had not the hearty sympathy and support of committee's successors in office, as the zeal and energy of the officers were of very little use if they had not the hearty sympathy and support of the members. The fact that 52 new members had juined during the year was in itself sufficient proof that the Chub was appreciated. The only fresh item in the report was that unfortunate bathing barge. It seemed they would have very nearly to have a new barge. However, the old one had done very good service, and had been in existence for nearly ten years. The Committee suggested, and he thought their suggestion should be carried into effect, that the Club was urgently in need of some new pair oar boats and sculling boats. Their members had increased, and they must now provide them with good materials for their use. He thought pair oar and sculling boats were very desirable for forming a really good style of rowing. Pair oar-rowing, properly understood, was really the best school of watermanship young men could take up and also the great test of skill among older and more practised oarsmen.

Mr. G. H Schworz moved that the report be

Mr. G. H SCIDWORE moved that the report be adopted. Dr. TRIPLER seconded, and the motion was

ELECTION OF OPPICERS.

The election of officers was then proceeded with, the Chairman amounting that Mr. Hayward had resigned the Secretaryship and that Mr. Schellenberg had declined to act as Treasurer. A ballot was then taken, and resulted as follows:—President—Mr. H. C. Litchfield; Caprain—Mr. F. J. Hall; Secretary—Mr. M. Schellenberg; Treasurer—Mr. G. C. Arlocok.

Another ballot was afterwards taken for the Committee.

The CHAIRMAN expressed regret that the Club had lost the services of Mr. Campbell, who had been called to another place, and that Mr. Mair, had also been obliged to give up his place on the Committee. Both gentlemen would be a great

Committee. Both gentlemen would be a great loss to the Club.
The ballet was declared thus:—Mr. W. Goddard, Mr. H. E. Hayward, Mr. H. Rose, and Mr. J. Macenthur.

The meeting shortly after terminated,

# UNION CHURCH.

The annual meeting of this church was held last Wednesday night at Van Schaich Hall, the Rev. E. S. Booth presiding.

The following were elected as church officers:—Elders, Revs. E. S. Booth, J. G. Cleveland, and Mr. A. J. Wilkin; Deacons, Messes, G. Booth and C. V. Sale; Deaconesses, Mrs. E. S. Booth, Mrs. Cleveland, and Mrs. G. Meacham; Organist, Mr. C. V. Sale; S. S. Superintendent, Mr. A. J. Wilkin; Trustees, Rev. J. H. Ballagh, Messes, C. V. Sale, G. Booth, Pollard, and C. G. ffin.

# LANGEELDT & CO.

The half-yearly general meeting of this company was held on Monday afternoon at No. 61, Main Street, Yokohama, Mr. J. F. Lowder present Messars. E. S. Edwards, Meyerdirks, Bleifus, F. Retz, F. H. Boll, O. Keil, and J. Feicke (Secretary).

## THE REPORT. The report was as follows :-

The Net Profit for the half-year, including balance brought forward from the 30th June, 1897, and after providing for General Expenses, Directors' and Auditor's fees, Depreciation and Losses, amounts to yen 24,244.58, which it is proposed to apply as follows:—

and the second second second	y = 10.
In payment of a Dividend of yes 15 per	
ahase	22,500 00
In payment of a Boaus to the employes of	_
the Company	00.000.1
Balance to be carried to new account	744 58

Total...... 24,244.58

Messrs. Lowder and Retz retire from the Board, but offer themselves for re-election.

Mr. Cacil Gainness having resigned the office of Auditor, the Directors have requested Mr. E. Hutchinson to succeed him. The appointment requires the confirmation of the shareholders.

ASSITOR'S REPORT.
Lawreness and compared them with the vouchers of the Company, and certify them to be Vokohama; January 1981, 1898.

B. Hutchinson, Auditor.

The Chairman, is opening the meeting said:
Gentlemen.—In presenting this report and
these accounts your directors feel the satisfaction
that they availly experience at the period of the
year, and I shall be very glad if one of you
would propose the adoption of the report and ac-

Mr. MRYSROIRKS proposed, and Mr. Bleifus

seconded, that the report he adopted.
Carried unanimously.
The CHAIRMAN said the next business was to confirm the appointment of Mr. E. Hutchinson to succeed Mr. Cecil Guiness as auditor. True to their policy they had requested one of the officers of their own hankers to act as auditor.

Mr. MEYERDIRES proposed, and Mr. Blairus seconded, that the appointment be confirmed.

The CHAIRMAN and Mr. Retz were re-elected as directors, and the meeting, which lasted exactly three minutes, then terminated.

# AUSTRALIA AND JAPAN.

(FROM OUR CORRESPONDENT.)

Sydney, December 24th.
The protest of Mr. T. J. Nakagawa, Japanese
Consul in Sydney, against the Aliens Bill introduced by the New South Wales Government into the colonial parliament, has not excited much come rise both in civilisation and in actual incluss—

bour of Japanese cooles is selling in their countries, and for several reasons, one being that there hard names, or making insulting comparisons at higher rates than are obtainable here for localists no real feeling against Asiatic races at about it. By the way, it is significant of the coal. That is to say, the Japanese coal-miner is such, but against the wholesal importation of the progress that Japan has made, that while for realistively better off than his Australian competitively of the coal inclusion.

UNIVERSITY OF ILLINOIS AT

class Syrians, Aighans, Chinese, Kanakas, and others, under contract to employers who farm oumacket rates. market rates. For the Japanese, as a people Australians entertain no other feelings than those market rates. For the Japanese, as a people, Australians entertain no other feelings than those of esteem and respect, as shown by the cordial relations existing among the various Japanese merchants and store-keepers in Australia and their customers. Moreover, the possibility of an Angla-Japanese alliance against Russia and other encroaching Powers in the Bast is not being overlucked, especially at the present moment when the dismemberment of the Chinese empire appears inevitable sooner or later. Mr. Nakagawa's protest has been widely reproduced in the colonial papers, and the facts adduced by him have created a favourable impression. The Hongkong Daily Telegraph regards the objections taised to the proposed measure as largely of a sentimental character. "The Japanese at present do not want to come here in any considerable numbers, as they can do better at home, and instead of the Mikado's Government being anxious to get rid of its subjects, it is distinctly opposed to their leaving the country. Practically speaking, the restrictive legislation proposed here suits the present policy of Japan better than if we were to encourage the influx of its people to our territory. The grievance is, therefore, one of pure semiment, and nothing alse. And this arises chiefly from a misunderstanding of the bottom ground on which our policy of alien exclusion is based. It implies misunderstanding of the bottom ground on which our policy of alien exclusion is based. It implies no contempt of the Japanese, or of any other people; it simply recognises the physical fact that European and Asiatic blood dees not blend in such a manner as enables the two races to form a homogeneous community. Where they exist tegether as segregate elements, therefore, that which is the weaker will be subject to the stronger, a state of things inimical to the common interest and destructive of the tie of patriotic clitzenship by which all the members of any State should be bound. This is not because Asiatics are necessarily inferior to Europeans. Rachrace possesses characteristics which the other may admire, and conspicuous amongst the intelligent and progressive peoples of the world are the Japanese, who in their own country and their own way need misunderstanding of the bottom ground on which and conspictors known to the intengent and progressive peoples of the world are the Japanese, who in their own country and their own way need fear nothing from comparison with the most civilised branches of the Caucasian family.

The reference made by Mr. Nakagawa to the recent efforts on the part of Japan to develop traderelations with this colony do not touch the question at all. There is no doubt that we have derived benefit from this enterprise, and have a prospect of deriving much more. But this is not the sole reason why Japan spends £70,000 m year on an Australian steam servier, or has abolished the wool duty, or is preparing to take home cargoes of frozen meat. All this is done to said itself; that we are also suited by it is merely incicargoes of frozen meat. All this is done to suit itself; that we are also suited by it is merely incidental. Nevertheless, it would be a matter for general regret if the friendly development of trade relations by which we mutually benefit sustained any check. There is no reason why our alien immigration policy should produce that effect. The trade referred to by Mr. Nakagawa soes not require the existence of an Asiatic colony here, and it is only against the establishment of such that the Aliens Bill is directed. The anxiety of the Japanese Government is to promote trade with Australians, not with their own people settled in Australians, not with their own people settled in

Australians, not with their own people settled in Australia; consequence what immigration law this colony chooses to adopt."

The Sydney Evening News points out that the sting of the Atiens Bill consists in the fact that "the Japanese are therein deliberately classed with the Chinese, whom they have lately beaten in a war (the lessons of which were not disdained even by the great European Powers) and whom they hoth have and despise." Probably, continues the News, "a Japanese of the present day feels about as hurt at being considered on a level with a Chinese as a Southerner of the old type would have been at being mistaken for some man showing "a touch of the tar brush." By all means let the Japanese be kept on, but for the fair and anderstandable reason that Australia is wanted for white men, who do not desire to have the comfor white men, who do not desire to have the com-petition of men of a different race and scale of living. A bill of this kind could be based on a friendly arrangement, and could be put through without any insulting references to a people who, taking the average, are certainly not mentally inferior to many white populations. There is no need to be frightened of the Japanese, or to consider them as a sections danger except as competitors in them as a socious danger except as competitors in industrial fields; but still there is no sense in calling a rising people—a people which intends to rise both in civilisation and in actual incleas—

hundreds of years she was keeping Europeans out and often getting into trouble for so doing European Australians are now endeavoring keep Japanese out of this country, and have got slight snub about their methods of going to work."

The Australia Star, the organ of the New Sourie Wales Protectionist party, which is ways decrying importations from Japanesem other countries, true to its exclusive policy, remarks that "In his protest against the Aliens Bill, Mr. Nakagawa, the Counsul for Japan, gives some information that will be of interest to those engaged in the Newcastle coal-mining industry. The Consul points out that there are considerable supplies of coal in Japan, but owing to the increase of manufacture. castle coal-mining industry. The Consul points out that there are considerable supplies of coal in Japan, but owing to the increase of manufacturing, coal raised in Japan is selling at more money than here. The coal miners, who declare that the fiscal question does not concern them, and who vote for labour members pledged to "sink" it, might profitably mark the statement of the Consul that the increase of manufactures has sent up the price of coll in Japan. Such an increase here would mean, of course, an increase in wages. Under free-trade we are enabled to compete with Japanese coal, and our miners are remunerated in a sum that, taken with interruptions to work all the year round, amounts to little more than a living wage. If it pays Japanese steamers to come to Newcastle and buy coal to run Japanese factories it should certainly pay us to run manufactories with our own coal; but, apart from this aspect of the question, it is evident that our coal is being sold far too cheaply. Japanese labour is abundant and cheap, and it follows that coal raised in Japan should be considerably chesper than coal obtained in Newcastle by white labour that, if intermittent, is still paid union chesper than coal obtained in Newcastle by white labour that, it intermittent, is still paid union rates. In view of the statement of the Japanese Cousul, an effort should be made to raise the price of coal, but that is easier said than done. There is too much coal easily accessible, too many collieries at work; in a word, too much cut-throat competition, to permit this mb edone under existing conditions. In order to raise the price of coal to its proper level concerted action is essential, but this appears to be almost impossible. It is a coal to its proper level concerted action is essential, but this appears to be almost impossible. It is a good thing to have a market for our coal in Japan, but that our coal should be cheaper there than local coal is a vast industrial lumiliation. Probably in a few years the articles wrought in Japan by the power of our coal with return to us, but that is free-trade; always to be hewers of wood and drawns of water for the industrial aristocrats of the earth is the destiny of the people of this country, according to the law of Cobden."

Taking up the same points of Mr. Nakagawa's protest, but in a more liberal spirit, the Newcastle Morning Herald, after describing the development of the Japanese coal mining industry, and its threatened competition with that of New South Wates, observes that the economical position of Japanese

observes that the economical position of Japanese and New South Wales coal has become reversed," and New South Wates coal has become reversed. How this came about was clearly referred to in the protest recently made by Mr. Nakagawa, the Japanese Consul in Sydney, against the passing of the Aliens Bill. In that document the representative of Japan pointed out the considerable trade relations which have sprung up during recent years between his country and Australia. Among other statements made is one that wages Among other statements made is one that wages have nearly doubled in Japan within the last three years, consequent upon the marked development that has taken place in many industrial pursuits. It has recently been locally stated, as explanatory of the present position of the coal trade in Japan, that the Government of that country, knowing that its coal resources were limited, preferred to keep its coal rather than sell it at unprofitable prices. This artitude is both nossible and terred to keep its coal rather than sell it at impro-fitable prices. This artitude is both possible and reasonable. But in Mr. Nakagawa's protest nothing such as this is advanced as the reason why Newcastle coal is now being sent to Japan. The consul explains the matter thus:—"There are concoustl explains the matter thus: -- There are considerable supplies of coal in Japan, but, owing to the increase of manufacturing, coal raised in Japan is selling at more money than New South Wales coal is selling at here. That is formally stated to be the reason why the steamers belonging to the Mitsui Bussan Kaisha are now calling monthly at this port for cargoes of our coal. That fact may be used as a basis for two arguments which are not quite parallel. On it may be founded the statements that competition is the soul of business, and that the great reduction in noice of our stable statements that competition is the soul of business, and that the great reduction in price of our shaple during recent years was the only means which would have been effectual in-meeting the product of the mines of the land of the Mikado. The argument which will be most in favour with the mines of this district, however, is the undoubtedly correct one that coal raised by the low-priced aly bour of Japanese coolies is selling in their countriate higher rates than are obtainable here for locational. That is to say, the Japanese coal-mines is

tor. Doubtiess, too, the Japanese colliery owner makes much more out of his property than does his Australian brother in business out of his. That the white man has for the present heaten the brown man off the industrial field should therefore the tegarded as an argument against further local reductions. No stronger statement as to the low tost of out local coal could be made than this that it is cheaper lot the Japanese to import New South Wales coal—notwithstanding that to its cost is to be added a freight which cannot be valued at less than, say, 8s a ton—caster than to use their own, which is won by native workmen, probably assisted by convict labour. Swely such a result is one with which the local admirers of atill cheaper coal should be abundantly satisfied."

The Melbonne Argus thinks that the words of Mr. Nakagawa see entitled to more consideration than they are likely to receive. "Japan is a rising Power—almost m great Power already, measured by European standards. She is advancing fast on the path of Western civilisation, and is alming just as a resolutely to expand her trade as to increase her weatilest attention.

on the path of Western civilisation, and is alming just as resolutely to expand her trade as to increase her warlike strength. Her national pride is likely to be all the more sensitive because her admittance to the comity of civilised nations is hardly yet accomplished. Under these circumstances the action of Australian colonies indiscriminately classing the Japanese with the Asiatic races whom they consider far beneath them must rankle deeply. The New South Wales measures make no distinction between Chinese, Afghans, or Japanese. All are victually barred out, the only difference being that the Indian subjects of Her Majesty are to be excluded by an educational test instead of by more direct means. Supposing for a moment that the assurance of the Japanese consul is literally correct, this affiont is needless. test instead of by more direct means. Supposing for a moment that the assurance of the Japanese consul is literally correct, this affiont is needless. Japan would, he says, he willing to negotiate on terms of equality for such a restriction of immigration as New South Wales desires. But instead she is to be subjected to the humiliation of a general exclusion bill. He points, by way of emphasising the argument, to the disposition shown by Japan since the war to hold out the hand of frieadship in Australia, and to he activity in opening me commercial relations with this country. A year or two ago, it looked as if we were no less eager to secure what the Japanese market could offer, but the attitude of our politicians belies us. On the side of Japan it is claimed that the duty on wool has been removed, for it is the policy of the Government to encourage such innovations as the wearing of woollen colling and the consumption of mutton. For this purpose a substantial subsidy is paid to maintain a regular steamship service with Australia, and the fine vessels in course of construction are being fitted with refrigerating appliances for the carriage of frozen meat. This trade may require some building up, for a people do not abandon moment habits in a day, but it has at least possibilities of great expansion. The idea which obtuides itself uncomfortably is that these overtures are being requited in very injudicious fashion. We should like to feel that New South Wales and other Australian Governments were driven by shees compalsion before they contemplated putting a slight tralian Governments were driven by sheer compulsion before they contemplated putting a slight of this sort upon a progressive nation, which is showing unusual enterprise in developing commercial intercourse with these shores. As matters stand, such a conclusion seems by no means justified. New South Wales has not suffered as yet from an influx of Japanese, although the question may have become a live one in Northern Queensland and Thursday Island. If its consideration is forced hereafter upon the southern colonies, we are assured by Mr. Nakagawa that there are other ways of achieving our end than the summary one adopted across the Murray. It would be satisfactory to know whether this is or is not the case before other colonies follow the inconsiderate, if not reckless, lead of New South Wales."

These extracts, which might be multiplied indefinitely, fairly illustrate the general tone of public feeling in Australia. The attempts made, with the assistance of the Japanese Government, to foster trade relations between Japan and Australia, have naturally tended to increase the friendly feeling evinced by the colonists towards the Japanese, and but for the persistent efforts made by the protectionists, in their eagerness to secure trade restrictions of the most objectionable character, some way would be devised of omitting the name of Japan from the Bill. But of one thing we may be certain, the B-itish Government will never allow any of its colonies to adopt unfriendly legislation towards a friendly Power. tralian Governments were driven by sheer com-pulsion before they contemplated putting a slight

NOTES (by Gansberg). (a) We are opposed to the early advance of P to K 5 in the French defence in any shape or form

(b) The originality of this move is not to be denied; but its value is very doubtful, for if Black takes the pawn it keeps to the White Q Ki, and the pawn can well be defended.

(c) As Black has his development much retarded, some such plan was best for him.

(d) The natural complement of P to K Kt 4 would have been R to K Ktsq with a view to playing Kt to Kt 3.

(e) B to K 2 was a much better move.

(!) A useless move.

(g) Black has no prospect of successfully defend ing this pawn, and the exchange has greatly weakened his centre.

(h) If to II 3 was imperatively necessary; moreover, Black could have had no hope whatever to defend his king's side against White's cook, therefore castling king's side is worse than useless.

(i) A bright finish, if B takes Q, R to B 7, mate; or, if B takes R, 27—R takes B.

# AN INSTRUCTIVE END GAME.

The American Chess Magazine in its current issue states that the prospects for another match hetween Harry N. Pillsbury and Jackson W. Showalter are very bright. Mr. Showalter is desirous of playing and Mr. Pillsbury is not averse. The details of the match are now being considered, and the terms, alless and agreement are likely to and the terms, tules and agreement are likely to be arranged so that the match can be finished in time to allow the players to aftend the Vienna tournament in May. Mr. Showalter states that he would like to begin about the middle of lannary.

There is a rumon affast to the effect that Janowski and Charonsek will in all probability play a match, either in Berlin or Vienna, and that a similar contest between Charcosek and Burn will be played in London. To the latter case it is also planned to match the amateur champion, 11. E. Atkins and Charousek.

Another match by telegraph has been started between Vienna and St. Perersburg.

"Are you a chessplayer?" asked the landlord of a prospective tenant. "I much prefer to have my houses occupied by chessplayers."

"No, I am not a chessplayer, and I can't account for a such a singular preference." "It is simple enough. Chessplayers move so seldom and only after great deliberation."

THE PLEASURES OF THE GAME. Sing not to us of passion, plot, or plan, Of woman's love or beauty bright; Give me the joy that thrills a man Who finds a brilliant win in sight,

# KING'S GAMBIT DECLINED.

In the present day many these players feat to offer a King's Gambit, became it is likely to be accepted. In days gone by the theory mervailed that all gambits were meanind, and, therevailed that all gambits were unsound, and, therefore, you had merely to accept gambits to win games. The world, however, grows wiser (perhaps) as it grows older, and it has, therefore, come to pass that although most authorities still maintain that gambits are mosund—in theory—they are sound enough in actual practice to be daugerous; and, therefore, they prefer to decline them. In the case of the King's Gambit, however, we vary much doubt whether the proffered pawn can be declined with impunity. The two methods of declining generally most feared by the attacking party are 2...... Pto Q 4, and 2...... B to B 4; but we think we can show that in both cases White should ultimately emerge from the opening with some advantage, either in position or material. Let us examine the first variation, known as the "Falkbere Gambit:—

1 P K4 1 P K4 P K4 2 P KB4 P Q4 . 3 PxP

2 P KB4 P Q4 I
White has now several montionations. He may continue, 4-B to Kt S chl or Kt to Q B 3 or Q to K 2 (suggested by Steinitz), or B to B 4; and last, but not least, 4-P to Q 3. In the latest addition of the "Handbuch" tree present writer is credited with having invented this move, and the variations which spring therefrom. As a matter of fact, however, the move was suggested by Löwenthal in his book of Morphy's gaines, published more than 30 years ago. But Löwenthal gives no continuation. Suppose them—

4 P Q 3 Ki K B 3 7 B Q 2 B x K t 5 Q K 2 1 Q x P 8 B x B B K t 5 6 K 1 Q B 3 B Q K 5 1 18 ..... Castles, 9 ~ B takes K 1, P takes II or 9 ..... P takes P ? to—Q to K 5, Q to B 3 ! 11—B to K 7, &c.).

g PxP! BxQ BxB 12 BxP R Kts 13 R K sq ch K Q2 14 B K5 10 PxQ K-xP

White has a Pawn which, with a little skilled manipulation, he can probably maintain, but in any case he has probably sufficient advantage to win the end-game. Hereford Times.

# YOKOHAMA CHESS CLUB.

We are glad to notice the increasing interest exhibited by members in the work of the Club, the meetings during the past mouth and the beginning meetings during the past mouth and the beginning of this mouth having been exceptionally well attended. A considerable number of Tomosomeout games have been played, in the "Ladder," the Secretary's Handicap, and the Championship, some of which were exceedingly well contested and are worth recording. We hope players will in future favour us with the scores of their games, for we are some that our readers will welcome local specimens of Chess as malesant changes from the specimens of Chess as a pleasant change from the usual master games clipped from home papers.

The score in the first round of the Champion-

ship Tourney stands now :-

	GAMES.	
PLAYER.	WON. I	ost.
F. x		
Mendelson		
Pollak	2,	0
Hodges	0	2
Friedlander	2	n
Thomas	g	2

It will be seen that Mr. Tennant and Captain Weilbach have not yet mel, but we believe these gentlemen will begin their match at the next meeting.

# LATEST COMMERCIAL.

# IMPORTS

A strong demand for grey shirtings, particularly in long lengths, has continued during the week, and has led to a fair business being transacted. The activity in the yarn market noted last week has somewhat abated, but a fair business has been done. There have also been enquiries for fancy cottons and woollens, not, however, resulting so far in any considerable business.

# THE GREATEST WONDERS OF MODERN TIME

# HOLLOWAY'S PILLS.

DERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills,

Sin Samush Bassa, in his work entitled "The Nile Tribut taries in Abyssinia," says—"I ordered the dragoman Mahometo Inform the Fakir that I was a Doctor, and I had the best medicines in the service of the sick, with advice grants. In I short time I had many applicants, to whom I served out a quantity of itolioway's lills. These are most useful to an explorer, as, prissessing unmisstakuble purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value,"

# SIMPLE, SAFE, AND CERTAIN. HOLLOWAY'S OINTMENT

Is a certain emedy for had legs, had breasts, and interations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduling all inflammations, Ma. J. T. Coorsa, in his account of his extraordinary travels in China, published in 1871, 3878—"I had with me a quantity of Holloway's Ointment. I gave some III the people, and nothing could exceed their gratitude; and, in consequence, milk fowly, butter, and horse feed pour. Jin upon us, until at last a teaspoonful of Oistmept was worth a fowl and any quantity of peas, and the demand became so y'est that I was obliged to look the sonail remaining "stock."

A TEL GRAN from Peking to a vernacular paper states that to avoid difficulties with Russia or Great Britain, in accepting a loan from either, the Chinese Government has decided to fall back on a domestic loan of 100 million tacls.

On the tatinat., a luggage train on the Kyushu Railway, while approaching the Futsukaichi Station, was derailed. A passenger train coming up behind met a similar fate. More than 30 passengers are reported to have been iniared, one man severely.

TRAFFIC on the Tokaido railway between Yamikata and Oyama was stopped on the 7th inst, by a fall of rock either in a tunnel or cut-It was expected that the line would not be clear for several days, but arrangements baving been made the mails got through on the ath.

In connection with the recent Kobe Customs frauds, two of the accused, Funahiki Hyoda, editor of a daily report of Imports and Exports, and Nagai Kotaro, a clerk employed in the Foreign Chamber of Commerce, have been convicted of complicity in the frauds and sentenced to two months' imprisonment and a

DURING the trial of a case in the Kobe District Court a few days ago, proceedings were brought to a deadlock through the Procurator refusing to obey the Judge when the latter demanded to know the name of a "secret service man" who had assisted the police in arresting some defend-ants accused of gambling. The Procurator withdrew from the case and proceedings were anapended.

THE Import market during the past week has been fairly brisk as regards cotton piece goods, yarns, and raw cotton, but little has been done in metals. In view of considerable shipments in transit, buyers appear to be waiting for a fall in prices, but whether this will occur appears doubiful, as reports from home show a very firm market. Some considerable transactions have taken place in kerosene, among others 10,000 cases out of 40,000 of Sumatra oil in arrive. having been placed. Arrivals of American oil both at Yokohama and Nagasaki have been fully equal to requirements, and a reduction in prices is anticipated by buyers. A fair business has been done in sugar, both brown and white refined. Arrivals of Manila brown, of which none remained last week, have amounted to some 40,000 piculs. There has been a very considerable import of China and Saigon rice, at very firm prices, as the grop in Cochin China has not been a full one and there is a good demand for Europe. In Exports, there has been a fairly good daily business done in Silk, both raw and waste, but the boom in the latter line, reported a fortnight ago, is over and buyers are getting wary in view of the high prices maintained. Scarcely anything has been done in tea, and in fact there is little chance of much transpiring, as the small stock still remaining

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

# SPIRIT OF THE VERNACULAR PRESS.

The object for which Japan has worked so long, namely the recovery of her turiff auto-nomy, being now at length within sight of achievement, the fift Shimpo has something to say on the subject. Considering that the United States derives 160 million dollars, or nearly fifty per cent, of its total revenue, from import duties, and that even Italy, essentially a poor country, obtains fifteen per cent. of its revenue from the same source, whereas the figure in Japan's case is only  $3\frac{1}{2}$  per cent., there cannot be much room to doubt that a change of rates is urgently needed. The necessary arrangements have now been made after infinite difficulty, and since there is every prospect of the speedy conclusion of the only two remaining treaties, namely, the French and the Austro-Hungarian, it is expected that the new tariff will come into operation from September or October next. The duties chargeable will be levied in accordance with two bodies of regulations, the Conventional Tariff and the Statutory Tariff, the latter being supplementary to the former in the case of countries that have treaties with a most-favoured-nation clause. There is no doubt that these new tariffs represent a great step in advance, m compared with the tariff now in force, but, on the other hand, their provisions are by no means perfect. It is an accepted principle in Japan that import duties should be levied wholly for purposes of revenue and not at all with a view to protection. The tariff ought therefore to be drawn up in such a manner at to obtain a maximum of revenue while opposing a minimum of obstacle to the development of the import trade. It is questionable whether that aim has been kept fully in view by the drafters of the new schedules. Then, again, every encouragement should be given to the growth of domestic manufactures, and all raw materials required for industrial enterprise should be admitted duty-free. From that point of view the placing of raw cotton on the free list was a wise step, but there are other articles that ought to be similarly treated. Another important point is that whereas Germany a d England, for example, retain absolutely unlimited power to impose what duties they please on Japanese products and manufactures, Japan's power to tax British and German goods is suictly limited. That cannot be called an equality of rights. Thus, though there is much cause for congratulation on account of the progress represented by the new tariffs, it will not do to suppose that the situation is entirely satisfactory. Something still remains to be accomplished.

One of the most remarkable features of Far-Eastern politics is the growth of China's foreign indebtedness during secent years, says the Nichi Nichi Shimbun. Up to a very modern date she was virtually free from all pecuniary obligation to Western countries. In 1887 she contracted her first foreign debt, a paltry sum of five millions of marks to Germany. Then she barrowed a silver loan of £1 635,000 from English in 1893, and a gold loan of three millions sterling from the same country in 1894, to gether with various smaller loans, aggregating about two millions sterling from sundry sources The total was paltry, and was amply secured by the customs revenue. But in 1895 and 1896, respectively, China made two big loans of £15 820,000 and £26 000,000, and now she is negotiating another foan of sixteen millions. On the other hand, her state income is small. According to the calculations of Herr von Brandt, the total sum collected from the people is 100 million tacls annually, made up of land tax (35 millions), customs dues (23 millions), transit dues (12 millions), likin (10 millions), selt tax (10 millions) and miscellaneous taxes (10 millions). Of this total, however, only about one-third finds its way to Peking, if Herr von Brandt's figures be correct. He probably estimates the receipts of the Central Government at too low a sum, but it is certain that they

fore, China is not in a position to borrow money abroad. She has already pledged her customs dues for all that they are worth, and, her national credit not being a particularly valuable asset, she has to look round for a new security. Meanwhile, Western Powers find their opportunity in her impecutiosity. They press their money upon her, not indeed without security— England, for example, seeks to have the land tax hypothecated to her in connexion with the new loan -but still with a readiness that would be unaccountable were not other conditions attached. conditions providing an increase of commercial privileges and an improvement of political position for the creditor. When the Shimonoseki Treaty was concluded, a great many critics said that the Japanese negotiators had made a mistake; that they had exacted from China a pecuniary promise which she would never fulfil, and that her engagement to pay 200 million tacks was not worth the paper on which it was writ-ten. Those critics have long lapsed into silence, and are now replaced by commentators who express great satisfaction at the prospect of China's paying off the remnant of the Indemnity. the former were pessimistic. For it's very plain that one of the objects which induce Western Powers to offer money to China is that she may be able to pay Japan off, so that the latter shall be deprived of all special claims upon her neighbour. If Japanese publicists looked a little more intelligently into the events of the time, they would perceive that to be paid off is not, perhaps, the most desirable result for their

The Osaka Asahi has four articles in series on the subject of national isolation. Undoubtedly there are advantages connected with isolation. Japan reaped them in the middle ages and they were so fully appreciated by the Tokugawa Government that it adopted and enforced the most extreme form of isolation. On the other hand, isolation has its drawbacks. From them also Japan suffered. She found that, owing to want of intercourse with other countries, she had fallen far behind in the race of progress. She has been strug-gling hard during the last thirty years to recover her lost ground, and to some degree she has succeeded. But geographically speaking, she is condemned to isolation. It takes her people days to reach the shores of any other country. That fact, however, coafers many benefits. England illustrates them. It is not a question of "sour grapes" with Englishmen when they boast that their country stands alone, They know the advantage of being able to remain beyond the range of international collisiona and frictions. Japas, occupies in the Far East a position analogous to that occupied by England in the Far West. But it must be confessed that the benefits of isolation become very doubtful when a union of Powers has to be faced, Japan has had bitter experience of that truth. The opening of her intercourse with the outer world placed her vis d-vis m phalaux of fourteen Western States, and they held her in a vice. Sir Harry Parkes, Great Britain's Representative, stood at the head of the phalanx and wield ed its forces. Japan was powerless in the face of such a union. It was for that resson that Count Induye failed to revise the Treaties. Count Okuma appreciated the fact. He adopted the policy of breaking up the phalanx and negotiating with each Power indepen-dently. His programme of revision was faulty, but his method of procedure deserved full praise, It is true, indeed, that he did not originate that policy: Count Terashima had set the example. Still, to Count Okuma belongs the credit of having made practical application of the principle. Count Mutsu, following in the same lines, was at length able to achieve the country's zim. The lesson taught by these incidents was that a single State can not succeed unless its dealings are with a single State. A ruder and more forcible illustration of the same principle was afforded in connexion with Liantung, Russia, Germany and France combined against

combination. Italy attempted to help her, Italy has no great stake in the Far East, but she would be pleased to extend her interests there, and her position in the Mediterranean makes her a special friend of England's. She, therefore, approached England on Japan's behalf. But England declined to move: her policy at the time was one of neutrality. Thus Japan stood finally alone, and had no choice but to yield. She was one, not merely against three, but against lour; for had she defied Russia, Germany and France, she would have had China again on her hands. It is a source of perpetual pain that the Imperial Rescript of April 1895 had to be issued, but there was no help. At that time it did not appear to politicians that the union of the three European Powers could be durable. Russia and France might work together in the East, but Germany could scercely stand in permanent bne with them. Germany, however, has clung to her allies with singular tenscity, and recent events show plainly that these three Powers must be regarded as a coalition for aggressive purposes in the Orient. Germany has taken Kiao chou, Russia has occupied Port Arthur, and France is re-inforcing her squadron to assist these two States, Japan's interests are seriously involved. So are England's, British policy may have been an object of doubt to some Japanese observers in former times, but it is so no longer. Evidently Eugland's aim is to preserve the integrity of the Chinese empire and to secure the tradal routes of the Orient for the use of the whole world. That is precisely Japan's aim also. As for China, she can not desire anything else. She has no other hope of safety, The situation points plainly to an all between England, Japan and China. un alliance true that China has always imagined herself superior to every other nation, and that the idea of an alliance has been repugnant to her pride. But her eyes must be opened by this time. Such an alliance need not involve any complicated procedure. On the side of England and Japan, there should be occasional combined movements of their naval squadrons and each aquadron should have full information of the other's whereabouts. As for China, she should agree that, with certain exceptions, all her northern and southern ports should be available to the ships of the allies. union of that kind would completely secure the peace of the Orient.

The Nippon declares that the twentieth century is evidently to be an era of brute force (inryolin). The lesson taught by the events of the past few years is that the so called civilization of Western Powers has progressed in the direction of the law of might. Wearied by the weight of the armaments that they have been carrying as a protection against one another's violence, European States seek to relieve the strain by excursions into far-distant fields. South America, Central Africa and the Australian islands are still included among the uncivilized quarters of the world, and thither the Powers of the Occident have directed their aggressive attention. But the arena is not wide enough for their purpose, and they have consequently turned to China, Korea and Japan, which countries also are to be classed, it would seem, with the "flesh of the weak" awaiting consumption by the strong. International law is the law of Christianity. Its observance is confined to Christendom. Oriental countries lie entirely beyond the range of its application. They have no share in its privil ges, are not allowed to plead its provisions. The extraterritorial system practised against them is a plain proof of the fact, but the recent action of Germany is a still plainer. If a deed of violence is committed by some lawless subjects of a State against the persons or properties of strangers, the duty of apprehending and punishing the offenders devolves upon that State. Only in the event of its does the Power whose nationals have suffered become entitled to take the law into its own are insignificant when compared with the size Japan. The situation was hopeless for the latter hands. But Germany did not wait to see and population of the empire. Evidently there-unless she, on her side, could contrive some whether the Chinese Government would dis
Digitized by UNIVERSITY OF ILLINOIS AT charge its duties. She had immediate recourse to force and seized a portion of Chinese territory. Such procedure would be wholly out of the question within the pale where international law applies. There are violent characters in all countries, and if every act of lawlessness were made a pretext for armed aggression, no weak nation would be secure for a moment. Russia, Germany and France combined to expel Japan from Liaotung and the banks of the Yalu, because, apparently, they regarded her develop-ment as a recrudescence of the spirit of Ghengis Khan or Tamerlane. Have their own doings in the East since that time been worthier of civilization than were the doings of the Mongols and the Tartars conturies ago? The universally accepted doctrine of the time seems to be that to be strong at sea is to possess the right of using one's strength to the detriment of others, and that to own vessels of war is to be entitled to seize whatever territories appear convenient as naval bases or coaling stations. The twentieth century approaches the horizon as the era of brute force. And strange to say, many Oriental publicists find nothing to be surprised at in the prevalence of such a doctrine, but are rather disposed to rejoice that the era of violence and aggression has dawned again upon the world.

The Femiuri Shimbun publishes two articles urging the advisability of emigration to South America. It quotes many figures showing the remarkable progress that the Argentine Re public has made during recent years, and speaks in glowing terms of the opportunities presented by Brazil, Pe u and Chili. Our contemporary's statistics being accessible to all, and its articles being composed chiefly of figures, we need not give any detailed resume. The Yomiuri's object is not merely to encourage its nationals to emigrate to South America, but also m induce the Government to negotiate commercial treaties with the Argentine Republic and with such other States in that part of the world as have not yet outered into conventional relations with Japan. It thinks that one of the features of the twentieth century will be the material development of South America.

. .

# DAMAGE BY WEDNESDAY'S GALE.

The severe gale that swept over Tokyo, Yokohama, and neighbourhood on the 2nd just, caused a number of casualties in Shinagawa and Yokohama waters. The Asahi reports that a large junk called the Inari Maru, owned by the Induye Shipping Company, Yokobama, while on her way from Yukobama to Tokyo with 434 bags of foreign rice, was lost, together with three sendo. The junk Kiuchu Maru, loaded with 100 rails, sank in Yokohama harbour, but the sendo were saved. The Enju Maru, with 200 bags of foreign rice, had a narrow escape, and had to jettison some 80 bage of rice. The lighter Toraichi Maru, with 229 cases of foreign salmon, went to bottom, and her sendo are still missing. The cargo boat Sanshu Maru, owned by the Oits Shipping Co. also foundered off Yokohama. The Shinryoku Maru, of the Maisushita Shipping Co., Yokohama, was lost with 908 cases of kerosene, together with the crew, off Haneda. The following junks also broke adrift while being towed by the steamer No. 2 Hoson Maru off Haneda, near Shinagawa :- The Urayoshi Maru, with 700 cases of kerosene; the Myojin Maru, with 1,600 cases, the Kannon Maru with 600 cases of oil; the No. 3 Matsu Maru with 500 bags of Chinese rice; the Hachiman Maru with 278 bags goma; the Ishidaka Maru with 350 bags of rice; the Myofin Maru with 100 bales of American cotton; the Inari Maru with 547 bags of sugar; the Myojin Maru with 42 bales of drugs 35 cases of provision, 17 cases of wine, and 33 cases of foreign paper. The steamer Sumidagawa Maru and No. 3 Hoson Maru are now engaged in searching for the missing junks. It is added that several other vessels belonging to the Inouge and Ota Shipping Companies. Vokuhana, met with initial disaster.

# AN ANALYSIS OF PRICES IN JAPAN.

According to the investigations completed by the Bank of Japan and published in the Fiji, the prices of domestic staples in January this year compared with those of January and December last year were as follow :-

an	. 1898	B. Dec	. <b>18</b> 97	. Jar	1. 1897
Coal	224	****	222	*****	152
Cotton yacus	I21		131	*****	
Saké	136	41111	132	*** ***	140

Lining stuffs	100		102		IOI
Glass panes and					
wares	170	*****	. 179	*****	-

Fourteen other commodities remain the same in their prices as in the previous month, the comparative figures for January this year and for January last being as follows:—Cutton thread, 133 and 120; silk floss, 120 and 98; charcoal, 181 and 185; wood, 204 and 153; dried bonits, 246 and —; barley, 269 and 135; wheat, 218 and 163; bleached cotton stuff, 122 and 104; vegelable wax, 128 and 131; tea, 127 and 123; leather and hidea, 186 and 150; silk thread, 123 and 119; eggs, 194 and 191; hemp, 148 and 145.

The average of prices on the whole was 170 for January, 1898, 172 for December, 1897, and 146 for January, 1897, the value in January, 1887, being taken at 100.

From the above it may be perceived that Japanese cut tobacco represents the highest appreciation, owing probably to the Leaf Tobacco Monopoly Law being put into operation, whereas the rise in the value of oil cake, rice, bran, &c., is attributable to fluctuations in the sardine fishery. Floor and fowls have risen on account of scarcity of stock; coal is recently increasing steadily and still shows an upward tendency cotton yarns, which were in a depressed condition at the end of last year, have begun to revive; in short, the appreciation of most of the com modities above mentioned is traceable to certain special causes.

# COLLISION IN A JAPANESE COURT.

A passage of arms occurred the other day between the Judge and the Procurator at the Kobe District Court. During the trial of a gambling case in which several respectable residents were concerned, the Judge insisted on knowing the name of a man who accompanied the officers when they made the arrest,

The Procurator interrupted and said that the man who accompanied the police was a "secret service man," whose name it was against the public interest to disclose. He had given in-structions to this effect by virtue of his official authority. The Judge retorted that he insisted on the question by virine of his official power.

As a result the Procurator retired from the Court, saying he would not attend the proceedings further, and the Court had to be adjourned.

On Sunday the trial was resumed in presence of Procurator Kato, who demorred to the Judge's trying the case further on the plea that he had adopted a prejudiced attitude towards the pref secution, and the proceedings well as the proceedings will be proceeding to the proceedings will be proceeding to the proceedings will be proceedings and the proceedings will be proceeding to the proceedings will be proceeding to the proceeding to the proceeding the proceedings will be proceeding to the proceeding the proceeding the proceeding the procedure will be proceeding to the procedure of the proceeding the procedure will be proceeding to the procedure of the procedure will be proceeding to the procedure of the procedure will be proceeding to the procedure of the pr

# THE MITSUI BANK AND THE MONEY MARKET.

A correspondent writes:-The raising of the deposit rate has been the general feature of Japanese banking since last year. Recently, the Fifteenth Bank, the Mitsubishi Bank, and other trustworthy and respectable establishments, have all raised their deposit rates, and offer 7 per cent, per annum for a fixed deposit for one year -that is, 2 per cent, higher than the interest on any Government Loan Bonds. Other banks, with a comparatively small capital and of less credit, have been compelled to do the same. 72 per cent, for a deposit fixed for one year is nothing but usual now adays, some banks having gone so far as to offer 8 per cent. Indeed, there is now keen competition among Japanese bankers to attract money by advancing the de-posit rates. Is such a high rate as 8 per cent. to be considered a reasonable figure? Is there any cloud threatening the economic world that drives almost all banks to resort to this measure in order that they may strengthen their reserves or, rather, not drive their customers away? Is this a felicitous phenomenon-this competitive advance of the deposit rates-when we remember that such deposits in those for a fixed period are made as much for the sake of security as of profit? Will this step, followed by all at the same time, bring about a satisfactory result to all? What will they do if the demand for money becomes slack after they have succeeded in tempting much from their neighbours? These are financial problems that require close study. We are told that the Mitsui Bank, one of the greatest monetary establishments of Japan, is looking on this remarkable phenomenon with indifference, and is not going to offer a higher rate of interest for any kind of deposits, whether fixed or otherwise. Why does not this establishment follow the step taken by almost all Japanese banks? Possibly it has on hand large surplus funds in want of employment, possibly the directors do not consider this upward movement of interest as other than temporary. Possibly they apprehend something serious to come as the consequences of this keen competition for deposits. The attitude of the bank is the more interesting as it has been the leader in most financial movements in Japan. It was the Mitsui Bank that first abolished the fraction rin in all banking accounts. It was the Mitsui Bank that first gave their customers the convenience of using cheques instead of cash in paying Customs Duties. Last summer when other bankers, on account of the tempo-rary expansion since the war with China, made loans and advances most freely, the Mitsui Bank took an entirely opposite step, and raised its rate of discount and interest on loans and advances. The bank is a kind of barometer of the money market, and considering this its present attitude is significant, and claims the notice of the public. But whether other bankers are taking a right step in raising the deposit rate, or the Mitsui Bank is acting properly in going the other way, is a question that cannot be decided in matters stand at present.

# TOBACCO IMPORTS AND EXPORTS.

The trade in tobacco in Japan for the last four years has been as follows;

# THE EXTRADITION CASE.

arrangements have been completed for tion. Or, again, if the body of the pro-the extradition by the United States of missory notes had been fraudulently the Japanese clerk who, having robbed Messrs. Favre Brandt and Company, of Yokohama, effected his escape to San Francisco. The circumstances of the Francisco. fraud, so far às our information goes, were very peculiar. It had been the custom of the foreign firm to draw up in the French language certain documents for transmission to the Japanese Authorities in connexion with contracts to which the latter were parties. The clerk one day in- it must be said that the use to which the formed the firm that, owing to a change defendant's signature was applied was in necessary to submit the documents in been accepted without question, and he thereupon submitted for the firm's signature documents which he represented to which were in reality receipts empowering him to draw a sum of about twenty. one thousand dollars. The firm apparentthese Japanese documents were what the clerk stated them to be. They affixed his part, and the Lord Chief Justice entheir signature, solely on the strength of the man's assertion, and he at once pro- hama firm, they were dealing with an emceeded to negotiate the documents, obtaining some lifteen thousand yen, with tremely difficult to imagine that any charge which he fled to America. Telegrams of reckless carelessness, or contributory were sent to San Francisco, however, shortly after his departure from Yokohama, and he was arrested as soon as the steamer entered the American port. About four thousand dollars were found in his posses-He had apparently spent the remainder, or otherwise disposed of it. His extradition has been effected on a charge of forgery, but it will be seen that the peculiar features of the case invest it with special interest. The recent action in the Queen's Bench Division of the English High Court of Justice is very much in point. Lord William Nevill induced an intimate friend, Mr. Clay, to append his signature to a document which purported to have reference to the marriage settlements and divorce of Lord William's sister, Lady Cowley. Lord William did not allow Mr. Clay to read the document, but kept it. carefully covered up, with the exception of the spaces for the signatures, explaining that, if Mr. Clay insisted, he should be made acquainted with the contents, but that it was desired to keep them private. Mr. Clay, having full confidence in Lord Nevill, signed his name, imagining that he was merely acting as a witness, whereas in reality he appended his signature to promissory notes for over eleven thousand pounds sterling. The notes were duly negotiated by Lord Nevill, who then pas-sed over to the Continent, but when the notes were presented to Mr. Clay for payment, he naturally demurred, and action was brought against him by Mr. S. Lewis, who had cashed the notes on the strength Foreign Office in London on the subject of Mr. Clay's signature. 'The action went in favour of Mr. Clay, the Lord Chief Justice ruling that Lord Nevill had been, vised Treaties go into operation. That is in effect, guilty of forgery. "Mr. Clay," all very well of course, but, in point of his Lordship said, "had no contracting fact, such action is belated, for the mind and his signature obtained, by untrue matter received official consideration statements fraudulently made, to a docu-ment of the existence of which he had no ment may be regarded as certain. Our

ferred by delicate contrivance from one and publishing journals in this country, document to another, and so skilfully as and it denounces as "gratuituous impertidocument to another, and so skilfully as We learn that the necessary diplomatic to escape notice under ordinary examinawritten above, and after his signature had been made, it would have been forgery, and in such case it is clear no recourse could be had upon it. Can it make any difference as to resulting contractual obligation that the body of the note was without his knowledge filled up before he was fraudulently induced to put his name in the belief that it was something wholly different? I think not. In plain reason of regulations, it would henceforth be substance and effect forgery, whether or not it amounted to the criminal offence of Japanese. His statement seems to have forgery?" There was, however, another point to be determined, namely, whether Mr. Clay, in signing his name as he did, had been recklessly careless; whether, in be mere specifications, or tenders, but short, he could be considered guilty of contributory negligence. That question was answered in the negative. The jury decided that Mr. Clay had given his sigly took no steps to assure themselves that nature in "misplaced confidence"; that there had been no want of due care on dorsed the finding. In the case of the Yokoplaye whom they fully trusted, and it is exnegligence, could be substantiated against them. Still the incidents are evidently of a nature calculated to invite discussion. The clerk, while he showed himself to be a man of singular daring and craftiness, broke down signally at the most critical point of his enterprise. Had he quietly left the mail steamer at Honolulu and waited there for a ship to carry him to Australia or South America, it is in the last degree improbable that he could ever have been apprehended. But by passing over to San Francisco, he entered the territory of a State having an extradition treaty with Japan, and, moreover, placed himself within range of the fatal telegraph, which could not have reached him in Hawaii. Happily there is generally some defective link in the chain of a villain's devices.

# FOREIGN JOURNALISM IN JAPAN.

Truly it seems that there is a determination on the part of the Japan Gasette to create a "situation" in order that it may pose as a saviour. Our contemporary persists in thinking itself bound to stand forth as the champion of the foreign press in Japan, but we venture to suggest that the foreign press will not gain much from such championship. A member of the Institute of Journalists, instigated by the present editor of the Japan Gazette, has induced the Institute to address the of the rights that will be enjoyed by foreign journalists in Japan when the Revised Treaties go into operation. That is

nence" or subsidized pusillanimity the contention that the enjoyment of such a right requires any concession on Japan's part. We are not concerned to reconcile the amusing discrepancies displayed by the Japan Gasette's mental processes. Otherwise we might point out that if the Revised Treaty confers the right in question, there is no occasion for the Institute of Journalists to take any action, nor any ground for the sweeping charges of insufficiency preferred by this same Japan Gasette against the Treaty. The plain fact is that the whole of this storm in a tea pot had its origin in a false statement circulated by the Japan Gasette itself and repeated by the editor of that journal in a letter addressed to the London Times. The falsehood was that, on the occasion of the reform of the Press Law by the Japanese Diet in its session of 1895-7, a clause restricting journalistic enterprise to Japanese subjects had been inserted with view to Treaty Revision. In other words, the Japanese Legislature and the Japanese Government were accused of deliberately enacting a law for the suppression of foreign journalism in this country after July 17th, 1899. Of course the Japan Gasette did not intend to mislead its readers, neither did its editor deliberately set himself to mislead the readers of the London Times. We must assume that much at any rate. But in truth no statement could have been more misleading. For had such action been really taken by the Legislature and the Government with a view to Treaty Revision, the public would have possessed emphatic evidence of Japan's resolve to extinguish foreign journalism within her realm. Astonished at so gross a blunder and appreciating the injurious impression it must produce, we pointed out that nothing of the kind had taken place; that the restrictive clause had stood in the Press Law for ten years; that it had been inserted originally without any reference whatever to Treaty Revision, but simply because so long as foreigners were not subject to the penalties prescribed by the Press Law of Japan, they could not be allowed to enjoy its privileges, and that, for the rest, the Government of Japan was known to entertain most liberal views on the question of foreign journalism. It might have been supposed that the fapon Gazette would then have acknowledged its very serious blunder and withdrawn its false accusation against the Japanese Legislature and the Japanese Government. On the contrary, our contemporary fell into an access of indignation at the idea that the Japanese Government had any voice in the matter, and insisted that foreign journalists would not be beholden to Japanese charity but would demand their Treaty rights. A fine phrensy no doubt, but less ludi-crous were it more consistent. If the Japanese Government were disposed to dispute the point, it might claim that journalism, not being a "trade," can not be said to be textually included in the privileges secured to foreigners by the Treaty. But the Japanese Government is understood to have no such disposition. It entertains perfectly liberal knowledge, cannot bind him. It is as if he contemporary girds indignantly at the had written his name for an autograph notion that the Government of Japan collector or in an album. The case differs in no material respect from one in the subject. The Japan Gazette, however, or in the subject. The Japan Gazette, however, or in the subject of think that which a genuine spiritized shierly tank the right of owning, editing the property of should be affair.

solution. Of course we appreciate and commiserate our contemporary's alarm and florry. It understands that its own record does not confer any claim to Japanese consideration, and it has probably the grace to acknowledge to itself that could it change places with the Japanese Government, a Japan Gazette would receive short shrift at its hands. Our contemporary may dismiss those conscience-begotten fears how-ever. It will come in with the "ruck." Its labours have doubtless been arduous and, from its own point of view, agitating, but they have neverattained the magnitude of calling for hostile discrimination, or sug-gesting the need of suppression. The principle of freedom is too strong to be disturbed by petty abuses.

We may refer here to a comment made by the Kobe Herald in the sense that it would have been advisable had the Japanese Legislature removed the restrictive clause from the Press Law with a view to the operation of the Revised Treaties. At first sight that appears a reasonable criti-But we must remember that the task before the Diet was to modify the Law solely for the purpose of Japanese subjects, and that the modifications introduced were to go into effect immediately. Had the restrictive clause been removed, it would have been necessary either to defer the enforcement of the modified Law until the abolition of Consular Jurisdiction, or to empower foreigners to become proprietors and editors of Japanese journals two and a balf years prior to that event. We can not yet tell whether the privilege of engaging in Japanese journalism will be extended to foreigners after July, 1899. They will certainly be allowed to own, edit and publish journals in a foreign language, but as to journals in the Japanese language, we do not know whether a decision has been reached. At all events, the Japanese Press Law refers solely to Japanese journals, and if that fact be noted, the retention of the restrictive clause ceases to have any significance so far as foreign journals are concerned.

# MR. CLEMENT ACOTT.

Mr. Clement Scott seems to have a bee in his bonnet about female morality. When he was in Japan he discovered, by frequenting some low-class tea-houses and other haunts of refined pleasure-seekers, that all the fair sex in this country is frail. Probably he never met a Japanese lady in his life, but that didn't matter in the least. He had a coup d'æil that enabled him to infer the manners and customs of the aristocracy from the methods of the social castaways in the purlieus of the foreign settlements. He has now made It is that all the another discovery. females connected with the stage in Eng-land are morally degraded. The immediate result for himself is that he has found it prudent to pass over to the Confact that dementia very often takes the torm of Mr. Clement Scott's complaint.

His Excellency Sir William Robinson, G.C. M.G., Governor of Hongkong, bade official farewell to the Legislative Council on Jan. 25. and two months without one leve of absence.

# LONDON INTELLIGENCE RE-CEIVED FROM FAPAN.

Somebody telegraphed from Kobe to The Times, in December, that "the news of the occupation of Port Arthur had disturbed the Japanese Ministry" and that "long Cabinet Councils had been held in the presence of military officials." We recently referred to this intelligence as misleading and said that people in Tokyo had neither seen nor heard anything of such occurrences. The Kobe Chronicle, however, defends The Times' correspondent, and in support of his assertion quotes a paragraph from our own columns. The paragraph, which appeared in the Mail on December 22nd, was avowedly a translation from the Asahi Shimbun. Here it is:-

This paragraph is actually adduced by the Kobe Chronicle as justification for a tele-gram sent by The Times correspondent to London that "the Japanese Ministry was disturbed" and that "long Cabinet Councils had been held in the presence of military officials." We would observe, in the first place, that if a paragraph appearing in a vernacular journal is considered sufficient basis for a telegram to The Times about the mood of the Japanese Cabinet, The Times is apt to be very greatly misinformed; in the second place, that a Cabinet meeting on receipt of such important intelligence, is a perfectly natural and almost inevitable step which does not warrant any such inference as that the Ministry is "disturbed;" and, in the third place, that when a correspondent converts one Cabinet meeting into "long Cabinet Councils" allows his imagination to outrun his facts. The Kobe Chrônicle can scarcely be serious in taking such a line. What the correspondent of The Times did was to send to London a telegram implying that the Japanese Government had been much excited by the Port Arthur news; that Japanese statesmen contemplated necessity of an appeal to force, and that several long meetings of the Cabinet had been held to discuss the question. Such a statement conveyed a most exaggerated notion of the facts. No well informed person in Tokyo would have dreamed of sending it, and that the Kobe Chrouicle should insist upon its accuracy is surprising.

# A GRADUATED IDEOGRAPHIC READER.

We learn that Mr. Basil H. Chamberlain tinent. It is a curious but well established is engaged compiling a work on the lines indicated in our recent paragraph with reference to the speedy acquisition of a working knowledge of the ideographic script by discriminating between the characters in common use and those rarely employed. This will be good news to students of written Japanese, for Mr. Many landatory speeches anitable to the occasion were delivered. The departing Governor Chamberlain's competence to provide has established a record—a reign of six years such an aid is beyond question, and there s great need of the book.

# THE BUDGET.

An Imperial Ordinance issued on the 9th instant, sanctions the adoption of the current year's Budget for the purposes of next year. By the "current year" is to be understood the year ending March 31st 1898, and by "next year," the year com-mencing April 31st, 1898. This, of course, is a mere matter of routine. The Constitution provides that in the event of the Budget, as submitted to the Diet, failing to come into existence, the Budget for the preceding year shall be adopted. Commenting on that prospect some time ago, we expressed doubts as to whether the adoption of the old Budget might not embarrass the Government seriously, since the sanction contained in the Constitution refers to the Or-dinary Expenditures only, whereas the Upon receiving official information from Russia that the Russian Pacific Squadron had occupied that the Russian Pacific Squadron had occupied programme depends upon extraordinary port Arthur and Talien Bay with the consent of the Chinese authorities, and that the French Squadron had also been put into motion, the Musisters of State and others convened a special meeting of the Cabinet. During the proceedings Count Matsukata proceeded to the Palace, and telegrams were dispatched to Japanese Ministers sanctioned the corresponding extraordinatoral. sanctioned the corresponding extraordinary outlays as "continuing expendi-tures," and that, consequently, the sums needed for carrying out the programme year by year need not be again approved by the Diet so long as the original figures are not changed.

# CARRYING OF WEAPONS AT THE GENERAL ELECTIONS.

The following Imperial Ordinances were issued on the 9th instant :-

# IMPERIAL ORDINANCE.

IMPERIAL ORDINANCE.

In view of the existence of urgent necessity, We, with the advice of the Privy Council and maccordance with the 8th Arricle of the Imperial Constitution, hereby authorize the prohibition of the carrying of swords, fire-arms, spears, sword-arms, gun-canes, bambon-spears, chibs, or other lethal weapons, and direct that the authorization be proclaimed.

# IMPERIAL ORDINANCE No. 12.

Att. I - Persons taking part in the election of members of the lawfully organized Diet are hereby torbidden to carry swords, fire arms, spears,

by lookidden to carry swords, five-arms, spears, sword-canes, gun-canes, hamboo-spears, clubs or other lethal weapous.

Art. II.—Persons violating the prohibition of the preceding Article, shall be punished with minor confinement for a period of not less than eleven days and not more than two years, together with a five of not less than 5 yes and not more than 200 yes, and shall have the weapon ronfirested.

200 yen, and shall have the weapon confiscated.

The term of prescription laid down in the 104th Article of the Law of Election of Members of the House of the Law of Election of Members of the House of Representatives shall be applicable to the possity prescribed in the above clause.

Act. III.—This Ordinance shall become operative from the 20th day of the 2nd month of the

31st year of Meiji.

This Ordinance, if vigorously enforced, should be the means of putting a stop to the acts of violence which have hitherto proved only too common at elections in Japan. The soshi without a stick, a swordcane or a pistol will be a comparatively helpless individual, and no one will find it worth while to employ him. It can not be denied that the present Cabinet is adopting wise and resolute precautions to secure the preservation of peace and good order at the general elections, and to guard against any display of partiality by local officials. The latter point is very important, for since it is understood by the public at large that an alliance between the Cabinet and the Liberals is likely to take place before the the Diet

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

zealous officials in some localities might abuse their power to further the Liberal cause unless they were distinctly instructed that nothing of the kind would be tolerated by the Government.

# THEN AND NOW.

A correspondent of the Fapan Times, discussing the state of affairs likely to prevail after the Revised Treaties go into operation, draws a very deterrent picture of the interferences and inconveniences to which people in France and Germany are subject at the hands of the police, and auggests that, although there will be plenty of cause to regret the change from our present life of freedom to an existence of official espionage and restraint, it will be our duty to remember that things are no better in some of the leading countries in Europe. We do not think that there is much comfort to be drawn from the comparison. It is something to have companious in misfortune, but the most satisfactory condition is to be without the misfortune. For our own part we do not look forward to the unpleasantness foreshadowed by our contemporary's cor-respondent. Many a time the question has been propounded to us, " Do you anticipate trouble after the abolition of Consular Jurisdiction," and we have always replied that we do anticipate a certain amount of friction and misunderstanding, but that we have no apprehensive of police interference or official tyranny. Why should the foreign resident suffer discomforts that find no place in the life of the Japanese themselves? The police do not make arbitrary visits to the houses of the Japanese, nor is the collection of the taxes attended with any vexations greater than those incidental to such operations everywhere. An idea used to prevail that foot passengers are required to carry lamps after sunset in Japan, and that the police can arrest any one violating that regulation. But such is not the case. There is no law of the kind. Wheeled vehicles must be provided with lamps when moving at night, which is quite as it should be. It has also been insisted that foreigners engaged in an after-dinner game of cards will be liable to have their liouses raided by the police, and a solitary instance has been discovered of a party of clerks meeting with some mishap of the kind in Kobe. Card-playing is common enough all over Japan, but the police never enter a private house for the purpose of checking the pastime. They have no authority to do so. Gambling, indeed, is forbidden by law, yet if people care to gamble in the privacy of their own homes, they need not fear police interruption any more than it is to be feared in London of Paris. Why disquiet ourselves in vain? Certainly it would be pleasanter to preserve Consular Jurisdiction and to be continued in the enjoyment of comparative immunity from taxation, but a Frenchman or a German residing in England would feel the same predilection, mutatis mutandis. There are no evidences that official-There are no evidences that omerat-dom makes irksome and arbitrary incur-sions into the every-day life of the Japanese people, nor do the laws of Japan contain any provision suggesting that officialdom is competent to thrust itself disagreeably into the existence of quite impalpable, Digitized by Google

# TALIEN.

It is difficult to credit the news said to have been telegraphed from Peking to The Times in the sense that Great Britain has definitely abandoned her demand for the opening of Talien to trade. We are not certain, of course, that such a demand was preferred. No official announcement having yet been made of the conditions n connexion with the new loan, it is posfind a place among them. Assuming that so important an item be ruled out now. we fail to see how any objections offered by them to the opening of Talien could possess even a semblance of validity. Russia and France can not reasonably place obstacles in the path of the commercial progress of the Orient. They are at liberty to impose any restrictions they please on the prosecution of trade within their own dominions, but it is impossible to conceive them standing forth as advocates of China's isolation. Many people suspect, indeed, that Russia looks forward to carrying her Siberian Railway to the Liaotung Peniusula, and that Port Arthur is the ice-free harbour which she anticipates acquiring. The forecast seems likely enough, and, if credible, would explain Russia's alleged objection to see Talien thrown open to the trade of the world, for that step would virtually have the effect of neutralizing the whole of the Liaotung Peninsula. But reasons of that character could not find a place in any diplomatic discussion, or, indeed, be openly formulated at all. Besides, if England has proposed the opening of Talien, it is not merely because of her general interest in the tradal development of the Far East, but also because of her particular desire to secure for her subjects free access to the markets of Manchuria, which aim would certainly be imperilled if Russian authority became supreme there. Thus the very considerations that may be supposed to have weighed with England in formulating the demand are the considerations that impel Russia to oppose it, and if we credit the rumour that the demand has been withdrawn, we are driven to suppose that England has made a complete change of front in deference to objections which she must have plainly anticipated from the first, and which, if disclosed by Russia, should tend to strengthen rather than to break down Great Britain's resolve. From every point of view it appears to us that this Peking news is extremely apocryphal.

Since writing the above the somewhat vaguely worded telegram which we publish elsewhere, has come to hand. It conveys no distinct information as to the Talien question, but we gather from it that discredit is thrown upon the statements of the Peking correspondent of The Times, and that it will be well to refrain from arriving at any conclusion until some authoritative intelligence is forthcoming.

The profits made by the Iwaki Coal Mining Company during the latter half of last year amounted, according to the Hochi, to 33 998 foreigners under the new Treaties. The yen, of which 24,000 yen were distributed ma bases of some persons' fears seem to us dividend at the rate of twelve per cent. per

# THE NEW ENGLISH DICTIONARY.

The Chancellor of the University of Oxford recently entertained at dinner in the hall of Queen's College the scholars concerned in the compilation of the New English Dictionary on Historical Principles. The occasion was the completion of the third volume of this colossal work. The first volume appeared in 1888, and it proposed by Her Majesty's Government is expected that the last will be published in 1908. From the speeches made at the sible that the opening of Talien did not dinner and the paragraphs published by Oxford and London journals, we gather it did, however, the question is, why should that the public remain singularly indifferent to the progress of the great Russia and France are said to have opposed dictionary. People, as a rule, seem to the position taken by England, but truly ignore it. There can be no doubt that the book will by-and-by be one of the greatest treasures a student can possess, but interest is difficult to arouse in the case of a lexicon requiring twenty years for its compilation, ten years of which have still to run. Who can be sure that he will live to receive the last volume if he becomes a subscriber at this stage? Yet all must long to possess the dictionary. The Times says of it :-

"It is the greatest enterprise which has ever been undertaken by the Clarendon Press, the greatest effort probably which any University, it greatest effort probably which any University, it may be any printing press, has taken in hand since the invention of printing. An eminent Dublin professor notlong ago defined a University as an institution for the promotion of treeless learning. A University press in an analogical sense might be defined as one which exists, parily and events for the production of treestance. at all events, for the production of unremmomentive works which, however, will tend to the benefit of posterity and envich the language and literature of the country. An exhaustive dictionary intended to equal or surpass the work which Little completed for the French language was beyond the scope of private enterprise. It will be not the least of the glories of the University of Oxford to have completed this gigantic task."

It may interest our readers to examine the following comparison relating to the contents of the 3rd volume of the dictionary:

We are not in possession of any information with respect to the cost of the dictionary, or the advantages gained by subscribing to it from the outset, nor do we remember that anything has been published on the subject by our local booksellers. If Messrs, Kelly and Walsh can remedy the defect, as they certainly should be able to do, we trust they will take some steps to inform the community, for there may be in Japan many people who would like to put down their names for the work.

# CYCLES.

We have received very pretty catalogues from Messrs. Humber and Company and from Messrs. Osmonds. as we are aware the Osmond cycle is not well known in Japan, but it seems to be very much in demand in England, for the catalogue states that "despite the undeniable slump existing in the cycle trade, the whole output of the Osmand Works for 1898 has already been booked by the various agents of the company." It would, of course, be a great aid to intending purchasers of cycles if catalogues were compiled so as to convey a clear impression of the distinctive features of the various types. But no such appeal is made to public intelligence. Each maker

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

claims that his own machine is the acme of perfection, and we are left to credit or discredit the statement as we please. The Osmond Company, it is true, speak with exceptional ingenuousness. "Although and Itelement of 25, have lived togeexceptional ingenuousness. "Although Osmond cycles," says their catalogue, "have admittedly led in design since the very date of their introduction, we willingly admit that we cannot claim for them equal pre-eminence as regards that finish of enamelled parts which is the sine quâ non of a perfect machine; we can safely claim that the finish of our machines has been equal to the best, but we are not satisfied with this-we strive for priority, not equality." That is a cleverly worded assertion of superiority in essentials and at least equality in non-essentials. The Humber Company are less artistic in their manner of advertising. They manufacture three kinds of cycle, the Beeston Humber, the Wolverhampton, and the Coventry, and here is what they say about them, all in the same page under the heading "Hints on Selection:"— "The Beeston Humber cycles are better the Wolverhampton Humber is equaland in many respects superior—to all other high-class cycles." "It must not be imagined that Coventry Humbers are inferior in durability to the more expensive types made at Beeston and Wolverhampton." These descriptions are all sufficiently tempting, but when we turn to the prices we find a marked difference, the Roadster safety costing £31 in the Beeston Humber type, £26 in the Wolverhampton, and £21 in the Coventry. A similar machine costs £30 in the Osmond type. The figures are high, but we learn from the catalogues that experience has established the advantages of the expensive machines and that the public buy them in preference to the cheaper. Doubtless the Beeston Humber and the Osmond are the finest machines manufactured, and those that can afford to use them are fortunate. The Beeston Humber Chainless Safety is pro-bably the prince of all, but it costs £36. The catalogues from which we quote are well worth procuring, for they are beautifully illustrated and contain clear and minute information about all the parts of the machine and the manner of keeping it in order. We are unable, however, to give the name of the Yokohama Agents for the books have reached us without any information in that sense.

# TOKYO DRAMATIC & MUSICAL SOCIETY.

The Tokyo Dramatic and Musical Society gave its first performance for the season on the evening of the 4th instant, before a fairly large audience, in the Shoreikai Hall, which, as usual, was lent for the occasion in view of the charitable objects of the Society. The piece chosen was "Naval Engagements." It had been specially adapted and greatly improved by Mr. E. H. House, to whose well-known literally skill the Society is much in-debted. There were hopes originally that Mr. House would kindly lend his in-

ther on terms of the closest friendship, was played by Captain Brinkley. If there carrying their unanimity of sentiment is any criticism to be offered, it is that even to the point of agreeing that either the ladies did not always succeed in ther on terms of the closest friendship, shall be perfectly free to marry whom he pleases provided only that the ages of the the piece was a decided success, and in bride and bridegroom be suitable. Lieut. recording the fact we must note the debt Kingston, going on service to the Mediterranean, meets a charming widow of 40, Mrs Pontifex (Miss Münter), and obtains her promise to marry him, the Admiral meanwhile falling in love with and getting engaged to his ward, Miss Mary Mortimer (Miss von Fallot), a pretty girl of 25, whose romantic predilection for the rank of Admiral is encouraged by her father. The son returning on leave, accompanied by Mrs. Pontifex, puts up at a hotel in Portsmouth preparatory to driving out to his father's house, some ten miles distant, to break the news of his intended marriage. Admiral Kingston and Miss Morthan the best, being the most perfect timer happen to be stopping at the same cycles which it is possible for money and ingenuity to produce." "We claim that the Lieutenant; their mutual explanations and recriminations; the efforts of the ladies to reconcile father and son; the transfer of the Admiral's affections to the widow, and of the Lieutenant's to his former play-fellow, Miss Mortimer, and the final agreement of all to recast the marital programme in accordance with these newly developed dispositions-these are the materials of which the plot is constructed. It is a piece very well suited to amateur acting, its only fault being an absence of scenic effects, for since the whole action takes place in the parlour of a fifth rate hotel, there is no opportunity for any display of the decorative skill with which Mr. Conder has delighted the public on previous occasions. The ladies' parts were capitally sustained. Miss Münter's rendering of the captivating widow being excellently conceived and carried out with spirit and piquancy, and Miss von Fallot, as Miss Mortimer, showing talent of an ex-ceptional order. The rôle of Mrs. Pontifex is the more effective of the two. Its emotional effects are stronger and its general tone less subdued, whereas Miss Mortimer, though a young lady not without arts and airs, is nevertheless demure and self-contained, on the whole. The contrast between the two was pretty, and each of the fair débutantes-for neither Japanese newspapers and documents, the had been previously seen upon the stage -won hearty applause. The same distinction has to be noted between the parts Herod played the former in a manner that kept the audience in good humour from first to last, and Mr. Conder succeeded in imparting its full value to the less highly coloured rôle of the young officer, who, while he has inherited a rich legacy of his father's obstinacy and independence, is nevertheless compelled to observe the restraints that govern filial conduct. We have had occasion before to speak of these two gentlemen's acting, and we need only say here that their performance in "Naval Engagements" enhanced their already high reputations. Dr. Clay McCauley, who kindly took the valuable assistance in placing the farce minor part of Schortt, the master of tavo pages. In these the total number of upon the stage, but indisposition and the inclement weather unfortunately prevented him from undertaking the task. "Naval invest an originally insignificant rôle with version of the New Testament used there Engagements" is a capital play, full of features of great interest and amusement invest features of great interest and amusement investigation and Digitive door unteresting a common-place English of these only 3,13 were different.

making themselves heard. On the whole of gratitude due to Baroness Sanno-miya, who acted as stage-manageress and rendered much valuable assistance in other ways. Thanks have also to be accorded Miss Nishikawa, who discharged the onerous but inglorious duties of prompter.

The musical part of the programme can be too highly praised. The instrunot be too highly praised. ments were four violins and a piano, the violins played by the three Misses Page and Master Page, and the piano by Mrs. Page. From a technical point of view it was highly finished performance, and to the beauty of the music was added a charming spectacular effect, for the three young ladies wore exactly similar costumes, as artistic as they were picturesque. They shared the ovation given to the actresses and actors after the fall of the curtain, and in common with the actresses received hand-

some bouquets.

The evening wound up with a stage supper given by the actors to the actresses, the lady members of the Society's Committee, and others who had assisted in putting the piece upon the boards. During supper, the healths of Monsieur le Baron and Madame la Baronne d'Anethan, of Baroness Sannomiya, of Mr., Mrs., the Misses and Master Page, of Miss Nishi-kawa, of Mr. Conder and of Captain and Miss Münter, were drunk with enthusiasm, and hearty thanks were tendered to Mr. Conder, without whose thoughtfulness, tact, technical knowledge and unwearying good nature the performances of the Society would scarcely be possible.

# THE STUDY OF CHINESE CHARACTERS.

There does not seem to be the slightest probability that Chinese characters will be dispensed with in this country during the life-time of any foreigner now residing here. Hence, for those to whom it is a matter of moment to be able to read study of Chinese is as imperative as it was thirty years ago. We have often been asked to suggest a method of curtailof the Admiral and the Lieutenant. Mr. ing the immense labour involved in this study, and it occurs to us that the statement of a few facts relating to the frequency with which the same characters occur in standard works may give encouragement and guidance to inexperienced students. About thirty years ago, Mr. William Gamble, when superintendent of the Presbyterian Mission Press in Shanghai, undertook and carried through an extremely interesting and useful investigation. He employed two Chinese scholars for two years each in examining and collating the characters found in the Bible and 27 other publications printed at the Mission press. They went over 4,166 oc-

三經集字 (a collection of the characters in the Shili-san-king), which contains some interesting information bearing on the frequency with which characters occur in standard works. According to this authority, the "Four Books" (四書) contain only 2,326 different characters, and the Five Classics (五經) contain 2,426 characters which do not occur in the "Four Books." The whole number of different characters found in the Shih-sanking (Thirteen Classics) is 6,544; 928 of which are rare or obsolete characters, with which it would be useless to burden the this way, or they are insensible of the

memory. Mr. Gamble's investigations established the fact that five or six thousand well selected characters are sufficient for all practical purposes in China. We should say that even half that number would enable a student to read and understand most of the articles which appear in the newspapers in Japan, and that an additional thousand would place him in a position to read magazine articles with ease. The conclusion at which Mr. Gamble arrived was that in most books the majority of ideographs occur very frequently and that the number of different characters is comparatively small. In order to demonstrate this more clearly, he selected from the characters collected by his Chinese assistants those ideographs that occur most frequently and arranged them in 14 groups, according to the frequency of their use, Group I. consists of 13 characters only which occur over 10,000 times each.
They are 不, 之 人, 以, 其, 我, 於, 日, 為, 獨, 者, 而,耶. Group II. consists of 224 characters, which occur from 1,000 times to 10,000 times each. Group III. has only 16 characters, which occur from 900 to 1,000 times each, and Group IV. 19 characters which occur from 800 to 900 times each. Mr. Gamble's fourteenth group consists of 547 characters which occur from 24 to 49 times each. Adding the characters in the 14 groups together, we have a total of 3,285 different characters. Making every allowance for variety of topics treated, we should say that between four and five thousand characters would prove ample for all ordinary purposes. The best way to acquire these would be to read books composed with the object of familiarising the student, first, with the characters in most frequent use and then gradually extending his knowledge to more rare ideographs. A set of readers published by Mr. Fukuzawa many years ago professed to be modelled on this plan, but our recollection of them is that they were not altogether consistent. There is not the slightest doubt that as a rule the Chinese ideographs are studied by missionaries and others in this country in a very unsystematic manner, and that as a consequence of the employment of unsuitable methods the learner makes little headway and eventually in some cases gives the

thing up in despair, Another point to be noticed in connection with this subject is the necessity of studying fukuji, or ideographs in combination. Mr. Lay's dictionary would prove of far more value had the compiler given the principal combinations into which so many characters enter. Not a few of the ideographs furnished are seldom used except in combination, and in many cases

There is a Chinese work called the + rendering of these ideographs while they are divorced from their lawful wives or husbands, as the case may be. In Mr. Gubbin's excellent work this defect is remedied. There is no doubt that constant reading with a teacher is the best way of learning, but the difficulty hitherto has been to find books graduated in a manuer suited to the purpose of the foreign student. Is there no hope that somebody will compile a set of readers based on the principle of the ideographs' frequency of occurrence? The Japanese do not seem to study their language in need of curtailing labour as we do. But if once they were put on this new track, we doubt not that they would follow it eagerly enough, and consequently the compiler of such a set of readers would certainly find a ready sale for them in every part of the country.

# STATE BANQUET AT THE PALACE.

During the year of mourning which expired on the 11th of January, all entertainments at the Palace were, of course, suspended, and the Emperor refrained from his custom of occasionally inviting the Ministers of State to dinner or luncheon. On the 5th instant, however, his Majesty gave a State banquet to virtually all the leading statesmen of the time. Invitations were issued to their Imperial Highnesses Princes Arisugawa and Kanin, and their Excellencies Marquis Ito, Marquis Yamagata, Count Matsukata, Count Inouye, Count Hijikata, Marquis Tokudaiji, Viscount Yoshikawa, Marquis Saionji, Baron Nishi, Count Okuma, Viscount Katsura, Mr. Sone, Baron Ito, Baron Suyematsu, Marquis Hachisuka, Viscount Takashima, Count Itagaki, Viscount Nomura, Marquis Saigo, Marquis Oyama, Baron Okazawa, Baron Yamada, Mr. Kioura, and Mr. Hamao. Among these twenty-six invités, five were unable to attend owing to illness, namely, Marquis Saigo, Marquis Oyama, Count Kuroda, Count Kabayama, and Viscount Shinagawa. Vernacular journals are disposed to attach considerable significance to this affair, regarding it as an indirect expression of the Emperor's desire that union should be effected between the Meiji statesmen of all camps. Certainly it bears that construction. His Majesty has never before invited to the same banquet all the members of a displaced Cabinet and of the Cabinet by which it has been displaced, especially when the invitation included political rivals nominally so hostile to each other as are Count Okuma and Count Itagaki. In the shadow of the Throne, however, all disputes among political parties are supposed to disappear.

# THE " TOKYO PUNCH."

The first number of the Tokyo Punch has made its appearance. It is to be a bi-monthly publication, issued on the 5th and the 20th, and will apparently contain eight pages of pictures and text, the size of each page being to in. by 14 in. The Japanese are essentially a laughter-loving people. Witty sayings, plays upon words, and jests of all kinds plentifully season their social intercourse. The Imperial family excepted, nothing is secure from merry ridi-

their gravest journals often descend to frivolities, and are not less careful to amuse their readers than to instruct them, so that they frequently seek to lighten a crisis by the aid of ridicule. Looking back twenty-three years, we recall an incident that illustrates this trait of Japanese character. In 1875, Morita Mokichi, editor-in-chief of the Hochi Shimbun, was thrown into jail for publishing an article which preferred accusations of immoral conduct against the Governor of Sakata, Mr. Mishima Michiyasu-afterwards Chief of the Metropolitan Police-and a short time subsequently Mr. Kato Kuro, editor of the Saifu Shimbun, was sentenced to three years' imprisonment, because, in an article entitled "Craving for a Parliament," he declared that unless a republican form of government were adopted in Japan, a Patrick Henry would certainly appear upon the scene. Of course the publication of the two journals had to be suspended after the incarceration of their editors, and it might have been expected that such an event would arouse 🔳 good deal of indignation and anger among newspaper men. But the Japanese treated the matter differently. The staffs of the ill-starred journals, and of other lead-ing papers in Tokyo, held a meeting and decided to perform a funeral ceremony in memory of the defunct sheets, observing all the rites of the Buddhist ritual. The Temple of the Goddess of Mercy at Asakusa was chosen for the purpose. Copies of the proscribed newspapers were placed in a coffin of white pine, of the exact size and shape required at the burial of a corpse; a number of white-robed bearers were employed to carry the catafalque; prayers were offered by priests in full canonicals; journalists and other literateurs, in the capacity of mourners, burned inceuse and pronounced funeral orations; all the paraphernalia were on an elaborate and costly scale, and thousands of spectators thronged the temple grounds and approaches during the ceremony. Thus the whole affair was turned into a huge joke, the laugh being entirely against the Government. It will readily be supposed that a nation so prone to look at the Indicrous side of events did not remain long without a comic paper after the inauguration of journalistic enterprise. Indeed, nearly every one of the leading journals published, from time to time, sketches depicting current events in a laughable light, and running through the comments of all was a vein of humour which sometimes betrayed foreign readers into an erroneous idea that Japanese character had no really serious side. The Charivari of Japanese journalism in its early years was the Marn Maru Chimbun, a publication generally good-humoured, always lunny, sometimes decidedly coarse, and never distinguished by much artistic skill. The Maru Maru Chimbun was not a success. It raised an occasional laugh, but did not appeal strongly to educated people. The Tokyo Punch-or Ponch as it is transliterated—seems to be a much more ambitious production. Its pictures are well drawn and carefully reproduced, and the letter press contains a great deal of keen satire and rollicking fun. Of course a great many of the allusions are incomprehensible to foreigners, but the political cartoons are easily understood. The frontispiece—the only coloured picture—is the least happy of all. It is supposed to the characters to which they are coupled affect the meaning they bear in a material manner. Hence it is almost impossible to give anything like and accurate the least happy of all. It is supposed to their credit the least happy of all. It is supposed to manner. Hence it is almost impossible to be laughed at as to be laughed with, to give anything like and accurate to be supposed to find, therefore, that who has a charming face to turn in every

direction, but without consulting the legend one could not possibly identify the face. The artist has been somewhat happier with Marquis Saigo, whom he represents dancing to the music of geisha and claiming that he has accomplishments of his own and does not depend solely on the reputation of his elder brother, as rude people say. A still better likeness is that of Baron Nishi, Minister of Foreign Affairs. He is depicted on his hands and knees, the perspiration pouring off his face, and three foreign Representatives—those of Russia, Germany and France—standing astride over his back, while the Chinese Minister watch-the performance with a face of pensive gravity. Scarcely an effort has been made to produce likenesses of the three foreign Representatives: they are after the manner of the stereotyped caricature of the "hairy alien." There are two very suggestive cartoons. One is a halfvery suggestive cartoons. One is a half-page representation of a dragon-fly with a lion's head. The dragon fly is Japan of course, and the lion, England. Under-neath is the legend, "A strange monster now wandering about the Orient," and above is written:—"I should like to see this monster quickly. I suspect that the big eagle would fly from it." The second cartoon is a full-page picture of a huge, open-mouthed ogre, stretched out at full length, one hand resting on Korea, the other on China. In the foreground is Japan, tiny men-of-war cruising about its coasts, liliputian railways traversing its territories, and batallions of pigmy soldiers marching about everywhere. The ogre's soliloquy is printed in the margin:—"I am the giant from Europe that has crushed ten thousand miles of fortresses under his thumb and drunk the sea at a mouthful. Who are these people that boast of their Fuji-yama and their rice? Their Fuji tooks to me a mere grain of millet and their rice would n't fill my maw. They have no money and they spend their time disputing among themselves. Call them a loyal people! They would all sell their country. Sending out men of war, for sooth! Pil blow them into space with the breadth of my nostrils. Marshalling twelve divi-sions of troops indeed! How comical! They have no money to support their troops and they think of making a costly campaign. In my eyes they look smaller campaign. In my eyes they look smaller than ants. Why are they buzzing about like mosquitoes? I could swallow them all at a mouthful if I wanted to. Pigmies, hide away in your holes." There is, of course, a picture of Marquis Ito, in ideographic allegory a boar, holding Count I hand if a montant with his right hand Ilagaki (a monkey) with his right hand and touching the shoulder of Count Okuma (a bear) with his left. The bear, his ton-gue protruding and his eye angry, turns away and declines to be made a foot-stool of as the "monkey of Shikoku" has been. Our readers will gather from these brief notes some idea of the kind of humour in which the new Punch indulges. It is not very brilliant wit, nor are the illustrations of a high order. Indeed, the latter go far to confirm a theory which we have always held, namely, that the art of caricature is still in its infancy in Japan. The Japanese do not know how to exaggerate special features of a face while preserving the likeness. A draftsman in the West would not think of putting Marquis Ito into the form of a boar, or Count Okuma into that of a bear, or Count Itagaki into that of monkey, without contriving that each animal should be a portrait of the

personage it represents. But the Japanese artist seems incapable of any such achievement. Often, too, the faces that he limns, as likenesses pure and simple, defy identification. Blemishes of that nature are fatal. They reduce the whole thing to the level of school-boy work. But it is a question of time, we presume. Nothing in the way of caricature was ever practised in Japan in former days. The talent may exist, but as yet there are no evidences of it, and we must wait to see whether it will be developed. Until it is developed, publications like the Tokyo Punch can not hope to win much applause.

# OUTRAGE BY SOLDIERS AT HIMEYI.

A serious disturbance, says the Kohe Chronicle, is reported to have occurred among soldiers at Himeji. It appears that barracks are in course of erection close to Himeji castle. cash allowance is made to the cavalry men for firewood in their barracks, but the amount being insufficient, the soldiers were in the habit of obtaining waste wood from the carpenters' Lately they began to help themselves to good timber, even after it had been planed.
On the night of the 29th ult, the carpenters were keeping watch for the thieves. A soldier presently appeared and was caught and roughly handled. Subsequently a sergeant and three privates visited the carpenters' shed to demand au explanation of the rough treatment that had been meted out to the soldier. The foreman carpenter went to the barracks, and an officer ordered him to appear again on the following day with all the carpenters concerned in the affair. On the 30th an officer visited the carpenters' shed and informed the foreman that in future if the soldiers asisconducted themselvas the matter should be reported to the officers on duy. Shortly after 5 p.m., however, about 10 soldiers under the command of a sergeant surrounded the carpenters' shed. The carpenters were surprised, and attempted to run away, but their escape was prevented. The foreman carpenter was willing to accept responsibility and surrender himself to the soldiers. But all the other men dissented from this, thinking it best to deceive the soldiers by saying that the fore-man had gone home. He was instead put into a tool box. Towards evening, about 40 soldiers broke into the shed, violently assailing the carpenters and smashing all the fixtures. In the course of the disturbance, a lamp fell down and the shavings were ignited. A bugle was blown as a fire alarm. A large number of soldiers came to the scene and put out the fire by pulling down the shed. A soldier paid some attention to the tool chest in which the foreman was hidden and tried to open it. But the cover being nailed down the soldiers rolled the chest about until it was broken and the man emerged. He was recognized by the ser-geant, and the soldiers beat, kicked and otherwise ill-treated him. Eventually they brought him near a well and noured cold water on him. An officer on duty appeared and released the man, who ran to the sawyers' shed, where he fell down unconscious. The sawyers carried him to the Himeji Hospital, where it was found that he had been injured on the head, hands and legs. Four other carpenters were also more or less injured.

Information was given to the police, and inspectors and policemen were sent out to the scene of the fray, but they could not obtain access to it because it was within the compound of the barracks. Information was also given to the gendarmerie, who are stationed about I ridistant, but when they arrived the row was finished. Investigations are now being made into the matter by the authorities.

# ELECTORAL CORRUPTION IN JAPAN.

STRONG SPEECH BY THE HOME MINISTER. At the Local Governors' Assembly held on the 2nd instant Viscount Yoshikaws, Minister for Home Affairs, is said to have spoken as follows in regard to the enforcement of the Law of Election :--That the House of Representatives is absolutely indispensable as a political machine is beyond question, and laws touching the election of members must therefore be administered with great judgment and discretion, insamuch = any defects in the law of election of representatives might lead to the return of persons utterly unfit for the service required. The duties imposed upon the members of the Diet are extremely serious, and failure to discharge them would expose the whole country to immeasurable risks. Since the inauguration of the Imperial Diet, various causes for anxiety have become apparent. Does not the Law strictly prohibit the receipt or presentation of money, goods, or promissory notes in elections? Is it not illegal to commit violence upon the person of voters, or to force them to act against their will, or to riot in the place of voting or at the election hall? Yet these odious practices are frequently resorted to by the candidates under the influence of temporary election mania. Thus wealth is squandered, property is lavished, or the use of unprincipled bullies, better known by the name of soshi, is indulged in. In some cases armed bands are formed and rivals are openly challenged to fight. Persons possessing the power of control should exercise their duty strictly. There is another thing, however, which not only hampers personal freedom, but also corrupts the heart. Preventitive measures against bribery are absolutely indispensable. Without national morality no society can maintain its strength; no national development can be expected. Bribery is a vice too serious to be overlooked in any healthy society. I do not doubt that in previous elections you adopted suitable measures for the repression of such malpractices. Yet serious abuses on these occasions appear to increase continually. What is the reason for all this? Those who have the responsibility of enforcing the Laws and Ordinances ought to give their fullest attention to this point, date of the general election is at hand, and the task of enforcing the Laws with rigour devolves upon the local governors. You will, I hope, take all these matters into consideration, and endeavour, by giving proper directions to your subordinates, to discharge your functions as they should be discharged.

# ROBE CUSTOM SCANDAL.

The Kobe Custom House Scandal is being investigated, and two sentences have been inflected. Funshiki Hyoda, editor and publisher of the Daily Report of Imperts and Exports, was sentenced to two months' imprisonment and ordered to pay a fine of five yen.

It appeared that during July an arrangement was made with the accused by which he was to receive 100 yen every month for inserting in his Report shipments which had passed the Customs without official registration of the payment of duty, the object being to avoid inquiries by shippers.

Nagai Kotaro (the Japanese clerk in the Foreign Chamber of Commerce) has been sentenced to imprisonment for two months with hard labour and ordered to pay a fine of 5 yes for complicity in the frauds. The Court found that during September the prisoner received 175 yes out of the money derived from the missppropriation of Customs duties, well knowing this money to have been stolen.

The indemnity to be paid to Great Britain by the United States in respect of the Behring Sea claims amounts to 357,000 gold dollars, with interest at the rate of 7 per cent., extending over a period of 16 years.

# WEST AND EAST.

THE immense problem of which recent incidents in China seem to be initial factors naturally attracts considerable attention in Europe, and fires the imagination of writers like the editor of the Spectator, who live in a subjective realm peopled by gigantic phantoms of their own creation. The Spectator is always pleasant to read. Its articles introduce us to the society of a philosopher whose views of men and things are bounded by the four walls of a well-stocked library, who muses placidly "while the fire burns," and who, working daintily and artistically with straws of fact and stacks of fancy, builds up imposing edifices of eventualities and peoples them with moral precepts and stately prejudices. It cannot be doubted that the Spectator represents a section of British public opinion-"the clerical section" would, perhaps, be the best term to apply to it- a section com- at the same time, Englishmen should posed of most excellent folks, charitable and philanthropic within their own sphere, but imbued with an inveterate horror of every non-professing Christian, and quite persuaded that since the " heathen " who, being offered the good, reject it, are bound to be beaten with many stripes hereafter, the duty of the elect is to deny their title to human privileges here; to despise them immense difficulty in fitting its theories to and stand apart from them as severely as may be in this world by way of preface the - imperial destiny of nations, but to the everlasting discrimination of which feels a coy reluctance to act upon its they will be the victims in the next. The belief. The partition of China, and the Spectator has devoted much space in recent issues to the Chinese question. The opportunities for picturesque speculation offered by such a question were certain to attract the London journal. There is something stupendous in the notion that the destiny of a huge empire peopled by by the destiny which seems sometimes to four hundred millions of inhabitants-two bundred and seventy millions would probably be nearer the truth, but, of course, the more striking number is taken-, and forecasts of the result can not fail to be interesting. When the Japanese were winning victory after victory in their struggle with China, the Speciator spoke with awe and horror of the contingency that a yellow race might be about to wield a strong arm in the struggle of the nations, and its writings to-day continue to be permeated by that disturbing dread. It shrinks from the notion of an all liance between England and Japan, because the latter is not European, and because Europe "claims to lead the world." Conscious, however, that a prejudice so unreasoning cannot faito provoke opposition, it attempts

honest retrospect, it would see that the share in the partition of empires," and it worst sins attributed to the Japanese at ascribes that coercion to the "Providential Port Arthur were less shocking and barbarous than the sins habitually committed by British soldiers at the sack of cities in Europe, and sanctioned by British generals, within the present century. But it would appear that the nature of a sin weighs far less with the Spectator than the personality of the sinner. For in an article immediately preceding, that from which we have quoted these Port Arthur nation may become a brigand with a comments, it declares itself averse to the clear conscience when it perceives that assumption of any ruling functions by Great Britain in China, because it "believes that Christian men cannot govern Chinamen without spasmodic outbursts of cruelty." Thus, according to the Spectator's views, Englishmen should "regard an alliance with the Japanese with the utmost repugnance." because the Japanese were guilty of an outburst of cruelty against the Chinese at Port Arthur, but, eschew governing responsibilities in China because they would certainly be betrayed into spasmodic outbursts of cruelty against the Chinese. It is not often that a newspaper, especially a newspaper of the Spectator's calibre, falls into such flagrant self-contradictions. truth is, however, that the Spectator finds any working programme. It believes in consequent addition of vast tracts of territory to England's area and great masses of Asiatic people to her population, is a prospect from which it shrinks as a moral philosopher while secretly hankering after it as a follower of the star of empire. "If Fate has suddenly set herself to determine in the long run," it writes, "we are forced men in the East because they, too, advocate coerce States to share unwillingly in the partition of Empires, so be it. We cannot contend against what would then the partition of Asia, we can be certain of seem to be the Providential Government of the world." There is, however, no such destiny for non-Christian States. The Providednce which compels a nation to proceed reluctantly to the consumption of alien empires is a Christian Providence. "An Asiatic and a Pagan people" like the Japanese are not subjected to any such pressure by destiny nor exposed to any such aggressive compulsion by Providence. How quaint it is when we come to reason it out calmly! In fact, nothing emerges from the analysis except the old doctrine "one law for me, another for thee." The Spectator rails against the Japanese because it supposes that they "want England to sanction the partition to justify its racial antipathy by re- of China by helping in it," and it rails ference to the excesses committed by against "the English in Asia because they the Japanese at Port Arthur; excesses that are always in favour of annexing the uniproved their perpetrators to be "still an verse as a hint to mankind that British settlement, speaks in strong terms of the

government of the World" against which it would be vain to contend. So then the whole question turns on choosing the paychological moment rightly. International brigandage is inevitable; we have only to decipher the season when Providence wills that the thieving shall begin. How is the discovery to be made? The Spectator has a theory about that important point. A a mood of larceny has seized its rivals. If Europe is definitely bent on the general subjugation of Asia-and the Spectator thinks that Europe does harbour such a design-then England must follow the direction indicated by the finger of Providence. Does not this doctrine recall the case of the Cornish parson who preached vehemently against the sin of wrecking, but stopped his sermon and slid down the banisters of his pulpit in order not to be left behind when his congregation streamed off to plunder a castaway? The struggle between the Spectator's instincts and its principles must be very diverting to Oriental readers. It is not agreeable to Englishmen, however. When we find a leading London journal declaring, at one moment, that England should "ask for, and, if necessary, seize, the position in China which the Admiralty consider best adapted for a great naval station, and should hold that station, by battle if need be, against all the world"; affirming, at another moment, that the partition of China, against which England ought to contend, has practically commenced because Germany and Russia have seized stations on their own account; denouncing, at a third moment, Englishsuch seizure on their country's part; and asserting, finally, that Japan is to be held at arm's length because she desires one thing alone, namely, that British statesmanship does not derive inspiration from any such welter of doctrines. England and Japan have a common policyto maintain the integrity of the Chinese empire, to bring about its material development by peaceful means, and to keep its markets open to the whole world. Racial prejudices will not interfere with the mutual prosecution of that aim.

ANTI-FOREIGN DEMONSTRATIONS BY COOLIES AND STUDENTS,

\*HERE appears to be considerable feel-I ing in Kobe on the question of the rude demeanour displayed by coolies towards foreigners. Moreover, a correspondent, addressing one of the journals of that Asiatic and Pagan people." If the Spectoods are best," yet it talks solemnly conduct of students in certain Normal tator could reconcile itself to a moment's about the destiny which coerces States to Schools in the interior, who call out Keto-

fin (hairy Chinamen), Akuma (demon), the faculties of all the schools and colleges and other opprobrious epithets when having public status or receiving official foreigners pass. Complaints of a similar recognition throughout the empire, in the nature have reached us, and although we sense that the duty of refraining from can not say from personal observation rudeness towards foreigners should be that any access of discourtesy is observable impressed upon students as a matter towards foreigners on the part of the affecting the international reputation of student and labouring classes in Tokyo the country and therefore having concern and its environs, we certainly can say that for every patriotic Japanese subject, there the feeling of absolute security which can not be the slightest doubt, we think, existed among the foreign residents a few that a signal change for the better would years ago is no longer present, and that be speedily brought about. So far as our ladies hesitate about going alone into the experience goes, a child in Japan is never streets. # THE HOSPITAL BALL.

The Subscription Balt in aid of the funds of the Yokohama General Hospital came off at the Public Hall on Thursday evening. It was a pronounced success. Despite the heavy fall of anow during the day and the thaw that set in soon after dusk the hall was overcrowded, and the dances up till supper-time were one continued crush. The limitations of the Public Hall in regard to dancing space are very apparent now-the community has outgrown its only public ball-room; still, as everyone who attends these functions goes in the best of tempers, the utmost good humour prevails and much pleasure undoubtedly results. Last evening the hall was tastefully decorated, feathery bamboo being used in prolittle band of workers who had the task in hand. The floor was excellent and dancing, which began about half past nine, continued till two o'clock, the original programme of 14 dances being expanded by many extras. Music was supplied by the Town Band.

arranged in the smaller hall; half of which was also fitted up = a cosy drawing room. The whole of the arrangements worked most smoothly, and thanks are due for this in great measure to Mr. C. M. Duff, who had charge

JAPANESE ARCHITECTURAL DE. CORATION.

Japan is shortly to have a visit from one of the most emineut American architects, Mr. Ralph Adams Cram, of Boston. His purpose in coming here is interesting, inasmuch as he will be one of the first American experts prominent in his profession to make a special study of Japanese architecture with a view to its adaptation to Western uses. As the result of his errand may, perhaps, be the introduction of many of the dainty details of the domestic architecture of this country into American dwellings, it is fair m expect that there will follow a demand for the products of the skill of Japanese domestic artisans, thus opening up a new line of exports to America. Mr. Cram being also a Bostonian of much literary repute, comes as the representative of leading Architectural Journals. He is expected to arrive by the steamer Peru, due on the 13th inst, and will be the guest of Mr. Arthur May Kuapp, of whose Japanese house in America he was the architect. Of course Mr. Cram will not be the pioneer in this field. Japanese decorative art has already been applied to the interior of foreign buildings with remarkable success by Mr. J. Conder. Pro-bably His Imperial Highness Prince Arisngawa's residence at Kasumigaseki in Tokyo is the best example. But Mr. Conder's work has naturally been confined to Japan, where he has resided for the past eighteen years. United States and in Europe adaptations of this kind do not appear to have been carried nearly Indeed, unless an architect possesses very intimate knowledge of Japanese decorative art he can not hope to utilize intelligently for such purposes.

# ANOTHER GERMAN MISSIONARY ATTACKED IN CHINA.

The Cauton correspondent of the China Mail, writing on [annary 25th, said :- I have to report s murderous attack, on the 12th inst., upon the Rev. W. Homeyer, of the Berlin Missionary Society, whilst he was proceeding from his station near Nam Hung, in the North of the Kwangtung Province, to the District City of Yan Fa. Mr. Homeyer was making the journey on foot, and was accompanied by a servant who carried the baggage. On the night of the 11th, he reached a market place called Ch'i Hing. There he spent the night, leaving early next morning. He had not gone very far when he was overtaken by three Chinese, who apparently had come from Ch'i Hing. They addressed Mr. Homeyer by his Chinese name, and walked with him in a familiar but yet respectful manner, After walking several miles, a ferry had to be crossed. The road then lay along the bank of the river. Suddenly and entirely unexpectedly one of the Chinamen seized Mr. Homeyer by the neck. A second one attacked the coolie who was carrying Mr. Homeyer's baggage. Mr. Homeyerwas getting the better of the man who had attacked him when the third Chinaman came up to the assistance of his friend. No knife was used, but a bamboo pole proved quite an effective weapon when applied to the head of the foreigner. Mr. Homeyer received a deep cut over one of his eyes, and one of his legs was beaten very severely. The robbers carried away money and clothes to the value of about thirty dollars. After some trouble Mr. Homeyer was able to get a chair. He then found his way to his station as fast as he could. He is now pronounced to be out of danger. It is very difficult to account for this outrage. Plunder could scarcely be the only reason, for when Mr. Homeyer offered to give them everything he had, they still continued to best him. The German Consul here has taken up the case, and is dealing with it in a most energetic way. He is leaving no stone unturned to get proper redress for this outrage and to prevent the occurrence of others.

# MONTHLY SUMMARY OF THE RE-LIGIOUS PRESS.

The Kirisutokyō Shimbun speaks in high praise of the character of English and American students, as compared with the students of Japan. The writer quotes Dr. Wadsgaki, who is said to have stated that during his stay in England nothing impressed him so much as the earnesiness, the steadfastness of purpose, and the brotherly feeling of English students. They realise what are their responsibilities : citizens of a great country and do their very best to fulfil them. Their generosity of sentiment and their readiness to help people in dis-tress are beautiful traits, which are worthy of imitation in this country.

It is stated in the Kirisutobjo Shimbun that the Young Men's Christian Association con-nected with the Imperial University is in a flourishing condition, and that a short time ago learned address delivered by Dr. Christlieb in one of the Hongo Churches on "German Theology in the Nineteenth Century." The meeting ras attended by about 60 persons, Mr. Yabine Danjö and others taking part in it.

The Kirisutekye Shimbun insists on the need of reforming Japan's prison system. The in the opinion of this paper out of all proportion to the money spent. During the past three years the total number of prisoners is stated to have been 170,000. It is said that the number of prisoners at any one time is never less than fo,000, that the number of officers in charge of these prisoners is 13,000 and the number of religious teachers 100, the cost of the whole business being about 44 million yen. According to a recently issued report of the Home Department, out of every hundred discharged prisoners some 70 return to a life of crime. The Kirisutokyō Shimbun gives statistics bearing on the amount of crime committed in other countries, according to which in England the proportion of cominals is a in every thousand of the population, in America there are 90,000 criminals in a population of 65 millions. It is said that not more than half of the 90,000 are naturalized Americans. So that it is seen that the proportion in Japan is very large. In the opinion of the Kirisutehyō Shimbun no change can be expected till private persons take up the matter here as they do in England and elsewhere. It condemna the indifference shown to the whole subject by the mujority of the public.

The Kirisutokyo Shimbun has of late printed a few pages of the paper in English. In the copy that now lies before us is an article by Dr. De Forest, of Sendai, on "Mixed Re-sidence and Christianity;" "Reflections on the New Year" by Dr. Gordon; and a short paper on "Social Christianity" by Mr. J. S. Motoda.

The Kokumin-no Tomo, in reviewing the present state of Christiauity in Japan, states the following facts and expresses the subjoined opinions. The long-desired and exmestly worked for independence of the native church is gradually becoming a fail accompli. This is specially the case with the Kumisi Churches (Congregational) and the Itchi Krôkai (Presbyterian). The aums of money collected for special purposes by various bodies are very large compared with what they used to be. For instance, in Ocaka alone the Nihou Kirisuto-dendo-Kaisha a short time ago raised the sum of 2,500 yes for evangelistic purposes. At the large meeting of the Itchi Kyōkai, held on the occasion of the celebration of the 25th anniversary of the foundation of the church, a very decided stand was taken in reference to the desirability of getting rid of denomi-nationalism in the native churches. The churches promised to do their best to effect this end. But while there are signs of progress and prosperity, there are some objectionable practices still resorted to. Such objectionable practices still resorted to. Such is the habit of introducing politics into the pulpit, so common among a certain class of in Rikuzen and Rikuchu. Mr. Anezaki Masaharu under the new régime?

young preachers, specially those under the leadership of Mr. Matsamura Kaiseki. It is quite common to hear from the lips of these professed preachers of the gospel trades against living sixteamen or discourses on the merits of an Oliver Cromwell or a Garibaldi, and the enunciation of revolutionary principles. All this is contrary to the spirit of the Gospel. The Temperance Association is not so prosperous as it might be. The Methodists do the lion's share of such work as as accomplished in this line, the Kumisi and Itchi Kyōkai churches being in the hackground. This is to be regretted. The Fukuin Gomeikai has not till lately aitracted much attention, but during the past six months it has shown great energy, open-ing preaching stations and holding lecture meetings in various quarters. Since one of its great objects is the union of the sects, its efforts are watched with great interest and sympathy by all earnest Christians.

Mr. S. Gulick, now of Matsuyama, Iyo, formerly of Kumamoto, recently published a work designed to influence young men, called "The Growth of the Kingdom of God." Instead of marshalling arguments in favour of Christianity, it gives an account of Christian experience and furnishes statistics bearing on the progress of missions. The book is for sale at the Kyöbunkan, Ginza, Tökyö, at t yen 25 sen DEL CODA.

A work, the Japanese title of which is Shisen oyobi Choshisen (The Natural and the Super-natural), by Dr. Bushnell, has been translated into Japanese by Mr. Harano Hikotaio, and is for sale at the Keissisha, Kyôbashi, Tokyo, at 60 sen per copy. It is said to be a vigorous attack on materialism.

In a long stricle, Mr. Tanaka Chigaku replies to Dr. Katô's 55th essay, in which, it will be remembered, Dr. Katô asserts that religious devotees are slaves. Mr. Tanaka affirms that Dr. Kaiô does not distinguish between true and false religion and that he writes in the spirit of one who is annoyed by the actual existence of religion at the present time. Mr. Tanaka maintains that there is no derogatory sense in which the word "slavish" can be used that applies to the sincere Christian or the sincere Buddhist. If to follow in the footsteps of one's betters be slavery, then Christian and Buddhist believers are slaves. If dependence on the will of another be in all cases slavery, then the men and women who bow to the will of the founders of the secia to which they belong are slaves. But what is there that is discredittable about such subserviency?

The Shakai Zasshi discusses the religious aspects of the Kino-chou affair, asserting that the action of the Germans is the greatest blow that Christianity has received for many a long day. Hithertomany Japanese have been rejuctant to believe that the gospel of Christ is backed by the cannon and the sword, but the Kiso-chou incident places this beyond doubt. It is imposaible to estimate the extent of the injury done to Christian propagandism by the step the German Emperorhastaken. The time worn accusation, current in China and Japan, that missionaries are nothing but political agents, designed to serve the purpose of aggrandisement, can no Unless we are much mislonger be rebutted. taken, says the Shakai Zasshi, every missionary in China and Japan will feel the effect of this untoward incident for years to come.

The Meikyo Shinshi (Buddhiat) writes in the same strain, saying that for the emissaries of a religion which professes to teach universal love and to establish the reign of justice to be used as a means of gratifying the covetousness of a European Power is perfectly outrageous, and more than justifies all the hard things that have been said sa to the connection between the Christian religion and European political interests.

months ago was sent by the Imperial University to the above-named provinces for the purpose of collecting information bearing on the religion of the inhabitants of the places visited. We give, in as concise a manner as possible, the particulars furnished in Mr. Anezaki's report. Among the districts traversed special attention was paid to the old Sendal and Namba daimiates, on account of the conservatism of the inhabitants in those parts. Ancient forms of worship are more carefully preserved in these localities than anywhere else in Japan. Speaking generally, the objects of worship of the mass of the people are in every case endowed with personality. It is plain that their notions of supernatural beings are all based on what they know of human beings and their attri-butes. Whatever be investigated, there is no getting away from anthopomorphism. According to the popular belief the world is peopled with spirits whose existence resembles in many respects that of all human beings. The worship of the people in these parts may be described me partly a worship of nature and partly the worship of divinities concerning whose claims tradition has much to say. Most of the motives for prayer are personalto be cured of disease, protected against calamity, and made happy. Mr Anezaki gives a classification of the various objects of worship under the following headings:—(1) Gods of Hindu origin; (2) Tutelary gods; (3) Animals and Plants; (4) Mountains and rivers; (5) Natural phenomena of various kinds; (6) Petiahistic objects of worship; (7) The 生殖器 Seishokuki(symbols of reproduction);"
(8) Spirits and demons. Mr. Auezaki's essay is of great length and considerable interest, but we have no space for more than a brief outline.

In addition to the above the Tetsugaku Zasshi discusses a number of ethical and religious questions. There are articles on "Cause and Effect;" "Ideal and Rational Morality;" and other subjects. The Teisugaku Zasshi and the Nihon Shugi have of late been engaged in a warm controversy over the question of the State as a basis of ethics, the Tetsugaku Zasshi denying that a state has the necessary qualifications for fulfilling the functions of a final Court of Appeal in moral questions, and hence that the position taken by Mr. Takenouchi Manzo, one of the leaders of the "Nippon Shugi" party, on this question is entirely indefensible.

The new Vice-Minister of Education, Mr. Kikuchi Dairoku, is reported by the Jiji Shimpo to have given utterance to the following opinions respecting the effect of mixed residence on education and religion:—In view of the near approach of mixed residence, will the Home Department place Christianity on the same footing as Buddhism and Shinto? Upon the decision of this question the action of the Mombusho will largely depend. In France the teaching of religion in elementary and middle achools supported by the State is strictly forbidden, and in a country like Japan, where so many religious are represented, it seems to me the best policy is to confine education to secular subjects. Then there is another question to be sattled. Under the new treatles will foreigners be entitled to become professors and directors with the same status is possessed by the Japanese filling these posts? † In France only such foreigners as have electoral rights are al-

\* The Greek Phallus, corresponding to the The Greek Challes, corresponding to the Semitic Ashtaroth and the Linga of the natives of India. Like the Greeks, the Japanesa have two symbols, both of which are worshipped. The male symbol, however, in Japan, as in India and ancient Greece, has more worshippers than the fewale. female.

† It may not be generally known that at present It may not be generally known that at present the foreign professors in Japanese employ are on an entirely different footing from their Japanese confières. The foreigner has no voice in the management of the school or college, does not attend faculty meetings, or express an opinion on attend faculty meetings, or express an opinion on any course the school may choose to adopt. He is

lowed to become teachers in government achools. As foreigners in Japan will not have electoral rights under the new Treaties, the French law does not apply here. Of course it would be possible to make the payment of a certain sum of money in taxes a necessary qualification for office in Government schools. This probably would be the best course to adopt. By far the most important subject connected with the approaching change is the policy to be adopted by the Department of Education in reference female education. At present the education of women is mostly in the hands of the Missionaries. This is by no means desirable for many reasons. It is most important that prior to the commencement of mixed residence the attention of the public should be directed to this subject -and a line of policy adopted.

Considerable space is devoted in several important magazines to reviews of the two great works on religion that have appeared in recent years. Both have been already noticed by us, but their scholarship and thoroughness call for Anezaki Masaharu's "History of Indian Reli-gion," and to the "History of Japanese Bud dhism," by Messra, Murakami Sensel, Sakaino Tekkai, and Washio Junkei. The former may he had for I yen at the Kinkölö, Honciö, 3 choms, Nihonhashi, Tötyö, the 1st volume of the latter costs I yen 70 sen, and is for sale at the Tetengaku Shoin, Hongo, Tokyo,

Mr. Anezaki has for many years past made a specialty of Oriental religious, and is possessed of all the ardour and ripe scholarship necessary for the task he undertook when he sat down to compress into 300 pages the vast amount of ma-terial he had collected bearing on the creeds of The Tetaugaku Zaszki, the Toyê Tetsu India. gaku Zasshi, the Rikugō Zasshi, and other magazines all apeak of the work in terms of warm approbation. The Rikugō recommends it to Christian ministers as a profitable study.

The new history of Japanese Buddhism is nndoubtedly a still greater work than that of Mr. Anezaki. The names of the authors are a sufficient guarantee of scholarship and accuracy. The first volume covers 700 pages. This history, being the first exhaustive work of the kind, ought to prove of great value to learned investigators of all nationalities. We subjoin the comments of several of the magaziner on this new effort.

The Tetsugatu Zasshi says :- The first volume of the "History of Buddhism" furnishes a well-arranged account of Buddhist doctrine as first taught in Japan, together with the changes it underwent, and a history of the temples erected in early days. There are two reasons for the non-publication of a work of this kind before;—(1) Japanese historians have not studied Buddhism; (2) Buddhist priests have taken no interest in historical research. If there is a fault to find with the volume that has been published, it is that more space has been devoted to describing what was introduced from abroad than to tracing Japanese developments.
The Topo Tetsugaku Zasshi observes: It is

now some 1,300 years since Buddhism was introduced into this country. There are 12 sects (余 shu) and 36 sub-sects (液 ha). The histories of any importance that have hitherto appeared are the 三國佛教傳通報題 Sankaku-Buk-kyō dentiu-yengi, the Sankaku-Bukkyō ryaku shi (路史) and the 佛教小史 Bukkyō shoshi, by Mr. Fujii. But these make no pretence to being thorough. Hence the publication of the new work is a subject for congratulation among all scholars. The volume now issued deals with the early history of the sect, commencing with the year 553 A.D. and ending with the year 781. This period is subdivided into two eras, the first covering the period from 552-644 A.D.—and the second from 645-781 A.D. The history aims at showing how the customs, the government, and the civilisation of those days were influenced by the teaching of the emissaries of the new sect. The Shigaku Zasshi says the printing of the work is all that could be desired.

The maps and pictures are by no means well Time religion is not designed to fix our thoughts done, which is to be regretted, in in many cases the authors have furnished a large number of very rare drawings. The work is minute to the extent of overflowing. Its chronology gives evidence of the most careful study and arrangement. Upon no work of modern times has more scholarly labour been expended. The public owes a debt of gratitude to the compilers.

The Shinri (German Church) from month to month maintains a high standard of excellence an exponent of Christian thought of the more iberal type. Nos. 93, 94, 95 that lie before us contain a number of carefully written articles on a variety of subjects. In No. 93 the titles are "Parents and Children;" "The relation of the old Christian dogma to Greek Philosophy;" "The Decalogue;" "Baptism," "The Religion of Israel before Moses;" and "The Modern Theory of the Evangelisation of the World," the latter by Prof. Dr. G. Warneck. Dr. Christlieb, Mr. Schiller, Mr. Minami, and Mr. T. Hiroi are very regular contributors and articles written by acholars residing in other parts of the world are constantly being published. In Mr. Minami the German Mission possesses a writer of considerable power, the lucidity of whose style make his articles well worth perusal apart from the theories advocated. There now hes before us an easay covering 22 pages on the "Relation between Religion and Morality," contributed by this writer, which is a most thorough and scholarly discussion of the subject; history, practice, and principle each furnishing a heading for investigation, and for the enunciation of a fixed opinion. Among the miscellaneous items which appear in No. 95 is a note celling attention to the prevalence of "ism" in and outside the church. The outburst of sentiment know as the "Nippon-Shugi" is nothing but the appearance of another "ism." Before the leaders of this movement aspire to the position of teachers of the nation on the subject of religion, they would do well to be a little less violent in their abuse of Christians. The writer whose con tributions on the Nippon-Shugi movement so often appear in the Taiyo (Mr. Takayama) would be more likely to gain a hearing if he treated the subject in a more quiet and scholarly manner than he has hitherto done, and dealt less in abusive epithets.

In a recent number of the Nippen Shugi, Mr. Takenonchi Nanzo reverta to the much discussed subject of religious education as carried on by Buddhists and Christians. He asserts that the girls trained in Christian Schools are more foreign than Japanese in their sympathies and feelings, and adds that from a national point of view the education that is imparted in such institutions is a perverter and a corrupter of youth. Mr. Takenouchi thinks that Sectarian Schools should not be permitted to teach anything but religion. He objects to the State allowing the general education of youth to be entrusted to persons whose main purpose is to proselytise. This is a view which is held by a very large number of influential Japanese at the present time, and it is not at all unlikely that it will affect the policy of the Mombusho very considerably within the next twelve mouths.

. . The Fukuin Shimpo, writing on definitions of religion, says that none of those made by Japanese are satisfactory; they are either partial or founded on misconceptions. Mr. Fukuzawa's remark, "Religion is to be compered to tea "; and Dr. Kato's observation, "Religion has its source in tear," are instances in point, and tend to show how shallow are the views com-monly entertained on the subject. The writer, Mr. Yebina Danjo, quotes the definitions of Kant, Herbert Spencer, and Schilling to show how deeply foreign thinkers have explored on this subject. Mr. Yebina then reviews the teaching of the three ancient creeds of Japan and points out various particulars in which their

on the future nor to teach us how to worship, but to teach us how to be perfect as our father in Heaven is perfect and how to love our neighbonrs us ourselves.

A writer in the same paper refers to a remark made by an English Bishop while travelling in Japan, to the effect that the Japanese are lacking in seriousness, and that this defect displays itself in the manner in which religion has been treated in this country, and to an observation of Mr. Fukuzawa in which he declared that he could not understand how a Japanese could seriously believe in Christianity. From these views the writer dissents. He says that the lives of earnest Buddhists in former days and the lives of Christians in this Meift era are a sufficient refutation of this accusation. The eleven Christians who in the early days of the Meiji era confessed their faith in Christ at Yokohama have remained steadfast believers ever since. The country is dotted over with men and women in all classes of society whose Christian conduct forms a remarkable contrast to the lives of those who surround them, This contrast is specially manifest among the lower classes, where all kind of wickedness is perpetrated in a most open manner. The charge that the Japanese are a non-religious people has never been proved, nor is it capable of proof, concludes the Fukuin-Shimpo.

In the Toyotetsugahu Zasshi, Dr. Inouyo En-ryo ban a good deal to say on mixed residence and the preparation to be made for it. Inouye is inclined to agree with those who think that there will be no great rush of foreigners to Japan. By the majority of Occidentals the Inpanese are regarded as uncivilised, says Dr. Inouye, and hence there is no likelihood of people coming in large numbers. What we have most to fear is the arrival of an unscrupulous and immoral class of foreigners. It must not be forgotten that there are hundreds of places in the interior of the country where foreigners are quite unknown and where they are still regarded as barbarians. In out-of-the-way places people think to-day as they did in the Tokugawa era, If, then, a bad class of Occidentals should settle in such places the anti-foreign feeling would be intensified and might lead to serious results. As regards the preparation that it is desirable to make for the coming change, it should, Dr. Inouye thinks, consist principally of strengthening the moral side of Japanese business life. The attention of teachers has in the past been too much centred on family morality, and com-mercial integrity has been seriously neglected. If the family life of the Japanese is superior to that of Occidentals, their business life is certainly inferior.

The advice Dr. Incope gives to his Buddhist friends is to reform their lives and adopt better methods of teaching and organisation. With the exception of the Shin and the Nichiren Sects there is a great want of union among the Buddhists. Then in the matter of doctrine the way in which they habitually lay stress on the evanescent character of this our human life produces the impression that the prevailing tone of Buddhism is pessimistic and consequently its teaching is regarded as injurious to youthful minds, as executated to damp the natural ardour of youth and turn it saids from those enterprises and pursuits which should engage its whole attention. Buddhism has its message concerning the things of this world as well as concerning those of the next. What is needed is that more prominence should be given to the former than has hitherto been done.

We observe that the Bukkyo and the Hansei Zasshi also have articles on the same lines as that now quoted from the Toyotelsugaku Zasshi, specially urging the importance of centring teaching on the affairs of this life and of seeking to reform existing abuses.

The Buddhists have just published a work the new sect. The Shigaku Zasshi says the deficiencies are supplied by Christianity. In printing of the work is all that could be desired, breadth of view and ability to belp the distress-but the same cannot be said of the lithography. ed, Christianity has no rival, says Mr. Yebina. Buddhist Subjects," which covers 400 pages

Digitized by Google

and is for sale at 80 sen per copy, at 14 Kagachō, Kyōbashi, Tōkyō.

Vol. II. of the Tsusoku-Bukkyo gimon Kaito shū, "A Collection of Replies to difficult ques-tion concerning Popular Buddhism" has aption concerning Papular Buddhism" has appeared. As stated by mi when noticing the issue of Vol. I., the work has been compiled by Mr. Takami Döken. The second volume is for sale at 20 Atago-chō, Shiba, at 90 sen per copy. It covers 600 pages. The first volume has sold so well that the author has ventured to issue another on the same Whatever may be said about the defunct state of Buddhism as a whole, there are certainly some quarters where great activity is shown.

The Kvoikujiron gives the result of an interview with Marquis Ito which was held for the purpose of eliciting from the Premier an expression of opinion on education, mixed residence, and religion. The interviewer, one of the staff of the paper, observed that it had been stated in public that the Cabinet were discussing the advisability of including religion in the educational system to be followed under the new treaties and asked what were the views of the Marquis on the subject. To this the Marquis is reported to have replied follows:—There has been no discussion of the kind you refer to in the Cabinet, nor is there likely to be. That religious devotees should endeavour to spread the doctrines in which they believe by means of education as well as by other means is quite natural. But for statesmen and educationalists in the employ of the Government to meddle with religion would be contrary to the spirit of the Japanese State and Constitu tion, and contrary to the genius of European civilisation as exemplified in its latest and highest developments. Persons must be extremely ignorant not to be aware of this fact. Though the countries of Europe, no less than America, may be called religious countries, we find that with the progress of thought there has been a persistent expulsion of religion from the precincts of government and state education. Japan of the Meijl era has adopted European civilisation, has decided to make wealth power foremost among her possessions, and will not allow herself to be hampered by religion in the attainment of her objects. Our rapid progress in the past is to be attributed to our being free from the trammels which have bound surround ing nations and which still constitute the great obstacle to their advancement. Religion being a thing that has to do with a man's own con science, the State allows each subject liberty to accept what form of faith he pleases, as long as he obeys the laws of the land in his outward conduct. To interfere with men's choice would do more harm than good. In all state affairs, in government organisation and the rules of departments there must be no mixture of religion. When all the laws and rules bearing on public life are free from the religious element, when religion is placed beyond the pale of politics and state education, then does it become a real subject of interest and investigation to a certain class of minds.

The Koye, the Roman Catholic organ, seems never to finish its say on the subject of "Baptism." We think we are not mistaken in assert. ing that it has already been discussed in more than a dozen issues of this monthly periodical. Among other topics that occupy attention in the numbers before us are "Confucianism" and the faith and lives of Japanese Christians of bygone ages. The paper shows no signs of improvement in tone or literary excellency, and does not even furnish anything like a full statement of statistics bearing on the extensive labours of the Roman Catholic Missionaries.

We read in the Seihyō Shimpō (Greek Church) that the Rev. E. R. Woodman and others have lately started a new religious periodical called the 講經資料, Kökeishiryö, which is designed, as the title implies, to aid stud-ents of the Bible by furnishing them with ex-

as the Expositor, the Biblical World, and the Homiletical Review in the West. The Kokei Shiryo, we are told in the opening number, does not purpose to play the tôle of a defender of the Christian faith by answering the objections of sception or by discoursing on the evidences of its truth, but only to publish material designed to throw light on the meaning of the Bible. The publication will be conducted on non-sectarian principles. The chief writers for it will be Messrs Woodman, T. T. Alexander, and H. H. Koisu. The names of Messrs J. T. and H. H. Kötsu. The names of Mesars J. a., Swift and R. L. Miller appear among the memsine will be published monthly, cost 75 sen per annum, and will be for sale at the Kyöbun Kan, Ginza, Tokvo.

# JAPANESE FACTS AND COMMENTS.

The mails between Tokyo and Yokohama are collected nine times for the down trains and eight times for the up trains. The mail matter has increased considerably of late, the number of letters for daily transmission being reported to exceed 12,000. In view of these facts four new collections have been added, and the hours of delivery have been entirely recast.

Kerosene oil at Kobe has begun to show an upward tendency, on account of fresh arrivals not being expected. Moreover quotations have risen by two or three sen. The stock brought over from January consisted of Pine, 287,832 cases; Sumatra, 14,669 cases; Tank, 100,086 cases; Anchor, 6,205 cases; a total of 408,792

The Nippon states that telephones are to be established in Otaru, Sapporo, and Hakodate, during the 30th fiscal year. Purchases of posts to the number of 1,600 were recently made at the Sapporo Post and Telegraph Office. It is said that the instruments will shortly be sent from Tokyo, the plans for the telephone exchanges being completed.

The Yokohama Municipal Council recently decided, the Tokyo Asahi alleges, that on the revised treaties coming into operation foreigners in Yokohama shall be charged the same rates for the supply of water as natives are now required to pay. This decision has obtained the quired to pay. This decision has obtained the sanction of the Minister for Home Affairs and the Minister of Finance.

A journal to be entitled the Diplomatic Times (Gwaiko Jiji) is expected to appear shortly under the chief editorship of Mr. Ariga Nagao, M. A. It is purely, the Yomiuri remarks, a political magazine devoted to the publication of diplomatic news and matters concerning international law, treaty revision, the Red Cross Society, &c. The first number is to be published in Tokyo on the 10th instant.

The coal imported into Kobe during last year amounted to 140,666,966 cattles, a considerable decrease as compared with the figures for the 29th year of Meiji, which aggregated 333.159,400 catties. The amount imported for January this year did not exceed 14.807,200 catties, showing a decrease of 16.993.560 catties as compared with the corresponding period of last year. The stock at present is very insignificant, and prices remain as firm as ever.

The Minister of Agriculture and Commerce has at last issued an order to the Osaka Rice Exchange to the effect that the chief Director and Directors of the said Exchange should be discharged from office in accordance with Art. XXVII of the Rice Exchange Law, and that a special general meeting should be convened within two days from the receipt of the order, according to Art. XXXVI of the local Regula-tions for the Exchange, so that new Directors may be elected.

For the exchange of one yen silver and

is hoped, will fill the place of such organs financial rules were established and funds provided. In the 30th year of Meiji sales of bullion were fixed at ten million yen, approval being obtained from the Imperial Diet, By December last, however the funds were found insufficient, and special Imperial sanction was obtained on the 7th instant for another ten millions over and above the aum voted.

> A special meeting of Public Procurators of all grades and from various parts of the empire was held recently to receive instructions from the Minister of Justice onsecuring uniformity in judicial administration, arrangements for the operation of the revised treaties, and the control of elections. With regard to the latest point, the Minister stated that offences of bribery and intimidation ought not to be dealt with on the same footing as ordinary misdemeanours. In all such cases resolute steps must be taken against offenders, Il whatever party they might belong.

The tightening of the money market since last year has brought about serious embairassment both for new enterprises and undertakings already established. The universal failure to meet calls on shares, remarks the Hochi, has led to reductions in capital or the dissolu-tion of companies. The unhealthiness of the business world became more serious last month, as is clearly shown by the fact that the number of commercial and industrial companies dissolved was 13, while those compelled to reduce their capital numbered 10, the total amount of the reductions being 304,200 yen.

The amount of fish manure transported from Wakanai and Oistu, Hokkaido, to the port of Akamagaseki is really considerable, the Osaka Asahi assetts. Statistics of the year before last show that the transport of manure, which con-sists of herrings, codfish, solefish, dried sardines, etc., totalled 3.555.941 kwamme, valued at 651,754 pen. the import of dried sardines from Korea also seems to have reached several millions of cattles. The fertilisers imported from Hokkaido and Korea are chiefly sent to the central provinces, and to Kiushiu and Shikohu, to be employed on indigo plantations in spring and on cotton farms in summer.

The census returns show that the number of foreign residents in Kobe in January this year was me follows :-

Nationality.	Families.	Men.	Women.	Totals
British	204	306	193	499
American	62	66	70	130
German				
Russian	/5	105	42	147
In the second	2	5	7	14
Italian	—	3	-	3
Dutch	10	01	3	23
Portuguese	14	25	14	39
Spanish	4	7	4	15
Chinese	235	944	306	1,250
***				
Total	628	1.404	648	2 106

The Mitsui Bank's report for the latter half of last year, prepared immediately after the meeting of the managers from the various branches in the empire was closed, shows that the net profits amounted to 440,030 *yen*, of which 80,000 yen were distributed as dividend, 4,000 yen carried over to the next account, and 360,000 yen set aside as reserves. The total 300,000 yen set aside as reserves. The toral reserve is now no less than 2,170,000 yen, representing nearly two and a half times the amount of the capital registered. The Mitsui Bank has already secured the atmost public confidence, and is the first among banking corporations to accumulate reserves above the amount of the capital.

The warehousing business in Japan during the latter half of last year was prosperous on the whole. The Osaka Warehousing Company is reported by the Hochi to have secured a profit of over thirteen per cent, while a similar institu-tion in Tokyo is somewhat elated at having declared a dividend at the rate of twelve per cent. The want of development in warehousing enterprises in Japan is chiefly attributable to the immaturity of the fire insurance business. Inents of the Bible by furnishing them with exobliterated coins simultaneously with the endifference to the business of issuing loans on
positions of its meaning. The magazine, it forcement of the gold monometallism, special the security of goods arises from the same cause.

As to the profits realized by undertakings connected with docks, canals, and marine transport, the rates are widely different, 10 per cent. being paid by the Yokohama Dock. 7 per cent, by the Tone canal, 20 per cent, by the Kobe pier, and 16 per cent, by the Union Tug-ship Co.

According to the Shogvo, the Bank of Japan has raised its interest on loans by one rin, the new rate coming into force from the 9th instant at the main office and branches throughout the empire. This measure seems to have been taken in view of the pressing demand for funds for the payment of taxes and shares, while the condition of trade grows worse than ever. The disbursement of Government deposits and other circumstances have brought about a reduction in the specie reserve, and the issue of notes above the legal limit continually increases. The financial situation boded no good for the bankers, and serious precautions became imperative.

The Kokumin publishes an interesting article with regard to the financial situation. It says the depression in 1890 and the position at pre-sent are much the same, but appear to have arisen from different circumstances. In the former case the direct cause was the complete change consequent upon the enforcement of the system of convertible notes, and the sudden expansion of business enterprises, the result being an unusual tightening of the money market and an extravagant fall in the price of shares: Private enterprises crumbled to dust and lahourers were altogether deprived of their em-ployment. Things are different in the present case. The chief factor in the present depression is the issue of War Bonds, while the embarrassment was greatly increased by the extravagant expansion of all undertakings before and after the War, the result being a grievous deprecia-tion of shares and the steady dissolution of private enterprises. In short, the depression is really limited to private undertakings; Government enterprises are unaffected.

Kobe's trade with Italy is still very small. According to last year's statistics published in the Firi, the imports and exports did not exceed 2,666 106 pen and 182,923 yen respectively. It is said that the Italian Government recently resolved to attempt an extension of its commerce with Japan by granting annual subsidies to the Italian Trad ing Company in Yokohama and to a firm in Kobe Settlement. The principal productions of Italy consist of tools and instruments, arms, wheat, cheese, leather, perfinnery, etc., whereas staple exports from Japan are rice, silk, and other miscellaneous articles. As Italy auffers from scarcity of coal there are prospects in that direction.

The trade of Kobe in general remains stagmant except in bamboos, for which large orders are constantly received from England, America, and Australia.

The amount of silver collected by the Government from the public exceeds fifty million year, asserts the Mainichi, According to the programme originally formulated, the coins were to be minted into aubaidiaries of fifty sen denomination for circulation in the interior and the Osaka Mint was required to continue its work in this direction up till March next. The Mainichi has, however, frequently pointed out the excess as well as the unpo planty of subsidiary coins, and has even alleged that a difference of value would occur between the standard silver and itsanbaidiaries. This forecast has begun to be realized. The evils arising from the over-production of subsidiaries became apparent, and the Government was obliged to consider new monetary schemes for the future. Rumour has it that negotiations have been opened with a foreign merchant in Shanghai for the sale of silver yen pieces. It is impossible to place entire credit in this rumour but in any case the sale of silver will prove a fact at no distant date.

Since the inauguration of the patent system post-bellum undertakings, especially in regard in Japan protection for a large number of new to the expansion of armaments, the administra-

inventions has been granted from time to time. But the inventions of scientists and professors have, says the Jiji, been grievously few. The patents granted to titled as well as untitled protessors of engineering since the operation of the Patent System are as follow:—In 1885, 3; in 1886, 4; in 1887 none; in 1888, uone; 1889, 3; in 1890, 6; in 1891, 6; in 1892, 11; in 1893, 5; in 1894, 8; 1895, 6; 1896, 6; 1897, 2; total 60. Classified more minutely, these figures show that thirty five patents were ed by Professors of Engineering and Physics and other personages from the Imperial University—6 for shipbuilding, 2 for civil engineering, 9 for mechanics, 11 for chemistry, 3 for electricity, 3 for mining, and 1 for metallurgy. Ten of the inventors above enumerated acquired more than two patents each. Compared with the total number of inventions patented throughout the empire, that of the so-called learned men bears a ratio of only 0.02 to 1. The Jifi thinks it regrettable that these professors have contributed so little to the advancement of the country's industry and resources.

The regular meeting of the Japan Industrial Bank took place on the 3rd instant. The Bank has failed to realize profits to the amount expected. Five per cent per annum is the rate of dividend fixed by law, but even this rate will not be paid for the current term, the actual profits realized being less than 3,000 ren. The transactions of the Bank, however, are steadily progressing. It is said that the applications for loans received since the commencement of its business total 8,500,000 yen, of which 1,500,000 yen have been already negotiated. This, added to the amount now under negotiation, exceeds two million yen. The paid up capital being only 2,500,000 yen, the Bank will soon find itself deprived of funds for further loans, and recomes to the issue of bonds is absolutely indispensable. The debentures are of 50 ren face value each instead of 100 ren, as prescribed in the regulations. The change was considered necessary in order to attract the money of small owners-a system well suited to the financial condition of the country at present. The Nobles' Assembly Hall, which was purchased by the Bank at the end of last year, is now in course of repair, and the Bank's removal is expected to take place shortly. This we gather from the Fiji Shimpo.

Statistics published in the Nippon show that the number of foreign residents in Tokyo at the end of December last was 761-504 males and 287 females. The following are the details:--

Persons stopping in hotels and inne are not included in these figures.

The Tokyo Atahi says the Government formulated gigantic schemes under the name of

tion of Formosa, and the development of communications. These measures, however, were only intended to conceal the bungling in connection with the return of Liantung peninsuls, and were consequently strongly criticised. That the authorities have failed to carry out their expansion programme may be perceived from the fallowing figures:-

	Batimaten.	Amount brough
Department.		over to next year's account.
	Yen.	Yen.
War		11,573,333
Naval		22,991.724
Celonial		1.713,342
Сантинисяціоня	10,043,636	4,820,195

The amount carried over to the next year's budget reaches 20 to 50 per cent. in the different ilems, whereas in ordinary years six or seven per cent. is the highest. Classifying the esti-mates for the 20th year an Ordinary and Extra-ordinary, the following figures are obtained:—

| Restinates. | Yen. |

Government are chiefly involved in the extra ordinary estimates. But of an estimate of 98 million pass over 44 millions were carried over to the next account, representing 45 per cent. of the whole. From these facts it must be inferred, remarks the Asahi, that the Government's expansion programme is nothing but a great financial bungle.

Now that the Ito Cabinet is restored, the question of Formosan administration has again been brought upon the tapis. Viscount Nogi, Governor-General of Formosa, is to atrive in the capital in a few days on business connected with the proposed reforms. The clamout for reform has indeed been loud since the last Cabinet, but despite some alteration of the official organization, the disorder remains, the Nippon tematks, as bad as ever. The Tokro Asahs, commenting on the same subject, says that although the frequent change of a chief functionary in any administrative department m not advisable, a resolute step must be taken in regard to the new territory, and no man is better fitted for the post of Governor General than the Crown Prince, whose installation could hardly fail to inspire the Formosau officials with respect. The Nipponseems to coincide in these views, as it advocates the appointment of Prince Komatsu or another prince of the blood-if the Crown Prince's appointment is considered impracticable. It insists on the propriety of imposing the duties of civil administration upon Prince Komatsu instead of securing his services

a high military councillor.

The Yomiur's suggests as a matter of prime importance the immediate reform of the financial administration. It points out that the revenue and expenditure of Formosa for the current year aggregate eight million and twelve million odd yen respectively, and that a sum of 4,280 000 yen has to be supplied from the Home Treasury.

The Fominer is in hearty sympathy with all plans for developing the resources of the island, but it does not think these need be curtailed by economy in expenditure. Our contemporary refers to the necessity of introducing alterations into the administrative machinery, of limiting the number of the garrison, and of maintaining the judicial system on a firmer basis.

As for the Fiii, it remarks that a matter of

paramount importance in any uncivilized territory is the construction of railways, inasterritory is the construction of ratiways, mass-much as without recourse to such convenient means of transport, no administration can be ancessfully carried on. "Look at foreigners," it says. "The first thing they do for colonial purposes is to provide the best means of communication." The teports which are con-stantly received from Formosa with regard to risings and insurgent outbreaks reflect disgrace upon the nation. Riots ought soon to be suppressed by the utilization of railways. The scheme for increased taxation, or for loans, either domestic or foreign, is commendable.

# PIRACY IN CHINESE WATERS,

A special correspondent of the Hongkong Zelegraph, who is making a trip up the West River, writes as follows on the subject of piracy:

River, writes as follows on the subject of piracy:—
During a very pleasant run through the Delta, and up the West River to Wuchow, (a distance of 226 miles over the course) on board the Steamboat Company's well-found steamer Lung Shan (Capt. G. F. Monison), I saw and heard a good deal of piracy both in the thickly populated Delta and on the West River and its large tributaries. We had been steaming down river and through the Delta only about five homs (we left Canton at 9 s.m.) when we approached the village of Yung Kee, on the bank of a creek running into the channel through which we were travelling at the rate of about o knots per hour. As soon as we got near it that go which we were travelling at the rate of about 9 knots per hour. As soon as we got near it the Captain called my attention to the men and children on the shore. "This," said he, "is a well known village where desperadoes of every description dwell. I consider the best name for that creek is Firste Creek because the majority of the inhabitants of the desperadoes of every description dwell, I consider the best name for that creek is Pirate Creek because the majority of the inhabitants of that village are either pirates or persons connected with or descendants of pirates. You just wait until we are steaming pretty close inshore and you'll then hear them cursing us for all they are worth. Been the little children will revile us." The startling allegations of the gallant officer seemed thoroughly justifiable, for no sooner were we within ear-shot of the villagers than they indulged in volleys of the most offensive epithets, the children joining in and making, the while, indecent jestures which are well understood in China to indicate intentional insult, contempt, and bitter hatred. As long as we were in sight in China to indicate intentional insult, contempt, and bitter hatred. As long as we were in sight the people howled at us, demonstrating thereby their ill-will in no uncertain manner. Asked if this sort of thing was usual, the Captain answered in the affirmative and then went on to relate how a steam-launch towing a large passenger boat had been "held up" and looted only a lew days previously not very far from this notorious pirate town. It is not pleasant to contemptate what our fate would have been had our engines broken down near that homest frest. No other steamers were in sight, neither was a narive Custom House. Lekin station, or guard boat to be engines broken down near that homets' nest. No other steamers were in sight, neither was a native Custom House, Lekin station, or guard boat to be seen. We would have been at the mercy of these desperadoes, and little mercy would have been shown to the foreigners or to our 150 native passengers in the event of the fight for tife proving a victory for the invaders. Fortunately our engines (as was only to be expected) ran like clockwork, and we soon found ourselves miles away from the pirates' lair. and we soon pirates' lair.

Going up tiver we passed several large rafts of Going up (iver we passed several large rafts of timber in logs and firewood cut ready for use flying what is known in these regions as the "pirate, flag," If indicated to the look-out men of the piratical gauge that infest the rivers in the southern provinces of China that they had paid their dues to pirate chiefs far up the river and that they should therefore. that they should therefore allowed to proceed nomolested to their destination. It may be said that when once a raftsman has paid blackmail and obtained in consideration thereof one of the

nomblested to their destination. It may be said that when once a raftsman has paid blackmail and obtained in consideration thereof one of the flags that will protect him from further extortion he can hoist it whenever he pleases and thereby avoid much squeezing. That, however, is not so. The raftsmen know only too well how impotent the native authorities are, and they have had many a lesson demonstrating their inability and disinclination to grapple with the pirates, and they accordingly pay toll to them regularly. That is the only sure method of procuring immunity from savage attack encourse, while to look to the properly constituted authorities for protection, although Lekin is paid at certain barriers, would be suicidal fully of the most glaving description.

A few days ago a launch towing a passenger boat containing upwards of 200 people who were going to their homes to spend the New Year boildays was stopped by pirates while passing through one of the creeks that intersect the Shuntak district. The Chief Engineer (Chinese) was shot because he showed fight and refused to cut the rope to which the passenger boat was attached and thereby place the hapiess passengers at the mercy of the blood-thirsty villains who were eager to rob them of all their valuables. As soon as the engineer was riddled with bullets another member of the launch crew obeyed the pirates' order, The rope was cut in twain, the pirates left the launch after beaching her, and, boarding the passenger boat, terrified the inmates with their firearms and threats of violence and were soon in possession of The 20,000 in silver and much valuable clothing and jewellery.

One of the most daving piratical outrages committed in the Delta in recent times occurred last muted in the Delta in recent times occurred last muted in the Delta in recent times occurred last

week near Shekki, a town about 5 to 6 honrs' steaming by ardinary passenger launch from Canton. It is in the populous and wealthy Hemgshan district. According to the reports that have reached this city one bundred pirates were engaged in the raid. They commenced by seizing in broad daylight a launch, and with it towed to the town of Shekki a hoat filled with pirates all armed to the teeth. A landing was easily effected, the Lekin and river goords were promptly subdued, and the township was soon in their hands. Their object was to place themselves in an advantageous position to lost two or three luge passenger boats that were then due to week near Shekki, a town about 5 to 6 hours! hings passenger boats that were then due to arrive at Shekki with valuable cargo and hundreds of passengers. The district magistrate, hearing of the moplessant turn of affairs, summoned his guards and endeavoured to put the pirates to flight. His men were defeated, several people were killed and wounded, and the dastardly villains succeeded in doing exactly what they pleased. They held up the passenger boals and steamed away under cover of darkness with a large amount

away under cover of darkness with a large amount of plunder variously estimated at \$30,000 to \$60,000. As usual, there is no news of the pirates being in to earth.

The holding up of a passenger boat by about a dozen pirates or the robbing of a trading junk is a pretty common occurrence in these regions, and creates very little excitement outside the district in which it happens. It is only when a big gain takes a town, kills a few people, and gets away with a considerable amount of plunder that the general public evince much interest in the subject of piracy in the Delta. It seems to be regarded by the natives as one of those evils which by the employment of drastic measures may be checked, rimployment of drastic measures may be checked, but cannot be completely eradicated.

# THE MINISTER OF THE HOUSEHOLD.

The Official Gasette of the 9th inst. announces that Viscount Hijkata is relieved, at his own request, of the office of Minister of the Imperial Household, and that Viscount Tanaka Milsu ski is appointed to succeed him. The retiting Minister is to continue to receive the treatment due to the position he resigns. Viscount Tanaka held the post of chief of the Bureau of Imperial Archives up to the time of his promotion. Until January of the present year he was Vice Minister of the Imperial Household. He is a Major General on the Reserve list.

# FIRE IN YOKOHAMA.

About a quarter past 10 on Thursday night fre broke out in a carpenters' shed of the Yokohama Dock Co., formerly owned by the Nippon Yusen Kaisha, in Kaigan dori, and quickly spread to other buildings in the compound. A party of firemen of the Yokohama Fire Brigade under Superintendent Morgin, with one of the steam engines, and two hose-reels and stand pipes, promptly pro-ceeded to the scene, and upon their arrival found that two of the godowns were in flames. The steam engine and one standpipe were quickly got to work from hy-drants, but it was 2 a m. before the fire was completely extinguished, two of the godowns being entirely and a third partially destroyed. It is supposed that the fire originated from some burning embers having been left in the carpen-ters shed when the workmen left the premises in the evening.

# LIVELY SCENE IN TOKYO.

On the afternoon of the 1st instant a salt dealer, named Sait: Yoshijiro, of Gofukucho, Tokyo, was assailed by fire-brigade men, twenty-eight in all, who immediately unroofed his house and rendered it uninhabitable. This is the second instance reported in Tokyo of the destruction of a house by pugnacious fellows since the Murai cigarette scandal. One of the fraternity of which Saito is the head had previously had an affray with a fireman whom he had severely beaten and the assault on Saito's house was taken in revenge. The disturbance twelve ruffians supposed to have taken a prominent part in the outrage.

# NEWS OF THE WEEK.

One hundred deaths occurred in Nagasaki during January. Of these, the bodies of 84 persons were cremated.

Mr. Inouye Kataunosuke has been appointed Envoy Extraordinary and Minister Plenipotentiary to Germany and Belgium, in place in Viscount Aoki, resigned.

In our last monthly Summary of Current Japanese Literature, Mr. Aston was represented as translating the "Koji-ki," instead of the "Nihou-ki"; Mr. B. H. Chamberlain is the translator of the former work.

Among recent appointments made by Preaident McKinley we find the following:—Her-bert G. Squires, New York, to be Secretary of Legation at Peking; James W. Ragedale, Cali-fornia, to be Consul at Tientsin.

The Kobe Cycling Association has started on a new lease of life. The funds in hand amount to \$32 54. Mr. King has been elected Captain, with Mr. Wheeler, Secretary, and Messre. Woolfall, Mancini, and Clarke as Committee.

The Cam, an English steamer from New York with a cargo of kerosene oil, arrived in port at Yokohama on Wednesday morning. She had rether a nasty experience the previous night, grounding on the Spit at Futsu, down the bay. With assistance from Yokohama the fore part of the ship was lightened and she got off at high water next morning.

A lighter containing fifty-five bales of American cotton belonging to the China and Japan Trading Company was stolen on the 4th inst, at Kobe. Detectives put off in a launch and the thieves were overtaken at Wada. They at first hid themselves among the cotton, but changed their resolve and rowed towards shore: They succeeded in getting away from the lighter, but one of them was arrested during the night.

The Hongkong branch of the Navy League have sent a chart to the head office of what they consider should be the extended boundaries of Hongkong. The msp was made by the Public Works Department. The acquisitions suggest-ed by the Navy League include the whole of the numerous islets near Hongkong and the strip of mainland cut off by a line drawn from the rivermouth north of Starling Inlet to Tyshan Bay.

A Kobe contemporary says that "the President of the Doshishs recently petitioned for this wellknown School to be granted the privilege, common to the private schools that are graded with the Middle Public Schools, of a postponement of the call for military duties in favour of the students until they reach the age of 20 years. The petition has been rejected because in the Trust Deed of the Doshisha it is laid down that the moral teaching of the School is based upon the principles of Christianity."

The fate of an unfortunate woman named Amy Hall has been affording some sensation at Shaughai. Her body was found by the French police in the water off Kiniceynen Wharl. It was stated at the inquest that Stephen Hart, who is well known in Yokohama, first as an amateur journalist, next as a pseudo-artillery officer, and next as a prisoner at Port Arthur during the China war, had been living with the deceased. When called, he could throw no light on the affair, and a verdict of suicide by drowning was

In the Official Gasette tenders are invited by the University Gasette tenders are invited by the Branch at Ujina of the Unyubu (Transport Dept.) of the War Office for 30 miles of 9lb. Rails and 180 Trucks with all the necessary fittings, to be delivered at any place within the City of Kobe indicated by the officers in charge. Samples and particulars as to tenders house was taken in revenge. The disturbance and contract are open to inspection at the same was with great difficulty quelled by the arrest of office until the 22nd Feb. Tenders should be submitted before 11 a.m. on the 25th Feb., and they will be immediately opened. Tenders for

Oregon Pine are invited by the branch office at Kobe of the Treasurer's Office of the Railway to be opened at 10 a.m. on the 21st Feb. The Yokoliama Naval Arsenal (Zoheisho) invite tenders for 300 teak-wood legs and 12,500 kilo. of angle, bar and other from which are to be opened on the ztat Feb. at r p.m.

On Friday afternoon a fracas occurren between the police and a party of med belonging to the U.S. flagship Olympia, outside No. 80, Settlement. The police had warrants for the arrest of certain leave-breakers from the Olympia, and tackled the tars, who made a stout fight for their liberty. Reinforcements of police soon arrived on the scene, however, and with the assistance of a crowd of finrikisha men and others, the blue-jackets were overpowered and five of them dragged off to the Police Station.

At about half past twelve on Monday afternoon Mr. Morgin, Superintendent of the Yokohama Fire Brigade, was notified by a messenger from the Club Concordia that smoke was issuing from beneath the fireplace in one of the rooms of the Club. Mr. Morgin sent a couple of firemen to see what was wrong, when it was found that the woodwork beneath the stone slab of the fireplace in the Library was on fire. The stone and fire grate being removed the smouldering woodwork was easily extinguished without any further damage being done. Had the accident occurred at night, however, it is prohable that the results would have been serious.

Owing to the anarchy that prevails in Nagaaski harbour, remarks the local Press, captains and pilots berth vessels where they please, with out regard to the public convenience. At the present time, and for many days past, we oil-ships from Philadelphia have been seriously impeding the business of the harbour. When the wind blows from the East or from the West they block almost the whole of the fairway. As these vessels are likely to stay for several weeks longer, one, at least, of them ought to be moved to a more suitable berth. If they both remain where they are, we are likely before long to hear of a collision in the Harbour.

A fisherman, named Miyasaki Yasutaro, aged 34, a native of Nushima, Mihara district, Awajii Island, who was condemned to death on the 25th November last, in the Kohe Chiho Saihanalso, on a charge of having murdered four men and women and injured three other inhabitants of the village, was executed on the morning of the 4th inst. in the prison on the Minatogawa bank. There were present Procurator Fakuda, Secretary Yamaoka, of the Kobe Chiho Saiban-sho, Mr. Nishimura, the Governor of Hyogo prefectural prison, a prison chaplain and doctor, and about 50 prison warders were on guard. After the Governor of the prison had read the order for the execution, the prisoner was placed on the scaffold, when he made a few remarks scknowledging his guilt, but affirming that he was neither a robber nor a beggar, and his act therefore was not a mean and contemptible one The tragedy, the Kobe Chronicle adds, arose out of a love affair.

A familiar figure to the residents of Kobe will be seen no more among us-Mr. John Merrison died at 3 o'clock on Wednesday morning, a'ter an illness that confined him to his bed for about three weeks past. Mr. Morrison was sixty years of age, and had spent a long period of his life in the Far East. He came out first, we be-lieve, from the head-office in London to take charge of the Hongkong and Shanghai Banking Corporation's branch at Amoy; he was there only a short time, however, ere he was transferred to Saigon. His third move quickly followed, and it brought him to Kobe in 1877. He remained in the Bank as Agent for about three years, and since then has been in business for himself — Hyogo News.

The members of the Yokohama Literary

principal item on the programme was a lecture by Mr. E. B. Clarke, who has recently returned from England, entitled "Undergraduate life at Cambridge." Mr. Clarke's effort was largely of an anecdotal nature, and was aufficiently bright to render interesting even a subject which has been pretty nearly exhausted by the creator of Verdant Green. A college song tendered by Mr. A. M. Gale came in appropriately, and others who assisted in the programme were Miss Webb, Miss Pratt, Mr. M. M. Ellis (pianoforte), Madame Henckler (song), and Mr. G. H. Denison, who recited an original poem entitled "The Devil's Rock."

The following verses, says the Nagasaki Press, appear in a children's Christmas bock just published. They apply admirably to the singing of the lower orders in Japan:—

"I found a person singing all alone in foreign

parts;
His voice was not melodious, it came in fits and starts;
I asked him what he did it for, and he this answer gave,
I is the custom of my country in this manner

to behave.

And when you go a-harvesting (a sight you musn't miss)
There are fourteen hundred of us and we all shout out like this.'

I thanked him for informing me, I praised him toneful air.

tuneful air, But when they go a-barvesting, they will not find me there,"

The Robe Chronicle reports that about midnight on Tuesday fire was discovered to have broken out in a block of four houses in Sakaimachi Ichome. Two of the houses were occupied by Chinamen, the other two by Mr. R. Bergerand Messrs. Gomes Bros , respectively. The fire originated in one of the houses occupied by Chinamen, the end one apparently, and the flames, having once got to the roof, soon secured hold of the entire black, which burnt like matchwood, despite the efforts of the foreign and Japanese brigades. Fortunately there was not a breath of wind at the time, or the conflagration would certainly have been far more extensive. Mr. Berger managed to save zone of his furniture. We learn that the losses of Measts. Gomes and Mr. Berger are covered by insurance.

A "fish story" that will probably make the members of augling clubs writhe with envy is narrated by the captain of the British steamship Wilderspool, which recently arrived in New York from Java. While the vessel was making her way through a fierce north-easterly gale a wave of enormous proportions broke over the fore part of the steamer, and immediately afterwards a futtering sound was heard. Believing that a sail had been blown adrift, the captain ordered the watch on deck to go forward and ecure the canvas, when it was quickly found that no sail was loose, but floundering on the deck and lashing its tail was a shark eleven feel long, which had been swept on board by the big sea. With some difficulty a rope was make fast about the body of the monster, which was happily despatched.

Under the title of "Musical Reflections of a Chinese Philosopher," Mr. Granville Bantock, in the Musical Standard, makes some very pertinent temaiks on musical matters. Here ere some spacimens :-

" It is a criminal off-nce to indulge in frivolous conversation during the performance of good

"Those who enter noisily during the playing of the music should be delivered up to the 'Street god' (policeman.)"

"A professor of music is one who professes his set; a composer is one who practises it."

"Technical skill dues not always imply good

"Technical skill dues not always imply good musicianship, for the blows of a hammer can make no impression upon the sout."

"Envy and jealousy in every department of music should be carefully avoided. It is refreshing to hear one vocalist speak well of another."

"The musician com-puses; the pupil pro poses; the teacher dis-closes; the fistener re-poses; the critic ex poses; the public dis-poses."

new Korean port, Chenampo, just opened to foreign trade. Chenampo has been selected as the port of Ping-yang, which gained notoriety in the west as the scene of the first great Chinese defeat in the late war. Mr. Willis, who has been travelling through the neighbouring region, de-rived an impression that it is rich in agricultural and mineral resources. Ping-yang, which is a city of some 35,000 inhabitants, is the trading centre, but can only be approached by vessels of lightfidraught, whereas Chenampo, which is 40 miles lower down the river, affords good auchorage for sea-going ships at any state of the tide. The Japanese laid down a light railway between the two places during the war, using Chenampo as a landing place for stores, which were convoyed thence to Ping-yang as a distributing centre. The fact that the Customs have acquired a considerable plot of ground there in anticipation suggests the question who will pay costs? For it is one of the anomalies possible only in the East that the Korean Customs staff, which was organised originally by Sir Robert Hatt while Korea was a Chinese fiel, is still paid by China with a disregard of accomplished facts that is little short of sublime.

In H.B.M.'s Court at Kobe, on the 7th inst. Alfred Winter, a seaman belonging to the steamer Orwell, was brought up before Mr. J. Carey Hall, Consul and Judge, on charges of obstructing the Police in the execution of their duty and assaulting . finribisha man. From the evidence adduced it appeared that on the 31st ult, a little before 7 p.m. the accused and a ship-mate named Matheson entered the police box close to the American batoba in an intoxicated condition and created a disturbance. After some time the two men left the police box, but Matheson returned almost directly and as he again caused trouble, was arrested and while being taken to the station, called out to the accused to come to his assistance. the latter did and a scrimmage ensued between the two seamen and four constables and some finrikisha coolies who came to the assistance of the police. Sticks and stones appear to have been freely used, Matheson received a rather severe cut on the head and two of the constables and a jinrikisha man—who stated that the police called on him for assistance, were less seriously hurt. His Honour found accused guilty, and sentenced him to one month's imprisonment with hard labour for obstructing the police, and a fine of \$3 for the assault on the finridisha man, and costs.

A rather amusing atory of the arrest of a Chinese opinin smuggler is going the rounds. The enterprising Celestial—whom we will call for convenience Chang-arrived at Yokohama on board a large steamer, and managed to get a quantity of opinm through the Custom House. He then proceeded by /inrikisha a to a large business house in the Settlement, where he hoped to make a deal with one of the Chinese employés, whose name may just as well be Wong as any other Chinese monosyllable. Wong, however, was out to tiffin, but another Chinese, who scented a "aqueeze," tried to arrange ferms with the caller. Chang, however, declined a deal, and the other Chinaman, piqued at his refusal, alipped out of the shop, and spoke a few words to the waiting /inrikisha man. The latter nodded intelligently-all was understood. Meanwhile the unconscious Chang, after gathering together his belongings, left the shop and took his seat in the 'rikinka, giving the coolie the name of a hotel in the Chinese quarter. Chang did not know Yokobama well; otherwise he might have suspected that the coolie was not taking him by the most direct route. After a quarter of an hour the finrikisha stopped outside an official-looking building, and despite Chang's remonstrances, the man stepped inside.

"This not my place," said poor Chang. "Oh, yes it is," returned the Japanese.

In a few seconds he returned with a police-The members of the Yokohama Literary Society spents pleasant time last evening at Van Schaick Hall. Mp in Vilkin occurred the Times of the public disposes,"

# CORRESPONDENCE.

#### IMPORTED CEMENT.

TO THE EDITOR OF THE " JAPAN MAIL."

TO THE EDITOR OF THE "JAPAN MAIL."

DEAR SIR,—In your issue of the 4th inst. I noticed a paragraph concerning the import of cement, and as I have just come to Japan (from Europe) on this particular business (my firm controlling the output of the syndicate of the principal centent manufacturers in Belgium), I should esteem it a favour if you would insert in you next issue the following few facts:—

In the first instance, the report that none of the imported brands are as good as the "Alsen" is not quite correct, and is unjust to some of the principal firms in Yokohama and Hyogo, who have been importing other brands. The "Alsen" manufacture is no doubt a first class, artificial cement, which—this having been one of the first on the market—is best known, but I would venture to say, basing myself on personal experience in various parts of the world, that it is in no way superior to any of the principal Belgian, German, or English artificial cement and this has been found by some of the principal authorities on cement in Europe and America. The "Alsen" has undoubtedly the advantage of being dearer than any other make.

In the second place, speaking of the inferior quality of certain Belgian manufactures (Germany and England only make one high standard artificial quantity on firm has supplied a large quantity of first class natural Portland cement, which quality, besides being somewhat cheaper, has in every way the strength and fineness required for the work for which it has been called for, and the best proof one can give is that the Lapanese Government Engineers and a good many proved of it.

Private Railway Engineers have accepted and ap proved of it.

highest percentage of increase per amount; while artificial cements showing strains of 500 and 600 pounds per square inch at 7 days show no ultimate gain, but an actual loss, and a very slight percentage of actual gain.

You see therefore that the above report based on many years experience, approves in every way.

of the decision of the Japanese engineers to adopt the first quality of natural Portland cement, for which the chief producer is Belgium,

ALOYSE LAMM. Yours obediently,

#### JAPAN'S GOLD CURRENCY.

TO THE EDITOR OF THE " JAPAN MAIL.

To the Editor of the "Japan Mall."

Sir,—On October 1st, 1897, this country passeld from the Silver Standard, which had previously revailed here, to an exclusively Gold Standard of value, which is now in operation.

The motives of the Government for this act were not apparent at the time, and are but imperfectly understood even now. Some intelligent people regard it as a basty act, proposed by a Ministry not very strong in economics, and passed after inadequate debate by a Parliament knowing still less of such subjects. Others attribute it to a rather childish desire to imitate Western nations, or to mark Japan's equality of rank with them by adopting the standard they preferred. For the first of these views there may be some casson that for the second there is, I think, none at all, the Japanese

by law certain monetary conditions which already existed in fact, and chose this method of attaining their object. Of its results I will say a word in two later. At present I will deal only with the motives which seem to me to have inspired the act.

motives which seem to me to have inspired the act. This country, as is well known, had of late years made rapid and temarkable progress both in industries and trade, and it was evident to all men that this progress was due very largely to the favouring influence of the continually declining rate of exchange between the Japanese yea and sterling money. The increase in the value of gold which had taken place all over the world during the last twenty five years, and which had shown itself in Western countries in depression of trade and steadily falling prices for silver and for commodities generally, had shown itself here chiefly, and indeed almost solely, in the rates of exchange on those Western countries. It is true that the gold coins which the Mint began to issue in 1822, and the gold bollion in the country, doubled in price during those 25 years, and most of it was and the gold bolloof in the country, denoted in price during those 25 years, and most of it was exported. But other prices remained about the same all the time, such fluctuations as took place in them being due to other than monetary causes. Nevertheless the rise in the value of gold had some in them being due to other than monetary causes. Nevertheless the rise in the value of gold had some notable effects here, though they were of a kind quite different from that which it had produced in Europe or America. In the first place, it led to a great increase in foreign demand for Silk, Tea, Rice, etc., and created new markets for many other products not previously wanted for export. For although the gold prices of these articles gradually declined with the prices of all other things in foreign countries, yet this decline was generally less than the simulaneous fall in the rate of stelling exchange here, so that some margin for profit generally remained on this side. As a consequence a great and lively Export trade was developed, to the advantage of Japanese producers. Every relapse in stelling exchange atimulated demand for products, the cost of which in year remained as before. In this way the exports of Silk and Silk goods mounted from a some of only year \$8,203.111 in 1872, to one of year 71.880,408 in 1897. In other products the gain was even larger, so that the total Exports of 1897 reached year 163.134,077 against year 17.026,647 in 1872. These were splendid tesults for a nation which only one generation back had no export trade at all. Of course there were increasing imports to pay for these exports, among which the precious metals made a considerable figure from time to time.

But the same tide of exchange that favored Exports was generally adverse to Imports. For

made a considerable figure from time to time.

But the same tide of exchange that favored Exports was generally adverse to Imports. For though, as the country grew wealthy, demand for foreign articles increased, yet the cost of these articles in Japanese money was often inconveniently high. Out of this condition of things arose the apportunity to establish in Japan manufactories of cottons and of other things previously imported, and of that opportunity the alert Japanese promptly availed themselves. In 1875 there was but one Cotton Mill in Japan. In 1896 there were some 60 Cotton Mills with a productive power which allowed of large exportations of Yarna and goods to China and elsewhere, and the average dividend of these Mills was about 15 per cent for the year. At the same time paper mills, chemical works, match factories, breweries, etc., etc., sprang up all ever the country, yielding handsome profits; and now at Nagasaki steel steamers of 6,000 tons are being built by Japanese shipwights.

tons are being built by Japanese shipweights.

Now any Statesman nating all this prosperity would naturally deshe to perpetuate it it possible. And if he also saw, as he could not fail to see, that its real foundation lay in the fact that the Japanese ren had become worth only two shillings in stelling money, he would just as surely desire to render that rate of exchange also permanent, especially if he saw any eason to apprehend such a rise in the Gold price of Silver in Western countries as would raise the exchange here. This then, in my judgment, was one consideration that led to the change of standard in 1897. It was then believed, at least in Tokyo, that silver at 28 pence per onice had touched bottom and was more likely to rise than to fall farther. The time had come, therefore, when something had to be these views there may be some ceason that lar the second there is, I think, none at all, the Japanese heing fas too sensible and showed to imperi their material interests from such pality motives.

As a matter of fact I find that the change of standard has, as yet, had un great effect upon the affairs of this country. The paper yet continues as the each ange of standard has, as yet, had un great effect upon the affairs of this country. The paper yet continues as the electron of the affairs of this country. The paper yet continues as then believed, at least in Tokyo, that sitver at Sta,—The letter of E.S.P. in the Weekly Mail of East that they are now redeemable only in Gold, instead of as before only in Siver, seems to be unleaded, instantion as the relative values of Gold and Silver builton are about the same as before. All that has happened seems to be that the Silver yet has been demonstrated, and a Gold yet of the same value rules in its place, while business and contracts are scarcely affected by the change.

What the Government did has year was virtually to declare that the ratio of year was virtually to declare that the ratio of year was virtually to declare that the ratio of year was virtually to declare that the ratio of year was virtually to declare that the ratio of year of between the paper year was virtually to declare that the ratio of year was virtually to declare that the ratio of year of between the paper year was virtually to declare that the ratio of year of the virtual to the paper will be unless and contracts are scarcely affected by the change.

What the Government did has year was virtually to declare that the ratio of year of the virtual paper will be unless and contracts are scarcely affected by the change.

What the Government did has year was virtually to declare that the ratio of year was virtually to declare that the ratio of year of year of the value of the year was virtually to declare that the ratio of year was virtually after October 1st, become a fixed legal ratio, and the peop

in the other. Nor could the change of standard seriously de ange general husiness, since the mar-ket value of the new yen would be about the same as that of the old.

A second consideration no doubt was that Japan, in her new career of industrial enterprise, might need aid from foreign capital. But capital was repelled by continual fluctuations in the rate of exchange. To fix the rate might attract capital when it came to be required. A third consideration was in the situation of the Government itself. A Parliament having been invested with control over the Budget, the national expenditure for ionicads and other needed things only obtainable abroad was subject to its security; and since such outlays had to be estimated a year or more in advance, it was desirable that uncalculable fluctuation in exchange should be eliminated from the Budget. This also could best be done by fixing the rate of exchange. Further, the Government last year appears to have contemplated borrowing money from foreign sources, to meet the increased A second consideration no doubt was that Japan money from foreign sources, to meet the increased outlays on armaments which had become necessary after the war with China, and by reason even of its brilliant success in that war. To effect these loans a fixed rate of exchange was indispensable.

loans a fixed rate of exchange was indispensable. These, and no other, were, in my opinion, the motives which induced the establishment of the Gold Standard in Japan. Holding certain definite objects in view, her statesmen declined to explore the intricacies of monetary science, or to attempt any solution of the peoplexities of other people in regard to the Gold or Silver questions; but, recognizing certain conditions here existing, proceeded to deal with them in a practical way to the apparent advantage of their country.

As to the wisdom of their determination I offer no opinion. It is certain that Japan could have obtained any foreign capital she required without making any alteration in her own money. But

making any alteration in her own money. But whether the other aims referred to could have been attained in any other or better way, is very

nitriol.
The effects of the change made have not been once so innocuous as was anticipated. The fall quite so innocuous as was anticipated. The fall of silver in London did not stop at 28 pence, Japan's own action depressed it to a still lower price, with the result that a good many silver year have returned here from China and elsewhere for redemption in gold, which thereupon stole away, The Cotton Mills and other producers have also found the exchange rates in China turning against them, to the detriment of their sales and profits, while foreign capital still shows some shyness about investments in a country where changes of about investments in a country were changes of currency seem so easy. On the whole, however, the two shilling yen has not, as yet, done any great barm in Japan, and it, after all, silver should by and by rise in its gold price, her young in-dustries will find themselves rather cleverly protected against losses from that cause, while all obligations to fineign countries are now exactly

obligations to foreign countries are now exactly calculable at any time in Japanese money.

But it strikes me that those who regard the establishment of the gold standard in Japanese as in value as a special attribute of gold, are very far out in their reckning. For the change of currency made here is founded solely on the ecognized fact that gold has doubled in value all over the world since the opening of the Japanese Mint in 1872. Japan, for her own advantage, and with what seems to me a wise foresight, has accommodated her affairs to this fact, and prepared herself against any possible reversal of it. But it would be hard to find any intelligent person here to deny the fact. On a quest of the Britt would be used to find any time fligent person bere to deny the fact. On a quest of that sort one must go to England or America, where even statesmen who decline to admit it appear still to flourish.

T.W.

Kobe, January 30-b, 1897.

the disease and the remedy, the Gospel being necessary for all alike. Accordingly, many mis-sionaries take pains to inform their hearers that merely to bear the Christian name is not enough nation. Of this truth, the condition of society in so-called Christian countries is an illustration too apposite to be neglected.

appaiste to be neglected.

How, then, is the misconception of the Japanese to be accounted for? Perhaps the following little story may throw some light on the question. A missionary gumarried, living in an interior tawe, engaged as cook an old and simple minded Japanese woman. A year or two later he married, and the old cook remained in the employ of the young couple. She had watched the conduct of her master day but day and may had the same group tunities of day by day and now had the same opportunities of day by day and now had the same opportunities or observing the newly instituted family life. She saw also the other people with whom her master and mistress associated, educated, refined, gentle men and women, walking in the fear of God and in the law of the Lord, blameless. But it came to pass in law of the Ford, blameless. But it came to pass in process of time that the people with whom this old woman lived moved to one of the open ports. Here, in going to the market, she had daily to pass through strests crowded with saloons and pass through streets crowded with saloons and other evil houses, where the drunken carousings of foreign saifors were of constant occurrence. She came to her employers in surrow of mind, and said:—"Are there many people of this kind in your country? I thought all Americans were like you?" The poor old woman had a mistaken impression of America. And she had gotten this impression from the missionaries; that is not to be devied. But had she not here misled, in the hest denied. But had she not been misled, in the best and sweetest manner possible, " by years of noble deeds?"

Occasionally it may happen that a missionary actually misinforms a friend in conversation on this subject. The explanation of such a case this subject. The explanation of such a case is doubtless to be found in the reply of Dr. Johnson to a lady who pointed out an error in his dictionary, and asked:—" What can have led you to make such a mistake?" "Ignorance, Madam, pure ignorance", was his answer. That is the trouble with many missionaries, they are actually ignorant of the vice that prevails in their own

It must have struck the impartial readers of the Fapan Mail that when missionaries undertake to discuss this and similar questions with their critics, they are almost always worsted. Very soon it becomes apparent that their opponents are im-mensely their superiors in knowledge of what is low and vile in the civilization of the West. This low and vite in the civilization of the West. This results most naturally from the difference in their education and manner of life. To take the present instance. What does the writer signing herself E. S. P. say of herself? (1) That in Melbourne she accompanied a young Japanese to an extremely indecent play. (2) That she had often attended such plays. (3) That she "can remember the time when actions are the such as Received and the such as Received as Received and the such as Received as Received as Received as Received as Received as Received and the such as Received a when actresses playing boys' parts, such as Rosa lind in 'As you like it,' and others, and ballet dancers, never wore their skirts even as high as the three, as may be even the same as the as the knee, as may be weified from any old prints of celebrated actiesses and public dansenses of fifty years ago." Notice, please, her statement that she "can remember" this time. It appears, then, that in spite of occasional shame at what she saw, this person has been attending similar indecent this person has been attending similar indecent exhibitions for fifty years. That there were such persons I had heard, but I did not expect one of them to make a public statement of the facts in the columns of a newspaper.

It is no wonder that this writer finds it impossi-

It is no wonder that this wider finds it impossible to sympathize with the work of the missionary. I can assure her that a missionary has led a very different life. Ste herself seems to have surmised as much, for she says:—"In all probability, the missionaries who come to Japan, and express themselves so shocked at the immorability of the Japanesse, have lived in such a religious atmosphere before they came to this country that the inconsistent

indecencies, etc.

Perhaps a sneer cutled the lip of the writer as these words were penned. But they are magnificently true. There are, I am sorry to say people enough in our churches who bear the Christian name unworthity, who have a form of goddiness but are ignorant of the power thereof. But the missionaries of the cross are not born of such lineage, nor are they supported by such constituencies age, nor are they supported by such constituencies. The brains and money required by mission work are furnished by that portion of the thurch to which the Gospel of Christ is a vital, sanctifying, and consecrating power. Missionaries are born of pious parentage, are noutished in godly homes, educated in pure schools and colleges: they read clean books, they indulge in pure ammenteris, and are watched over with fostering care until they are old enough of their own accord to reject the evil old enough of their own accord to reject the evil and choose the good. From this education they in come to foreign lands and live time lives before P Digitized by

friends and foe. Do I say this in the spirit of boasting ? God forbid! I do not forget that in the eyes of Him who looketh on the heart no man is pure, and that what we are we are by the grace of Ond alone. But according to the highest human tests of virtue, the people who come out as missionaries grow up from the credle in an atmosphere of purity, and as mature men and women their lives bear witness to the keeping power of

the Gospel of Jesus Christ.
As for the Japanese who travel in England and America, their case is in somm respects deplorable enough. Unless they are furnished with excep-tional letters of introduction or are directly connectional letters of introduction or are directly connected with the religious bodies, entrance to tinly Christian homes is not readily obtained, and they are left to gather their impressions of Western life from the public places of entertainment. When from the public places of ettertainment. When they do find entrance to what seems to them refined society, they too often fall in with such comeany as did the young Japanese in Melburroe.

To any one desirous of knowing how this mat-

To any one desirous of knowing how this matter of comparative morality looks to a Christian Japanese, I commend the perusal of Mr. Uchimura's books, "How I became a Christian," especially the latter portion. His discussion of the matter seems to me admirable, and I have derived great benefit from his theory of the deepening of both light and shade in Christian lands. In conclusion I wish to say a word on the radical misconception that underlies the article under discussion and all similar criticisms. The writer sealer of the article witer

speaks of "the attempt to improve or alter speaks of "the attempt to improve or alter Japanese morality by the introduction of Christian doctaine or precept." She evidently thinks that this is the object of mission work. This is a fundamental error. We are here to preach the Gospel not to propagate morality. That those who truly accept this Gospel are morally improved thereby, is an incidental advantage that never fails to follow, and at which we rejoice, but it is in no seuse the object of mission work. The case is somewhat parallel to that of foreign merchants. These come to Japan to make money for themselves by honorable traffic. This they do, and an incidental advantage is that the Isoanese and an incidental advantage is that the Japanese are entiched by the process. The foreign mer-chants doubtless take no little satisfaction in the fact that their presence builds up the material pro-sperity of the people among whom they live. But that is in no sense the object of their coming hither.

So it is with us.

The object of the missionaries here is to declare to the Japanese people that there is one God and one Mediator between God and man, the Man thist Jesus. If the Japanese had all the vittees that the most lively imagination could ascribe to them, there would not be one whit less need for this revelation than there is now. To put it in other words, we have been sent here, as Paul was to the Romans and Greek, "To open their eyes, to turn them hom darkness to light and from the power of Salanto God, that they may receive forgiveness of sins and inheritance among them that are sanctified by faith that is in Christ." If this purpose he kept in mind, it will appear at once how unterly intelevant are all comparisons between the national morality of Oriental and Occidental countries.

This error, that missionaries have come to these lands to propagate morality, in surprisingly prevalent. On so mistaken a basis no satisfactory discussion can be reaced. On the other hand, let the religious principles involved be onceunderstood and admitted, and the necessity of missionary work, quite independently of the moral status of the countiy, becomes so evident that a discussion is at once

seen to be superfluous.

I remain, dear sir, yours very truly. ICHABOD, QUILL.

#### JAPAN AS AN AMERICAN MARKET

Mr. W. R. Townsend, who will be vividly re-membered in Yokohama, has given his report to the San Francisco Bureau of Foreign Commerce on the trade relations between California and the Far East. His conclusions may be summed up

Outside of lumber and flour, which must necessarily come from the Pacific coast, and in which two articles the volume of business has which two articles the volume of histness has doubled or trebled this past year, there are comparatively few articles wanted in the Orient in large quantities, which are produced on the Pacific coast mall; if they are they can be supplied from the Eastern States in most cases at less cost.

Eastern States and Europe as chesp or cheaper. California can supply Japan with some of her requirements in leather, mechanical subber, printing paper, provisions, canned fruits, meats and vegetables, wines and, occasionally, when wanted in a lurry, some article of machinery, but in these articles and in lumber and flour she must these articles and in lumber and flour she must share the trade with Portland, Tacoma, and Seattle, who have four competing lines of steamships and consequently cheaper freights. Japan is at present importing largely from America kerosene, cotton and cotton piece goods, wire and wire nails, locomotive, rails; pig, bar and sheet iron; coke, clocks, tobacco and cigarettes, bicycles, electrical and all other kinds of machinery, machines and tools. But what can the Pacific coast supply of these as manufactures or at manufacturer's first selling prices?

Connection among metabants in the Orient is

Competition among merchants in the Orient is now as keen as anywhere, and while the lew American houses in Japan and China would prefer to purchase from America they have until recently been compelled to order 75 per cent, of their goods from England and Germany. I am glad to say, however, that the trade of the United States with however, that the trade of the United States with Japan has taken rapid strides and must have doubled in 1897 over any previous year. The metit of our goods and of our machinery particulary is being recognized and appreciated. The Baldwin works alone supplied too locomotives in 1897, over a million dollars! worth, and the damand for electrical, wood and iron working machinery and machine tools is rapidly on the

increase.

The prices of skilled labour and food products in Japan have probably doubled during the past year, and are still advancing. This is very materially helping the sale of our labour-saving machi-

It is feared by many American manufacturers that the present demand is merely for sample machines, and that great injury will result to our interests as soon as Japan has the facilities for copying and manufacturing our goods and machinery.

There is certainly little or no ecolection under Japan's present laws on patents and trade marks, Japan's present laws on patents and trade marks, but it will be a long time before she has the facilities and ability to successful copy our intricate machinery and machine tools. They already make a few clumsy bicycles, gas and steam engines, electrical and other machinery, but the sale of ours grows rapidly, and this will continue, and, with the growth and development of the whole Orient, America will more than hold her own.

The probable carving up by European Powers of China in the near future and the opening up of that country by railroads, together with the railroad development of Siberia and Korea, will make new and larger markets for our products. There is no proposition before the American manufacturers more worthy their support than the proposed establishment of a permanent exhibition of American products and machinery at Shanghai by the Chinese American Chamber of Commerce.

There are many things about the export business which American manufacturers do not seem

ness which American manufacturers on on seem to understand, and this alone throws much trade to England and Germany.

During the recent hard times in America there was a disposition to foster export business, but now that times are better at home there is a general indifference, and orders are even neglected and often entirely ignored. The volume of business to be done in the Orient in the next ten years is very large, and our manufacturers will do well to foster it now, as they may want it very badly one of

these years.
The English and German manufacturers and their export agents give great attention and go to considerable expense in supplying samples and in arranging codes for same, and go at once into all the particulars necessary to start business without the necessity of a year's correspondence. There are few American manufacturers whose latterheads mention their cable address or the codes used, and, worst of all, a large percentage of them mail their letters with domestic postage only or insufficiently paid postage, causing their correspondents at the other end to pay double rates on the unpaid portion.

Another general complaint is the lack of stability in quotalions. It is to be expected that many articles of produce and manufacture will fluctuate in value, but they all do not, and as export business is always cash against letters of credit, lowest prices should be named at the outset and lower than where the same goods are to be sold on credit In a list of the bonded warehouse charges in at home. Having given a quotation it would be Japan are the names of 193 articles which are in policy to stick to it for a transaction or two, at ported into that country. About twenty-five of least to get business started, but it has been the these are manufactured on the Pacific coast. experience of most merchants in Japan that our Practically every one of these is produced in the proprietable property in the produced in the proprietable produced in the produced in the produced in the produced produced in the produced produced in the produced produced in the produced pro heen made in asking too little and raise rates next

There is no parcels post between America and Japan, although there is a samples post, and if packages are nucked = Merchandise " instead of "Samples" they will never reach their destination. Unfortunately it is very expensive to forward packages by express and steamer, but if the business is worth having it is worth some expense to secure. The European steamship lines, with their cheap package express and the parcels post with

cheen package express and the parcels post with all European countries, are a great convenience and saving. I cecently sent a package to Portland, Oregon, via Tacoma, at a cost of \$8, and a similar package to London, three times as far, with matine insurance included, cost only \$2.

Them are three or four large American houses in Japan, representing possibly every line of American machinery and manufactures, and some of their business is in the line of taking orders by catalogue. Heretofore when they made a sale their profits were good, but they are handicapped their profits were good, but they are handicapped by not having practical men in every line they represent, whereas most of the English and German houses are generally equipped with expets in all lines.

During this part were Account.

During this past year America has sent over many special representatives, which has given the great impetus to our trade already mentioned, and there has been established in Japan one house carrying a large stock of machinery and tools of various kinds, with expert engineers in every line. While this field is now pretty well covered there is still a demand for experts in

various lines.

There is however no room for any brokers-The Japanese merchants are anxious to do direct insiness and thus avoid the profits of the foreign houses, but there are very few among them who understand the melhod or can put up a letter of credit, and only one or two native banks who issue these.

Banks who issue trees.

It must be borne in mind, that there are only 3,000 to 4,000 foreigners in Japan and only 500 or 600 Americans. The European will buy a homemade article every time in preference to anything American.

American.

White Japan has been and will continue to be in the near future America's best Oriental market, there is a much larger field in certain lines in China and Siberia. These are principally machinery, railway and track supplies, building material, provisions, flour and other food products.

The Chinese are about to build thousands of the Chinese are about to build thousands of

The Chinese are about to build thousands of miles of railways, and the Russians who are hurrying forward their trans-Siberian line will also build from Viadivostock through Korea to Chemilpo or some other open-in-winter ports and though Manchuria to Tientsin and Peking, also from Peking 1400 miles or more northwest over the great overland tea route to connect with their Siberian line near Lake Baikal.

It is extremely difficult for foreigners to get a foothold in business in Siberia. They are not welcomed there, all the mercantile houses in Vladivostock being Russian or under Russian council, but Shanghai and Tientsin have enterprining European and American merchants and opening for others.

#### SOUTH EAST DURHAM ELECTION.

Mr. Richardson (Liberal) has been elected member of parliament for South-East Durham in the place of the late Lieut.-General Sir H. M. Havelock Allan (Unionist)

#### THE SOUDAN MUTINEERS.

London, Feb. 8.

#### FRANCE AND THE BRITISH OC-CUPATION OF EGYPT.

M. Hanotaux, Minister of Foreign Affairs, speaking in the Chamber, stated that France would continue to defend the rights of the Sultan and the Powers in Egypt. SERIOUS SITUATION IN UGANDA.

The situation in Uganda is regarded as very grave.

(Received by the Jiji.)

#### CHINA DECIDES TO FALL BACK ON DOMESTIC LOANS.

Peking, February 7.

Seeing that the collision of views between Great Britain and Russia in regard to China's desire to raise a foreign loan is not likely to be easily settled, the Government has decided to fall back on domestic resources and to issue domestic loans of too million taels divided into one million shares of too taels each. Government officials will be obliged to subscribe to the loan.

#### LORD SALISBURY'S POLICY.

London, February 9. Lord Salisbury, speaking in the House of Lords, declared that he is desirous that Kartoum should be restored to Egypt within a few months, and that as to Talien Bay, should England persist in its being opened it will cause considerable embar-rassment to China. In compliance with China's request England has agreed to postpone the question of opening the port until the Eastern Chinese Railway connects with Talien Bay. Russia and Germany have guaranteed to England that should either or both Powers obtain ports from China they will be opened

#### OPENING OF PARLIAMENT.

al once.

London, February 9. Parliament has been opened.

DEATH OF MR. HUGH MATHESON. Mr. Hugh Matheson, of the firm of Messrs. Jardine, Matheson & Co., is dead.

(From the Asahi.)

#### OPENING OF PARLIAMENT.

London, February 9.

The British Parliament has been opened. The Queen's Speech was chiefly occupied with declarations in regard to the questions of Ind a und the proposed Army extension, ference was made to Chinese affaira,

#### GUARANTEED LOAN TO GREECE.

London, February 9. Mr. A. J. Balfour, Chancellor of the Ex-chequer, has stated in the House of Commons that Great Britain, France and Russia have agreed to guarantee a loan on behalf of Greece for paying the indemnity due to Turkey,

(FROM LE COU-ster DE SIZGON.) ANTI-SEMITIC DEMONSTRATIONS IN

FRANCE.

Par's, January 17, Crowds of people assembled in the streets of Paris last night shouting out epithets at Zola, who has been writing on the Dreyfus case, demanding the death of the Jews, and throwing stones into Zola's residence in Rue Bruxelles. Fifteen arrests were made. About thirty patriotic societies have demonstrated in the Place Vendome in honour of General Saussier, who has been replaced as Generalissimo of the French army by General Jamont.

Paris, January 18. Anti-semitic demonstrations have taken place at Paris, Nancy, Clermont, Lyons, Nantes, Bordeaux, eld Maracillon

#### CHESS

mications to be addressed to the Cunse Ecuton.

The Yokohama Chess Club meets at 184, Creek

The Tokyo Chess Club holds its meetings at 3, Uchi-Saiwai-cho Itchome (next to the Tokyo Club).

#### SOLUTION OF PROBLEM No. 355. WHITE. Notes (abridged) by Emil Kemeny in The Ledger, Philadelphia.

(a) P to Q 4 followed by Q R 5 ch or Kt to K II is the usual defense.

3, is the usual detense.

(b) Black could not guard the Pawn, and it would have been better to abandon it at once. Castles should have been played.

(c) Well played. Black cannot answer 8 takes Kt on account of P takes B, followed by B takes E.

Kt.

(d) Necessary, for P to Q 5 was threatening.

(e) A very conservative play. White could have played Kt to Kt 5, which in all probability would have led to a speedy win.

(f) Black should have played Q to B 4 ch, followed by Q takes K P, thus guarding the Kt. The next move enables White to establish a windows by the conservation of the cons

ning attack.

(g) Better, pethaps, was P to K B 4, followed by K to B 3 or K to B 2 and K to K sq should White continue Q to R 6 ch and Q takes P ch. Black evidently overlooked the brilliant reply White had on hand.

(b) He could not capture the Rook on account of O to K to ch followed eventually her P to B 6.

have lost the K.P. but this would have led to an even game. The R to R 5 play was premature.

(k) Q to K 2 could have been played with safety.

The sacrifice of the Rook is unsound and causes defeat.
(1) The decisive stroke, which very likely was

overtooked by Black.

#### A CHASS SPARK.

The appended gem game is well worth exami-nation, and is an excellent example of the late Captain Mackenzie's elegant style. It was played in the Paris tourney, 1878 :-

NOTES.
(a) Lasker gives preference to English over the

(a) Lasker gives preference to English over the Continental usage in defending the gambit.

(b) P takes P is universally recommended instead of the text move. It is doubtful whether the retreat of the hishop in advance of the capture

was ever before attempted in serious play.

(c) B to K Kt 5 looks inviting, but is probably bad. On the other hand, B to Q Kt 5 simply means an exchange of the bishop for Black's queen's knight.

(d) Q to Q 3 seems better here, as White's center pawns are his only compensation for his dennued queen's side and exchanged king's

(c) Queen to king's square would have been equally attacking and also defensive of White's Q B P.

(f) An incomprehensible binnder which costs one more of White's queen side nawos.

(g) White has now arrived at Q 3 in two moves

and minus a pawn.

(h) Black now proceeds to open his king's knight's file on White's castled king.

(i) The situation enables Black to do most any-

thing with impunity.

(j) Of course king cannot take the rook on account of B to R 6 check, followed by Q to Kt 5 winning.

(i) Q to Q 3, followed eventually by R to B 6
(ii) Q to Q 3, followed by Q R to K sq or Q R

The story is told of Winawer that in 1867, to K B sq. according to White's Q to K 2 or Q to then he was quite unknown as a chess player, he R B 2 continuation; was the proper play to the play to the play to the proper play to the play to the proper play to the pl

pete for the Emperor's prize in the great tourney of the year. Conversation ensured as follows:—
R.—'So you are a chess-player?' W.—'Why not?' R.—'Do you know what first-class chessmeans?' W.—'I play chess—that is all I know.'
R.—'Let us have a game to night, and f will give you some idea of how we play chess in Paris.'
W.—'Thank you; I shall be very pleased.' In the evening the men were set up, and Rosenthal removed his Queen's Knight. Winawer said 'You want to give me a Knight? All right; I do not mind.' Rosenthal host two games and then pleaded fatigue as a reason for not playing on level terms. 'However,' he added, 'we shall meet in the tournament.' They did; Winawer won both the tourney games from Rosenthal, and eventually he came out second—one point behind pete for the Emperor's prize in the great tourney eventually he came out second-one point behind Kolisch,

#### CHESS SONG.

By SHERIFF SPENS.

Tune-" Comin' thro' the rye."

Gin a body meet a body, Game at chess to try; Gain a body beat a body
Need a body sigh?
Ilka player has his losses,
Few hac mair than I,
But aye I meet wit smile defeat,
"Nane the waur," I cry.

"Nane the want," I cry.

Gin a body play a body

At the game of chess,

He needna gloom, or fret and fume,

Gin he's in a mess.

Lika player has his losses,

Few hae main than I,

The pieces yet again I set,

"Nane the want," I cry.

Gin a body to a hody Lose his boonie Queen, He's daft to teat on scanty hair, Cursin' foe and freen.

lika player has his losses, Few hae mair than I, But wherefore pine mgame to tines, "Nane the want," I cry.

Gin a body beat a body,
Let the body ken
That you can still defy his skill,
An' fecht ower again.
Ilka player has his fosses,
Mine I'll no deny;
I fecht again, and no in vain,
"What the wann," say I.

(From the Chess Bouquet, by Gittens.) To time signifies to lose.

#### VOROBAMA CHESS CLUB.

VORDHAMA CHESS CLUB.

Only three games were played this week in the Championship Tomney and all were between Messrs. For and Mendelson. The contest between these competitors is now concluded, the result being:—For 2 wins, Mendelson 3. The tatter is thus the first certain candidate for the record round. The match between them was somewhat remarkable from the fact that in each of the five games the second player won, and that play all through proceeded in such a brilliant style and at such a rapid pace that endeavours on the part of onlookers to take down the score for us proved finitless. When Mr. Mendelson plays in the second round, we will try to make arrangements for having a cinematograph in attendance.

In the "Secretary's Handicap" Mr. Pollak has

In the "Secretary's Handicap " Mr. Pollak bas cored the first win.

#### SUMMARY OF NEWS.

By a fire in Hakodate on the 13th inst. 300 houses were reduced to ashes.

CAPTAIN and Miss Münter left Japan on the 15th inst. by the Empress of Japan.

Over 1,100 deaths from plague occurred in Bombay in the week ended 10th February.

CHINA is reported to have granted Great Britain the right to carry the Burman railway into

the Russian gunboat Zabiaka. Neither vessel received serious damage.

THE Russian cruiser Tamboff, (8,640 tons) has left Odissa for Vladivostock with one thousand troops on board.

CHINA has agreed to pay compensation for the kidnapping of a Frenchman in Tonking by Chinese brigands.

THE Interport Football match between Yokohama and Kobe takes place at the latter port on the 26th instant.

A JOINT STOCK glass manufacturing company in Yokohama obtained a license from the Government on the 14th inst.

THE M. M. steamer Sydney is reported to have taken a million yes in gold from Kobe for London on the 4th inst.

THE death of Count Kalsoky, former Austro-Hungarian Minister for Foreign Affairs, etc., was announced on the 15th inst.

A GREAT configgration has occurred in Manila, from which the losses are estimated at \$700,000 insured and \$2,000,000 uninsured.

NAVAL manceuvres by the Japanese Standing Squadron were to take place for a fortnight from the 15th inst. off the port of Shimidzu.

THE City tax has been raised in Tokyo to provide funds for the repair of the roads, which are generally in a wretched condition.

JAPANESE coal has risen enormously in price, and is still rising, owing to large demands from Hongkong, Shanghai, etc., and for naval requirements.

A SPLIT is reported to have occurred among the united steamship companies running from Japan to European ports, owing to which freights have been reduced from 32s, to 22s.

THE P. & O. steamer Bornes ran aground on the Saratoga Spit, coming up to Yokohama on the 14th inst., but got off with assistance from other vessels the following day.

THE present compound of the Kobe Customs is to be greatly enlarged, and a bill asking for a vote of yen 168,000 for the purpose will be submitted to the Diet next session.

THE number of law suits brought by Japanese against foreigners in the various Consulates at Yokohama through the Kanagawa Prefectural Office during last year was 54.

MISS ELSIE ADAIR, with her husband, Mr. Van-derlip, and Prof. Hoffman gave a successful variety entertainment at the Public Hall, Yokohama, on Wednesday evening last.

THE British battleship Victorious, which recently left England for the China station, ran aground at Suez on the 13th inst. and had to discharge her coal and possibly her guns, to get off.

THE Yokohama Bazaar and the Kyowa Club in connection with it, started by the Japanese Trade Guilds of Yokohama, were opened on the 15th inst. in the building beside the Cricket

It is proposed by the Nilgata Prefectural Assembly to construct a harbour at a cost of yen 14,000,000, but they have no idea as to where they are to get the money. A foreign loan s proposed.

on the 13th inst. The Bank is to manage the finances of the Korean Treasury, which has deposited yen 100,000 with it.

YOSHIMURA HARUO, an official of the Tsu branch of the Mitsui Bank, who absconded with yen 19,000 belonging to the bank, has been arrested at Osaka and sent to the preliminary Court for examination.

A TERRIBLE explosion is said to have occurred on the U.S. man-of-war Maine in Havannah harbour on the 15th instant by which the ship was completely wrecked and 200 of her crew are reported to be missing.

TROUBLE has arisen between the United States and Spain over a letter written by Senor Delome, Spanish Minister m Washington, in which he described Mr. McKinley as a "low class politician, who caters to the rabble." Senor Delome's resignation has been accepted.

On the 12th inst, a train composed of three passenger cars and two luggage vans, from Choshi Station, ran off the rails between Asahi and Yokkaichi Stations. Five passengers were more or less injured. It was afterwards found that the screw of the points had been purposely taken away by some person.

THE President of the Nippon Yosen Kalsha has commenced an action in the Tokyo Local Court against the Hokuyetsu Steamship Company for \$80,000 as compensation for the damage sustained by the N.Y.K. steamer Kinshiu Mark through collision on the 12th of December last with the Hokuyetsu Steamship Company's steamer Hokushin Maru, in the vicinity of Uraga, Sagami Province.

THE round-the world cyclists, Messrs. Fraser. Lowe and Lunn, arrived in Yokohama on Tnesday evening, being met at Totsuka by a party of wheelmen from Yokohama. On Wednesday afternoon they rode to Tokyo, a small contingent of Tokyo cyclists meeting them and escorting them to the Club and Imperial Hotel. On the way to Tokyo Mr. Lunn met with an accident resulting in a gash on the knee and a est hand.

THE Import market, in spite of continued complaints of tightness of money and high rates of interest, shows a healthier tone than it has done for a long time past, so far as cottons are concerned, grey shirtings having been largely dealt in, while yarns also have shared in the improve-ment in the market. Metals generally remain very inactive, bar iron being the only line in which any considerable business has been transacted. There has been a slump in the kerosene market, attributable, it is said, to large arrivals and the low price of the Sumatra oil now obtain-Prices both for American and Russian have dropped to the lowest summer quotations, and even at these rates it is hard in do busi-ness. Sales of brown augur about keep pace with arrivals, which have been almost entirely from Manila. Little has been done in white refined. In exports, silk is the only staple in refined. In exports, silk is the only staple in which any large business has been done. At the beginning of the week the market was quite excited and large settlements were made if rising prices. This quieted down, however, after a day or two suit since then there has been a fair, steady business done. The export of raw silk from Yokohama from 1st July mend of January last amounted to 45,113 bales—27,541 to Europe and 17,572 to America. Nothing if doing in tea. and there is no change Nothing # doing in tes, and there is no change A COLLISION occurred in Naganaki harbour on Tex Russo-Korean Bank, with a capital of copper, dc., the demand for which is firm, the 8th inst. between the steamer Kitseng and 1500,000, is reported to have opened in Soul with high churisiness doing.

UNIVERSITY OF ILLINOIS AT

#### SPIRIT OF THE VERNACULAR PRESS.

The 15th of March is the day fixed for the general election. Already the various political parties have taken the field, and in every constituency candidates are canvassing. But what does the public know about the platforms of the different parties? Who can tell which party is for increased taxation; which for reduced ex-penditures; which for cutting down the scheme of army expansion? Strange to say, not one of the parties has thought it necessary to submit to the electors a plain and distinct exposition of its political views. It appears to be thought sufficient that a man should call himself a "Progressist," or a "Liberal," or a "National Unionist," or what not. But, so far m the purposes of practical politics are concerned, the people do not know what is meant by a Pro-gressist or a Liberal. They have no clear idea of the distinction between the views of persons calling themselves by such names. On the other hand, the issues that the country has to consider are very plain and very important. If the present scale of public expenditure be continued, the taxes must be increased. Are the expenditures to be reduced? If so, in what direction? Some persons are understood to be opposed to the development of the military forces on the lines of the scheme adopted by the Diet in the sension of 1896 7. But to cut down the proposed establishment by two or three Divisions would afford very little relief to the finances, and certainly would not remove more than a fraction of the deficit that has to be met. Some other economies have to be effected, if economy is to be the order of the day.
What are those economies? If, again, the scale of expenditure is to remain as it is while the burden of taxation is not altered, whence can the necessary funds be obtained? In default of the natural remedy, additional imposts, some other source of income must be found? What is it? Further, there was vague condemnation of the late Government's foreign policy. What other lines would the political parties have statesmen follow? All these are plain questions inviting explicit answers. Constitutional institutions become a mere farce if the representatives of the people confine themselves to a purely destructive and negative sôle. Upon them, not less than upon the Ministers of the Crown, devolves the responsibility of mapping out the country's course and forming public opinion. It will not do for them merely to stand forth as opponents of the Cabinet, or followers of this leader or of that. They have to declare their opinions; to indicate the routes that they desire to see adopted. Otherwise they sink to the level of mere obstructionists or blind partizans. Unfortunately they have not recognised that plain fact. On the eve of the general elections they maintain absolute silence with regard to the great problems of the time, and leave the constituencies either to form bewildered guesses as to their opinions or to be blindly guided by their party appellations. That is a poor part to play in the drama of constitutional government. Such are the views of the Nichi Nichi

The Yi/i Shimpo is strongly in favour of granting to China an extension of the period originally fixed for the payment of the Indem-The Peking Government is naturally anxious to pay off the remainder of the Indem-nity by May next, because, by so doing, it would save all the interest hitherto disbursed, and would, moreover, obtain immediate re-possession of Wei-hai-wei. Even supposing that the whole sum is not paid off in May, the regular installments have to be handed over during the year, namely, 1712 millions of taels in May and 31 millions in November. Thus China sees herself obliged to borrow money, and the borrowing threatens to cost her dear. There are plenty of would be lenders. Russia is only too willing to supply the required amount, but her rather than an attitude of hostility, and he Russia attaches to the accommodation conditions destined to prove far more expensive to should be quite clear about its own policy tions destined to prove far more expensive to should be quite clear about its own policy. China than any disadvantages resulting from before entering into an alliance with any foreign denty became ubiquitous. It is beyond questionable to prove the control of the co

failure to discharge her whole debt to Japan at once. England is also ready to furnish the money, but, though her conditions are much less onerous and objectionable than those formulated by Russia, to accept her offer would place the Chinese Government in an embarass ing situation vis-d vis the Great Northern Power. Under the circumstances, China would fain have had equal recourse to each of the selfproposed creditors, but neither of them saw its account in that arrangement. The result is that China finds herself terribly perplexed, and knows not which way to turu. Is it not Japan's duty, and would it not be for her interest, to step into the breach by granting to China an extension of the period originally fixed for the payment of the Indemnity? It is enough for Japan that she shall receive the interest regularly up to 1902, when, according to the Shimonoseki arrangement, the last installment falls due. She has in Wei-hai-wei an excellent security for the ultimate payment, and she can easily make financial arrangements to meet the altered pro-gramme. On the other hand, the relief that such a course would afford to China can not be doubted. Of course the Peking Government wants money for many purposes—for the development of the country's resources and for the rehabilitation of its armaments. But its pressing reason for seeking a loan was to pay off the Indemnity, and if that pressure were removed, the difficulties of the situation would be immensely lightened. Japan does not desire to see China crushed or partitioned. She does not wish to see her neighbour tied up by engagements conceived expressly for the purpose of furnishing pretexts for foreign aggressions hereafter. Now is the time to come to China's assistance in a practical and substantial manner.

A writer in the Mainichi Shimbun discusses the true foreign policy of the country. It will be surmised at once that any one obtaining access to the editorial columns of that journal is opposed to the army-increment programme. The writer in question is very emphatic on that point. He considers that Japan has no need of a strong military force. She undoubtedly wants a powerful navy, but even though she contemplated a policy of armed aggression on the Asiatic Continent, the force that some of her statesmen think of organizing is excessive. Its dimensions are beyond her financial capacities, and the effort of maintaining it would cripple her before she even took the field. Her true policy should be one of defence on the north and commercial expansion in a southerly and commercial expansion in a somberly direction, Formosa being her chief basis of operations for the latter purpose. One would imagine from the excitement into which people have recently been thrown that the aggressive tendencies of Europe against the Orient had only just been discovered. But they have been operative for the past century. The sole difference is that they seem to have now developed a specially active phase. European aggression, however, must be recognised as a perpetual factor in Oriental politics, a factor to be constantly reckoned with in shaping an Eastern State's procedure. It is easy to talk of preserving the balance of power, but immensely difficult to determine whether the scale swings evenly, or whether it is tilted in either direction. The statesmen of a country must choose their general course and pursue it with the least possible deviation. Since the Liao-tung affair, Russia has been regarded as an enemy by the Japanese nation. But she was not so regarded On the contrary, she took infinite previously. pains to cultivate Japanese amity, and she succeeded to a great extent. There is no apparent reason why she should be counted a foe. At all events, if opposed by Japan she can strike at her opponent's head, whereas Japan could only hope to wound her foot. An alliance to check her might be very advantageous; the writer in the Mainichi does not under-estimate its value. But he evidently advocates an understanding with

State. The article is vaguely worded, but we interpret it to mean that Japan's direction of natural expansion is likely to bring her into collision with England rather than with Mussia, and that it would be better for her to agree with the latter Power than to defy it by joining hands . . with the former.

The Nippon has two articles in which it discusses the policy of the Occident towards the Orient. The trident of Neptune, it says, is the sceptre of the world's sovereign, and England has held it for many a year. Other Powers may be great on shore, but England rules at sea. Gradually, however, means of communications have been so much improved that old-time conditions are greatly altered. It is now less difficult to cross the Atlantic than it was formerly to get from one country to another in Europe. Pari passu with this development of communications, the aggressive appetite of the West has expanded. In other days, only two or three nations turned their eyes in far-distwo or three names turned their eyes marchi-tant fields, and among these England was pre-aminent. She carried her flag everywhere and obtained possession of nearly all the places favourable for colonization, thus enormously growing in wealth and influence. But now her example finds many imitators, the latest of whom is the Emperor of Germany. Weary of supporting in Europe a military burden which taxes his country's strength severely without adding anything III its resources, his Majesty has turned his glance abroad and conceived the idea of founding another empire in China, Russia and France have similar ambitions, but it was reserved for Germany to strike the most decisive compet the comp of a pirate." There is, indeed, such a thing as international law. European nations observe its provisions in dealing with one another. But they interpret it in a wholly different manner when dealing with the Orient. The distinction has become more marked than ever of recent years. Civilization may have progressed, but the spirit of equity has certainly become less effective. In former years commerce led the way and armed force followed after to support its claims if necessary. But now, as shown by Germany at Kino-chou, force leads the way and trade follows in its footsteps. No student of the times can read their main lesson wrongly. Europe's attention used to be concentrated on the regions in the east of the Mediterranean. It has now been transferred to Eastern Asia, Africa, South America, and Australasia have been exploited one after the other, and all their choice localities appropriated. There remains only the Far East. There European aggression finds a wide arena. The vital question is, what are the limits of the Far East for the purposes of this aggressive programme? Is Japan in-cluded within them? About China and Korea there can be no doubt. Their integrity is not to be respected; they are evidently to be treated like Africa and the Australasian islands. But Japan-does Europe regard her also as lying within the sphere of exploitation?

The Shegyo Shimpo goes straight to the root of things. It declares that the peace of the East depends upon Japan. England may be said to control Russia; Russia to control England, but Japan, in a certain sense, controls them both. The two great rivals in the East them both. The two great rivals in the East are England and Russia. The latter is incomparably powerful on land; the former rules the ocean. Even with France for ally Russia hesitates to strike at England, but England, on her ocean. eide, is equally desirous to avoid a collision with Russis. In fact, it may be said that both Sinten are honestly auxious for peace and genuinely averse to defying each other to combat. But circumstances are inexorably forcing them late the lists and their ultimate collision is almost inevitable. The two nations are profoundly sensible of the fact. When Germany seized Kino-chou, England showed little excitement. Germany's potentialities in the Orient did not disturb her. But when Russia utilized

tion that if either of these giants were convinced of his inability to meet the other in combat, the preservation of peace would be guaranteed. It rests with Japan to establish that preponderance. The balance of power is in her hands. In a very few years, she will be able to send to sea a fleet of over eighty ships with a displacement of a quarter of a million tons, and to put in the field an army of half a million men. Her alliance would give complete control of the situation to either England or Russia, which-ever she joined. There is no misconcep-tion about that in Europe. In December the London Times discussed the advisability of such an alliance, and the St. Petersburg Novesti was equally emphatic as to the advantage of an understanding between Russia and Japan. This empire may not yet have qualified to rank among the Great Powers. It has still a considerable interval to travel-before it reaches that goal. But it has acquired for itself a position in the East of which it may well be proud. It stands between England and Russia. To whichever of the two it holds out its hand, on that aide the preponderance is established. Such an assertion may seem vainglorious, but its truth, the Shegye thinks, cannot be questioned.

The Pomiuri Shimbun writes enthusiastically about the prospects of Japanese emigration to Peru. An agreement has been concluded by which the Morioka company undertakes to furnish thirty thousand Japanese labourers for agricultural and mining purposes in that country, and as the *Pomiuri* has frequently inslated that South America possesses all the qualifica-tions to be a principal field for Japanese enterprise, it naturally lends the support of its voice to this scheme. The failure of the emigration project in Brazil may perhaps have the effect of making some Japanese look coldly upon the Peru vian undertaking, and others may recall the scizure of illegally procured labourers for Petu, several years ago, in a Japanese port, as well as the recent failure of Peruvian silver mines. all these things are referable to considerations which do not affect the present enterprise. Pelu has shown herself most anxious to obtain Japaness immigrants, and is evidently willing to welcome them, not in the capacity of labourers only, but also in that of citizens. There are immense opportunities for development in the country, which, despite its rich resources, has a population of only four persons to the square mile. If this emigration scheme is successfuland there is no reason to doubt that it will he-it ought to prove the gate for a wave of Japanese enterprise into South America. question is not one of the emigrants' advantage alone. A prospect of Japanese tradal develop-ment unfolds itself also. For thirty thousand Japanese necessarily means a considerable demand for Japanese products, and means also the gradual introduction of Japanese manufactures into Peru, where they will become known with a rapidity that would not have been possible under other circumstances. Already the textile fabrics of this country find a market in South America vid Hongkong, and it may be reasonably hoped that a direct route thither will now be opened for them. The Fomiuri devotes two articles to this subject, but it appears to us that a very brief epitoms will suffice for our readers, as the vernacular journal's chief object in writing is to render the enterprise popular among its nationals.

#### BANKING IN JAPAN.

The Hochi gives an interesting review of banking business in Japan during the past year. Last year, the spirit of reckless speculation awakened by the late war with China having gradually died away, a natural reaction en-sued. The anxiety entertained as to the proposed alteration in the Coinage System and the commercial panic by which Osaka was disturbed had also the effect of holding the banks in constant apprehension. Tightening of the money market was the inevitable result, and daily interest of over 3 sen became an or-dinary rate for loans. That the banks were balance of \$2,000,000 uninsured.

thus enabled to realize abnormal profits towards the end of the year was by no means surpris-ing. It may interest readers to peruse a comparative table showing the results of the various banks' transactions :-

#### GREAT FIRE IN MANILA.

A private telegram of the 7th received in Shanghai from Manila, reports the occurrence there of a conflagration in which nearly the whole of Rosario Street was involved. sured losses were estimated at \$700,000, with a

#### MARQUIS ITO AND THE LIBERALS.

On the night of the 6th instant, Marquis Ito entertained Count Itagaki and some members of the Lower House belonging to the Liberal Party. During the evening he delivered an address in which, after stating that the constitution of Japan differs from those of the various nations of Europe, and so ought not to be formulated on the basis of religion, but upon the absolute recognition of the Emperor, he proceeded thus: -As I have no other motive than to promote the national interests, I shall not hesitate to part company with the Liberals whenever I find in them procedure prejudicial to the interests of the State. The question of the reduction of the land tax, for instance, was some time ago approved by the Liberals, but in no way can it be carried into practice III present. There is much talk about party Cabinets, but the importance of obtaining ample assistance from political parties outside the Government is by no means to be lightly considered. The success which the present Cabinet had attained in securing the sympathy and co-operation of the Liberal party is a matter for sincere congratulation. Let us endeavour to promote, with one heart and combined effort, the grand policy of national prosperity." The Marquisthen proceeded to comment upon the impropriety of introducing alterations in the Law of Election, and spoke strongly against the action of the last Cabinet

The Premier's address, remarks the Yorssu, touches no suggestive points. Yet the Liberale appear to have imagined, merely from their self-conceit, that they have completely succeed-ed in gaining the heart of the Premier. Their folly in delightedly making blind submission to the Marquia is really pitiable. The Yorosu could not be expected to write otherwise.

#### OPENING OF YOKOHAMA BAZAAR.

The formal opening of the Yokohama Bazaar in the Public Gardens, and the Kyowa Club in connection with it, took place on Tuesday afternoon. The premises were gaily decorated with bunting outside and inside. There was a display of day fireworks and the Yokohama Band played a selection of music in one of the upper rooms. The opening ceremony was performed in a large hall on the upper floor, which was supplied with plenty of chairs. There was large attendance of members of the Yokohama Trade Guilds, the Kyowa Club and of invited guests, among whom were Mr. Otani Kahei, many of the leading business men, the chief officials of the Kanagawa Prefectural Office etc. An entertainment by story tellers lasted nearly two hours and afforded much amusement to those present. Then Mr. Yamagata, chief of the committee of the Association, read a congratulatory address and was followed by Messra. Tanikawa and Shibata. Afterwards Mr. Rinoye, Chief Secretary of the Kanagawa Prefectural Office, Mr. Umeda, and Mr. Otani Kahai delivered addresses, encouraging the exhibitors to present goods of excellent workmanship only for exhibition and hoping for the future success of the Bazsar. In conclusion, Mr. Suzuki, chief official of the Sample Museum of the Department of Agriculture and Commerce, delivered an address. Refreshments were then liberally served, including plenty of beer and wine. Shortly after six o'clock, the proceedings concluded with three loud cheers for the Emperor, Empress, Crown Prince, Yokohama Bazaar, and the Kyowa Club. The exhibits, in the Bazzar are to be sold at marked prices; all the articles are of excellent workmanship. The Bazzar has been established by the members of the Yakohama Trade Guilds with the assistance of the leading Japanese business men of the

The death has just occurred at Bradford, England, of the Rev. Joshua Northup, said to be the oldest Methodist preacher in the kingdem. He was born on March 19th, 1799, and preached from 1820 up till last July.

#### FAR-EASTERN SITUATION.

It may be inferred, we think, from the telegrams published this morning, that the Chinese Government has asked Japan to defer the payment of the Indemnity. The amount of principal still due by China is 83½ million taels. She has paid 116½ millions. By the 8th of May next has to hand over one sixth of too million taels, together with six months interest on the same, making a total of 17% millions. On November 8th, she has to make another payment of 34 millions on account of interest. It does not appear that she has yet made any provision to meet these liabilities. Of course there is plenty of time. If she chooses to place herself in the hands of either England or Russia, she can obtain funds in as many days as she has still months at her disposal. But the fact that she has asked for a delay seems to imply that she is unwilling to have recourse to Western capitalists if she can possibly avoid doing so. We presume that she has asked not only for a postponement of the May payment, but also for some grace as to the date for optionally discharging her whole remaining indebtedness in one sum. According to the Shimonoseki Treaty, she is entitled to a remission of all the interest hitherto paid by her if she acquits herself entirely by May 8th of the current year. Her payments of interest up to the present aggregate 105 million taels, and it follows that if she possessed funds to put up the remainder of the Indemnity in a lump sum on or before May 8th, she need only pay 73 million taels—.ie 83 less 105—, whereas if she continues 105-, the system of annual installments, she will have to pay, by May 8th, 1902, a total of 93% millions—i.e. 83% millions of principal and 10% millions of interest. It would, of course, be very convenient for her to obtain a postponement, but Japan has not sufficient inducement to make any such concession. There are some publicists in this country who have long been in favour of showing leniency towards China, and their advice has certainly become more popular since a clearer per-ception has been obtained of the "con-sideration" that the Middle Kingdom's European creditors are disposed to exact. But the practical question is, what can Japan gain by postponing the satisfaction of her monetary claim. Is she also inclined to join the game of crushing China with obligations? That may be the idea of the publicists who recommend a modification of the terms of payment, but Japan is scarcely in a position to seek from her neighbour concessions of the kind formulated by Russia or Germany, and we can not think that even the most romantic politician would advise her to forego a tangible pecuniary advantage for the sake of establishing a claim upon such a shadowy quantity as Chinese gratitude. In the face of recent and contemporary events he would be a rash man who should venture to estimate China's capacity to implement any promise two or three years hence. Japan wants money and she had better hold her debtor to his engagements. As English-

is likely to be promoted by an obdurate attitude on Japan's part.

The portion of Mr. Balfour's Manchester speech that refers to the Far-Eastern Question runs as follows:—

Eastern Question runs as follows:

In India, as I have just told you, we are responsible for the good government of vast populations subject to our sway. No such responsibility, I am glad to think, is laid upon us in China. What, then, is the character of our interests in that country? Our interests in China are not territorial, they are commercial. I have no revelations to make to you to-night of a policy with regard to China, no startling revelations; but I can indicate and ask you to accept the broad principles by which the details of that policy should be governed. What are those principles? They follow by a logical sequence from the principles I have laid down, that our interests there are commercial and trading interests, and are not territorial interests. And the first deduction I draw from that is that territory, in so far as it is not necessary to supply a base for possible warrike operations, is a disadvantage rather than an advantage, for it carries with it, may be, an expenditure in money, and, what is more interested to the carries with it, may be an expenditure in money, and, what is more interested to the carries with it, may be a paraedical content of the carries with it and an advantage rather carries with it an armendian of the carries with its and the content of the carries with its and the content of the carries with its and the be, an expenditure in money, and, what is more important to us, carries with it an expenditure in men. The second principle I draw from it is this—that insemuch as our interest in the external trade of China is 80 per cent, of the whole hade of the rest of the world put together, so per cent of the trade of all the other nations added together, we have a special main to see that the policy of that country is not directed towards the discouragement of foreign trade. (Cheers.) Let me point out, in the third place, that by the very traditions of our policy, by the deepest traditions of our policy, we are precluded from using any trading privilege granted to us as a weapon for excluding rivals. (Hear, hear.) If we ask for freedom to trade, we do not mean freedom to trade for England (a voice, "Brhain")—for Britain alone; we mean freedom of trade for all the world alike. (Cheers.)

HOW OUR INTERESTS MAY BE ASSAILED.

And note, therefore, that there are two ways, and two ways alone, so far as I know, by which our trading interests—our sole interests—in China can be interfered with. The most important of these is by possible pressure on the Chinese Government by a foreign Government to make regulations adverse to us and favourable to them. other words, to destroy that equality of opport unity which is all that we claim, but which we do claim. The second method by which I can imagine our interests being interfered with might, indeed, have less serious consequences, but is not to be neglected. I do not think it probable, but we can imagine it as possible, that foreign countries with protectionist traditions might dot the coast of China with stations over which they had complete control and through which they would not permit the trade and through which they would not permit the trade of the world freely to permeate; where they would put up Customs barriers, or something equivalent to Customs barriers, bostile to others and favourable to themselves. Now those are the ways in which I think it possible that our interests in China might be adversely affected; but depend upon it that the Government will do their best to see that in neither of those ways will the trade of this country be injured. (Hear, hear.) In such an effort, we are, after all, struggling not for our selves only, but for the world at large. I disclaim absolutely that spirit of petty jealousy which animates too many politicians in all parts of the world.

OUR UNSELFISH POLICY. OUR UNSELFISH POLICY.

I have been told—I ought, perhaps, not to refer to it, as I have not had an opportunity of verifying the quotation—I have been told that Sir Charles Dilke in a recent speech has accused me of being responsible for the partition of China because two years ago, I think it was at Bristol, I said that I regarded without fear or dislike the idea of a Russian outlet of commerce helps the light of a further than the commerce helps the file of a further than the commerce helps the state of the said that I regarded without fear or dislike the idea of a Russian outlet of commerce helps the said that I regarded without fear or dislike the idea of a Russian outlet of commerce below the line of winter and ice. I adhere to that statement. I cannot conceive why we should object to Russian commerce going where it will, provided we are not excluded from going theretoo. (Loud cheers.) We are constantly attacked as a nation in the foreign Press for what they call our selfish policy. I do not know what that means, but this I know, that we are alone among all the nations of the world in this—when we conquer a nation and rescue it from barbarism and uncivilization, we

policy, I think we may feel that we are working for no narrow or personal objects, and that that which is for our good is likewise for the good of all mankind, and that if our policy be carried in effect commerce will flourish, the interchange of wealth will grow apace, and all those influences which make for the better understanding between which make for the better understanding between nations, for the maintenance of a perpetual peace, will be the result of the policy of her Majesty's Government, whether in China, Africa, or elsawhere. That is my earnest desire, as I am size it is yours. And I trust that the exposition which I have given you to night—uncontroversial as you will admit it has been in tone, containing no attacks upon opponents, no conteactiticism of their attacks upon us, but given in takin perturns afternet undelengate language. plain, perhaps almost undiplomatic language— represents a policy which deserves your confidence and that the result of this meeting may be a renew ed expression on your part, not merely of the confidence that you have before shown in your representative, but also in the Government of which he is a member and to which the destinies of the Empire are for the moment entrusted.—(Loud and prolonged cheers.)

Lord Kimberley, in a speech subsequently delivered, makes the following reference to Mr. Balfour's declaration :-

And now for a word as to the state of affairs in the Far East, and there again I feel the greatest satisfaction with the principles laid down by Mr. Balfour in his speech as to our policy in China. I do not think it could have been more wisely stated. What he said in effect was that our interests in China were commercial, and that we do not want China were commercial, and that we do not want to occupy any territory there unless possibly some naval bases were necessary. That seems to me to be the right policy. I hope I shall not be called a Little Englander, but surely we have acquired about enough territory already. Surely we have a sufficient number of brown and black prople for whom we are responsible, and we do not want to add to any expensivilities. whom we are responsible, and we do not want to add to our responsibilities the government of some fundreds of millions of Chinamen. We cannot wish to have more territory, but, as Mr. Balfour says, we have most important trade relations with China, and I was glad to see he spoke out friently and plainly on the subject. We do not want territory, but we want free access for China and for ourselves in that part of the wald. We do not want to be excluded. I believe that this country is powerful enough, and would be determined enough, to prevent anything which would shut us out from a fair share of the trade with China.

It may be doubted whether these expressions

It may be doubted whether these expressions of policy will prove altogether satisfactory to foreign residents in the Far East. Many people out here entertain a conviction that unless England takes some very positive and striking step at this juncture she will be permanently dethroned from her place of eminence in the Orient. But the fact is that England has taken a decisive and effective step, with the result that her policy is now para-mount. She may be said to have im-posed it upon the Powers whose proceedings recently caused so much uneasiness. Russia and Germany have both given engagements that any port acquired by them in China shall be opened to foreign trade, the effect of which pledge is to avert the only contingency that would have been seriously hurtful to British interests, namely, the seizure of important places in China and their closure to English commerce by rivals of Great Britain's. The character of the situation has been completely altered by England's interference, a fact which should effectually silence those that talk about her moribund prestige and the supineness of her states-

It was suggested some time ago in these columns that one outcome of Germany's action at Kiao-chou would probathe world in this—when we conquer a nation and the world in this—when we conquer in the world in this—when we conquer in the world in this—when we conquer a nation and the world in this—when we conquer in the world in the world and not for curselves are taken by the former Power placed her in a position where the latter's good-will became almost a necessity. The plain fact is that every territorial acquisition are taken by the former Power placed her in a position where the latter's good-will became almost an eccessity. The plain fact is that every territorial acquisition are taken by the former Power placed her in a position where the latter's good-will became almost an eccessity. The plain fact is that every territoria

Far East constitutes a new point of vulnerability from a British point of view. Germany at Kiao-chou is absolutely at new acquisition, the Pest of January Great Britain's mercy. So is Russia at 12th contains a sketch which is regarded Port Arthur or Talien. War declared, as probably embodying the Government's the Seez Canal would at once become impassable to non-British ships, and not a ton of coal could be obtained on the long voyage from Europe to China, while England could easily assemble in these waters a fleet against which neither the Russian nor the German Squadron, nor both combined, could hope to contend successfully. That view of the case seems to have been taken very strongly in Germany. From the Berlin correspondence published in The Times of January 11th, 12th, and 13th, we learn that the German press, without exception, had adopted a most conciliatory tone towards England, and had endorsed Mr. Balfour's declaration of British policy as strictly consistent with German designs also. We also learn that the publication of the official programme of Prince Henry's eastward voyage disclosed the fact that the squadron would touch en route at seven British ports, which discovery set people thinking whether a direct road to the Indian Ocean could not be established through Austria, Turkey, and Asia Minor, debouching at Basra or the Strait of Ormuz. From Basra to Kiao-chou would still be too far for a continuous voyage, but the programme includes the acquisition from Holland of a naval port in Sumatra, opposite Penang. It is not explained how ships could make their way through Austria, Turkey, and Asia Minor, but with that detail we need not concern ourselves here, the main point being that Germany's enterprise in China has opened her eyes to the significant fact that Great Britain commands the one route available at present for speedy communication between Europe and the Far East. Hence the Germans, eminently practical, are beginning to see that, for the successful beginning to see that, for the successful a departure which may seriously affect and peaceable prosecution of the enterher relations with her European allies, prise inaugurated at Kiao-chou, England's friendship is essential.

Concerning the extent of the concessions obtained by Germany at Kiao-chou, the Imperial Gazette of Berlin, in its issue of January 5th, contains a statement summarized as follows by The Times :-

"The cession of Kino-chou is in the form of a leave for a considerable time, and the German Government is at liberty to erect within the territory ceded all necessary buildings, and to undertake the requisite measures for the protection of the same." The territory ceded comprises the whole of the inner basin of Kian-chou Bay up to the high system and requisite the light system. the high-water mark; moreover, " the larger ton-gues of land lying south and north of the entrance gues of land lying south and north of the entrance to the bay to the point where their natural bound-aries are marked by suitable eminences, and also theislands situated within and before the bay," The theislands situated within and before the bay." The territory thus delimitated is described as having "an extent of some square rates," and around it will be marked out a larger purton of land within which "no measures may be findertaken nor dispositions made on the part of the Chinese without German sauction, and especially shall no hind-tances be opposed to the regulations affecting the waterway deemed increasing by the Germans."

In order to avoid conflicts, continues the Image.

waterway deemed necessary by the Germans."

In order to avoid conflicts, continues the Imperial Gaestie, which might affect the good understanding between the two Powers, the Imperial Chinese Government has transferred to the German Government for the period of the lease all its sovereign rights in the territory in question. Rinally, in the event of Kiao-chou not meeting the requirements of Garmany, it is adjudated that she shall receive a more suitable point d'appril, to be mutually agreed upon herealter, and the kindly-disposed Chinese Gavernment will, in this eventuality, take over all lastidings, &c., exected at Kiaoality, take over all buildings, &c., erected at Kiso-chon and refund the expenses incurred on behalf of them by Germany. Digitized by Google

With regard, further, to the steps contemplated by Germany for utilizing her intentions :-

intentions:—
According to this journal, great activity will shortly be manifested in Knor-chou Bay for the purpose of adequately equipping it as a war inchour, with dockyards and repairing works. There is no intention, however, to make the bay permanently a fortified point d'appai for the fleet, but the harbour works will rather be undertaken with the view of meeting all the requirements of a trading post. As to the necessary funds, the Government is at present quite unable to form any accurate idea as to the sum of money that may eventually be required. As soon as it can do so, the representatives of the country will be informed of the Government's intention. In any case, it will have to be seen first how far Kiao chou Bay promises to answer all the expectations formed of it as a trading port before the Admiralty will venture to expend any great sums upon it.

It may also be supposed that the Government

It may also be supposed that the Government is at present occupied in considering the question of the future administration of its possession in East Asia. In any case, the despatch of maxines and coast defence actillery to Kian-chou Bay must be regarded as a provisional measure, and it is not unlikely that Germany will feel herself called upon to form a colonial service to meet the military requirements of her newly-won territory,

It appears to us very doubtful whether Germany will carry out the above programme. She will not possess at Kiaochou any advantages that are not shared equally by other Powers, and consequently no reason suggests itself why she should spend large sums on the improvement of the place. Her policy in the East during the past two years can scarcely commend itself to her thoughtful nationals. In connexion with Liaotung she alienated Japan's friendship and secured no compensation. In connexion with Kiao-chou, she has presented herself to the Chinese in the light of their most ruthless enemy, and to Eastern countries generally as a Power not restrained by any scruples derived from international law. She has also made for, as is clearly pointed out in The Times. not only does her value as an ally diminish in proportion to the military and naval responsibilities she assumes in distant countries, but also Austria-Hungary and Italy-may hesitate to extend their engagements with her to the Far East. Finally, she has given new pledges to fortune by creating a voluerable point in her armour.

#### THE SPANISH MINISTER IN WASHINGTON.

The telegraph tells us that the Spanish Minister in Washington has been guilty of a most unfortunate indiscretion. does not always observe circumspection in writing private letters, but, on the other hand, he is expected, especially if he be a diplomatist, to be able to distinguish beletters that run a risk of becoming public property. The Spanish Minister does not seem to have succeeded in observing the distinction, and there is reason to fear subsided, in great part, and Spain seemed likely to be allowed to consummate her attributing that purpose to them "T.W" a serious character.

REASONS FOR JAPAN'S ADOPTION OF THE GOLD STANDARD.

Many of our readers, especially among the "old residents," were doubtless glad to see the well known-initials "T.W." appearing once more in our correspondence columns at the foot of a letter on the subject of finance. "T.W." is always lucid and instructive. It is very interesting to learn the views entertained by one so thoroughly versed in Japanese affairs on subject which he is particularly competent to discuss, and which, indeed, he may be said to have made his own by his far-seeing and learned essays on it in former days. There is one statement in his letter that we would gladly endorse, but we find some difficulty in doing so. We allude to his conclusion that one of Japan's chief reasons for turning to gold monometallism was her desire to secure herself against a reversal of the conditions under which her export trade had made such marked progress-her wish, in short, to catch silver at its apparently lowest point and fix it there for her own purposes by adopting a gold currency having a silver value calculated at the ratio of I to 32. We ourselves, when discussing Japan's motives at the time, entertained, and stated in these columns, the same belief that "T.W." now professes. It would have been eminently satisfactory to be able to attribute such a view to Japan's statesmen, for their tenure of it would have proved them to be in intimate touch with the great financial problem of the But our faith was seriously shaken age. when we observed that Count Matsukata, introducing the gold-standard Bill to the Diet; made no allusion whatever to any motive of the kind, and that a corresponding silence was observed throughout the debates in both Houses. In fact we think we are right in saying that the only influential exponent of the view to which we allude was the Fiji Shimpo, and even that journal did not show any persistence in ventilating it. On the whole, if we were asked now to summarize Japan's reasons for adopting gold monometallism, we should formulate three; first, her statesmen's conviction, right or wrong, that gold is the currency metal of civilization; secondly, a wish to gain admission to the money markets of gold-using countries, in other words, to obtain access to their capital; and thirdly, a sense of the crippling effects that exchange fluctuations produce upon international trade. If any other reasons were operative, they did not make themselves conspicuous at the time.

We failed to note when publishing "T.W.'s" rséumé of the story of Japan' adoption of gold monometallism, that his letter was written for the information of inquiring friends in Europe and not originally with any intention of publication in Japan. As to the point discussed by us in connexion with the letter, namely, whether one of the reasons influencing Japanese financiers had been that they that his error may renew the impa-anticipated an appreciation in the gold tient feeling which showed itself so strongly in the States a few months ago with reference to Cuba. The feeling had white metal had fallen, we find that in plucky efforts for the subjugation of the is supported by some good authorities. insurrection. But now, doubtless, there We ourselves, as our readers may perhaps will be a reaction, though probably not of remember, believed, when the adoption of the gold standard first entered the field

of practical politics, that apprehensions of a rise in the gold price of silver and the consequent crippling of the export trade, did strongly influence Japanese statesmen. But we were led to doubt the correctness of our supposition when we observed that neither the Minister of Finance in his Parliamentary exposé of the project, nor any member of the Diet discussing the Bill, alluded to that phase of the problem. It is now alleged, however, that though the possibilities of silver's appreciation were among the arguments which presented themselves to the framers of the measure, a purely hypothetical forecast of that kind, likely to provoke much discussion and not capable of any satisfactory proof, did not commend itself as a consideration deserving prominence, especially in any official statement of the

#### TALIEN.

There is no apparent reason to doubt the correctness of the Reuter's telegram published in our issue of the 10th instant, which purports to be an epitome of Lord Salisbury's speech in the House of Lords. Evidently a species of compromise has been concluded between Germany, Russia, and England, the two former Powers and England, the two former giving a guarantee that they will throw open to the trade of the world any ports obtained by them from China, and England, on her side, consenting not to press for the immediate opening of Talien, but to postpone the question until the Eastern Chinese Railway—that is to say, the railway from Tientsin to Shanghaikwan and thence vid Newchang through Manchuria-connects with Talien. course such an agreement practically secures Talien against being converted into a naval station by a foreign Power, and the engagement given by Germany and Russia averts any danger of Chinese markets being closed to general trade in consequence of territorial acquisitions by those States. We do not venture to surmise whether German or Russian des signs have been frustrated by British interference, but it is at least permissible to express satisfaction that England's policy of keeping the markets of China open to the trade of the world has been successfully asserted. In saying that Talien is now secured against becoming a naval station for a foreign Power, we do not rely so much on the guarantee given by Russia and Germany, as on the fact that, the opening of the place to trade having been explicitly deferred, not refused, it can not be handed over to any Power as a military base without a distinct breach of faith on China's part. Of course, it will be at once apparent that not to be opened until the building of the Chinese Manchurian Pailway, the event much can be gained by discussing those points. The interesting fact is that Englane has made good her position. It is now possible to understand the rumour recently telegraphed with regard to the Czar's expressions of satisfaction that a crisis had been averted.

The interesting fact is that Englane tective decks now approaching completion in French dockyards. All five have coppered bottoms, and are consequently the lacquer wares now manufactured compare with those of former times in point of durability, he finds very strong adjectives to express the difference in favour Original from Digitized by Google

#### NEWS SENT TO LONDON FROM JAPAN.

It is not easy to understand the principles upon which the editor of the Kobe Chronicle conducts controversies. Compare, for example, these two extracts: Japan Mail. Kobe Chronicle.

Fepan Hail.

Reb. glh.

The Kobe Chronicle, however, defend The Times' correspondent, and in support of his assertion quotes a paragraph from our own. The paragraph, which appeared in the Mail on December 22nd, was avowedly a translation from the Asahi Shimbun.

Kobe Chronicle.

We quoted for the information of the Japan Mail a paragraph which appeared in that journal on the same date as the Kobe telegram in The Times was dispatched, a paragraph which we stated at the time was a translation from the Asahi Shimburn (though the Mail, with its customary economy of truth, suggests that we credited the paragraph directly to itself).

Our words do not contain the remotest suggestion that the paragraph in question was credited directly to us by the Kobe Chronicle. When, therefore, that journal accuses us of "customary economy of truth" it is more courteous than careful.

It is of little use bandying words about this matter. The plain fact is that the Kobe correspondent of The Times, whose defence the Kobe Chronicle has chosen to assume, sent to London during the recent crisis in the Far East various telegrams conveying the impression that much excitement prevailed in Japan, that a tendency existed in Governthat a tendency ment circles to adopt a belligerent policy and that warlike preparations on a considerable scale were in progress. He thus greatly misled the British public. There is no getting over that fact. The truth is that Japan may be said to have given no sign whatever, and that a well-informed correspondent, despatching telegrams to London, would have emphasized the somewhat remarkable calmness of the nation and its rulers, instead of giving prominence to exactly the opposite mood. That is incontrovertible. We note that the Kobe Chronicle attributes to us a paltry motive, a desire to discredit the Kobe correspondent of The Times in favour of the Tokyo correspondent, and threatens to make public another attempt of a similar nature in which we figured badly. The meaning of such methods of controversy is very well understood. They do not lie in our line.

#### NEW FLAGSHIP OF THE FRENCH FAR EASTERN SQUADRON.

The new flagship of the French Squadron in these waters is to be the d'Entrecasteaux, which was launched in 1896, and is expected to be ready for sea at an early there are two weak points in the pro- date. She is a steel protected cruiser of gramme. One is that, since the Talien is the first class, her displacement 8,114 metric tons; her indicated horse power, 13,500; her maximum speed, 19 knots; will be thought by some publicists to have her gun-position armour, 10-24 in., and been put off until the Greek Kalends. The her deck armour 4 in.; her armament, two other, that Russian behaviour with regard 0.4 in., twelve 5.5 in. quick firing, and to Batoum does not inspire complete con twelve 1.8 in.; her nominal coal supply fidence in any engagement given by her 650 tous; her complement, 521 men, and about an open port. We do not see that her cost, £667,740. The d'Entrecasteaux much can be gained by discussing those is one of five first-class cruisers with pro-

#### YAPANESE LACQUER.

Mr. Araki, an established authority on the subject of lacquer, has imparted to a representative of the Japan Times an in-teresting piece of information. It is to the effect that out of a total of over 13 million pounds (avd.) of lacquer sap used annually in Japan, not more than one-eight is of Japanese production. The estimate is to a certain extent vague, for it includes an item of 625,000lbs. supposed to be smuggled. But there will probably be no error of exaggeration in saying that the annual consumption is the million pounds, and that five-sixths of it are imported from China. On the face of the matter there is no apparent reason why China should not supply Japan's wants in the matter of the lacquer tree's sap. But Araki explains that the so-cal-led "lacquer juice" sent over from China is, in fact, not the pure sap of the lacquer tree, but a compound obtained by mixing the saps of various other trees and shrubs with a small quantity of the genuine product. When such material is used by the manufacturer, there results an article not deficient indeed in the outward features of good lacquer, but without any qualities of durability: the lustre fades quickly and the surface cracks. It is, of course, another instance of the old story, cheap and nasty. The adulterated Chinese sap can be obtained fifty per cent. cheaper than the Japanese: the former costing 4 yen per 81lbs., the latter a yen. In other words, to employ Japanese sap in lieu of the total quantity of sap procured from China, would involve an additional outlay of a quarter of a million yen annually. quarter of a million yen seems an insignificant sum when we have to discuss an industry of such importance as that of the lacquer-maker in Japan. The latest authentic figures available in this context refer to the year 1895. They show that the gross output of lacquer wares in Japan during that year was three million yen, in round numbers, of which total one million yen worth was exported. It appears, then, that for the sake of effecting a saving of a quarter of a million yen in three millions, or 8% per cent., the Japan-ese lacquerer is content to use inferior sap, and to turn out an article deficient in precisely the quality for which Japanese lacquer has been famous since the earliest days of the manufacture, namely, durability. About eighty per cent, of the lacquered goods produced in Japan are intended for every-day use as household utensils, bowls, trays, cups, tubs and so forth. These articles being subject to usage more or less rough, it may seem that a high grade of manufacture is not required. That is true but only to a very limited extent. There is not a more economical householder in the world than the Japanese. He wants above all things an article that will last. From the moment that a lacquer bowl begins to crack, it ceases to be capable of thorough cleansing and becomes practically useless. It is for that reason that whenever an industrial exhibition in Tokyo or Kyoto attracts a supply of vermilion lacquer wares from the Riukiu Islands they are eagerly bought up, their durability having been established by long experi-ence. If a Japanese be asked to-day how

of the latter. But if he be asked to indicate a cause for the deterioration, he will unhesitatingly reply, "scamped processes of manufacture; the use of two or three coats of lacquer where ten or twelve were formerly applied." Of the inferiority of the Chinese sap so largely substituted for the native material, he seems to take no note. It is certain, however, that Japanese artizans have not lost anything of their old skill in the manufacture of choice lacquer; they can turn out as fine work today as they ever could. The question of Chinese or Japanese sap does not present itself here: for first-class work no expert would think of employing the imported product. Doubtless the great inferiority of the middle-class articles now put on the market must be referred to the enchanced cost of labour which prohibits the careful processes formerly adopted. It may be assumed, too, that this defect as well as the disadvantages attendant upon the use of Chinese sap are generally present in goods manufactured for export. Cheapness and superficial attractiveness are the qualities chiefly desired by the exporter in lacquer as in every other branch of Japanese art manufactures. The result is that Japanese lacquer, once so famous, has lost caste. People find that after a box or a vase has been employed as decorative furniture for a year or two, its lustre grows dim and fissures begin to There can be little doubt that арреаг. had the lacquer wares exported been as durable as they are pretty, the export would have shared the expansion visible in other branches of Japan's over-sea trade. The whole system of the industry stands in need of reform. It would seem, however, that one great difficulty is the neglect which has overtaken the cultivation of the lacquer tree and the disfavour into which the business of collecting the sap has gradually fallen during the past twenty years. Every fine product of human hands requires patient labour. That is essentially true of lacquered wares. The first exercise of care and toil begins with the gathering of the sap, a process demanding intelligent discrimination and delicate manipulation. story may be summed up by saying that the lacquer industry has fared much as many other Japanese industries have fared in modern times, cheapness of production has been made a paramount object with corresponding loss of high qualities.

" GREATER JAPAN."

The second number of Greater Japan has just appeared. In the English section we find much that is interesting, but we are compelled to say that the editors appear to have more confidence in rumour than prudent writers are usually disposed to place in it. Speaking, for example, of Germany's action in procuring a ninetynine years' lease of Kiao-chou, Greater Japan says :-

This shows an entirely different attitude of Germany as compared with her original demand for permanent occupation of the Bay. Decidedly she has come down very low. What made her to be so violently aggressive in the beginning and so moderate in the end? Did she intend at the outset to devour Chinese territory, and afterward has been prevented to do so by the intervention of other Powers?

On what evidence, we wonder, does the Kiao-chou. It is true that she was very Army were augmented by fifty per cent. it Colombo on the 13th January for China. She generally accused of harburing such a could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be maintained at an increased cost of the could be could be maintained at an increased cost of the could be could be maintained at an increased cost of the could be could be contained at an increased cost of the could be con

purpose, but the public has not been placed in possession of the smallest proof that she ever entertained any design more radical than the leasing of the place. The very high-handed character of the whole proceeding naturally invites criticism, but it has not been shown, to the satisfaction of any impartial observer, that Germany materially modified her policy, or that, in brought to bear on her by other Powers. In short, there is nothing to prove that the consummation of her programme fell sensibly short of its prime conception.

We observe, also, that Greater Japan quotes certain expressions of a German press correspondent in Kiao-chou as "unfolding German policy and sentiments" and as "the true explanation of that violent procedure of diplomacy adopted by her at the outset of the trouble." following occurs :-

What a pity that this fine country is already fully occupied by the children of the yellow race, and that they can not be driven out or exterminat ed by the aid of force and alcohol like the abori-

Truly it is a little extravagant to regard such statements as a fair reflection of German opinion. They are not a fair reflection of the opinion of any civilized people, and most assuredly they do not represent any phase of German policy. We make the point because we should have supposed that all intelligent Japanese publicists would long ago have learned to distinguish between the real views of European nations and the singularly distorted expositions of them that often find their way into the columns of local foreign journals in the Far East. The instinct of empire is apt to assume a very ugly shape when developed in the minds of men whose personal interests counsel inter-national aggression and the reign of might. They play their own part in the system of things, do these men, and it is not by any means a pernicious part. For, when all is said and done, they are found to serve as instruments of progress, though they can hardly be themselves classed among its products. But they do not echo civilized opinion. Very far from it, indeed. There are probably not half a dozen Germans in the East who would endorse the words quoted by Greater Japan as "un-folding German policy and sentiments in connexion with the Kiao chou affair.'

Another very courageous statement of the magazine is this:-

The new Minister of Finance, Count Inouye, has, as we are informed, accepted his position with the condition that the expansion of the Army should be reduced from one hundred percent, basis to fifty percent, basis that is to asy, instead of doubling the miginal size of the Japanese Army, Count Inouye proposes to increase it one-half only. In this way the new Government may be able to make the annual saving of ten million vers. million yen.

It has certainly been rumoured that Count Inouye entertains a project in the above sense, as already explained in these columns, but that his Excellency expects to effect an annual saving of ten million yen by the reduction is quite incredible. The annual cost of maintaining the Army on its ante-bellum footing was 124 million yen, in round numbers, and the estimated cost of maintaining it on its post-bellum new magazine base its assertion that footing is 264 millions. Does Greater Germany's original intention was to annex Japan suppose that if the ante bellum

of 314 million yes, whereas its maintenance if augmented by a hundred per cent. would involve an increased outlay of 1311 millions? Count Inouye is also represented by Greater Japan as having long endorsed the scheme of importing foreign vapital through the credit of the country" and as being likely to "submit his proposition to the Diet for approval." refraining from demanding the cession It may be that Count Inouye sees the of Kiao-chou, she yielded to pressure hopelessness and peril of attempting to carry out the programme of railway construction, telephone and telegraph expansion and other public works with domestic capital, but we do not think that he favours the project outlined by Greater Japan, namely, the floating of a foreign loan for the purpose of redeeming public bonds, and thus supplying capital for the prosecution of industrial enterprises.

Russia looms very large on the horizon Among the expressions thus quoted the following occurs:—

of Japanese thought at present. The principal cartoon in Greater Japan represents the Czar as a veritable colossus, his right arm holding reins by which he drives Austria, Italy, Germany and France, and his left brandishing a Club over Asia. The picture is called "Europe as it really is." England, in the shape of an ancient dame, sits beyond the silver streak, placidly watching the turmoil, and plainly indisposed to take any part in it. Another sketch in the same magazine shows John Chinaman in an apparently mummified form, a British tar and Russian soldier busily engaged in wrapping round the mummy a cerement on which are conspicuously depicted the ideographs Kobai (for sale by public auction). Elsewhere in the same pages China figures as a huge pig, afive but somewhat mutilated. A helmeted German is busily cutting a slice from the porker's shoulder, and three other prospective butchers stand around with ready weapons.

#### MARQUIS ITO A WARLIKE STATESMAN,

This paragraph is characteristic of the Spectator :-

A kind of legal revolution has taken place in Japan. The people are profoundly britisted by recent events, and demand a more contageous policy. The Government has therefore resigned, and the Mikado, while dissolving Parliament, has appointed the Marquis Iro Premier and Count Okunia Foreign Secretary, or, in other words, has called a War Minister to power. We have discussed elsewhere the policy which the new Premiermay pursue; but in all Japanese affairs there is a factor of which no European knows anything, while no Japanese will let out the truth. The Emerch is Confessedly absulute, and this not mercely A kind of legal revolution has taken place in peror is confessedly absolute, and this not merely on name, and is said to be a well-informed and in name, and is said to be a well-informed and judicious man, but of his policy, or action, or opinious we never hear a word. He is like that metaphysical substance without which nothing can be anything, yet which no one every sees or hears, or, except by thinking, can grow conscious of.

The paragraph appeared in the Speciator of January 1st. It is not correct even as to leading facts, for it speaks of the Ito Cabinet as actually formed at that date, and it assigns the portfolio of Foreign Affairs to Count Okuma. But it is above all delightful when it calls an Ito Cabinet "a War Ministry." People that know Marquis Ito will smile when they read such an estimate of his policy.

Yet another European fleet in the Far Rast is about to be strengthened! The Portuguese

#### FOREIGN JOURNALISM AFTER JULY 1899.

We note with some surprise that a misunderstanding continues to exist with regard to the Japanese Press Law and foreign journalism. A Kobe newspaper, referring to the clause which forbids the editing or publishing of newspapers by foreigners, says :-

It seems to us that the duty of the Government, when the Press Laws were before the Diet for amendment, was to move in strike out this clause altogether in view of the near approach of Treaty operation. That this was not done could not fail to suggest that the Government was prepared, i Sible, to discriminate against foreigners in this ster. The retention of this clause, in fact, was on all lours with the introduction and passing last year of the Raw Silk Direct Export Law, which, in violation of definite provisions of the Treaties, proposed to give bounties to Japanese subjects

It really does look as though there existed

a resolute determination to form wrong conceptions about this matter. amended Japanese Press Law containing the clause in question, was intended to go into immediate operation. In other words, it was to become effective more than three years before the date fixed for the operation of the Revised Treaties. Hence to expunge the clause relating to foreigners would have made it possible for any European or American-except a British subject, who is specially interdicted from engaging in such enterprisesto become the proprietor, publisher or editor of a Japanese journal, though he would not in that capacity have been subject to the punitive provisions of the Press Law until the Revised Treaties went into force three years later. Thus a Japanese journal registered in the name of a foreigner might with impunity have defied the vetoes prescribed by the Press Law. It was, therefore, essential that the clause should be maintained. That is plain enough, surely. An interesting point seems to be made, however. It appears to be thought that if the Japanese Press Law is not operative against foreigners in its entirety, then binding force can not be claimed for one particular clause; that is to say, if the provision forbidding aliens to own or edit Japanese papers be valid, all the accompanying provisions also must be equally valid against foreigners. But all the provisions are not valid, and we are therefore led to the conclusion that the insertion of the antiforeign veto is superfluous, since fo-reigners might disregard it if they pleased. Without entering into a direct discussion of that legal problem, we may point out that the mere fact of such a clause having stood in the Japanese Press Law for the past fifteen years without evoking any protest from the Foreign Representatives, is a proof that they recognise the right of the Japanese Government to insert it and to enforce it. For one thing is quite plain, namely, that although the penal provisions of the Law can not be directly enforced against foreigners, nevertheless so long as the prohibitory clause stands in the statutes of the country, no Japanese subject is the opening of which foreign Powers entitled to enter the service of a foreigner compel for the purposes of their trade. engaged in Japanese journalistic enter- A port voluntarily opened can be closed office boys, and the post offices would not be available for the distribution of his chinese official custom, foreigners have awayaper. But the Treaties secure to foreigners the right of employing Japanese autonomy. Thus an open port does not positive the fractas of the business.

I don't wish to excuse the Japanese in the least, who ought to be severely punished for their scandalous behaviour, but it was only what I expected, when I heard that British fremen, Japanese firement and sake were being mixed together in a point of the business.

I don't wish to excuse the Japanese in the least, who ought to be severely punished for their scandalous behaviour, but it was only what I expected, when I heard that British fremen, Japanese firement and sake were being mixed together in a point of the funity of the firemen and sake were being mixed together in a point of the function of the function of the function of the function of the severely punished for their scandalous behaviour, but it was only what I expected, when I heard that British fremen, Japanese firement and sake were being mixed together in a point of the business.

It thus subjects in any lawful capacity. follows either that the clause in question is a direct violation of the Treaties, or that the veto it embodies is within the proper competence of Japanese legislators to impose under the Treaties. To make this plain, let us take another concrete example. Suppose that the Japanese Government were to enact a law forbiding any shipments of goods by foreigners on certain days in the month. It is obvious that the Foreign Representa-tives would at once protest, for, al-though, whether such a law existed or did not exist, the Japanese Authorities would have no power to interfere directly with the shipment of goods by foreigners in the indicated ways, they would have power, in the absence of any diplomatic protest, to punish Japanese boatmen or coolies who assisted in the shipping of be indirectly enforced against foreigners, and the shipment of goods on the days in question would be inferentially an unlawful employment. The interest of this argument, so far as the Press Law is concerned, lies in the fact that by suffering the prohibitory clause to stand, the Foreign Representatives have constructively recognised journalism to be outside the pale of ordinary commercial operations, all of which are permitted to foreigners by treaty. Of course we are speaking now solely of the owning and editing of journals written in the Japanese language. The Press Law, although is does not contain any explicit limitations of that nature, was enacted with reference to such journals only. Newspapers in a foreign language are entirely apart. That, indeed, is anoare entirely apart. That, indeed, is anotat the latter place, a story embodying ther reason why no occasion existed to charges of the most serious character abolish the prohibitory clause two years ago.

#### A STRANGE IDEA.

We find a perplexing article in the Keisai Zasshi with regard to the opening of Talien, as proposed by Great Britain, according to rumour. The Keisai is quite convinced that Russia aims at getting possession of Manchuria, and that, if she held Port Arthur and carried her Siberian railway thither while assembling a strong fleet in the harbour, Korea would be virtually in the hollow of her hand, and nothing could prevent her ultimate acquisition of Chihli. The Keisas further recognises that the opening of Talien to the trade of the world would seriously impede the consummation of these designs by Russia, since it would place on her immediate flank a port accessible to the war-ships of all nations, and would permanently alienate an important part of the territory which she hopes to acquire. Finally, the great value of Talien from a tradal point of view is clearly explained by the Keisai. But in the course of the article the following passage occurs :-- "A so-called 'open port' is not voluntarily thrown open for purposes of foreign trade; it is a place

differ from an enemy's country. being the case, if on the west of Shinking's southern coast Port Arthur be occupied by a foreign State, and on the east an enemy's country be established at Talien, which commands the Korean peninsula, it is evident that the tranquillity of the Orient is seriously affected, and that China can not escape ruin and the partition of her territory among foreign Powers. As for the manner of the partition, Shinking would go to Russia who is now shaping her programme in that sense. Shinking in her possession, her Siberian Railway extended to Port Arthur and Talien, the fortifications of these ports completed and a strong fleet assembled there, Russia would have Korea at her mercy and it would be impossible to keep Chinii from falling into her hands." That seems to us a strange view. The opening of goods by foreigners contrary to the law. Talien to the trade of the world is a step in short, were no objection raised by the precisely calculated to avert the results Foreign Representatives, the veto might apprehended by the Keisai Zasshi, for it would have the effect of neutralizing the Liaotung Peninsula. Certainly it would not promote, but rather retard, the partitioning of China. It has been proposed by Great Britain, not merely for commercial reasons, but because it would help to secure the integrity of the Chinese empire and to preserve the peace of the East.

#### THE AFFAIR OF THE "HAKATA MARU."

It is doubtless fresh in the recollection of our readers that, early in January, some passengers by the Nippon Yusen Kaisha's S. S. Hahata Maru from Moji to Hongkong, caused to be published in a journal against the Japanese crew of the ship. When the newspaper containing the account reached Japan, we applied to the Company for information, but as the vessel had proceeded on her westward voyage from Hougkong before the publication of the accusations in question, no account of the occurrence could be obtained before she reached Singapore. From the latter port the chief officer addressed to the Hongkong journal a letter of which we have now received a copy :-

TO THE EDITOR OF THE "CHINA MAIL."

Sir.—After leaving Hougkong on Friday, Jan.

7th, I saw an account headed, "Rictious Japanese
Seamen. A Murderous attack on European
Passengers," in your issue of that date.

I can only say the facts of the case are quite had
enough, without grossly exaggerating them, as
has saidantly here iden.

enough, without grossly exaggerating them, as has evidently been done.

To begin with, you call it an unprovoked attack.

Your informers omitted to acquaint you with the fact that about 8 p.m. on Dec. 31st I had to turn several European Steerage Passengers out of the native firemen's forecastle, where they were drink-ing saké with the Japanese firemen. I saw two of then going at to the steerage; they were offersively drunk; one of them informing an officer of the slip that they were treated more like cattle than passengers in not being allowed the druk and probably quarrel with the Japs. Another Empean Steerage Passenger grossly insulted a Japanese Lander Passenger and the section. pean Steerage Passenger goosty lifetine a Japanese married lady passenger to the extent of what would be termed in Hongkong, an attempted criminal assault, and several of them had been threatened by me that if they did not behave better, they would be turned out of the ship.

I might also explain that even a drunken Japanese freman understands and reseats being

sworn at in English. So much for the unprovoked part of the business.

at t a.m. on the 1st of January was the direct outcome of that mixture, I was asked to give these passengers something to defend themselves with, but refused, as I believed after the first diswith our reinied, as a nearest after the tria dis-turbance at 1 a.m. was over, no further moistation would be given to the passengers. I proved to be mistaken however, as Mr. Hall was assaulted in the afternoon by one Jap. I don't know why this man, who was going to the gangway, should single out Mr. Hall, who was standing with two Engineers out Nr. Hall, who was standing with two Engineers on the quarter deck; the two engineers seized the Japanese and another one who came along. I was asleep at the time and being called went on deck and told Mr. Hall to come to my room; he came up the ladder to the saloon deck, and the Engineers released the Japanese; the offender however runked up the ladder after Mr. Hall and again attacked him, but was driven back.

At that time the Steerage Passengers came on the saleon deck, and asked for arms to defend themselves with, which I refused to give them. What they wanted to defend themselves from I don't know, as no one had implested them since the first attack in the morning. I told them to go aft to their quarters but a number of them were foolish enough to remain on deck all night.

If these two attacks were unprovoked, how is it that no one of the crew fried in assault the afficers and engineers of the ship? against whom one would imagine, they would have more cause for complaint.

Mr. Hall states the Japanese broke all the gear in the cabins and on deck.

Nothing was broken in the cabins or on deck, with the exception of the engineers' doors, which I shall notice presently,

The Japanese did not threaten to carry the

bridge and kill all the Europeans; the idea is simply abourd.
To satisfy the passengers, however, who appeared to be really frightened, I, on the captain's advice, sent the second officer to a Japanese gun boat for a boat's crew to ensure order, but the com-

mander refused to send one.
The poor unfortunate Royal Naval Reserve man who lost all his papers, destroyed them himself in a fit of drunken frenzy, outside my door on the afternoon we left Kube, where he came ima-gining he had a grievance and was at liberty to

make himself a misance to everyone.

Moreover Mr. Hall tells me, he gave your representative permission to colour his statements;
what right Mr. Hall had to give that permission I
fail to see and I must say they are most glacingly coloused.

Now with regard to the engineers, what occur-red is a New Year's custom, which ought to be stamped out. The firemen came aft, smashed the doors of the engineers' sooms in and dragging the occupants out lifted them up in the air and lowered, or let them drop, on deck, according to the popularity or otherwise of the victim. In this the popularity or otherwise of the victim. In this case the chief engineer, who is a heavy man, was severely injured; the third engineer was also burt and would have been struck on the head with a piece of bamboo (some of your informers called it an iron bar) if the purser had not prevented it. Now the N. Y. K., though wishful to do so, are powerless to prevent these things; and Foreign efficers and engineers can be a producted in the purser these things; and Foreign efficers and engineers can be a producted in the powerless to prevent these things; and Foreign efficers and engineers can be a producted in the p officers and engineers can never obtain a verdict against the offenders if they prosecute in Japan.

I feel bound to write this explanation as your account is so misleading, and I trust the love of even-handed justice, which is supposed to be one of the characteristics of the British race, will prompt you to give it publicity.

Yours faithfully, (Signed) F. E. Cope, Chief Officer S.S. Hakata Maru.

We have also seen a letter from the master of the steamer, Captain Nivison, in which he says :---" The account in the Hongkong paper is entirely untrue and any assault committed on the steerage passengers was, in any opinion, entirely their own fault." The sum and substance of the matter seem to be that while the Japanese crew undoubtedly employed most reprehensible violence, the responsibility of provoking the fracas rested with the foreign steerage passengers, who were evidently persons of low and offensive habits. But it is also quite plain that Japanese crews of passenger steamers will soon destroy the reputation of the ships and divert all trade from them unless some efficient means can be employed to

#### THE "SHEPHERD'S VOICE" ON EARNESTNESS.

We are sorry to learn from the Shepherd's Voice that we "have not any active conviction on the situation (i.e. the social evil) beyond indulging in fortuitous adverse criticism on the forward steps of those who have at heart and hand the genuine welfare of Japan." The Shep: herd's Voice, being a Christian publication, is quite incapable of formulating an emphatic statement about any person's convictions without absolute proof of the accuracy of its assertions. We do not ourselves perceive how one writer can ascertain the quality of another's convictions sufficiently clearly to define it as the Shepherd's Voice does. But that, doubtless, is because we are not within the circle of the light of truth which has illumined the intelligence of the Shepherd's Voice, and endowed it with supernatural power to see beyond the range of ordinary vision. We believed, indeed, that we did own a conviction, and a very active conviction at that-namely, that the licensing system is the best way of dealing with the social evil. The Shepherd's Voice, too, says that we "lend the weight of our influence to the support of the system in practice in Japan." Still the Shepherd's Voice declares us to be without active convictions on the subject, and to be merely putting fortuitous obstacles in the path of true reformers, and since the Shepherd's Voice is strictly veracious and abounds in Christian charity, we must assume that it knows more about our convictions that we do ourselves, and that it would not think of attributing to us the wretched part of mere idle opponents of progress were there any possibility of judging us more kindly. Therefore we feel very badly.

The Shepherd's Voice further accuses us of giving statistics that relate to "two of the classes of immoral women only," and says that we regard these classes as "constituting the entire population of non-virtuous women" in Japan, which conduct it calls " a deliberate intention to be careless." What is "a deliberate intention to be careless."? Something very like deliberate deceit, it seems to us. But the Shepherd's Voice is a Christian publication, truthful, charitable, and scru-pulous. It would never accuse us of a deceitful intention had not that supernatural acumen with which it is endowed enabled it to look into our heart and decipher our thoughts. Therefore again we feel very badly. What hurts us specially is that we tried to explain, in the clearest language at our poor command, that we were not discussing social morality but the social evil. By "the social evil" we refer to the pursuit of a certain kind of vice as a profession, not to the immoral laches of women who do not belong to the professional class. "The social evil," in the ordinary sense of the term, has no reference whatever to any females except those commonly called "abandoned." So when the Shepherd's Voice speaks of the looseness of factory girls and servants, and charges us with "a deliber-ate intention to be careless" because we did not include their want of chastity in Digitized by Google

and that when we say one thing we really mean another.

Altogether we are humiliated to find that the logic of the Shepherd's Voice is quite beyond our comprehension.

Our own firm conviction is that the licensing system of prostitution is the only sound system. We are further persuaded that the Japanese plan of relegating the swil to remote quarters of the cities and confining it there, is excellent.

It appeared to us when we wrote the above that we expressed our approval of the system in general, and that we added our approval of one special feature of it, namely, the relegating of the evil to remote quarters of the cities. Even now the words seem to read that way. It does not strike us that any one could possibly imagine that we declared our approval of the system solely because the evil is so relegated. We can not see how the two sentences could be conceived to bear that construction. But the Shepherd's Voice with its supernatural light takes a very different view. Having quoted the above words of ours, it comments on them thus:-

I wish every candid reader to look at the above-I wish every canond reader to look at the shove. It is a fair specimen of our contemporary's logic. We refer to the second sentence. As to the first, for the present we shall be going as far as the case demands to (sic) simply deny in toto that the licensing system is sound, rational, or remedial. The second sentence

is complimentary.

The system is excellent because it banishes the evil to remote quarters of the cities 1. Now, we are not to remote quarters of the cities 1 Now, we are not at all certain that the element of banishment was con-sidered in the matter; clacit twould seem that, if the system "is excellent" for this reason, it would have system "is excellent" for this reason, it would have banished the evil to the summit of Bandai San and confined it there. But this would have been uncommercial; hence that feature of the system which locutes the evil near the cities and confines it there is the really "excellent" feature which our contemporary lauds!! We are viewing this one defence of the system from a purely reasonable standpoint. There was displayed just as much effort to secure commercial convenience as there was to take the thing out of town when this canker was awarded a suburban residence. And will the pacific Mail please give some not or town when this caneer was awarded as apparoan residence. And will the pacific smil please give some reason why the plan when it attempted to banish the evil from the city failed to do so? Would it not have been more excellent if it had sent it up Bandai? Before we drop this point, we wish to say that the smil's argument for the system, that the brothel is made so private and unabtrusive (sic) that a mission-ary going about for twelve years never saw it, is in perfect keeping with other specimens of its logic. If it had been banished to Bandai San not even one mis. had been banished to Bandai San not even one may, sionary would have seen it; but as the system is now, the brothel is allowed the most convenient quarters near the cities, but beyond the liability of fires, and many other inconveniences attending location in the midst of the city,

Of course it was very stupid of us not to think of Bandai-san. If the social evil could be banished to the top of that dilapidated volcano, there would be no more social evil in Japan. And we never thought of that! We were so silly as to discuss actually existing conditions, not hypothetical ideals. Our memory, too, wholly deceives us when we recall the fact that there have been more fires in the prostitute quarters of the cities during the past thirty years than in the cities themselves. Besides, we had a weak idea that we applied the term "excellent" to one particular feature of the Japanese system, a feature quite distinct from the general system of licensing as practised elsewhere; whereas it now appears that we called the system "excellent" because of that particular feature which does not belong to the general system at all. The Shephera's Voice is very luminous, absolutely accurate, and admirably logical. We entreat it not to expose our shortcomings any more. Truly we ourselves would our calculation, we make a farther shock-rather go and sit by that ragged crater on ing discovery, namely, that our faculty of the top of Bandai-san than engage in

#### ROUND-THE-WORLD CYCLISTS IN TOKYO.

The round-the-world cyclists, Messrs. Fraser, Lowe and Lunn, arrived in Tokyo on the afternoon of the 16th instant, having run up quietly from Yokohama by the Tokaido. They were met near Omori by a small party of Tokyo cyclists who had ridden out on the chance of finding them. There is no bicycle association in Tokyo, and it would consequently have been difficult under any circumstances to organise a reception for the travellers on a large scale. Add to this the facts that much uncertainty existed as to the time of much uncertainty existed as to the time of their arrival in Tokyo, and it will easily be understood why only four fellow-cyclists went out to meet them, namely, Messrs. Kirby, Page and Patterson and Captain Brinkley. Messrs. Fraser and Lunn were riding the English machines that had carried them all over the world, but Mr. Lowe, having been obliged to leave his cycle in Yokohama for repairs, had to use cycle in Yokohama for repairs, had to use an American wheel of very high gear, an exchange which was partly responsible for a nasty accident. For as the party emerged from Yokohama, led by a resident of that place, the latter dropped something from his pocket, and circled round so suddenly to meet Mr. Fraser, who had picked it up, that Mr. Lowe could not check his high geared machine in time to prevent a collision, and was obliged to sacrifice himself in order to avoid running into the leader. The result was a badly torn hand and a somewhat severe gash in the knee, despite which injuries he rode gaily on his way to Tokyo. The cyclists looked fresh and well. Their "get up" did not suggest anything of the hardships they had encountered, and though the various wallets, tool-cases and so forth, suspended from their machines, had a fine mellow aspect, the condition of the machines themselves hore eloquent testimony to the strength and durability of English workmanchip. They proceeded in the first instance to the Club, and after a brief rest there, went on to the Imperial Hotel, where they purpose spending the few days of their stay in Tokyo.

On Sunday, we learn, the Reliance Wheelmen of Yokohama will ride up to Tokyo and tiffin at the Imperial Hotel. The round-the-world cyclists will meet the Yokohama Wheelmen at Kawasaki we understand.

#### RECORD FOR SPEEDY NAVAL CONSTRUCTION.

Until three years ago, the Pembroke Dockyard held the record, we believe, for rapid construction, achieving it with the Nile, a first-class battleship of 11,940 tons. But Pembroke was beaten by the Ansaldo Dockyard of Genoa, where two first-class cruisers, one for the Argentine Republic and one for Spain, were built in twenty months. It was after this remarkable result, not surpassed by any other building yard in the world, that Messrs. Ansaldo and Company offered to build for the Japanese Government a first-class cruiser within the space of 18 months, if the design was furnished by the Company, and 20 months if the design came from the lapanese Government. The Nichi the Japanese Government. The Nichi Nichi Shimbun, from which we translate these details, adds that the price named these details, adds that the price named by the Genoa firm was lower than the Bidassoa. The famous author will shortly undertake a journey in Far Eastern countries.
